Savant Limited · RC 8730838

REALTIQ PRODUCT SPECIFICATION SET · CONSOLIDATED EDITION

REALTIQ Product Specification Set

RQS-01 to RQS-08 in one document: the full product specification for REALTIQ, with the platform-wide rules that apply across every part.

The specification set: RQS-01 REALTIQ Project Page & Purchase Journey Specification; RQS-02 REALTIQ Project & Unit Onboarding Specification; RQS-03 REALTIQ Property Search & Discovery Specification; RQS-04 REALTIQ Property Listing Onboarding Specification; RQS-05 REALTIQ Property Comparison Specification; RQS-06 REALTIQ User Portals & Dashboards Specification; RQS-07 REALTIQ Public Profile Pages Specification; RQS-08 REALTIQ Revenue and Monetisation Specification. A consolidated edition containing all eight is also available.

CONFIDENTIAL. Property of Savant Limited (RC 8730838). Provided in confidence, under non-disclosure obligations, solely for building, testing and maintaining REALTIQ for Savant. Not to be copied, disclosed or used for any other purpose without Savant's prior written consent. © 2026 Savant Limited. All rights reserved. See the full notice on the last page.

0. HOW TO USE THIS SET

0.1 Documents in this set

Code	Name	What it covers
RQS-01	REALTIQ Project Page & Purchase Journey Specification	What buyers see and do on a development's page — from discovery to multi-unit negotiation, checkout and escrow — and what developers manage behind it.
RQS-02	REALTIQ Project & Unit Onboarding Specification	How a developer sets up a development and its units so that every unit is accurate, searchable and ready to sell.
RQS-03	REALTIQ Property Search & Discovery Specification	How buyers find property: location search, filters, sorting, map and media controls.
RQS-04	REALTIQ Property Listing Onboarding Specification	How owners, agents and developers list an individual property, with every field mapped to search and comparison.
RQS-05	REALTIQ Property Comparison Specification	How buyers compare two to four properties side by side and move straight to enquiring or booking a viewing.
RQS-06	REALTIQ User Portals & Dashboards Specification	Every signed-in workspace and the shared rules for status labels, payments, viewings, the listing page, documents, finance, trust, promotion and ecosystem readiness.
RQS-07	REALTIQ Public Profile Pages Specification	What viewers see on the public pages of developers, agencies, owners and partners.
RQS-08	REALTIQ Revenue and Monetisation Specification	How REALTIQ's fees are charged, routed, split, invoiced, taxed and refunded.

0.2 Reading the set

- Each document opens with a Quick Reference and Key Decisions at a Glance, followed by its full specification.
- Cross-references use the document code and section, for example "RQS-06 §10.4". RQS-08 requirements carry IDs in the form 08-XX-nn and fee products the form FP-nn.
- "Console" means the REALTIQ Console (RQS-06 §19). Any value described as a Console setting is configurable by REALTIQ staff without a code change.
- Every feature in the set is a launch feature unless it is marked otherwise. Items built but not live at launch: the Mortgage payment type, Mortgage Partner pages and mortgage referral fee (FP-23), until a lender partner is live; aggregated data products (FP-24); charging for seller-run live video tours (08-PF-10); and each connected application, until it is registered and switched on (RQS-06 §23). Compare with recent sales appears in an area once it reaches the Console threshold of sold records.
- Target launch: 31 October 2026, subject to the developer's confirmation. Every launch feature is live on launch day unless the developer advises otherwise.
- The individual documents and this consolidated edition carry the same text.

0.3 Platform-wide rules (consolidated)

These rules apply on every page, portal and document. Each is specified in full in the source shown.

#	Rule	Source
1	Sales only. Residential, commercial and mixed-use property sales only. No land or empty plots, rentals, leases or short lets anywhere in features, wording, posts or templates.	RQS-06 §1; RQS-03 §1, §2.2; RQS-01 §21
2	Everything on the platform. Communication, negotiation, payments and documents stay on REALTIQ. Phone numbers, email	RQS-01 §11; RQS-06 §1

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

#	Rule	Source
	addresses, messaging handles and outside links are never shown to another party and are blocked in messages, posts and comments.	
3	Only exceptions. Live video viewings run on an outside tool with a REALTIQ-issued link; one-way notifications may go by SMS, WhatsApp or email. Guest contact details are kept by REALTIQ and never shown to the seller.	RQS-01 §11; RQS-06 §11.1
4	Currency. Prices in NGN or USD, with an optional second price in the other currency. Search, sorting and range filters run in ₦; a header switcher changes the display only. A USD list price may be payable in NGN at a rate both parties confirm before each payment.	RQS-03 §3.1; RQS-06 §10.2; RQS-08 §7.3
5	Square metres. All areas in m²; values in square feet are rejected, never converted; plots are not a unit.	RQS-01 §7.5; RQS-03 §6.5
6	Language and formats. UK English; plain language with no system terms; Title Case labels; dates DD-MMM-YYYY (handover and milestones MMM-YYYY); 12-hour time. The brand is written “REALTIQ”.	RQS-06 §4.3, §4.4; RQS-01 §10, §21
7	Accessibility and themes. WCAG 2.1 AA everywhere; status shown in words as well as colour; Light, Dark and Match device themes, with contrast of at least 4.5:1 in both.	RQS-01 §24; RQS-06 §4.6; RQS-03 §4.4
8	Status labels. Public labels are Available, Under Offer and Sold. Sold only when legal transfer is complete, escrow is fully released and nothing is outstanding. Grey means Sold and nothing else.	RQS-06 §5; RQS-01 §9.2
9	Freshness. Monthly “Nothing has changed” confirmation; amber “Needs confirmation” tag at about 60 days; checkout paused at about 90 days. Stale listings are never unpublished or greyed out.	RQS-01 §19; RQS-06 §5.3
10	Verified badge. One badge style, used only on information REALTIQ has verified, linking to the verification policy; verification is administrative validation, not a title warranty. Trust tiers use a different symbol. No badge is ever granted by payment alone.	RQS-01 §20; RQS-06 §16; RQS-08 §8
11	Honest presentation. No urgency devices, free return projections or negative labels. Empty sections are hidden; missing values read “Not provided” and inapplicable ones “Not applicable”. Self-declared content carries a grey “Provided by the …” note.	RQS-01 §20.1, §21; RQS-06 §16.4
12	Sponsored and Featured. Sponsored marks paid promotion; Featured marks REALTIQ’s editorial selection. Neither bypasses a buyer’s filters; Featured carries no ranking weight.	RQS-06 §17.1, §17.5; RQS-03 §3.3
13	Access levels. Guest, Registered and Verified (minimum KYC) gate features.	RQS-06 §3.1
14	Media and document access. Every item is Free, Paid, On request or Private. Photos, renders, recorded video tours and a development’s master plan or site plan are always Free. Paid and On request views are watermarked and logged.	RQS-06 §13
15	Private prices. The reserve price is required, private to the seller and never visible to REALTIQ staff; the actual sale price is private. Both are used only in aggregated analytics.	RQS-06 §8.2, §19.3; RQS-02 T17b
16	Escrow. An optional protection layer on Outright, Instalment or both. Funds are held by REALTIQ’s licensed payment partner in a segregated escrow account; REALTIQ instructs every release and reversal.	RQS-06 §10.1, §10.4; RQS-01 §13–§17
17	Money movement. Property payments and the services basket go through Moniepoint with splits; Paystack is used only for plans, subscriptions, promotion and REALTIQ fee invoices. REALTIQ never receives buyer or seller money into its own account. No stored balance exists except a prepaid budget tied to one promotion campaign.	RQS-06 §10.4; RQS-08 §4.1, §13.1
18	Fees. Every fee is a versioned Console value, shown VAT-exclusive before payment, switchable on or off, and never hard-coded. One REALTIQ transaction fee applies to every sale.	RQS-06 §1, §19.1; RQS-08 §5, §7
19	Plans and seats. Listing is free for owners (within a Console cap); Developer, Agency and Partner profiles can be required to hold a paid plan. Every account includes the holder’s seat; each additional seat is paid.	RQS-06 §2.2, §4.7; RQS-08 §6
20	Documents. REALTIQ never issues a document in another party’s name. Every issued document carries the REALTIQ mark and verifies by QR code.	RQS-06 §14.2
21	Records. Listings with any transaction history are archived, never deleted; deletion requests remove or anonymise personal data no longer needed while transaction records are kept for the Console retention period; every staff action is in a permanent audit log.	RQS-06 §8.3, §19.1

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

#	Rule	Source
22	Separation of duties. Nobody prepares and approves the same release, refund, payout, waiver or fee schedule change; title revocation needs two people.	RQS-06 §19.3; RQS-08 §13.2
23	Named providers. Maps, geocoding and address suggestions: Mapbox. Live video tours: Zoom, integrated into REALTIQ (not WhatsApp Video). 3D and virtual tours: Matterport, Realsee and CloudPano (RQS-06 §11.4). FX rate: Central Bank of Nigeria official daily rate (NFEM). SMS and WhatsApp: Termii. Email: Postmark. Mobile push: Firebase Cloud Messaging. Payments:	RQS-06 §4.6, §8.1, §10.4, §11.1, §19.1, §20
24	One record per property. Every property has one record in the property register; a different seller cannot publish a matching property, and a property sold on REALTIQ cannot be relisted by anyone but its buyer without proof of transfer.	RQS-06 §8.4; RQS-05 §8; RQS-01 §20

0.4 Glossary

Term	Meaning
Console	The REALTIQ Console, the staff workspace where configurable values are set (RQS-06 §19).
Console setting	A value REALTIQ staff can change without a code change.
Effective value	The value search and pages use for a unit: the unit’s own value, else its unit type’s, else the project’s (RQS-02 §2).
Unit type	A group of identical units in a project, described once and used to generate its units (RQS-02 §4, Step 5).
Standard rate / protected rate	The REALTIQ transaction fee rate without escrow / with escrow (RQS-08 §7).
Terms Agreed (Terms locked)	Transaction stage 6: both parties have accepted the terms; no payment is taken before it (RQS-06 §5).
Verified badge	The mark on a fact REALTIQ has checked; it is not a title warranty (RQS-01 §20).
Trust tier	A separate reputation level from New to Platinum (RQS-06 §16).
Freshness	Whether the seller has confirmed the listing recently; shown as “Needs confirmation” when overdue (RQS-01 §19).
Basket	The checkout for third-party services, paid as one Moniepoint payment with splits (RQS-06 §4.1, §10.4).

PART 1 OF 8 · RQS-01

REALTIQ Project Page & Purchase Journey Specification

What buyers see and do on a development’s page — from discovery to multi-unit negotiation, checkout and escrow — and what developers manage behind it.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

1. QUICK REFERENCE — EVERYTHING ON THE PROJECT PAGE, IN PAGE ORDER

Items are listed in the order they appear on the page, from top to bottom. For each item, the table shows what appears on the page and what the seller-developer supplies or manages for it in their dashboard (Section 18). Items 1–11 form the top of the page; item 28 is the mobile action bar. Section 6 gives the detail for each item. The page serves all property categories on the platform: Flats & Apartments, Houses, Commercial Buildings and Mixed Use.

#	Feature	On the project page	Seller-developer input (dashboard area)
1	Project branding	The project's own logo; if there is no logo, the project name as clean text.	Uploads the project logo — P7 (Branding & page content).
2	Project name	Name of the development.	P1 Project name.
3	Location line	Area, city and state from one location field, matching the map; full street address shown, with the Verified badge once checked.	L1–L3 State, LGA, Area; L5 Estate; L6 Street address; L7 Map pin (checked before publishing).
4	One-line summary	Short factual description.	P5 Short description.
5	Status badges	Development type (estate, apartment building, commercial complex, mixed-use or other) and build stage, using the eight official build stages. Internal statuses never shown.	P4 Development type; D1 Build stage; D1a Completed before handover?.
6	Handover date	Target handover month and year (a range if units differ), for units being completed. Not shown for completed stages or "Sold as is".	D3 Projected handover — project default, overridden per unit type or unit; earlier dates kept when revised.
7	Developer identity	Developer name with verification badge; opens the developer's own page.	P3 taken from the verified developer account (only developer accounts create projects); profile and logo belong to the developer page (RQS-07).
8	Project rating summary	Average rating and number of reviews, once at least 2 qualifying reviews exist.	Nothing to enter; replies to reviews (Reviews & questions).
9	Primary actions	Message developer, Book a viewing, Save / Follow, and a "View units" link.	Answers messages (Enquiries); V1–V3 viewing options (Viewings).
10	Media gallery	Chosen cover, real photos, renders labelled "Artist's impression", dated progress media, "View all media" by type.	Merged media sections (Step 7): Photos with cover, Renders, Construction progress, Project video, Drone, Aerial, Approach & access road (Media & progress).
11	Key facts strip	Price or price range, units available of total, unit types, payment options, title-status line.	Nothing typed here: calculated from unit records and payment templates.
12	Purchase and payment terms	Payment options, deposit, instalment length, escrow (if offered) in one line, service charge.	S2–S3 service charge; S5–S7 payment options; S7a escrow (optional); S8 payment templates.
13	About the development	Factual description, design approach and launch date. Architectural style appears on unit cards, not here.	P6 Description; D4 Launch date.
14	Developer card	Small developer logo, name, verification, short profile, completed projects; link to developer page; Follow and Report account actions.	Maintained once in the developer profile, shared by all their projects.
15	Master plan / site plan	Layout of the development with unit positions where available. Registered survey available on request.	M5 Master plan / site plan (public, optional); registered survey (vault, optional); unit position on site plan (new, optional).
16	Location and surroundings	Map with satellite view, directions, access-road condition, nearby places, link to paid market analytics for this property.	L8 Access road condition; L9 Nearby places.
17	Construction progress and key dates	Progress track with dated evidence, plus a "Key dates" panel (launch, construction start, planned duration, current and next milestone, handover). Units or unit groups with their own schedule show their own. Shown only for units being built.	D2 Milestone (project, unit type or unit); D3 Handover; D4 Launch; D5 Construction start; D6 Upcoming milestone targets; T19 Phase/block schedules; Construction progress media.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

#	Feature	On the project page	Seller-developer input (dashboard area)
18	Facilities and infrastructure	One list from the fixed catalogue, each marked Delivered or Planned; shared parking may be listed.	S1 Estate facilities with Delivered / Planned and the shared-parking catalogue item.
19	Title and documents	Declared title documents, verification progress, Request documents. Request documents uses four access levels — Free, Paid, On request, Private — with watermarking and view logs.	S4 Title documents (uploads to the private vault); approves document requests (Documents & verification).
20	Viewings	Open House (specific dates or a recurring weekly schedule), Show Home, Private Showings (By Appointment Only), Live Guided Video Tour, Video Tour (Recorded) and 3D / Virtual Tour.	V1–V4 (Viewings).
21	Project reviews and ratings	Reviews from verified buyers of this project only, with developer replies.	Replies to reviews (Reviews & questions).
22	Questions and answers	Public questions, answered by the developer, moderated.	Answers questions (Reviews & questions).
23	FAQs	Allocation, documents, handover, cancellation.	P8 FAQs.
24	Units in this development	Unit cards (grouped by type or one per unit), filters, list/table view, Add to compare, View details to the unit's listing page. Card details match the unit's category (Section 7.4).	T1–T26 unit types (incl. commercial fields T20–T26); U1–U5 units; P9 Unit display choice (Units).
25	Enquire about multiple units	Picker to select several units and open one enquiry (when two or more are available).	Receives it as one multi-unit lead (Enquiries; Negotiations & terms).
26	Closing actions	Message developer, Book a viewing, Save / Follow.	As item 9.
27	Freshness and reporting	"Last updated" dates (project and unit level), stale-listing label if applicable, "Report outdated information".	Monthly one-button "Nothing has changed" confirmation for the whole project, a group of units or single units; responds to reports (Freshness).
28	Mobile action bar	Book a viewing and Message [seller type] (Message developer on project pages) fixed at the bottom of phone screens.	Nothing to enter.

Unit cards sit at the bottom of the page, with a "View units" link at the top so buyers can jump straight to them.

2. PURPOSE, USERS AND SCOPE

2.1 What the project page does

A project page introduces a development listed by a developer and helps a buyer decide whether any of its units — homes, flats, shops, offices or other commercial spaces — suit them. It should answer the buyer's first questions within seconds (what is it, where is it, how far along is it, what does it cost, what is available, who is building it), build trust (title, verification, progress, reviews) and lead to a clear next step (message, viewing, documents, then purchase on a unit's own listing page).

2.2 Who uses it

User	What they need from the project page
Buyers — individual, in Nigeria	Location detail, open-house dates, real photos, price and payment options, clear availability, live video viewings when they cannot visit in person. All three buyer groups matter equally.
Buyers — individual, abroad (diaspora)	Live video viewings, document requests, currency toggle, clear escrow wording, confidence without visiting.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

User	What they need from the project page
Buyers — corporate and cooperative; investors and bulk buyers	Commercial and residential units; unit comparison, multi-unit enquiry and negotiation, one checkout across several units, per-unit receipts. Corporate and cooperative buyers use team seats; final acceptance of terms is by an authorised signatory (RQS-06 §9.1).
Developers (sellers, Developer Portal)	Their project's branding and their own identity; an easy way to present one or hundreds of units; a way to keep prices, availability and progress current; a manageable escrow workload.
REALTIQ staff (REALTIQ Console)	Accurate, trustworthy listings; tools to nudge stale projects; escrow operations in the REALTIQ Console to confirm releases and settle disputes.
Independent agents (Partner Portal: Legal, Engineering & Survey, Inspection and Valuation Partners)	A separate, limited view of the escrow conditions they are appointed to verify (Sections 14–17).
Buyer's Agents and Seller's Agents (Partner Portal)	Buyer's Agents shortlist, attend viewings and negotiate within the buyer's stated authority; Seller's Agents manage a developer's or owner's listing within the permissions in their mandate (RQS-06 §9). Both see amounts; neither is neutral, unlike independent agents.

2.3 What counts as a project

- **A project can have one unit or many.** The page looks and works the same whether a project has one property or a thousand.
- **A project is a developer listing with its own project identity.** Example: a developer building one home each in Maitama, Wuse and Garki can give each its own project name and list each as a project with one unit.
- **Individual sellers are not projects.** An owner selling a house or flat they own uses the separate individual listing flow and onboarding section, which already exists. Nothing in this specification changes that flow.
- **Card labels follow Listed By**: Developer, Agent or Owner. Project cards and project pages are always "Developer". There is no "Private sale" label. The lister chooses the Listed By display: type only ("Listed by Developer") or type and name ("Listed by Developer · [name]"), with the Verified badge and trust tier. Agent-managed listings can show "Listed by Owner · Managed by [agent]". Project cards and project pages remain "Developer".
- **Resale inside a project.** If an owner lists a home through the individual listing flow and that building also exists as a project on REALTIQ, their listing can show "This home is in [project name]" with a link to the project page.
- **All property categories on the platform** can be sold through a project: Flats & Apartments, Houses, Commercial Buildings and Mixed Use (the platform's 41 property types sit under these). Project structures include estates and gated communities, apartment buildings, commercial complexes (for example shops or offices), mixed-use developments with commercial units below and flats above, phased developments, and developer one-off properties.

2.4 Out of scope

- **Rentals, leases and short lets** — the platform is sales only. No rental wording, features or calls to action anywhere on the page.
- **The developer's own home page** — clicking the developer name or logo opens it; it is specified in RQS-07. Developer reviews live there, not on the project page.
- **Individual seller listings and onboarding** — handled in their own section.
- **Market analytics** — project and unit pages link to paid market analytics for that property; free return projections and forecasts are not shown on the page itself.
- **Fees, taxes and duties** — fee amounts, prices and seat pricing are Console settings (RQS-06 §1); how REALTIQ's fees are charged, collected, refunded and taxed is specified in RQS-08.
- **Land.** REALTIQ does not sell land or plots. Projects contain residential, commercial and mixed-use properties only. ("Plot size" on a house means the land the house stands on; it is not a land sale.)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- **The website homepage**, including its wording, is outside this specification.

3. KEY DECISIONS AT A GLANCE

Topic	Decision	Section
Features at launch	Every feature in this specification is a launch feature.	—
Data source	Every count, price range, availability figure and status on the page is calculated from unit records; nothing is typed at project level.	7.1
Branding	The project's own logo (or its name as text) leads in the header; the developer's logo appears smaller in the developer card. REALTIQ's layout and colours never change.	8
Unit count	A project can have one unit or many; the page design is the same. Only the price tile, availability tile, unit section and multi-unit enquiry adapt.	2.3, 7.2
Build stage	The eight build stages from RQS-03 drive what the page emphasises; stage can differ per unit or phase.	7.3
Timeline	A graphic progress track plus a plain-text Key dates panel, month and year only, for units being built. Revised dates show the original. No calendar grid.	10
Communication	All communication stays on the platform; contact details typed into messages are blocked. Enquiries and Messages are separate features.	11
Keeping data current	The developer keeps prices, availability and progress current; REALTIQ nudges monthly with a one-button "Nothing has changed" confirmation.	19
Reviews	Project reviews and developer reviews are separate systems. Only verified users who bought or almost bought can review; an average appears after 2 qualifying reviews.	22
Unit cards	The developer chooses grouped-by-type or individual cards; every unit keeps its own listing page.	9.1
Where purchase starts	Payment for a single unit starts on that unit's listing page; multi-unit purchases start from the multi-unit enquiry.	9.2
Multi-unit buying	One conversation, one lead, one checkout for any number of units; offers per unit or as a package total.	12, 13
Negotiating terms	The developer sets starting terms per payment type and marks which are negotiable; the buyer accepts, configures within bounds or requests tracked changes. Accepted terms lock into a terms sheet.	12.3
Payment allocation	One payment is split across units as fixed before payment; one receipt per unit plus a summary receipt.	13
Payment amount	The buyer cannot pay less than agreed; checkout amounts are fixed.	13
Escrow release	REALTIQ confirms every escrow release; independent agents verify where appointed.	14.4
Escrow communication	Each escrow has a verification room separate from buyer–seller messaging, organised by release condition.	14
Escrow scope	The ledger is always per unit; conditions can be per unit, per transaction or shared; each fact is verified once.	15
Disputes	A dispute needs a reason and evidence; REALTIQ's decision within the agreed timeframe is final.	16.1
Dispute threshold	Two or more buyers disputing the same shared fact hold every linked escrow; the lower of REALTIQ's and the developer's threshold applies.	16.1
Timeframes	Maximum times are agreed with REALTIQ and stored with each condition; visible timers and escalation apply.	17.1
Who pays the agent	Independent agent fees are paid by the buyer, the seller or both, as agreed in the terms.	17.2

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Topic	Decision	Section
What agents can see	Independent agents see only the conditions they verify and the evidence; never amounts or buyer–seller discussion.	14.2
REALTIQ transaction fee	One REALTIQ transaction fee on every sale: a standard rate without escrow and a higher protected rate with escrow; default payer split 50/50, changeable per transaction.	13, 17.4
Stale-listing reminders	Monthly reminders, then an amber “Needs confirmation” tag at about 60 days and a banner with checkout paused at about 90 days.	19.1
Stale projects	Stale listings are never unpublished or greyed out (grey means Sold); a staleness factor lowers their search ranking.	19.1
Property types	All four categories — Flats & Apartments, Houses, Commercial Buildings and Mixed Use — can be sold through a project.	2.3, 7.4
Mixed-use buildings	A mixed-use building is sold whole as one listing or as separate component listings; as a project, only a developer can list it.	7.4
Off-platform contact	No phone numbers, email addresses or messaging links anywhere.	11
Off-platform exceptions	Only live video viewings (run on an outside tool with a REALTIQ-issued link) and one-way notifications leave the platform.	11
Accessibility	The page, dashboard and escrow room meet WCAG 2.1 level AA.	24
Street address	The full street address is always shown; it carries the Verified badge only once REALTIQ has checked it.	11.1
Verified badge	One badge style everywhere, used only on information REALTIQ has verified.	20.1
Build stages	Uncompleted building and Semi-finished show a handover date when they will be completed, or “Sold as is” otherwise.	7.3
Escrow	Escrow is optional: an extra protection layer on Outright, Instalment or both, chosen by the seller.	13, 14
Master plan and survey	The master plan or site plan is always public; the registered survey stays in the private vault and is released on request.	6
Occupancy	Every listing declares “Vacant possession” or “Sold with occupiers”; no tenancy terms or income are shown.	7.4
Compare insights	Compare counts and price-position insights are available to developers at launch, anonymised and private.	18.1
Portal titles	My Portal, Seller Portal, Agency Portal, Developer Portal, Partner Portal and REALTIQ Console. “Landlord” is not used.	27.1
Photo minimum	At least 5 photos for Verified status; the number and shot types are Console settings.	21
Media	Media is uploaded into dedicated sections by type; renders are labelled “Artist’s impression”.	6, 21
Card labels	Cards show Listed By: Developer, Agent or Owner; projects are always “Developer”.	2.3
Compare	Any unit can be compared with any other unit of the same category; projects themselves are not compared.	7.2, 9.1
Measurements	Square metres only; values in square feet are rejected, not converted.	7.5
Search into projects	Search matches units; a project card shows how many of its units match and links to them.	23
Sale prices	The reserve price and actual sale price are private and never shown to buyers.	5
Currency	Prices are listed in NGN or USD, with an optional second price in the other currency.	5
Team access	Every account includes the account holder’s seat; each additional seat is paid. Five standard job types plus custom roles.	18.2

4. CHANGES FROM THE CURRENT PAGE

The current project page template has the problems below. The new page replaces each one as shown.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Current page	What the new page does instead
Badges include “Published”, an internal publishing status.	Hide internal statuses from buyers (item 5).
A project labelled “Upcoming” shows a launch date that had already passed.	Derive the build-stage badge from the recorded build stage.
“Available units 75 / 75” sits above a unit section saying “No units are available yet”.	All counts, ranges and statuses come from the same unit records (Section 7).
“Verified units 0 / 0” beside 75 available units; “0 / 1” on the other page.	Replace with a plain title-status line and the verification ladder (Section 20).
“Off-plan summary: 0 / 0 · Price unavailable” on both pages, even with 2027 completion dates.	Hide sections with no data; payment details move to the purchase section.
“Completion” shown as an exact day.	Show handover as month and year, plus the timeline graphic.
Location in the header and the label above the map are worded differently.	Use one location field for every label.
“Nearby” panel is empty on both pages.	Fill it or hide it.
Separate “Amenities” and “Features” lists with overlapping items.	One “Estate facilities and infrastructure” list; unit features go on unit cards.
Unit section subtitle: “Open a unit to use normal Property purchase, title, escrow, tour, installment, and cart flows.”	Rewrite for buyers (Section 21).
Unit card shows size “N/A”, a bathroom photo as cover and a view count of 0.	Say “Not provided”; default cover to an exterior photo or floor plan; show views, saves and stage counts as set out in RQS-06 §5.4.
Gallery images appear to be renders but are unlabelled.	Label renders “Artist’s impression”.
The project name appears only on gate signage inside a photo; no project logo element.	Project logo or text wordmark in the header (Section 8).
Only “View all units” and “View all” (two links to the same place); no message, viewing or document actions.	Primary actions at the top, closing actions at the bottom, mobile action bar.
A street map with a pin that is not checked before publishing.	Check pins at publishing; add a satellite view option.
Not shown: unit types, per-type prices, floor plans, site plan, payment terms, service charge, title status, viewing options, developer profile, reviews, construction progress.	Added in the page layout (Section 6).

5. PROJECT-LEVEL VERSUS UNIT-LEVEL INFORMATION

Information is stored at three levels: the project, the unit type (a group of identical units) and the individual unit. A unit shows its own value if it has one, otherwise its unit type’s, otherwise the project’s. The project page must never present one project-wide value (for example a single handover date) as true for every unit when units differ; where they differ, it says so.

Show once, at project level	Show per unit type or per unit (on unit cards and unit listing pages)
Project name, branding, location, map, access roads	Property type and unit-type name
Developer identity, profile and verification	Bedrooms, full bathrooms, powder rooms, en-suite
Default build stage and handover (phases or unit types may override)	Internal floor area (m²), plot size, floor level
Estate facilities and infrastructure	Unit features (for example BQ, fitted kitchen), furnishing, parking
Root title documents and their verification	List price or “Price on application”, currency, whether the price is negotiable
Default payment options, instalment terms and escrow availability	Availability: Available, Under Offer or Sold; seller-facing labels follow RQS-06 §5
Master plan, drone, aerial and construction-progress media	Floor plans, unit photos, video walkthrough, 3D tour

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Show once, at project level	Show per unit type or per unit (on unit cards and unit listing pages)
Viewing options (open house, appointment, live video)	Any unit-specific override of handover, service charge or payment terms
Project reviews, ratings and questions	Purchase, negotiation, checkout and escrow (on the unit listing page and in the enquiry thread)

The reserve price that developers enter during onboarding is private and must never appear on the project page, on unit cards or in any buyer-facing total.

6. PAGE LAYOUT — SECTION BY SECTION

The table follows the order in Section 1. “Top of page” means what a buyer sees before scrolling on a typical laptop screen: items 1 to 11. Every section with no data is hidden rather than shown empty.

Section (Section 1 items)	Purpose for the buyer	What it shows	Buyer actions
Header (1–9)	Know within seconds what this is, where, how far along, and who is building it.	Project logo or text wordmark; project name; location line; one-line summary; development-type and build-stage badges; handover month and year; developer name with verification badge; project rating summary. Rating summary appears only after at least 2 reviews.	Message developer; Book a viewing; Save / Follow; View units (jumps to the unit cards).
Media gallery (10)	Judge the look and quality honestly.	Developer-chosen cover image; side images and thumbnails; renders labelled “Artist’s impression”; “View all media” grouped by type. Merged media sections: project — photos, renders, construction progress, project video walkthrough, drone, aerial, approach & access road, master plan or site plan, CAD/BIM technical files (download on request); units — the same types plus floor plans with room dimensions and 3D tour. Real photos lead for completed projects; dated progress photos are added as construction advances.	Open gallery; switch media type.
Key facts strip (11)	Screen the project before scrolling.	Price (“₦X”) or price range (“From ₦X” / “₦X – ₦Y”), calculated from published, available units only; units available of total; unit types offered; payment options; plain title-status line. Any tile without data is hidden. “Price on application” units are handled explicitly.	—
Purchase and payment terms (12)	Understand affordability and how money is protected.	Payment options (outright, instalment plan, mortgage accepted); deposit percentage; instalment length; escrow in one plain line; service charge and whether the development is serviced. Shown only when data exists. Replaces the current “Off-plan summary” box.	Link to unit cards to see unit-specific terms.
About the development (13)	Understand the development’s story and design without hype.	Factual description supplied by the developer (P6); design approach; launch date (D4). Architectural style is a unit field (T16a), bulk-set per unit type, and may also be mentioned in the description. Claims kept to what the developer provided or what has been verified.	—
Developer card (14)	Judge whether this developer can deliver.	Small developer logo; developer name; verification status; short profile; completed projects.	Click name or logo to open the developer page (RQS-07). Follow the developer; report the account.
Master plan / site plan (15)	See where each unit, road and facility sits.	Optional uploads. Master plan or site plan public; registered survey in the private vault, released to a buyer on request with the seller’s approval. Unit positions where available. Applies to every development type.	View full size.
Location and surroundings (16)	Judge the neighbourhood, access and commute.	Full street address shown so the location can be found, with the Verified badge once REALTIQ has checked it (Section 11.1). Map with checked pin and a satellite view option; access-road condition; nearby places (hidden if empty); directions link. Link to paid market analytics for this property. Free return projections and forecasts are not	Get directions; open paid market analytics for this property.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Section (Section 1 items)	Purpose for the buyer	What it shows	Buyer actions
		shown on the page itself.	
Construction progress and key dates (17)	See real progress, delivery dates and delivery risk.	Graphic progress track and a plain-text “Key dates” panel (Section 10). Hidden for completed projects.	Tap a milestone to see its evidence; open a unit group’s own schedule.
Estate facilities and infrastructure (18)	Know what is shared and what is delivered.	One list from the fixed catalogue (for example security, water, power, roads, drainage, pool, play area, shared parking), each marked Delivered or Planned (S1). Parking counts are shown per unit.	—
Title and documents (19)	Start due diligence.	Declared title documents; verification ladder (Declared → Submitted → Verified) in plain words, e.g. “Title declared: Global C of O · Verification in progress”.	Request documents (goes through the document vault). Access levels: Free, Paid, On request, Private, with watermarking and view logs (RQS-06 §13).
Viewings (20)	See the property in the way that suits them.	Open House (specific dates and times, or a recurring weekly schedule); Show Home; Private Showings (By Appointment Only); Live Guided Video Tour; Video Tour (Recorded); 3D / Virtual Tour (RQS-06 §11).	Book a viewing; book live video.
Project reviews and ratings (21)	Learn from other buyers of this project.	Rating summary; reviews by verified buyers of this project only; developer replies (Section 22).	Write a review (verified buyers only).
Questions and answers (22)	Ask things the page does not answer.	Public questions from signed-in users with the developer’s answers; moderated.	Ask a question.
FAQs (23)	Get quick answers to repeat questions.	Allocation, documentation timelines, what happens at handover, cancellation and refund terms. Wording supplied by the developer or REALTIQ.	—
Units in this development (24–25)	Find and compare the units on offer, then act.	Unit cards, grouped by type or individual (Section 9); filters; list/table view; sold units greyed out; multi-unit enquiry picker (Section 12).	View details (opens unit listing page); Add to compare; Enquire about multiple units.
Closing actions (26)	Act after reading.	Short prompt with the main actions.	Message developer; Book a viewing; Save / Follow.
Freshness and reporting (27)	Trust that the information is current.	“Last updated” dates on prices, availability and progress; amber freshness label if stale, shown separately from availability (Section 19).	Report outdated information.
Mobile action bar (28)	Act from anywhere on a phone.	Book a viewing and Message [seller type] fixed to the bottom of the screen.	Same as primary actions.

7. HOW THE PAGE ADAPTS AUTOMATICALLY

7.1 One rule for all numbers on the page

Every count, price range, availability figure and status on the page is calculated from the same unit records. Developers never type these at project level. This removes contradictions such as “75 available” beside “No units are available yet”).

7.2 Adjusting to the number of units

The page design is the same for one unit or many. A few elements adjust themselves; the developer sets nothing extra.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Element	One unit	Several units
Price tile	"₦X"	"From ₦X" or "₦X – ₦Y"
Availability tile	"1 of 1 available"	"12 of 40 available"
Unit section	One unit card	Cards grouped by type or shown individually
Enquire about multiple units	Hidden	Shown when two or more units are available
Add to compare on unit cards	Shown	Shown — any individual unit can be compared with any other unit; projects themselves are not compared
Everything else (branding, developer card, progress and key dates, reviews, location, documents)	Same	Same

7.3 Adjusting to the build stage

The page uses the **eight official build stages** from the Property Search & Discovery Specification (RQS-03). The build stage recorded during onboarding (D1, with the new D1a question) decides which sections are emphasised.

Build stage	What buyers most need	How the page adapts
Off-plan; Under construction	Evidence of progress, delivery risk, approvals, developer track record, protection of their money.	Progress track and Key dates; handover month/year; renders labelled "Artist's impression"; dated progress media; payment milestones linked to construction stages; approvals, title status and escrow terms placed higher on the page.
Uncompleted building; Semi-finished — to be completed before handover (D1a = Yes)	Confidence in the completion and handover date.	Treated like Under construction: milestone, handover date, progress track and Key dates.
Uncompleted building; Semi-finished — sold as is (D1a = No)	Exact current condition.	Labelled "Sold as is"; no handover date or progress track; real photos of the current state lead.
Newly built; Renovated; Previously owned; Old	Real condition, readiness, title.	Real photos first; no progress track or key dates (the build-stage badge is enough); in-person viewings prominent.

Stage can differ inside one project. A phased development may have completed units and off-plan units side by side, so stage and handover are shown per unit or per phase as well as at project level.

7.4 Adjusting to the property category

Projects are not residential only, and a project is a project whatever its use: a developer may sell shops, offices and flats in the same project, and each unit card shows its own type. Every unit carries its category (Flats & Apartments, Houses, Commercial Buildings or Mixed Use) and property type, and its card and listing page show the details that suit that category. Details that do not apply are never shown as "0" (for example "0 Beds" on a shop). Commercial details come from the new onboarding fields T20–T26.

Category	Details shown on unit cards and in the table view	Project-level emphasis
Flats & Apartments	Bedrooms, full bathrooms, powder rooms, en-suite, internal floor area (m²), floor level, parking (required), furnishing, architectural style, key features, service charge, site area (shared).	Building facilities (lifts, backup power, shared areas), floor or stack plans, shared parking.
Houses	Bedrooms, full bathrooms, powder rooms, en-suite, internal floor area, built-up area (footprint — each unit's own for terraces and townhouses), plot size, unbuilt area, number of floors (terraces), parking (required), architectural style, key features (e.g. BQ).	Estate facilities, infrastructure, master plan, security, access roads.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Category	Details shown on unit cards and in the table view	Project-level emphasis
Commercial Buildings	Permitted or intended use, internal floor area, built-up area, plot size, floors or units, frontage (m), parking spaces (required), loading or vehicle access, power capacity and backup, lifts, fit-out level (Shell & core; Partly fitted; Fully fitted).	Access and visibility, parking capacity, power and services, approved building plans.
Mixed Use (the “Mixed-Use Building” type)	A mixed-use building can be listed as a project or not. It can be sold as one whole — a single listing of the Mixed-Use Building type, showing both residential and commercial details — or its components (shops, offices, flats) can be listed separately, each with its own listing card. As individual listings, anyone (owner, agent or developer) can list it; as a project, only a developer account.	Both sets of facilities; units grouped by category.

- **Mixed-category projects:** unit cards are grouped or filterable by category, and the key facts strip shows the categories on offer (for example “Flats and shops”).

  Bedroom-based filters and details apply only to residential units; commercial units are not hidden by a bedroom filter unless the buyer has chosen a residential type.

  A multi-unit enquiry may include units of different categories (for example a shop and a flat in the same building). Only Compare is limited to one category.

  Occupancy applies to every listing: “Vacant possession” or “Sold with occupiers”. New-build units default to Vacant possession. No tenancy terms or income are shown.

7.5 Floor area and plot size

Square metres (m²) is the standard; values in square feet are rejected, not converted. The measures are:

Measure	Meaning	Example (townhouse in an estate)
Internal floor area	Living or usable space across all floors. Required for every unit.	240 m²
Built-up area (footprint)	Ground the building itself covers. For a building alone on its land, one value. For attached units sharing a lot (for example a 4-unit townhouse block), buyers see both the footprint of their own unit and the footprint of the whole building (all units) — for example “Your unit: 90 m² · Whole building (4 units): 360 m²”.	90 m² (unit); 360 m² (whole building)
Plot size	Shown for all properties that sit on land: the land of the compound, plot or lot. For flats, labelled “Site area (shared)”.	1,200 m² (lot shared by the 4 townhouses)
Unbuilt area	Plot size minus built-up area (yards, parking, garden). Calculated automatically so it never contradicts the other two. On a shared lot it uses the whole-building footprint.	1,200 m² lot − 360 m² = 840 m²

8. BRANDING AND DEVELOPER IDENTITY

REALTIQ is not the developer. The page carries two identities: the project’s own branding and the developer’s. The project leads; the developer supports it.

- **Header:** the project logo sits beside or above the project name at a modest size. If the project has no logo, show the project name as clean text. Do not move the developer logo into the header.
- **Developer card:** a smaller developer logo beside the developer name, with a verification badge if the developer is verified.
- **Links:** clicking the developer name or logo anywhere opens the developer’s dedicated page (RQS-07).
- **Project cards elsewhere** (homepage, search results): a small project logo is fine; the developer name as text is enough. Two logos on a small card is clutter.
- **Upload rules:** accepted formats, minimum size and light/dark background handling are left to the product developer’s judgement (for example SVG or transparent PNG).
- **Consistency:** logos never recolour the page. REALTIQ’s layout and colours stay the same on every project page so each feels equally trustworthy. Large developer branding is not used.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- **Individual seller listings** (outside projects) carry no logo; the seller's name and verification status are enough.

9. UNIT CARDS AND THE PATH TO PURCHASE

9.1 Two ways to show units

Some developers want one card per unit type (for example three cards for three types); others want one card per unit (for example 50 cards for 50 units). Both options must be available. Every unit always keeps its own listing page, so search, compare and purchase work at unit level either way.

Display option	How it works	Best for
Grouped by type	One card per unit type showing price or price range, floor area, the category details in Section 7.4, key features and "X of Y available". Clicking opens a panel or short list of that type's individual units, each linking to its own listing page.	Types where units are identical.
Individual units	One card per unit. With many units this needs filters (type, bedrooms or use, price, status), a compact list/table toggle, pagination or "Load more", and sold units greyed out rather than removed.	Units with different prices by floor or position, or different finishes.

- **Defaults:** suggest grouped view when units within a type are identical and individual view when they differ; the developer can override. A buyer toggle between the two views is a welcome addition.
- **Table columns** (list/table view): unit, type, m², price, stage/handover, status, plus category columns — bedrooms, bathrooms and parking for residential units; intended use, parking spaces and fit-out level for commercial units.
- **Unit card content:** photo (cover image order: the front of the building; then the next most suitable exterior; then the floor plan — never a bathroom), unit or type name, price, availability, Listed By label, floor area, the category-specific details in Section 7.4, key features, payment tags, title status. Missing values read "Not provided"; values that do not apply read "Not applicable". Price per m² only when floor area exists.
- **Add to compare** on every unit card, using the same toggle as the rest of the site and following the Property Comparison Specification (RQS-05) (2–4 properties, one category per set, preview before any automatic picks). In a mixed-use project, a residential unit and a commercial unit cannot be in the same comparison; the Compare prompt to start a new comparison applies.
- **Filters inside the project** (property type, bedrooms for residential units, budget, availability, phase) appear only when there are enough units to justify them. The product developer sets the threshold.
- **One route to all units.** Keep a single "View all units" destination rather than two links to the same place.

9.2 Where purchase begins

Buyers do not normally see a property and buy it outright on the spot. The project page leads to the pre-purchase steps (message, viewing, documents) and to each unit's listing page. **Payment for a single unit starts on that unit's listing page.** Multi-unit purchases start from the multi-unit enquiry and end in one checkout (Sections 12–13). Purchase stages follow RQS-06 §5. A unit is Sold when the transaction is complete: legal transfer done, escrow fully released and nothing outstanding on either side. Buyers see Paid at full payment and Owned at completion.

10. CONSTRUCTION PROGRESS AND KEY DATES

The progress is shown as a graphic progress track **and** as plain-text dates, both for the project and for individual or grouped units that have their own schedule. No calendar grid. This information belongs to projects and units that are not yet finished; it is **not shown for completed or previously owned properties**, where it would add nothing.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

10.1 The progress track (graphic)

- **Layout:** horizontal on desktop, vertical on mobile. One step per construction phase, using the build-stage milestones already captured during onboarding.
- **Three visual states:** completed (filled, with the month achieved), current (highlighted) and upcoming (outlined, with a target month and year). States are also written in words (accessibility).
- **Evidence behind each step:** tapping a completed or current milestone opens its dated progress photos or video.
- **Honest slippage:** when a target moves, show “Target MAR-2027 · revised to JUN-2027” rather than silently replacing the date.
- **No percentage-complete bar** unless it is based on reported progress; a bar calculated from time elapsed would mislead.

10.2 Key dates in plain text

Plain-text dates sit alongside the track. Content of the “Key dates” panel (month and year throughout):

Key date	Example display	Notes
Launch	Launched: AUG-2026	Onboarding D4 Launch date.
Construction start	Construction started: OCT-2026	Onboarding field D5; or “Construction not started”.
Planned duration	Planned build period: 14 months	Calculated from D5 construction start to D3 target handover.
Current milestone	Current stage: Roofing (reached JUN-2027)	D2 Milestone; the month reached is recorded automatically when D2 is updated.
Next milestone	Next: Finishing — target SEP-2027	Onboarding field D6 (optional milestone targets); shows the revised target if it has moved.
Target handover	Handover: DEC-2027 (originally NOV-2027)	D3 Projected handover; the original target stays visible when revised.
Last updated	Last updated by developer: 03-OCT-2027	The one place an exact day is shown, because it records an action, not a promise.

10.3 Where the dates appear

Place on the page	What is shown
Header (item 6)	Target handover month and year — the single most important date, visible without scrolling.
Key facts strip (item 11)	Build stage and handover, for example “Under construction · Handover DEC-2027”. For mixed schedules: “Handover from JUN-2027 to MAR-2028”.
Progress section (item 17)	The track, with the Key dates panel beside it on desktop and directly below it on phones.
Unit cards (item 24)	One text line, for example “Stage: Carcass · Handover: MAR-2028”, taken from the unit’s own schedule.
Grouped unit panel (item 24)	When a unit type, phase or block has its own schedule, its panel shows its own mini progress track and key dates.
Unit listing page	The unit’s own progress track and key dates if it differs from the project; otherwise “Follows the project schedule” with a link back to the project’s progress section.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

10.4 Project, group and unit schedules

- **Schedules can be set at every level:** the project, a phase or block (T19, which becomes a schedule group), a unit type, or an individual unit. The handover date is set once for the project and overridden only where a unit type or unit differs; the header then shows a range. A unit uses its own schedule if it has one, otherwise its group's, otherwise the project's (the same inheritance used for other unit details in Section 5).
- **Large phased developments:** one track and key-dates panel per phase, collapsed by default, with the project panel summarising the range.
- **Completed units inside an unfinished project** show "Completed" and no track, while the rest of the project keeps its track.
- **Developer entry:** set once in the dashboard (Section 18, Media & progress) for the project or a group, and override only where a unit differs.

11. COMMUNICATION RULES

- **All communication stays in the platform.** No phone numbers, email addresses or messaging-app links on the project page or in listings.
- **Access levels:** features are gated by Guest, Registered and Verified levels (RQS-06 §3.1). Minimum KYC is required for full features; guests keep the basic enquiry.
- **Buyer actions are:** Message [seller type] — the action adapts to the seller type: Message developer, Message agent or Message owner (on project pages, Message developer), Book a viewing, Request documents.
- **Enquiries and Messages are separate features:** an enquiry creates a lead record in Enquiries and its conversation in Messages.
- **Reply-time indicator:** show "Usually replies within X hours" beside Message developer. It reassures buyers and encourages developers to respond.
- **Everything happens on the platform** — communication, negotiation, payments and everything in between. Phone numbers, email addresses, messaging-app handles and outside links typed into messages are automatically blocked, so deals cannot move off-platform. The sender sees a short explanation that contact details cannot be shared and why (escrow protection).
- **Escrow verification communication is separate** from buyer–seller messaging (Section 14).
- **Exception — only what practically cannot stay on the platform.** The platform cannot stream live video yet, so live video viewings are booked on the platform and run on Zoom, integrated into REALTIQ (WhatsApp Video is not used because it exposes phone numbers), with the meeting link issued by REALTIQ so neither side sees the other's phone number. One-way notifications from REALTIQ (booking confirmations, saved-search alerts) may go by SMS, WhatsApp or email. Guest enquiries: REALTIQ keeps the guest's phone or email; the seller never sees it and replies on the platform.

11.1 Street address

- **The full street address is always shown**, so buyers can find the location.
- **The Verified badge appears only on information REALTIQ has actually verified.** Once REALTIQ has checked that the address matches the map pin and the project's documents, the address carries the Verified badge (Section 20.1). Until then it is shown as plain text, without a badge. A small grey note "Provided by the developer" tells buyers where unverified information came from.
- An address a buyer reports as wrong goes to REALTIQ for checking.

12. ENQUIRING ABOUT AND NEGOTIATING ON SEVERAL UNITS

Buyers of several units (investors, companies buying staff housing or several shops or offices, families buying adjacent homes) should not have to open a separate enquiry and negotiation for each unit.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

12.1 How the buyer selects units

- A button in the units section, **“Enquire about multiple units”**, opens a picker: a list of the project’s available units with checkboxes, filters and a running total of list prices. This keeps unit cards uncluttered.
- It is separate from Compare. Compare is for weighing up 2–4 properties; the picker is for buying several. (The Comparison Specification (RQS-05) deliberately avoids turning cards into checkboxes.)
- **Two ways to choose:** specific units (for example A-03, A-04 and B-07) for buyers who care about position, or a quantity by type (for example “3 × Type B”) for buyers who do not mind which units; the developer then allocates the specific units.

12.2 One conversation, one lead

- The selection opens **one conversation thread** with the developer, listing the chosen units and their list prices at the top.
- The developer sees it as **one lead**, marked as a multi-unit enquiry.
- Offers can be made **per unit or as a package total**; the developer can counter-offer on the whole bundle.
- **Partial agreement is normal:** units can be added or dropped without restarting the conversation.

12.3 Negotiating payment terms

- **The developer sets the starting terms** for each unit or unit type, per payment type,: outright, instalment schedule, escrow conditions, milestones, refund and cancellation terms, and default and penalty terms.
- The developer marks which terms are **open to negotiation** (price, deposit percentage, instalment length, specific escrow conditions) and which are fixed.
- **The buyer can ask for conditions to be added or removed** on escrow, instalment or outright terms. Proposals are shown as tracked changes, for example “Remove condition 3” or “Extend instalments to 24 months”; the developer accepts, rejects or counters.
- **Buyer options:** after showing interest (an enquiry or offer), the buyer accepts the terms as offered, configures within the seller’s bounds (for example 18 months where up to 24 is allowed) or requests a variation; variations become the tracked changes described above.
- **REALTIQ Standard Terms:** REALTIQ thresholds (maximum penalty, minimum grace period, refund floor) are optional; listings within them show a “REALTIQ Standard Terms” label.
- **Per unit or one term for all:** example — unit A offers 6 months to pay and unit B offers 12 months. With both selected, the buyer can ask for both to be 6 months, both to be 12 months, or keep them different. The panel offers: keep terms per unit; apply one term to all selected units (match A, match B, or a custom term such as 9 months); or mix, aligning some terms while keeping others per unit.
- **The developer can accept per unit** (for example 12 months on unit A but 6 on unit B), and the thread shows exactly which units accepted which terms.
- When both sides accept, each unit’s terms are **locked into a terms sheet**, with version history kept. Later changes need both parties to agree again.
- **Bundle discounts** need a clause agreed during negotiation. Template default: if a unit drops out through the seller’s fault (for example title failure), the discount stands on the remaining units; if the buyer withdraws a unit, the developer may reprice the rest to the price for the smaller quantity.

12.4 Availability while negotiating

- Selecting units in an enquiry **does not hold them**; another buyer can still reserve them.
- If a unit in the bundle goes under offer or sells elsewhere, it is flagged in the thread straight away.
- Once the first payment is made, each unit’s public label moves to **Under Offer** individually; it becomes Sold only when the transaction is complete (RQS-06 §5).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

13. CHECKOUT, PAYMENT ALLOCATION AND RECEIPTS

- **One checkout for the bundle**, whether the buyer is buying 2, 3, 5 or 100 units. The buyer pays once and sees one clear total with each unit as a line item.
- **The buyer cannot pay less than agreed.** The checkout amount is fixed and cannot be edited; the per-unit split is shown before payment.
- **Paying ahead:** at launch, exact amounts only. Early settlement is requested from the developer in the thread.
- **Missed instalments:** grace period, reminders and the developer's remedies are part of the terms the developer sets, so they are agreed upfront.
- **Allocation:** one payment is split across units, proportionally to what is due on each unit or in whatever way was agreed. The split is fixed before the buyer pays, never worked out afterwards. A rounding rule assigns any leftover kobo to one designated unit so totals always reconcile.
- **Receipts:** one receipt per unit showing the amount allocated to it. Each receipt references the single payment it came from, and a summary receipt covers the combined payment for bank reconciliation.
- **Escrow and instalments are per unit.** Each unit keeps its own ledger. Allocated amounts go into that unit's own escrow. The buyer sees a combined schedule ("₦X due across 3 units on 01-MAR-2027") with a "Pay all due" option, and each payment is again split per unit.
- **If one unit fails** (cancelled or title problem), only that unit's money and schedule are affected; the other units carry on.
- **Escrow is optional.** Escrow is the seller's choice (onboarding S7a). Payment types are Outright, Instalment and Mortgage (Mortgage is built but hidden until a Mortgage Partner is active). Escrow is an optional protection layer on Outright, Instalment or both. Escrowed funds are held by Moniepoint in a segregated account; REALTIQ instructs each release or reversal; fees are split automatically. Every sale, with or without escrow, carries one REALTIQ transaction fee: a standard rate without escrow and a higher protected rate with escrow. The fee is paid by the buyer, the seller or split between them; the default is split 50/50 and can be changed for each transaction (Section 17.4). There are no stored balances. One checkout, per-unit allocation and per-unit receipts apply as described above.

Worked example: a buyer takes a 3-bedroom unit at ₦100,000,000 and a 1-bedroom unit at ₦50,000,000, each with a 20% down payment.

Unit	Price	Down payment (20%)	Receipt issued
3-bedroom	₦100,000,000	₦20,000,000	Receipt for ₦20,000,000 against the 3-bedroom unit
1-bedroom	₦50,000,000	₦10,000,000	Receipt for ₦10,000,000 against the 1-bedroom unit
Buyer pays once		₦30,000,000	Summary receipt for ₦30,000,000

If the parties agree a different split (for example the 1-bedroom paid in full and the 3-bedroom at 20%), that agreed split is stored with the terms and used instead.

14. ESCROW VERIFICATION ROOM

Escrow is optional — the seller chooses whether to offer it (onboarding S7a). Where it is offered, REALTIQ confirms every escrow release. The confirmation work needs its own space, separate from the buyer–seller conversation; independent agents and other third parties never see the negotiation. The same escrow is also used by individual property sellers, so one design must serve developer projects and individual sales alike.

14.1 What the room is

- Every escrow transaction gets a **verification room**: a separate workspace created automatically when terms are locked and payment is made. It is organised around the **release conditions** only.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- **People inside see only the agreed release conditions**, taken from the locked terms — for example “Release ₦X when roofing is complete, verified by site inspection”. Offers, negotiation history and other buyer–seller messages stay in the original thread. Independent agents never see payment or transaction amounts; the room hides amounts from them.
- **Participants:** the buyer; the seller (developer or individual owner); REALTIQ’s escrow officer; and any independent agents both parties appointed (for example an inspector, surveyor or lawyer). This can be a three-, four- or five-way conversation.
- **Same model everywhere:** an off-plan developer sale may have five milestone conditions and an inspector; an individual resale may have two conditions (title verified, deed signed) and a lawyer. Only the conditions and participants differ.
- **No personal contact details** in the room; participants appear by role and name only.
- **Instalments:** instalment schedules distinguish payment triggers (when an instalment falls due) from escrow release conditions (when held money goes to the seller).

14.2 Who sees what

Participant	Can see	Can do
Buyer	All conditions, evidence, agent reports, decisions and amounts in their own escrow.	Comment; raise a concern or dispute; message REALTIQ privately.
Seller (developer or owner)	The same, for their side of the transaction.	Claim a milestone; upload evidence; respond; message REALTIQ privately.
Independent agent	Only the conditions they are appointed to verify, and the evidence for them. They never see payment or transaction amounts, or any discussion between buyer and seller.	Accept the brief; request more evidence; schedule a visit; submit a signed report.
REALTIQ escrow officer	Everything in the room, plus the payment ledger.	Request evidence; approve release; order a refund; decide disputes.

14.3 How communication works inside the room

- **One thread per condition.** Every message, upload and report sits under the condition it concerns, so the record for “Roofing complete, Unit B-07” is self-contained.
- **Private channels to REALTIQ.** The buyer, the seller and each agent can each message REALTIQ privately — for example a buyer raising a concern, or an agent flagging something sensitive.
- **Nothing can be edited or deleted.** Every action is recorded with the time and the person responsible; this record is REALTIQ’s evidence in any dispute.

14.4 Release steps for each condition

Step	What happens
1. Pending	The condition is not yet due.
2. Claimed	The seller says it is met and uploads the evidence the condition requires (for example dated, location-tagged photos, a video walkthrough or a certificate).
3. Under verification	The appointed agent reviews the evidence, visits if needed, and can ask for more. If no agent was appointed, go to step 5.
4. Agent report	The agent submits “met” or “not met”, with reasons.
5. REALTIQ review	The escrow officer carries out REALTIQ’s own due diligence.
6. Outcome	Released (funds go to the seller for that condition and unit); returned for more evidence (back to step 2); or refunded where the terms provide for it.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Step	What happens
7. Disputed	Either party contests an outcome. REALTIQ decides within the set timeframe and its decision is final.

For shared project milestones, an objection window sits between REALTIQ's approval and the release (Section 16).

15. ESCROW AT SCALE — BULK PURCHASES AND LARGE DEVELOPMENTS

Escrow verification can apply to a single property or to a bulk transaction. A buyer might say, "For these 3 units, release X after 1 year". The design must stay practical for developers selling hundreds of units to hundreds of buyers. The solution is to separate three things that are otherwise bundled together:

Layer	Scope	Why
Money (ledger)	Always per unit.	Receipts, refunds, title and handover are unit-specific. This never changes.
Conditions (what must happen)	Per unit, per transaction, or shared across a phase or block.	Matches how deals are actually agreed.
Verification (checking it happened)	Done once, wherever the fact lives.	A roof is checked once, not once per buyer.

15.1 Three kinds of release condition

Condition type	Example	How it is verified and released
Unit condition	"Title perfected for Unit B-07."	Verified for that unit only. Typical for individual sellers and custom requests.
Transaction condition	"For these 3 units, release X after 1 year" or "Release when all 3 units are handed over."	Verified once for the whole purchase. The terms say whether release is all together or unit by unit as each is met. Default for bundles: unit by unit; "all together" is negotiable. Amounts are always allocated per unit in the ledger.
Shared milestone	"Block A roofing complete."	Verified once; the result flows to every escrow linked to that milestone, across all buyers.

15.2 How it looks to each party

- **Buyer — one room per transaction.** A single purchase gets one room; a bundle of 100 units also gets one room. Conditions are grouped (for example "Roofing complete: applies to your 3 units in Block A") and expand to show per-unit amounts. Shared milestones show as "Verified for Block A on [date]" with evidence attached. Buyers never see other buyers, their amounts or their conditions.
- **Developer — a milestone board, not hundreds of rooms.** Each shared milestone shows how many escrows depend on it (for example "Block A roofing: 84 escrows, 61 buyers, ₦X awaiting release"). The developer claims once and uploads evidence once. Unit and transaction conditions sit in a separate queue so custom requests are not lost. A filter by buyer or transaction gives the per-deal view when needed.
- **Individual seller** — one transaction room with its unit conditions; the same model, simpler.
- **REALTIQ — batch release with exceptions.** One shared-milestone decision creates one release per linked escrow, each recorded in that unit's ledger. Before a batch release, the console lists exceptions (escrows held for a dispute, a missed instalment or an unmet custom condition). REALTIQ approves the batch; exceptions stay held. Buyers are notified in bulk, each seeing only their own amounts.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

15.3 Keeping it simple

- **Templates first.** The developer defines conditions once per unit type or phase, linked to shared milestones. Most buyers accept these, so most escrows need no individual verification.
- **Custom conditions are flagged** as “Custom: verified separately”, so both sides can see it adds work; the developer can decline them in negotiation.
- **Nothing is re-entered.** Terms locked in negotiation become the room’s conditions automatically.
- **Project agent for shared milestones.** One independent agent, agreed between the developer and REALTIQ, verifies shared milestones for everyone. A buyer (particularly a bulk buyer) may appoint their own agent for their transaction; that agent sees the shared evidence and can inspect, but their finding affects only that buyer’s escrow. If findings conflict, REALTIQ decides.

16. ESCROW EDGE-CASE RULES

16.1 A buyer disputes a shared milestone

Rule: hold only the disputing buyer by default; hold everyone only when the complaint is about the shared fact and backed by evidence.

- **Objection window before release.** When REALTIQ approves a shared milestone, every linked buyer is notified with the evidence and agent report. Release happens only after an objection window agreed in the terms (hours or days, or zero where both sides want immediate release). Payment-term templates offer a default window, set by REALTIQ, which the parties can change during negotiation. If no one objects, the batch releases automatically.
- **A dispute needs a reason and evidence** (photos, the buyer’s own agent report, or a reference to specific evidence). A dispute without a reason cannot be submitted, so disputes cannot be used simply to delay.
- **REALTIQ triages quickly**, within the agreed timeframe, using one test: if this complaint is true, would the milestone be unmet for other buyers too?

Finding	What is held	Example
Unit-specific	Only the disputing buyer’s escrow for that milestone.	“My unit’s roof sheets are damaged.”
Shared fact, weak evidence	Only the disputing buyer’s escrow, while REALTIQ checks.	A complaint with no supporting material.
Shared fact, credible evidence	All unreleased escrows linked to that milestone.	New dated photos showing the roof incomplete.
More than one buyer disputes the same fact	All unreleased escrows linked to that milestone, automatically.	Two buyers report the same problem independently.

- **Threshold:** more than one buyer (that is, two or more) disputing the same shared fact holds every unreleased escrow linked to that milestone. The number is adjustable. REALTIQ must always have it set; a developer may optionally set a threshold for their project during onboarding. Each party sets its own threshold as it wishes; where both exist, the lower number applies, so buyer protection is never weakened.
- **Outcomes:** upheld shared fact — the milestone returns to “More evidence needed”, the developer fixes and re-claims, and a new verification and objection window follow. Upheld unit-specific — only that unit waits until the fix is verified. Rejected — held escrows release immediately and the decision is recorded.
- **Money already released is final**, except where REALTIQ later finds misrepresentation or fraud; recovery in that case is a standard clause in the developer’s escrow terms.
- **Abuse control:** repeated rejected disputes from one buyer, and repeated upheld disputes against one developer, are flagged to REALTIQ.

16.2 A unit drops out of a bundle

- Allocations are fixed at checkout, so removing one unit touches only that unit’s ledger.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- The departing unit's escrow is refunded or settled under the cancellation terms (for example a full refund if the seller caused the problem).
- Transaction conditions re-scope automatically: "when all 3 units are handed over" becomes "when the remaining 2 are handed over".
- Bundle discount treatment follows the clause agreed in negotiation (Section 12.3).

16.3 Phases progress at different rates

- Every shared milestone is linked to a defined phase, block or group of units. A project-wide milestone is allowed only when all units share the same build stage and handover.
- If a group splits (half of Block A is roofed, half is not), the developer can split the milestone; each escrow re-links automatically by unit membership, with no renegotiation.
- If a milestone's target month passes, linked buyers are notified automatically. Consequences (for example a refund right after an agreed delay) come from the terms.

17. ESCROW TIMEFRAMES, AGENTS AND PORTALS

17.1 Timeframes

- **Immediate but flexible.** REALTIQ aims to act as soon as evidence and any agent report are in. Maximum times are agreed between the developer and REALTIQ, or the buyer and REALTIQ, and stored with each condition (agent verification, REALTIQ review, dispute decision, objection window).
- **Visible timers** in the room show how long each stage has left.
- **Escalation:** automatic reminders as a deadline approaches, and escalation to a senior REALTIQ officer if it is missed.

17.2 Independent agents

- Buyer and seller can agree on an independent agent **within the platform**. Agents are drawn from REALTIQ's verified independent professionals (the Partner Portal network, RQS-06 §18), and both parties must agree before terms lock. Agents may be proposed by the buyer's choice, automatic matching or REALTIQ assignment; whichever method proposes them, both buyer and seller must agree before terms lock.
- **Conflict-of-interest declaration** when an agent accepts a brief.
- **Agent fees** are paid by the buyer, the seller or both, as agreed in the terms. Each agent sets their own rate; REALTIQ sets the platform rate in the Console (RQS-06 §18.1, §18.5). REALTIQ's platform rate is included in the agent's price, never added on top (RQS-08 08-PF-01, 08-PF-02).
- **Replacing an agent** needs both parties' agreement, or a REALTIQ decision if one objects.

17.3 Dashboards and portals

The platform will provide the portals needed to run this. Their contents:

Portal	What it contains
Buyer and seller dashboards	An "Escrow" tab listing each escrow, the status of every condition, the next action and its deadline, and a link into the room.
Developer milestone board	Shared milestones with the number of escrows and buyers linked and amounts awaiting release; a separate queue for unit and transaction conditions; filter by buyer or transaction.
Partner Portal (RQS-06 §18)	Assigned briefs; evidence to review; site-visit scheduling; report submission; history and fees.
REALTIQ Console — escrow operations (RQS-06 §19)	Queue of claims awaiting review, sorted by deadline; flags for overdue or high-value releases; dispute queue; batch release with exceptions list; per-unit ledger reconciliation; two-person approval (one officer prepares, a second approves) for releases or refunds above an amount

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Portal	What it contains
	REALTIQ sets and adjusts under its internal controls.

17.4 REALTIQ transaction fee

- **One fee on every sale.** Every property sale completed on REALTIQ pays one REALTIQ transaction fee, with or without escrow: a standard rate without escrow and a higher protected rate with escrow. Where escrow covers only part of the price (for example the instalments), the protected rate applies to that part and the standard rate to the rest (RQS-08 08-EF-01).
- **Who pays.** Buyer, seller or split; the default is split 50/50 and the payer option and ratio can be changed for each transaction. The fee and its payer appear on the terms sheet before terms lock.
- **How it is collected.** The fee is taken as a split from each payment, pro rata; under escrow the seller's share leaves the escrow account only as a split at release (RQS-08 Section 7.1). Multi-unit purchases show the fee per unit on each per-unit receipt.
- **Cancellation, reversal and default.** The fee is non-refundable once terms lock, and the innocent party never bears it. If the buyer defaults, the buyer pays the whole fee, deducted from the buyer's refund. If the seller defaults (for example the title fails), the buyer is refunded everything paid, including the buyer's fee share, and the seller pays the whole fee. On mutual cancellation each party pays its own share. On a no-fault reversal REALTIQ keeps a cost-recovery portion split equally, or waives it (Console setting). Fee shares on milestones already released stay earned. REALTIQ's dispute decision records the party at fault (Section 16.1).
- **Recovery from a defaulting seller.** Deducted from the seller's next payouts on any listing; new listings and transactions blocked until paid; added to the next plan invoice for developers and agencies; recorded in dispute history and trust; then legal recovery under the terms (RQS-08 08-EF-11).
- **No fee on penalties.** No REALTIQ fee is charged on penalties, forfeited deposits or amounts a seller keeps on default or cancellation.

18. SELLER-DEVELOPER DASHBOARD

The dashboard is the developer's private workspace. Everything buyers see on the project page comes from here, and everything the developer must do after a buyer acts (reply, negotiate, confirm payments, claim milestones) happens here. The public developer page is specified in RQS-07. Dashboard areas, team access and principles are specified in RQS-06 §7 (Developer Portal); this section summarises the areas that serve the project page.

18.1 Dashboard areas

Area	What the developer sees	What the developer does
My projects	All their projects with status (Draft, Partly published, Published, Unpublished), freshness status, and alerts needing attention (unanswered messages, overdue confirmations, escrow claims waiting, disputes).	Open a project; start a new project; resume an unfinished set-up.
Project home	Project name, location, status; set-up progress (steps 1–8); search readiness (what blocks publishing and what limits search filters); counts of units Available, Under Offer, Sold and Not released.	Publish ready units; Preview as buyer; edit the project; jump to missing information.
Branding & page content	Project logo (P7), cover image, short and long descriptions (P5–P6), FAQs (P8), facilities list with Delivered / Planned (S1), unit display choice (P9). Architectural style is set per unit type (T16a).	Upload the project logo; choose the cover; write FAQs; choose grouped or individual unit cards (Section 9).
Units	Unit types and individual units in cards or a spreadsheet-style grid, with category-specific fields (Section 7.4), prices with price history and availability.	Add unit types and units; bulk-edit prices and availability; tick units and confirm "Nothing has changed"; import from a spreadsheet; mark units Under Offer or Sold

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Area	What the developer sees	What the developer does
		(Sold is set automatically when the transaction is complete: legal transfer done, escrow fully released and nothing outstanding on either side).
Media & progress	Media sections (photos, renders, video, drone, aerial, floor plans, master plan, 3D, approach roads) and the construction progress track and key dates for the project, phases, unit types and units.	Upload into the right section; label renders; set key dates once for the project or a group and override only where a unit differs; update a milestone with dated evidence; revise a target date (the original stays visible to buyers).
Freshness	The monthly confirmation due date, days since last confirmation, any “Needs confirmation” tag or banner and the date it will apply, and buyer reports of outdated information.	One-button “Nothing has changed” for the whole project, a group, selected units or a single unit; or update what changed and confirm the rest; respond to reports (Section 19.2).
Enquiries	Lead records: every enquiry with its stage and the units requested; multi-unit enquiries flagged and shown as one lead; the developer’s average reply time (shown publicly as “Usually replies within X hours”).	Work each lead; open its conversation in Messages.
Messages	All in-platform conversations with buyers, including the conversation created by each enquiry.	Reply; send documents through the platform. Contact details typed into messages are blocked.
Payment terms	Default payment templates per unit or unit type: outright, instalment schedules, escrow release conditions, milestone links, which terms are negotiable, missed-payment remedies, bundle-discount clause, default objection window and agreed timeframes.	Create and edit templates; link conditions to shared milestones (per phase or block).
Negotiations & terms	Active negotiations with tracked amendments from buyers (per unit or one term for all), accepted and rejected changes, and locked terms sheets with version history.	Accept, reject or counter each amendment, per unit or for the whole bundle; lock terms.
Sales & payments	Checkouts received with per-unit allocation; per-unit ledgers and receipts; each buyer’s instalment schedule; overdue payments; early-settlement requests.	Review payments; respond to early-settlement requests; apply agreed remedies for missed payments.
Escrow	Milestone board: each shared milestone with the number of escrows and buyers linked and amount awaiting release. A separate queue of unit, transaction and custom conditions. Verification rooms, disputes and release history.	Claim a milestone once with evidence; respond to agents and REALTIQ in the verification room; follow dispute outcomes.
Viewings	Open-house dates, appointment bookings and live video walkthrough bookings in one calendar.	Set open-house dates; accept or reschedule bookings; run live video viewings.
Documents & verification	Declared title documents, verification progress (Declared → Submitted → Verified, or Rejected), and buyers’ document requests.	Upload documents to the private vault; resubmit if rejected; approve or decline document requests.
Reviews & questions	Project reviews and ratings from verified buyers; public questions waiting for an answer.	Reply to reviews; answer questions. Developer reviews are managed on the developer page, not here.
Performance	Views, saves, enquiries, “Add to compare” counts and price-position insights (how the unit’s price compares with the similar units buyers compared it with), per project and per unit. Available at launch.	Use them to adjust prices, media or terms. Compare counts and price-position insights are anonymised and private; views, saves and stage counts are also shown publicly on listing and project pages (RQS-06 §5.4).
Notifications	Everything that needs action: new messages and leads, negotiation replies, payments received or overdue, escrow claims, agent reports, disputes, monthly confirmation, buyer reports, reviews and questions.	Open the item directly from the notification.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

18.2 Team access

A developer can add staff (for example sales agents) with their own logins and limited permissions. The account holder's own seat is included; every additional seat (staff login) is paid, billed per period from the date it is added (RQS-08 08-AP-08). Seat pricing is set by REALTIQ in the Console (RQS-06 §2.2). The five standard job types below are kept, **and account holders can also create custom roles** by choosing exactly which permissions a role has.

Standard job type	Can do
Owner / administrator	Everything, including adding and removing staff, buying seats, payment templates, escrow and payouts.
Sales agent	Enquiries and messages, negotiations within limits set by the owner, viewings; sees only the leads assigned to them if the owner chooses.
Project editor	Units, prices, availability, media, progress, key dates and monthly confirmations.
Finance	Sales and payments, receipts, instalments and escrow; no page editing.
Viewer	Read-only access to the dashboard.

- **Custom roles:** the owner can create a role (for example "Senior sales agent") by ticking permissions from a list, such as reply to buyers, accept terms, edit prices, view payments, claim escrow milestones.
- Every action is recorded against the staff member who took it; buyers see the developer's name, with the staff member's first name on messages.
- Staff logins follow the same on-platform rules: contact details in messages are blocked.
- Accepting final terms and claiming escrow milestones can be limited to the owner or named staff.
- Team access is not only for developers — see Section 27.

18.3 Principles for the dashboard

- **Enter once, use everywhere.** Anything the developer enters (unit data, templates, milestones) feeds the project page, the unit listing pages, negotiations and escrow without being typed again.
- **Claim once, not per buyer.** Shared milestones are claimed and evidenced once, even with hundreds of buyers (Section 15).
- **Agents never see the developer's deal discussions or any amounts**, and private messages between agents and REALTIQ are not visible to the developer. The verification room is kept separate from Enquiries and Negotiations (Section 14).
- **Everything stays on the platform** — messages, documents, negotiations, payments and escrow.
- **Accessibility:** the dashboard also meets WCAG 2.1 level AA.

19. KEEPING INFORMATION ACCURATE

The developer is responsible for keeping prices, availability and construction progress current. REALTIQ must have a way to push developers to update, so projects do not become "zombie listings".

Information	Who keeps it accurate	How
Prices and price changes	Developer	Entered per unit or unit type; never typed at project level. Show "Prices updated [date]" and keep a price history so reductions and increases are visible.
Availability	Developer, plus automatic updates	Developer updates statuses. A unit is marked Sold automatically when its transaction is complete: legal transfer done, escrow fully released and nothing outstanding on either side.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Information	Who keeps it accurate	How
Construction progress and key dates	Developer	Milestones, dated media and key dates for the project, groups or units; slipped dates shown as revised, not overwritten.
Counts and ranges on the page	System	Calculated from unit records (Section 7.1).
Verification and title status	REALTIQ	Set by REALTIQ's verification and legal teams, not the developer.
Reviews and questions	Verified buyers and users; REALTIQ moderates; developer answers	Section 22.
Escrow condition status	Verification room workflow	Sections 14–17.

19.1 The nudge ladder for stale projects

Step	What happens
1. Reminders	Monthly. Every month the developer gets a dashboard banner and notification asking them to confirm prices, availability and progress, with a one-button "Nothing has changed" confirmation (Section 19.2). Changes that cannot wait for the monthly check are caught by the event triggers in step 2 and by automatic updates (for example units marked Sold when the transaction is complete).
2. Event triggers	Immediate prompt when a milestone's target month passes without an update, when the handover date passes, or when a buyer reports outdated information.
3. "Needs confirmation" (about 60 days)	After two missed monthly confirmations, the project and affected units show an amber "Needs confirmation · Last updated [date]" tag. This freshness label is separate from availability, so a unit can show "Available" and "Needs confirmation" together. The listing stays fully visible.
4. Search consequences (about 60 days)	A staleness factor lowers the listing in search ranking. In the Property Search & Discovery Specification (RQS-03)'s Recommended sort, the existing "listing recency / freshness decay (+20%)" factor also takes confirmation freshness into account, so a stale listing slowly drops.
5. Checkout paused (about 90 days)	After three missed monthly confirmations, an amber banner appears on the listing: "Details not confirmed since [date] — checkout paused until the developer confirms", and the affected units stay visible to buyers — they are never unpublished for staleness. Stale listings are no longer greyed out, because grey means Sold. The developer is notified before this happens. Buyers can still view and message, but checkout is paused until the developer confirms, so no one pays for a unit that may no longer be available.

A "Report outdated information" link on the page feeds step 2 and shows buyers that REALTIQ takes accuracy seriously.

19.2 One-button "Nothing has changed" confirmation

When nothing has changed, the developer must be able to confirm that in one step, instead of re-entering information. It works at every level:

Scope	How it works
Whole project	One button confirms every unit, the progress track and key dates, and project details.
Group of units	Confirm a phase, block or unit type in one step.
Selected units	Tick units in the Units grid and confirm them together (bulk).
Single unit	Confirm one unit from its row or its edit screen.
All except	Update the units that did change, then confirm everything else in one step.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- Each confirmation records a date **per unit**, so “Last updated” is accurate on every unit card and unit listing page, even when confirmed in bulk.
- Confirmation clears the monthly reminder for the units covered; any unit not confirmed stays on the reminder list and follows the nudge ladder on its own.
- The button appears in the monthly reminder itself, on the dashboard Freshness area and in the Units grid.

20. TRUST AND VERIFICATION LABELS

There are three different kinds of verification. The page must name them separately rather than blurring them together.

Label	What it means	Where it appears
Verified seller / developer	Sellers and developers need an account and verification before listing.	Header and developer card.
Verified listing	The listing has been vetted by REALTIQ: identity, authority to sell and on-site photos; development listings also need floor plans, approved building plans and parking capacity.	Key facts strip and unit cards.
Verified title	Set by REALTIQ’s legal officers, not the seller; once verified, a fingerprint (hash) of the document is recorded with its date and time in a log that cannot be edited, and anyone can check a document against it with its QR code. The hash detects the same document file being uploaded again; detecting the same property listed by several people or sold more than once uses the property register (RQS-06 §8.4). A public timestamp may be added later.	Title and documents section, unit cards.

- **Declared is not verified.** Title documents chosen by the seller are the seller’s own statement. Show the state, not a bare negative: “Title declared: Global C of O · Verification in progress” or “No title documents declared yet”, instead of “Title document not verified”.
- **Verification ladder:** Declared → Submitted → Verified (Rejected also exists, RQS-02 §7), so buyers see where a project sits without reading it as a warning.
- **Say which verification a count refers to:** “Units with verified title: 0 of 1”, not “Verified units 0 / 1”.
- **Verification fees.** The seller pays for verification: identity (“Verified seller”, for individual owners), listing verification and title verification. Title verification is priced by state band and can be paid upfront or deferred to the sale; a re-verification fee applies when the seller’s own change triggers re-verification. Fees are due whatever the outcome, and no badge is ever granted by payment alone (RQS-08 Section 8).
- **“How verification works” page:** each badge links to a short explanation of what was checked. Wording should state what was checked, not imply a guarantee.

20.1 How the Verified badge looks

The Verified badge is used **only** on information REALTIQ has verified — never as decoration, and never on information the seller has only declared. Design, used identically everywhere on the platform:

- **Badge:** a small tick-in-shield icon followed by the word **“Verified”**, in the platform’s verified colour (for example deep green), placed directly after the item it verifies — the address, title, seller or listing.
- **Words as well as colour:** the word “Verified” always appears, so colour-blind users and screen readers get the same meaning (WCAG 2.1 AA).
- **Tap or hover for details:** a panel headed “Verified by REALTIQ” says what was checked, by REALTIQ, and the date — for example “Address checked against map pin and site documents, 12-OCT-2026”. **Click for the policy:** the badge links to the verification policy, which states that verification is administrative validation, not a statutory title warranty (policy wording is a Console setting, confirmed by counsel before launch).
- **Unverified information** is shown in normal text with no badge and, where useful, a grey “Provided by the developer” or “Provided by the seller” note. No red warnings, so unverified information is not mistaken for false information.

- **One badge style only.** Do not create different verified colours or fonts for different items; buyers should learn one symbol.
- **Trust tier badges** (RQS-06 §16) use a symbol clearly different from the Verified badge. The Verified badge rules above are unchanged.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

21. CONTENT AND WORDING RULES

- **Portal titles:** “Landlord” is not used. Each user type sees its own portal title — My Portal, Seller Portal, Agency Portal, Developer Portal, Partner Portal — as set out in Section 27.1.
- **Photo minimum for Verified status:** at least 5 photos — completed properties: exterior, living area, kitchen, and a bedroom or main room; off-plan: 3 renders plus 2 dated site photos. The number and shot types are settings REALTIQ can adjust.
- Hide internal statuses (for example “Published”) and any section or tile with no data.
- Write every label for buyers, in UK English. Example rewrite of the unit section subtitle: “Choose a unit to see its details, payment options and viewing times.” “Cart” may be used only for the basket of paid services, never for buying a property.
- Use “Not provided” for missing values and “Not applicable” where a field does not apply; never “N/A” or “0 Beds” on a commercial unit.
- Show sizes in square metres (m²) throughout.
- Take every location label from one field.
- Label renders “Artist’s impression”.
- Keep descriptions factual. Avoid unverifiable promotional adjectives; long amenity lists are capped and drawn from the catalogue.
- Project and unit pages link to paid market analytics for that property. Free return projections and forecasts are not shown on the page itself.
- No urgency devices (“only X left” messages, countdown timers).
- **Public counts:** views, saves and stage counts are shown publicly on listing and project pages (RQS-06 §5.4). Profile pages show none of them.
- **Sponsored and Featured:** “Sponsored” marks paid promotion; “Featured” marks REALTIQ’s editorial selection.
- Sales only: no rental, lease or tenancy wording or calls to action anywhere.

22. REVIEWS, RATINGS AND QUESTIONS

- **Two separate systems.** Project reviews, comments and ratings live on the project page; developer reviews, comments and ratings live on the developer page. They are never mixed.
- **Who can review a project:** only verified users with a recorded interaction with the project on the platform — those who **bought** and those who **almost bought**. This keeps out competitors, neighbours and friends of the developer. “Almost bought” means the user reached an advanced step without completing, such as a negotiation opened with the developer, a viewing attended, or a checkout started; simple page views or saves do not qualify. Each review shows a badge: “Verified buyer” or “Verified enquirer”.
- **Rate different things by stage.** Before handover: communication, documentation and payment handling. After handover, add build quality, finishing and whether delivery matched what was promised. Build-quality ratings come only from verified buyers who received their unit.
- **Placement:** compact rating summary near the header; full reviews lower on the page. An average is shown only after at least **2** qualifying reviews.
- **Comments as moderated questions and answers:** any signed-in user can ask; the developer answers publicly.
- **Developer right of reply** on reviews, and a clear moderation policy. Rules on publishing reviews and handling complaints vary by jurisdiction.
- Upheld escrow disputes against a developer (Section 16.1) are a useful input to developer reviews.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

23. LINKS INTO THE PROJECT PAGE

The homepage is outside this specification. The project page supports these entry points:

- **Project cards** (wherever projects are listed, for example search results) show: cover image, small project logo, name, area, build stage and handover month, price range, unit types, “X of Y units available” and the “Developer project” label.
- **Direct link to the unit cards:** a project card or link can open the project page scrolled to “Units in this development”.
- **Search that matches a project:** the result card works as the Project & Unit Onboarding Specification (RQS-02) §6 describes — “12 of 140 units match”, “View matching units” expanding a list grouped by unit type, each row opening that unit’s page, and a single match linking straight to the unit — **and** adds an “Open project page” link that keeps the search filters. Search cards count matching units; the project page counts available units.
- **Developer name and logo** link to the developer’s own page (RQS-07).
- **Resale listings** by individual owners can link back to the project page (Section 2.3).

24. MOBILE AND ACCESSIBILITY

- Mobile action bar with Book a viewing and Message [seller type] fixed at the bottom of the screen.
- **Light and dark themes:** users choose Light, Dark or Match device in their account settings (default: Match device). Every colour, including the Verified badge, trust tier, status labels and freshness labels, meets contrast ≥ 4.5:1 in both themes (RQS-03 §4.4).
- Timeline graphic switches from horizontal to vertical on phones.
- Unit cards offer a compact list/table view so large projects remain usable on small screens.
- Compare works on phones as described in the Property Comparison Specification (RQS-05) (two-column view).
- **Accessibility: the page follows WCAG 2.1 level AA**, a widely used international guideline that makes websites usable by people with disabilities. In practice this means:
- Every photo, render, floor plan, site plan and map has a short text description, so screen-reader apps (which read the page aloud for blind or partially sighted users) can describe it.
- Status is never shown by colour alone: “Available”, “Under Offer” and “Sold” are written in words, and the timeline states “Completed”, “Current” and “Upcoming” in text.
- Text and buttons have enough contrast against their background to be readable, including for colour-blind users.
- Every button, filter, gallery, map control, picker and form can be reached and used with a keyboard alone, with a visible highlight showing where the user is.
- Videos (walkthroughs, progress videos) offer captions where speech carries information.
- Pages still work when text is enlarged, and on small screens without sideways scrolling.
- Forms (messages, viewing bookings, multi-unit picker, checkout) have clear labels and plain error messages.
- The same applies to the seller-developer dashboard and the escrow verification room.

25. DEPENDENCIES AND ITEMS FOR LOCAL REVIEW

25.1 What the page depends on

- The project and unit onboarding flow (built): unit types, units, build stage, milestones, handover month, media sections, payment options, service charge, title declarations, viewing options.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- Document vault and document requests; tour booking; in-platform messaging; notifications.
- Property comparison (RQS-05); instalments; escrow and the new verification room and portals.
- The developer page (RQS-07), the existing market analysis tools and REALTIQ's verified independent professionals network.

25.2 Pre-release legal checks for each state

- How escrow funds may be held and released, and the role of the payment partner.
- Appointment and liability of independent agents.
- Publishing reviews and comments, moderation and complaint handling.
- Required disclosures in property advertising (for example title status, approvals, developer registration, refund terms).
- Whether survey plans may be displayed; they are kept in the document vault by default.
- Wording of the fraud and misrepresentation recovery clause and of verification labels.
- Taxes and duties (RQS-08 Section 13).

26. HOW WE WILL KNOW THE WORK IS COMPLETE

Area	Done when
Quick reference items	Every item in Section 1 appears in the stated order, and any item without data is hidden rather than empty.
Consistency	Counts, price ranges and availability always match the unit cards; a project with no published units never shows units as available.
Internal statuses	"Published" and other internal statuses never appear on buyer-facing pages.
Branding	Project logo (or name as text) shows in the header; developer logo shows smaller in the developer card; both name and logo open the developer page.
Unit count	A one-unit project shows a single price, "1 of 1 available", one unit card with Add to compare, and no multi-unit enquiry; nothing else changes.
Build stage	The eight official build stages drive the emphasis in Section 7.3; Uncompleted building and Semi-finished show a handover date when they will be completed, or "Sold as is" otherwise; stage can be shown per unit or phase.
Progress and key dates	Progress track shows completed, current and upcoming states; each completed step opens dated evidence; the Key dates panel shows launch, start, duration, current and next milestone and handover; revised dates show both original and new target; units or groups with their own schedule show their own track and dates; nothing is shown for completed projects or units.
Unit cards	Developer can choose grouped or individual display; large projects have filters, list/table view and paging; sold units are greyed; View details opens the unit listing page; Add to compare works.
Communication	No phone numbers or emails anywhere on the page; Message developer, Book a viewing and Request documents all work in-platform.
Multi-unit purchase	A buyer can select units (specific or by quantity per type), open one thread, negotiate per unit or one term for all, lock per-unit terms, and pay once at a fixed amount; one receipt per unit plus a summary receipt are issued.
Escrow room	A room is created automatically; agents see only their conditions and never see amounts; negotiation messages are not visible in the room; private channels to REALTIQ work; nothing can be edited or deleted.
Escrow at scale	A shared milestone claimed once releases to all linked escrows after the objection window, except listed exceptions; each release is recorded per unit.
Disputes	Disputes require a reason and evidence; triage outcomes follow Section 16.1; REALTIQ decisions are recorded and final.
Freshness	The one-button "Nothing has changed" confirmation works for the whole project, groups and single units, and records a date per unit; monthly reminders,

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Area	Done when
	event triggers, the amber “Needs confirmation” tag, the about-90-day banner with checkout paused, and the staleness ranking factor all work; stale listings stay visible and are never shown grey.
Reviews	Only verified users who bought or almost bought can review, with the right badge; project and developer reviews never appear together; the average appears only after 2 qualifying reviews.
Mobile	Action bar is fixed on phones; timeline is vertical; unit list view is usable.
Wording	All buyer-facing text is UK English, sales-only, and follows Section 21.
Property categories	Flats & Apartments, Houses, Commercial Buildings and Mixed Use units each show the details in Section 7.4; no “0 Beds” on commercial units; mixed-use projects group or filter units by category.
On-platform only	Phone numbers, emails, messaging handles and outside links typed into messages are blocked, with an explanation to the sender.
Accessibility	The page, dashboard and escrow room meet WCAG 2.1 level AA, including the points in Section 24.
Team access	An account holder can invite staff, assign a standard or custom role, remove access, and see who did what; seats are counted for billing.
Verified badge	The badge appears only on verified information, looks the same everywhere, includes the word “Verified”, shows “Verified by REALTIQ” details on hover or tap, and links to the verification policy.
Seller-developer dashboard	Every dashboard area in Section 18 exists and feeds the project page item it supports (Section 1).

27. NOTES FOR OTHER PARTS OF THE PLATFORM

Team access, the Verified badge, on-platform messaging, the escrow room, multi-property payment allocation, the nudge ladder, accessibility and reviews described in this document apply across REALTIQ, not only to projects. RQS-06 governs where it says more.

27.1 User types and portal titles

User classes, account types and portals follow RQS-06 §2. One email can hold several profiles, with a profile switcher.

Group	User types	Portal title
Buyers	Individual buyer (in Nigeria or abroad); corporate buyer; cooperative buyer	My Portal. The page heading shows the account name, for example “Okoro Holdings Portal”
Sellers	Individual owner	Seller Portal
Sellers	Agent, agency or broker	Agency Portal
Sellers	Developer (a registered company). Only developers create projects	Developer Portal
Third parties	Legal Partner; Engineering & Survey Partner; Inspection Partner; Valuation Partner; Buyer’s Agent; Seller’s Agent. Mortgage Partner: reserved, not active until a lender partner is live	Partner Portal, with the role label shown, for example “Partner Portal · Inspection Partner”
REALTIQ staff	Department roles	REALTIQ Console
Guests	Not signed in	No portal

- Valuers are a user type at launch; mortgage lenders and banks come later. Buyer’s Agent and Seller’s Agent are Partner Portal roles (RQS-06 §9).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- **Buyer portal name:** use “My Portal” in menus and buttons, where space is short and the wording is the same for everyone; show the account name as the heading inside the portal (for example “Okoro Holdings Portal” or “Adaeze Nwosu Portal”). This applies to individuals and companies alike.
- Team seats with standard and custom roles are available in the Seller, Agency, Developer and Partner portals, and to corporate and cooperative buyers (Section 18.2).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

27.2 Social content, following, themes and reporting

These features apply across the platform, in every portal and on public pages.

- **Follow accounts:** Registered users can follow developers, agencies and agents, Partner Portal professionals, and owners who choose a public profile — like following an account on a social app. Projects can also be followed (Save / Follow). Buyers choose whether they can be followed (Settings › Profile visibility; default: not followable). A buyer who has not opted in cannot be followed and never appears in follower lists.
- **Following and Explore:** My Portal has a Following page showing new listings, project updates (construction progress, new units, price changes, open houses and show homes) and posts from followed accounts, newest first, and an Explore page of recommended real-estate posts by area, property type and topic, shaped by the listings the user views and saves and the posts and accounts they like (RQS-06 §17.7). Updates also reach followers by notification, following each user's notification settings (RQS-06 §17.3).
- **Social content:** sellers (owners with a public profile, agents and agencies, developers) and third parties (Partner Portal professionals) can publish the real-estate content they would post on Instagram or TikTok: photo posts and carousels; short videos; property and project walkthrough clips; construction progress updates; open house and show home announcements; new listing and price-change announcements; market commentary, tips and guides; professional explainers (for example legal, survey or valuation tips); behind-the-scenes and team content; and client stories with the client's consent. Content must relate to property sales and related services — no rentals, leases or short lets. Buyers do not publish posts.
- **Post media:** photos in JPEG, PNG, HEIC or WebP; carousels of up to 10 items, mixing photos and videos; short videos of up to 90 seconds; walkthrough clips of up to 3 minutes; videos in MP4 or MOV, up to 500 MB per file; aspect ratios 9:16 (preferred), 4:5, 1:1 and 16:9. The author chooses a cover image for each video, and videos offer captions where speech carries information (Section 24). These are default values; REALTIQ sets them in the Console (RQS-06 §19).
- **In-feed playback:** videos play muted and loop once at least half of the video is on screen; a tap turns sound on. Users choose "Autoplay videos" in Settings: Always, Wi-Fi only (default) or Never. Uploads are checked against the post media limits, and videos are converted for adaptive playback.
- **Posting rules:** a post can tag a listing, unit or project and links to its page; captions and hashtags are supported; posts can be scheduled. Phone numbers, email addresses and outside links are blocked. Each post shows the account's Verified badge and trust tier; paid promotion is labelled Sponsored. Sellers, agencies, developers and third parties can promote posts (RQS-06 §17.2, §17.5). REALTIQ moderates posts and comments, and reports go to Trust & Safety.
- **Engagement:** signed-in users can like, comment on, save and share posts (sharing uses REALTIQ links). Contact details in comments are blocked; authors can delete comments on their posts or turn comments off. A like is also an interest signal that shapes the user's Explore page; liking a post does not follow its author (RQS-06 §17.7). Guests can view public posts and profiles.
- **Profiles:** public profile pages show the account's listings, a grid of its posts, follower and following counts, Verified badge and trust tier, with Follow and Report account actions. Following is one-way and never shares contact details; users can unfollow at any time.
- **Report account:** any signed-in user can report an account, a listing, a post, a comment, a review or a message, choosing a reason: fraud or scam; fake or misleading listing; impersonation; harassment or abuse; asking to deal off the platform or sharing contact details; spam; other (with details). Reports go to Trust & Safety in the REALTIQ Console as cases (RQS-06 §19.2). The reporter is never shown to the reported account; the reporter sees the case status. Outcomes include no action, warning, content removal, suspension and blacklist (RQS-06 §16.4).
- **Themes:** Light, Dark and Match device are available on every page and portal (Section 24).

PART 2 OF 8 · RQS-02

REALTIQ Project & Unit Onboarding Specification

How a developer sets up a development and its units so that every unit is accurate, searchable and ready to sell.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

QUICK REFERENCE — PROJECT AND UNIT ONBOARDING, STEP BY STEP

Only developer accounts create projects, from Projects › Create Project. A project may have one unit or many. Set-up runs in eight steps, each saved automatically as a draft; every answer feeds a buyer filter in RQS-03 or is marked Operational or Descriptive. Section 4 gives every question.

Step	What the developer does	Key fields	What it drives for buyers
1. Project basics	Names and describes the development, adds the project logo, FAQs and the unit display choice	P1–P9	Keyword search; project branding; Listed By (Developer); grouped or individual unit cards
2. Location	Picks State → LGA → Area from the gazetteer, says whether it is a gated estate, pins the map, records access roads and nearby places	L1–L9	Location hierarchy and typeahead; map and commute search; Access Road Condition
3. Status and delivery	Sets the project's default build stage, milestone, handover month, launch, construction start and milestone targets	D1–D6	Build Stage; Ready to Move In; Handover Delivery Stage and Window; progress track and Key dates
4. Shared facts	Estate facilities (Delivered or Planned), serviced status, service charge, root title, payment options, escrow and payment templates	S1–S8	Amenities (strict AND); Serviced; Maximum Service Charge; Declared Title Documents; Payment Type; Escrow Available
5. Unit types	Describes each type once — category, property type, quantity, rooms, sizes in m², style, price, currency, reserve price, overrides, commercial details — and generates its units	T1–T26	Property Type; Beds & Baths; sizes; furnishing; parking; price filters and sorts; comparison rows
6. Units	Reviews generated units; sets unit IDs, availability, occupancy, price and other overrides, floor level	U1–U5	Listing Availability; Occupancy Status; unit-level price history
7. Project media and viewing	Uploads media into dedicated sections with access levels; sets open houses, appointments, live video and show homes	M1–M11, V1–V4	Media and tour filters; media tab; viewing panel
8. Review and publish	Checks search readiness, fixes blockers, publishes ready units or saves a draft	R1	Only complete units go live

After set-up, the project dashboard (Section 7) shows progress, search readiness and what missing data does to publishing and filtering. Bulk entry — unit-type cards, a units grid and spreadsheet import — uses the same field list (Section 5).

KEY DECISIONS AT A GLANCE

Topic	Decision	Section
Data model	Unit-type-first hybrid: unit types generate units; each unit is its own searchable record with effective values (unit → unit type → project).	2
Who creates projects	Developer accounts only. Listed By is set automatically to Developer from the verified account.	3, 4
Entry methods	Unit-type form, unit cards and a units grid with import all read and write the same records; the developer can switch at any time.	2, 5
One vocabulary	Onboarding, bulk grid, import template and buyer filters share one field dictionary with RQS-03 labels.	4, 9
Location	State → LGA → Area from REALTIQ's gazetteer; unlisted areas are matched to the map provider or reviewed. One project pin; unit positions go on the site plan.	4, 9
Build stage and handover	Eight build stages; handover is a month and year set once and overridden only where a unit type or unit differs.	4
Amenities	The 44-item catalogue, split into estate facilities (S1, marked Delivered or Planned) and unit features (T16). No free-text	4

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Topic	Decision	Section
	amenities.	
Measurements	Square metres only; values in square feet are rejected, never converted. Plots are not a unit.	4, 9
Prices	NGN or USD, optional second price in the other currency; reserve price required and private; actual sale price captured automatically and private.	4
Escrow and fees	Escrow is optional and separate from payment type. Payment templates state who pays the REALTIQ transaction fee: buyer, seller or split, default 50/50.	4
Media	Dedicated, titled upload sections; each item carries an access level (Free, Paid, On request, Private). The master plan or site plan is always public.	4
Search matching	A project matches a search only when one of its units meets every active filter; result cards show matching-unit counts and ranges.	6
Publishing	Missing property type, location, price or POA, build stage, availability, off-plan milestone and handover, or residential rooms block publishing; other gaps only limit filters.	7
Scale	Hundreds of units: progressive grid loading, background imports and bulk edits with a result summary and one-step undo.	5.4

Option lists marked “Spec” use the exact labels defined in RQS-03, so onboarding and filters share one vocabulary. This specification uses the buyer filters in RQS-03 (§3–§5) as the target and adds no buyer filter that RQS-03 does not define.

Data levels: Project = true of the whole development. Unit type = a template shared by a group of identical units. Unit = one saleable home or space. A unit’s searchable value is its effective value: the unit’s own value if set, otherwise its unit type’s, otherwise the project’s.

1. CHANGES FROM THE CURRENT CREATE PROJECT FORM

The current Create Project page is a single long form with three panels and one submit button. It captures development-wide information only and has no step for unit types, quantities, prices or availability, so nothing a buyer filters on at unit level can be captured. The table lists each current field and the gap this specification closes.

Current fields

Current label or text	Control	Current behaviour	Gap this specification closes
Create Project — “REALTIQ automatically assigns this project to your signed-in developer account.”	Page title and helper	Project ownership comes from the signed-in account	Listed By (Real Estate Agent; Primary Developer; Direct Property Owner) is not asked; the account type that sets it is not shown
PROJECT NAME	Text	Empty	Also the natural source for the Gated Estate tier of the location gazetteer when the project is an estate; no link is shown
DEVELOPER NAME	Text	Empty	Free text; descriptive only. Separate from Listed By
PROJECT TYPE	Dropdown	Shows “estate”; other options not visible	The specification states “Estate” is not a property type but a development container (§2.3). The field should describe development structure, not property type
SHORT DESCRIPTION; DESCRIPTION	Text; multi-line text	Empty	Feed Full-Text Keyword Search. Adequate
ADDRESS	Text	Placeholder “Street address or estate address”	Display/operational only; not a search tier

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Current label or text	Control	Current behaviour	Gap this specification closes
STATE	Dropdown	“Select state”	Matches the State tier. Options not visible
CITY	Dependent dropdown	“Select state first”	The specification’s tier is LGA, not City. A City list cannot populate the LGA tier reliably
AREA	Text	Placeholder “Neighbourhood or district”	Free text; spelling will vary, so the Area tier and location typeahead will miss projects
LATITUDE; LONGITUDE	Number	Placeholders “e.g. 6.4401”, “e.g. 3.5104”	Supports map search and Travel Radius; manual entry is error-prone; no map pin
AMENITIES; FEATURES	Free-text tag entry + Add	Empty	Not linked to the 44-item amenity catalogue, so amenity filters (strict AND) cannot match reliably. Difference between “amenities” and “features” is not defined
LAUNCH DATE; EXPECTED COMPLETION DATE	Date pickers (dd/mm/yyyy)	Empty	Completion is day-level and project-wide; the specification filters on month/year handover and allows units or phases to differ. No Build Stage or construction milestone
PROJECT MEDIA — “Images and videos supported”; “The first uploaded media item is used as the cover image.”	Single upload zone	Empty	One shared zone; floor plans, drone footage, aerial photographs and access-road media cannot be distinguished, so media filters and badges cannot work
Create Project	Primary button	Single submit	No save-as-draft or next step visible

Effect on search today

- Buyers can find a project only by keyword and by State. LGA, Area and Gated Estate location tokens cannot match reliably.
- Every search-critical unit attribute — property type, bedrooms, price, floor area, build stage, availability — has no capture path, so the project cannot answer any unit-level filter.
- Free-text amenities and a single media zone mean amenity, floor-plan, video, 3D-tour and drone filters would return incomplete or wrong results.

2. INTERACTION MODEL

Model: a unit-type-first hybrid. Every project is built from unit types (templates) that generate individual units. Developers can work in three interchangeable views — a guided unit-type form, individual unit cards, and a units grid with import — because all three read and write the same records and the same field list.

Entry method	How it works	Best for	Trade-off	Role in the model
Individual entry	One form per unit	2–5 units that each differ	Slow and repetitive beyond a handful of units; easy to enter the same thing inconsistently	Offered as “Add a single unit” — creates a unit type of quantity 1 behind the scenes, so data stays in the same structure
Unit-type grouping (default)	Describe a type once (e.g. “Type B — 4-Bed Semi-Detached Duplex”), set a quantity, units are generated	Most estates and apartment blocks	Needs a clear way to record the few units that differ	The default path for every project; exceptions are handled as unit-level overrides
Bulk grid and import	Spreadsheet-style grid of all units; XLSX/CSV import from a template	50+ units, or developers who already track inventory in a	Import errors must be fixed row by row; needs strong validation	Available at any time from the Units step; never the only way in

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Entry method	How it works	Best for	Trade-off	Role in the model
	generated from the same field list	spreadsheet		

Unit records: each unit is its own searchable record. It inherits shared values from its unit type and project but can override any of them. Search evaluates each unit's effective values, so a project never claims one price, bedroom count or build stage for units that differ.

Small vs large: the flow asks for an approximate unit count early. Up to 10 units (default threshold, adjustable by the product developer) opens the unit-type form with individual cards visible; above 10 it opens the unit-type form with the grid and import offered. Either path can switch views at any time without losing data.

3. END-TO-END FLOW

The developer has already chosen to create a development and has arrived at Projects › Create Project. There is no listing-kind step. The flow runs in eight steps, each saved automatically as a draft. Only developer accounts can create projects; a project may have one unit or many.

Step	Name	What the developer does	Small project (≤ 10 units)	Large or varied project
1	Project basics	Names the project, describes the development structure and writes descriptions (P1–P6); adds the project logo, FAQs and unit display choice (P7–P9)	Same	Same
2	Location	Picks State → LGA → Area, says whether it is a gated estate, sets the map pin and access-road condition (L1–L7); adds nearby places (L9)	Same	Same
3	Status & delivery	Sets the default build stage, construction milestone and projected handover (D1–D4), construction start and milestone targets (D1a, D5–D6)	Usually one set of values for all units	Defaults here; phases or unit types that differ override them in step 5
4	Shared facts	Estate amenities, serviced status, default service charge, root title documents, default payment options (S1–S7) and payment templates (S8)	Same	Same; items that apply only to some blocks are left to unit types
5	Unit types	Adds each unit type: property type, quantity, rooms, sizes, price, overrides, media (T1–T19, M7–M10); commercial fields (T20–T26)	Typically 1–3 types; "Add a single unit" for one-offs	Many types; can switch to the grid or import at any point
6	Units	Reviews generated units, sets unit IDs, availability and exceptions (U1–U5)	Card list of every unit	Grid with filters, bulk edit and import
7	Project media & viewing	Uploads project-level media into dedicated sections and sets open house, show home, private showings and live video (M1–M6, V1–V4)	Same	Same
8	Review & publish	Checks the search-readiness summary, fixes blockers, publishes all ready units or saves as draft	One-page review	Review grouped by unit type, with counts of ready and blocked units

Switching views: from step 5 onwards a view switcher offers "Unit types", "Units (cards)" and "Units (grid)", plus "Import units". Editing a unit in any view updates the same record; editing a unit type updates every unit of that type that has not overridden the field, after showing how many units will change.

4. ONBOARDING QUESTIONS

Questions appear in this order. The last column names the specification filter each answer feeds; Operational or Descriptive marks questions that do not feed a filter. Option lists marked Spec use the specification's exact labels so onboarding and filters share one vocabulary.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Step 1 — Project basics

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
P1	What is the project called?	Identifies the project; seeds the estate name	Text	Yes	—	Ocean Crest Estate	Project	Full-Text Keyword Search; seeds Gated Estate tier via L5
P2	Listed by	Advertiser type for search	Set automatically to Developer from the verified developer account; not editable	Yes	—	Developer	Project	Listed By (Entity)
P3	Developer name	Shown on the project page	Taken from the verified developer account; links to the developer page	Yes		Crest Homes Ltd	Project	Descriptive (keyword search only)
P4	What kind of development is this?	Replaces PROJECT TYPE “estate”; drives later questions	Single-select. Estate / gated community; Apartment building; Mixed-use development; Commercial complex; Other. A project may contain units of any use (shops, offices, flats); each unit shows its own type	Yes	Estate / gated community pre-answers L4 = Yes	Estate / gated community	Project	Operational — not a buyer filter; Estate / gated community creates the Gated Estate location entry
P5	Short description (one line)	Card headline	Text, maximum length set by REALTIQ in the Console	Yes	—	24 duplexes and terraces in Lekki	Project	Full-Text Keyword Search
P6	Describe the development	Detail page	Multi-line text	Yes	—	—	Project	Full-Text Keyword Search
P7	Project logo	Project branding on the project page	Image upload; formats and minimum size set by the product developer. If none, the project name shows as text	No	—	—	Project	Descriptive
P8	Frequently asked questions	Answers repeat buyer questions	Repeatable question-and-answer pairs	No	—	—	Project	Descriptive
P9	How should units appear on the project page?	Unit card display	Single-select: Grouped by unit type; Individual units. The system suggests one; the developer can change it	Yes	Suggest grouped when units in a type are identical	Grouped by unit type	Project	Operational

Step 2 — Location

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
L1	State	Location tier 1	Dependent single-select. Spec: 36 states + FCT Abuja	Yes	Parent of L2	Lagos	Project	Location Hierarchy (State); Browse by State / Region
L2	Local Government Area (LGA)	Location tier 2; replaces CITY	Dependent single-select from the search gazetteer	Yes	Filtered by L1; cleared when L1 changes	Eti-Osa	Project	Location Hierarchy (LGA)
L3	Area	Location tier 3; replaces free-text AREA	Dependent single-select from the gazetteer; if the area is not listed, it is typed and matched to the Mapbox location identifier; non-matches go to	Yes	Filtered by L2	Lekki	Project	Location Hierarchy (Area)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
			REALTIQ review					
L4	Is the development a gated estate, or inside one?	Decides whether the Gated Estate tier applies	Single-select: Yes; No	Yes	Pre-set by P4; Yes shows L5	Yes	Project	Location Hierarchy (Gated Estate tier)
L5	Estate name	Location tier 4	Select from gazetteer or create new (defaults to P1)	If L4 = Yes	Shown when L4 = Yes	Ocean Crest Estate	Project	Location Hierarchy (Gated Estate); Location Autocomplete
L6	Street address	Directions and display	Text, with optional map-provider address suggestions	Yes	Shown publicly so the location can be found; REALTIQ adds the Verified badge once it has checked the address against the pin and documents	Plot 5, Admiralty Way	Project	Operational — not a filter
L7	Pin the development on the map	Map and commute search	Pin set from an address suggestion, by dropping a pin, or by typing coordinates	Yes	Values must fall inside Nigeria	6.4401, 3.5104	Project	Search as I Move the Map; Interactive Map Viewport; Travel Radius / Commute
L8	Condition of the access road (tick all that apply)	Road access signal	Multi-select. Spec: Tarred; Untarred; Flood-prone; Sand-filled area	Yes	—	Tarred	Project	Access Road Condition
L9	Nearby places	Location context on the project page	Repeatable: place name; type (school, hospital, market, transport and so on); distance or travel time	No	Hidden on the page if empty	Lekki Phase 1 market, 5 min	Project	Descriptive

Step 3 — Status and delivery (project defaults)

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
D1	What stage is the development at?	Default build stage for all units	Single-select. Spec: Off-plan; Under construction; Uncompleted building; Semi-finished (Advanced Shell / Lock-up); Newly built; Renovated; Previously owned; Old	Yes	Off-plan or Under construction shows D2 and D3; Uncompleted building or Semi-finished shows D1a. Unit types and units may override	Under construction	Project default → unit type → unit	Build Stage Lifecycle; Ready to Move In
D1a	Will it be completed before handover?	Separates buildings being finished from those sold as is	Single-select: Yes; No	If D1 is Uncompleted building or Semi-finished	Yes → D2 and D3 required and the progress track is shown. No → listed “Sold as is”, no handover date	Yes	Project default → unit type → unit	Build Stage Lifecycle (“Sold as is” is a label, not a filter value)
D2	Which construction milestone has been reached?	Default milestone	Grouped single-select. Spec: 5 phases, 16 milestones (Site Preparation & Substructure … Handover)	If D1 is Off-plan or Under construction, or D1a = Yes	Hidden and cleared otherwise. The month each milestone is reached is recorded automatically	Carcass › Roofing / Parapet	Project default → unit type → unit	Handover Delivery Stage

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
D3	When do you expect to hand over?	Replaces EXPECTED COMPLETION DATE	Month / year picker, not before the current month	If D1 is Off-plan or Under construction, or D1a = Yes	One month per level: set for the project and overridden only where a unit type or unit differs; the project page shows a range when units differ. Earlier dates are kept when revised	DEC-2027	Project default → unit type → unit	Handover Delivery Window; Handover Date: Soonest
D4	Launch date	Marketing context	Date (existing field)	No	—	OCT-2026	Project	Descriptive — not a filter (Added to Site uses the publish date)
D5	When did (or will) construction start?	Key dates; planned duration	Month / year, or “Not started”	If D2 is shown	Planned duration is calculated from D5 and D3	OCT-2026	Project default → unit type → unit	Descriptive
D6	Target dates for upcoming milestones	Progress track and key dates	Month / year per remaining milestone	No	Revised targets keep the original visible	Finishing — SEP-2027	Project default → unit type → unit	Descriptive

Step 4 — Shared facts

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
S1	Which estate facilities does the development have?	Shared amenities	Checkboxes from the Spec catalogue, estate-level items first (e.g. Gated Access Estate; 24/7 Uniformed Security / Access Post; CCTV Surveillance; Swimming Pool; Fully Equipped Gym; Estate Clubhouse; Children’s Play Area; Central Water Treatment Plant; Dedicated Transformer; Shared / Estate Parking). Each ticked facility is marked Delivered or Planned	No	Replaces free-text AMENITIES and FEATURES	Gated Access Estate; CCTV Surveillance; Swimming Pool	Project (inherited by every unit)	Deep Features & Amenities Catalogue (strict AND)
S2	Is this a serviced development?	Managed-estate signal	Single-select. Spec: Serviced; Not Serviced	Yes	Unit types may override	Serviced	Project default → unit type	Serviced Property
S3	Default annual service charge	Running-cost signal	₦ per year, whole number, or “No service charge”	If S2 = Serviced	Unit types may override (charges often vary by size)	₦1,200,000	Project default → unit type	Maximum Service Charge
S4	Which title documents cover the development?	Root title	Multi-select. Spec: C of O; Global C of O; Governor’s Consent; Deed of Assignment; Deed of Sub-Lease; Letter of Allocation; Registered Survey; Excision; Gazette; Approved Building Plan; R of O	Yes	Uploads go to the private vault	Global C of O; Approved Building Plan	Project	Declared Title Documents
S5	Which payment options do buyers have?	Default payment terms	Multi-select. Spec: Outright Purchase; Instalment Plan; Mortgage Accepted. Mortgage Accepted is hidden until a Mortgage Partner is active	Yes	Instalment Plan shows S6–S7; unit types may override	Outright Purchase; Instalment Plan	Project default → unit type	Payment Type
S6	Longest instalment period (months)	Default tenor	Whole months > 0	If Instalmen t Plan	—	24	Project default → unit type	Instalment Duration

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
S7	Initial deposit at signing (% of price)	Default deposit	0–100%	If Instalmen t Plan	—	30	Project default → unit type	Initial Deposit Cap
S7a	Do you offer REALTIQ escrow to buyers?	Buyer fund protection	Yes / No, chosen per payment type: on Outright, on Instalment, or both. Helper: the buyer's funds are held by REALTIQ's licensed payment partner until the transaction's specified conditions are met	No	Unit types may override. Escrow stays optional; escrow is a protection layer, not a payment type	Yes	Project default → unit type	Escrow Available
S8	Payment templates	Terms buyers negotiate from	Per project or unit type: instalment schedule (optionally tied to milestones such as DPC); escrow release conditions (if S7a = Yes); which terms buyers may negotiate; late-payment grace period and remedies; bundle-discount clause; default objection window; optional dispute threshold; refund and cancellation terms (full refund; refund less a percentage; seller's choice within a REALTIQ cap; seller-defined schedule); default threshold and remedy; penalty rate and method; optional REALTIQ thresholds; REALTIQ transaction fee payer (buyer; seller; or split, default 50/50 — the payer and ratio can be changed for each transaction; RQS-08 Section 7)	No	Unit types may override	Instalments: 30% at signing, 40% at DPC, 30% at handover	Project default → unit type	Operational — feeds negotiation and escrow (RQS-01)

Step 5 — Unit types (repeat for each type)

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
T1	Roughly how many units does the project have?	Chooses the starting view	Number	Yes	≤ 10 opens cards; > 10 opens grid	120	Project	Operational
T2	Name this unit type	Groups identical units	Text	Yes	Unique within the project	Type B — 4-Bed Semi-Detached	Unit type	Descriptive (shown on the project page)
T3	Property category	Parent of T4	Single-select. Spec: Flats & Apartments; Houses; Commercial Buildings; Mixed Use	Yes	—	Houses	Unit type	Property Type (category header)
T4	Property type	Exact type	Dependent single-select from the 41 Spec types for T3	Yes	Terraced House or Townhouse shows T13; Commercial Buildings makes T6–T9 optional and shows T20–T26	Semi-Detached Duplex	Unit type	Property Type
T5	How many units of this type?	Generates units	Whole number ≥ 1	Yes	Reducing below the number of sold units is blocked	16	Unit type	Operational (drives unit counts)
T6	Bedrooms	Room count	Whole number ≥ 0, blank default	Yes for residential	Optional for Commercial Buildings	4	Unit type → unit	Bedrooms Boundary; Exact Bedrooms

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
								Match; Bedrooms: Most
T7	Full bathrooms (toilet, basin and bath or shower)	Room count	Whole number ≥ 0	Yes for residential	Optional for Commercial Buildings	4	Unit type → unit	Full Bathrooms
T8	Dedicated powder rooms (guest toilets)	Room count	Whole number ≥ 0	No	—	1	Unit type → unit	Dedicated Powder Rooms (Toilets)
T9	Does every bedroom have its own en-suite?	Room signal	Single-select: Yes; No	No	Shown when T6 ≥ 1	Yes	Unit type → unit	All Rooms En-Suite
T10	Internal floor area (m²)	Size — living or usable space across all floors	Number > 0, m²; values in square feet are rejected	Yes	—	280	Unit type → unit	Internal Floor Area; Floor Area: Largest
T11	Built-up area (footprint) of this unit (m²)	Size — ground the unit's building covers; for attached units, this unit's own footprint	Number > 0, m²	No	—	90	Unit type → unit	Building Area (compares this unit's own footprint)
T11a	Built-up area of the whole building (m²)	For attached units sharing a lot (e.g. a 4-unit townhouse block): footprint of all units together	Number > 0, m²	If units are attached on a shared lot	Buyers see both, e.g. "Your unit: 90 m² · Whole building (4 units): 360 m²"	360	Unit type or phase / block	Descriptive
T12	Plot size (m²)	Land the property sits on	Number > 0, m²	All properties that sit on land	For flats labelled "Site area (shared)"	1,200 (lot shared by 4 townhouses)	Unit type → unit	Plot Size of Property
T12a	Unbuilt area (m²)	Yards, parking, garden	Calculated: plot size minus built-up area (whole-building footprint on a shared lot)	Automatic	—	840	Unit type → unit	Descriptive
T13	How many floors?	Terrace height	Whole number ≥ 1	If Terraced House or Townhouse	Hidden otherwise	3	Unit type	Number of Floors (Terraces)
T14	Furnishing	Condition	Single-select. Spec: Furnished; Semi-Furnished; Unfurnished	Yes	—	Unfurnished	Unit type → unit	Furnishing Status
T15	Parking spaces per unit	Parking	Whole number ≥ 0	Yes	—	2	Unit type → unit	Dedicated Parking / Garage
T16	Which features does this unit type have?	Unit amenities	Checkboxes from the Spec catalogue, unit-level items first (e.g. Boys' Quarters (BQ); Maid's Room; Fitted Kitchen; Study / Home Office; Balcony / Terrace; Solar / Inverter System)	No	Combined with S1 for each unit	BQ; Fitted Kitchen	Unit type → unit	Deep Features & Amenities Catalogue (strict AND)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
T16a	What is the architectural style of this unit type?	Design style	Single-select from a fixed list; if the style is not listed, type it in. Styles come from REALTIQ's fixed style list (Architectural Style List, RQS-03 §3.2)	No	Units may override; typed styles are shown but not filterable. Set in bulk per unit type; may also be mentioned in P6	—	Unit type → unit	Architectural Style
T17	List price per unit	Default price	Whole number ≥ 0 in the price currency (T17a), or tick "Price on Application"	Yes (price or POA)	Units may override (e.g. corner plots)	₦185,000,000	Unit type → unit	Min & Max Price; Popular Price Ranges; Include Unpriced Listings; price sorts
T17a	Price currency	Currency of the list price, reserve price and actual sale price	Single-select: NGN; USD	Yes	Units inherit the unit type's currency. A USD list price may be payable in NGN at a rate both parties confirm in the platform before each payment (RQS-08 Section 7.3)	NGN	Unit type → unit	Min & Max Price (indexed under the Currency & Valuation Engine Rule); Listing Currency & Buyer-Visible Pricing
T17d	Second list price in the other currency (optional)	Seller's stated price in NGN or USD	Whole number ≥ 0 in the other currency (NGN and USD only)	No	Shown as the seller's stated price, separate from REALTIQ's conversion	$120,000	Unit type → unit	Descriptive
T17b	Reserve price per unit	Lowest acceptable price	Whole number in the price currency, ≥ 0	Yes	Must not exceed the list price (T17 / U3); may equal it. Units may override; never shown to buyers or used in results, filters or sorting. Private to the seller: not viewed by REALTIQ staff; used only in aggregated analytics	₦170,000,000	Unit type → unit	None — private seller data; buyers see only the list price (T17 / U3)
T17c	Is the list price negotiable?	Price flexibility	Single-select: Yes; No	Yes	Units may override	Yes	Unit type → unit	Price Negotiable
T18	Do these units differ from the project's status, service charge or payment terms?	Overrides for phases or types	Yes / No; Yes reveals D1–D3, S2–S3 and S5–S7 for this type, pre-filled from project defaults	No	—	Yes — Phase 2, Off-plan, handover JUN-2028	Unit type	Same filters as D1–D3, S2–S3, S5–S7
T19	Phase or block (optional)	Groups types for delivery	Text; a phase or block can hold its own D1–D6 schedule for all its unit types	No	—	Phase 2	Unit type	Operational — not a filter
T20–T26	Commercial details: permitted or intended use; frontage (m); floors or units; loading or vehicle access; power capacity and backup; lifts; fit-out level	Facts commercial buyers compare	Use: single-select list; frontage: m; floors or units: whole number; loading access: Yes / No + type; power: capacity and backup; lifts: count; fit-out: Shell & core; Partly fitted; Fully fitted	For Commercial Buildings and Mixed-Use Building	Hidden for residential types	Retail; 8 m; 1; Yes; 500 kVA + generator; 1; Shell & core	Unit type → unit	Comparison rows (RQS-05)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Step 6 — Units

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
U1	Unit identifiers	Distinguishes units	Pattern (prefix + start number, e.g. “B-01”) or typed list; editable per unit	Yes	Must be unique in the project	B-01 … B-16	Unit	Operational; unit reference code for Property Ref / ID Lookup is system-generated
U2	Availability	Sale status	Single-select. Spec: Available; Under Offer; Sold. Plus “Not released” (unpublished, not a buyer value)	Yes	Defaults to Available on generation. Sold is set automatically when the transaction is complete (legal transfer done, escrow fully released, nothing outstanding). Seller-facing labels follow RQS-06 §5; public labels remain Available, Under Offer and Sold	Available	Unit	Listing Availability
U2a	Actual sale price	Records the achieved price for analytics	Whole number in the price currency (T17a), ≥ 0	When U2 = Sold	Kept separate from the list price (T17 / U3) and reserve price (T17b); never shown to buyers. Captured automatically from the platform transaction, with the completion date; the seller confirms	₦190,000,00 0	Unit	None — private transaction record
U2b	Is the unit sold with occupiers?	Occupancy	Single-select: Vacant possession; Sold with occupiers. Helper: Sold with occupiers means the property has present tenants whose lease or rent is still running; the new owner may keep them, or refund them and evict them.	Yes	Applies to every listing; new-build units default to Vacant possession	Vacant possession	Unit	Occupancy Status
U3	List price override	Unit-specific price	Whole number in the price currency (T17a), or POA	No	Blank inherits T17; price history kept on change	₦195,000,00 0	Unit	Min & Max Price; Price Reduced Since Listing; Recently Reduced
U4	Other differences	Unit-specific facts	Override any T6–T17 or D1–D3 field for this unit	No	Overrides shown in bold with “Reset to type”	Plot size 520 m² (corner plot)	Unit	Filter of the overridden field
U5	Floor level (flats)	Position in building	Whole number or “Ground”	No	Flats & Apartments only	4	Unit	Descriptive — not a filter (Spec defines none)

Step 7 — Project media and viewing (dedicated upload sections)

Access levels: each media item and document carries an access level — Free, Paid, On request or Private. Photos, renders and recorded video tours are always Free (RQS-06 §13).

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
M1	Project photos	Gallery and cover	Section “Photos”: image formats only (JPEG, PNG and other photo formats); “Set as cover” control	Yes (≥ 1)	Replaces “first upload is the cover” with an explicit choice. Verified status needs at least 5 photos with shot types (completed: exterior, living area, kitchen, a bedroom or main room; off-	12 images	Project	Descriptive (project card); unit photo filters use M7

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
					plan: 3 renders + 2 dated site photos); number and shot types adjustable by REALTIQ			
M1a	Renders	Artist's impressions	Section "Renders": image formats; labelled "Artist's impression" on the page	No	—	6 images	Project	Descriptive
M1b	Construction progress	Dated evidence for the progress track	Section "Construction progress": photos or video, each dated and linked to a milestone	No	Shown for units being built	Roofing, JUN-2027	Project → phase / block	Descriptive
M1c	Project video walkthrough	Recorded tour of the development	Section "Project video walkthrough": video formats	No	—	1 video	Project	Descriptive
M2	Drone fly-through	Site context	Section "Drone fly-through": all file formats	No	—	1 video	Project (inherited)	Has Drone Fly-Through
M3	Aerial photographs	Site context	Section "Aerial photographs": all file formats; sources: drone, Google Earth, Google Maps or satellite imagery	No	—	3 images	Project	Descriptive — no Spec filter
M4	Approach & access-road media	Surroundings	Section "Approach & access-road media": all file formats	No	—	2 videos	Project	Descriptive — no Spec filter
M5	Estate master plan / site plan	Layout and boundaries	Section "Master plan / site plan": all file formats; buyer-viewable (public)	No	Optional for every development type	PDF	Project	Descriptive — no Spec filter
M5a	Registered survey	Boundaries and beacons	Upload to the private vault; released to a buyer on request with the seller's approval	No	—	PDF	Project	Document request
M6	Technical files (CAD / BIM)	Investor documents	Section "Technical files": all file formats; gated download	No	Access level set per RQS-06 §13	DWG, IFC	Project and unit type → unit	Descriptive — no Spec filter
M7	Unit-type photos	Unit gallery	Section "Photos": image formats only	Yes (≥ 1)	Units may add their own; Verified status rule as M1	8 images	Unit type → unit	With Photos Only; photo-count badge
M7a	Unit renders	Artist's impressions of the unit	Section "Renders": image formats	No	—	4 images	Unit type → unit	Descriptive
M8	Video walkthrough	Recorded tour	Section "Video walkthrough": video formats only (MP4 and other video formats)	No	—	1 video	Unit type → unit	Has Video Tour — Recorded
M9	Floor plans with room dimensions (m)	Layout	Section "Floor plans": all file formats	No	Required before Verified Listing for Commercial / Mixed Use types	PDF	Unit type → unit	Has Floor Plan

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
M10	3D / virtual tour link	Immersive tour	Section “3D / virtual tour”: URL (Matterport, Realsee or CloudPano)	No	Must be a valid Matterport, Realsee or CloudPano link. Matterport, Realsee and CloudPano are supported (their SDKs or APIs are integrated). Capture is provided	Matterport link	Unit type → unit	Has 3D / Virtual Tour
M11	Unit position on the site plan	Where the unit sits in the development	Marker on the site plan (M5)	No	—	—	Unit	Descriptive
V1	Will you hold open houses? Add dates and times	Walk-in viewings	Date + start and end time, repeatable; or a recurring weekly schedule (days and hours) for properties open for viewing without booking	No	Dates not in the past	Sat 14-NOV-2026, 10:00 AM–2:00 PM; or Mon–Sat, 9:00 AM–5:00 PM	Project (or unit type)	Open House
V2	Do you offer viewings by appointment?	Booked viewings	Yes / No	No	Yes links to the inspection booking engine	Yes	Project	Private Showings (By Appointment Only)
V3	Do you offer live video tours to buyers?	Live video viewing for any buyer	Yes / No	No	Yes links to the booking engine. Booked on the platform; the session runs on Zoom, integrated into REALTIQ, until the platform can stream; REALTIQ issues the link so no phone numbers are exchanged. Live video tours are run by any seller type — here the developer or its agent (free at launch; the option to charge is built and switched off in the Console until REALTIQ runs live video on the platform) or by an Inspection Partner (fee paid by the buyer; REALTIQ share split automatically)	Yes	Project	Has Video Tour — Live
V4	Do you have a show home for this unit type?	Visitable sample unit	Yes / No; if Yes: unit type represented; finish state (finished, furnished, unfurnished); location on site; recurring hours or by appointment	No	Listing note: “A sample of this unit type. Your unit’s finishes may differ; see your terms.”	Type B; furnished; by the gate; Mon–Sat, 10:00 AM–6:00 PM	Unit type	Has Show Home

Step 8 — Review and publish

ID	Question	Purpose	Input control and allowed values	Req.	Conditional logic	Example	Data level	Search / filter attribute
R1	Publish ready units now, or save as draft?	Release control	Choice: Publish all ready units; Publish selected; Save draft	Yes	Blocked units stay unpublished with reasons shown	Publish all ready units	Project / unit	Publishing timestamp feeds Added to Site (Recency)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

5. BULK-ADD AND EDITING EXPERIENCE

Bulk entry uses three methods over one data model: a repeating unit-type form, a units grid, and spreadsheet import. All three use the field IDs and allowed values in section 4, so a value accepted in bulk is always a value the filters understand.

5.1 Unit types and generation

- **Repeating unit-type form:** one card per type (T2–T19, T20–T26). “Duplicate type” copies every answer so a developer can change only what differs (e.g. Type C = Type B plus one bedroom).
- **Quantity and numbering:** T5 sets the count; U1 generates identifiers from a pattern (prefix, start number, optional block/floor). The developer previews the list before generating.
- **Shared attributes:** a type’s answers apply to every unit of that type. Project defaults (D1–D3, S1–S7) apply to every type unless T18 overrides them.
- **Exceptions:** a unit keeps any field it overrides (U3–U4). Overrides show in bold with a “Reset to type” action. When a type changes, a prompt states how many units will update and how many keep their own values.

5.2 Units grid

- One row per unit; columns are effective values. Inherited values appear in grey, overrides in bold.
- Frozen columns: Unit ID, Unit type, Availability, Price. Other columns can be shown or hidden.
- Filter and search the grid by unit type, availability, publish status, price range and “has problems”.
- Bulk actions on selected rows: set availability; change price by amount or percentage; move to another type; clear overrides; publish; unpublish; delete (blocked for sold units); confirm “Nothing has changed” for the monthly freshness check.
- Inline editing with keyboard navigation and paste from a spreadsheet into selected cells; each pasted value is validated before it saves.

5.3 Spreadsheet import (optional, not the only route)

- **Template:** download an XLSX/CSV generated from the field list, pre-filled with the project’s existing types and units, with drop-down validation for every Spec option list.
- **Upload and map:** columns are matched to fields by header; unrecognised headers are shown for manual mapping.
- **Preview:** rows are sorted into “Ready”, “Warnings” and “Errors”, with the failing cell and the allowed values shown.
- **Fix:** correct errors in the preview grid or re-upload. Valid rows can import while invalid rows are held as drafts.
- **Update mode:** re-importing with existing Unit IDs updates those units rather than duplicating them (developer confirms).

Bulk columns and validation (same fields as section 4)

Column	Field ID	Allowed values and validation
Unit ID	U1	Required; unique within the project; letters, numbers, hyphen and slash
Unit type	T2	Must match an existing unit type or create a new one (confirm on import)
Property category; Property type	T3; T4	Spec labels only; property type must belong to the category
Bedrooms; Full bathrooms; Powder rooms	T6; T7; T8	Whole numbers ≥ 0; blank allowed for Commercial Buildings; blank inherits the type
All rooms en-suite	T9	Yes; No; blank inherits

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Column	Field ID	Allowed values and validation
Internal floor area (m²); Built-up area of the unit; Built-up area of the whole building (m²); Plot size (m²)	T10; T11; T11a; T12	Numbers > 0 in m²; plot size for all properties on land; a value in square feet is rejected, not converted
Number of floors	T13	Whole number ≥ 1; Terraced House or Townhouse only
Furnishing	T14	Spec: Furnished; Semi-Furnished; Unfurnished
Architectural style	T16a	A value from the fixed style list (RQS-03 §3.2), or a typed style when the style is not listed
Parking spaces	T15	Whole number ≥ 0; required
List price; POA	T17 / U3	Whole number ≥ 0 in the price currency (T17a), with or without separators; “POA” accepted; currencies other than NGN and USD rejected
Price currency	T17a	NGN; USD
Second list price	T17d	Optional; whole number ≥ 0 in the other currency (NGN or USD)
Reserve price	T17b	Required; whole number ≥ 0 in the price currency, not above the list price; private — never shown to buyers or viewed by REALTIQ staff
Price negotiable	T17c	Yes; No; blank inherits the type
Availability	U2	Spec: Available; Under Offer; Sold; plus Not released
Actual sale price	U2a	Whole number ≥ 0 in the price currency; only when Availability = Sold; private — never shown to buyers; captured automatically from platform sales
Occupancy status	U2b	Vacant possession; Sold with occupiers
Build stage; Completed before handover; Milestone; Handover (month/year); Construction start	D1–D3; D1a; D5	Spec labels; milestone and handover required only for Off-plan / Under construction (or D1a = Yes); handover not in the past
Service charge (₦/year)	S3	Whole ₦ ≥ 0 or “None”
Payment options; Instalment months; Deposit %	S5–S7	Spec labels (multi-value separated by semicolons); months > 0; deposit 0–100
Escrow available	S7a	Yes; No; blank inherits the project default
Unit features	T16	Spec catalogue labels separated by semicolons; unknown labels flagged, never stored as free text
Commercial details	T20–T26	Allowed values as in section 4; blank for residential types

5.4 Duplicates, drafts and scale

- **Duplicate detection:** duplicate Unit IDs are blocked; rows identical in every field except the ID are flagged as a warning; a new project with the same name, LGA and Area as an existing one prompts “Is this the same project?”.
- **Save and resume:** every step autosaves; the project stays in Draft until published; the dashboard shows the next incomplete step and a “Resume” action.
- **Hundreds of units:** the grid loads rows progressively (virtualised) and keeps filters and sort server-side; imports and bulk edits run as background jobs with a progress bar and a result summary (“412 updated, 3 need attention”).
- **Undo:** each bulk action can be undone once from the result summary.

6. SEARCH AND FILTER DATA MAPPING

Search runs against units. Each unit is indexed with its effective values (unit → unit type → project) plus its project's shared values, so a mixed development is represented unit by unit rather than as one averaged listing.

Field (ID)	Onboarding question / control	Data level	Example values	Search / filter control	Filterable?	Why
Project name (P1)	Text	Project	Ocean Crest Estate	Full-Text Keyword Search; Gated Estate token via L5	Searchable	Buyers search by estate name
Listed by (P2)	From the developer account	Project	Primary Developer	Listed By (Entity)	Yes	Spec filter; developer stock is a key off-plan signal
Developer name (P3)	From the developer account	Project	Crest Homes Ltd	Keyword search only	No	Free text; a filter would list thousands of unmatched names
Development structure (P4)	Single-select	Project	Estate / gated community	None	No	Not a Spec filter; buyers filter on property type (T4) and Gated Estate (L5) instead
State; LGA; Area; Estate name (L1–L3, L5)	Cascading selects	Project	Lagos › Eti-Osa › Lekki › Ocean Crest Estate	Location Hierarchy; Location Autocomplete; Browse by State	Yes	Gazetteer values guarantee token matches
Map pin (L7)	Map pin	Project	6.4401, 3.5104	Map viewport; Travel Radius / Commute	Yes	All units share the project pin
Street address (L6)	Text	Project	Plot 5, Admiralty Way	None	No	Display only — shown publicly, with the Verified badge once checked
Access road condition (L8)	Multi-select	Project	Tarred	Access Road Condition	Yes	Spec filter; same for all units
Build stage (D1)	Single-select	Project → type → unit	Under construction	Build Stage Lifecycle; Ready to Move In	Yes	Phases may differ; evaluated per unit
Construction milestone (D2)	Grouped select	Project → type → unit	Carcass › Roofing / Parapet	Handover Delivery Stage	Yes	Only for Off-plan / Under construction units (or D1a = Yes)
Projected handover (D3)	Month / year	Project → type → unit	DEC-2027	Handover Delivery Window; Handover Date: Soonest	Yes	Month granularity matches the filter
Launch date (D4)	Date	Project	OCT-2026	None	No	Recency uses the publish date, not launch
Estate facilities (S1) + unit features (T16)	Catalogue checkboxes	Project + type → unit	Swimming Pool; BQ	Deep Features & Amenities Catalogue	Yes	A unit's set is the union of both; strict AND is applied to that union
Serviced (S2)	Single-select	Project → type	Serviced	Serviced Property	Yes	Spec filter
Annual service charge (S3)	₦ / year or None	Project → type	₦1,200,000	Maximum Service Charge	Yes	Blank is excluded when a cap is set, so capture it
Title documents (S4)	Multi-select	Project (unit types may add)	Global C of O; Deed of Sub-Lease	Declared Title Documents	Yes	Buyers screen by title; declaration is searchable, files stay private
Payment options; instalment months; deposit (S5–S7)	Multi-select; numbers	Project → type	Instalment Plan; 24; 30%	Payment Type; Instalment Duration; Initial Deposit Cap	Yes	Critical off-plan filters

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Field (ID)	Onboarding question / control	Data level	Example values	Search / filter control	Filterable?	Why
Escrow available (S7a)	Yes / No	Project → type	Yes	Escrow Available	Yes	Buyers can find listings where the buyer's funds are held by REALTIQ's licensed payment partner until the transaction's specified conditions are met
Unit type name (T2)	Text	Unit type	Type B — 4-Bed Semi-Detached	Shown in matching-units list	No	Developer label, not a buyer vocabulary
Property category and type (T3–T4)	Cascading select	Unit type	Houses › Semi-Detached Duplex	Property Type	Yes	Mixed projects index each type separately
Quantity (T5)	Number	Unit type	16	None (counts shown on the card)	No	Drives unit records, not a buyer criterion
Bedrooms; full bathrooms; powder rooms; en-suite (T6–T9)	Numbers; Yes/No	Unit type → unit	4; 4; 1; Yes	Beds & Baths; Dedicated Powder Rooms; All Rooms En-Suite	Yes	Null for commercial units, which are not excluded unless a count is set
Internal floor area; built-up area (unit; whole building); plot size; unbuilt area (T10–T12a)	Numbers in m²	Unit type → unit	280; 90; 360; 1,200; 840	Internal Floor Area; Building Area (unit's own footprint); Plot Size of Property	Yes (whole-building footprint and unbuilt area: display only)	Stored in m² exactly as the filters compare
Number of floors (T13)	Number	Unit type	3	Number of Floors (Terraces)	Yes	Terraces only
Furnishing (T14); parking (T15)	Select; number	Unit type → unit	Unfurnished; 2	Furnishing Status; Dedicated Parking / Garage	Yes	Spec filters
Architectural style (T16a)	Single-select	Unit type → unit	Style list to be defined	Architectural Style	Yes	Listed styles are filterable; typed styles are shown but not filterable
List price / POA (T17, U3)	NGN or USD amount, or POA	Unit type → unit	₦185,000,000	Min & Max Price; Include Unpriced; price sorts; Price Reduced	Yes	Each unit has its own price and price history
Price currency (T17a)	Single-select	Unit type → unit	NGN; USD	Min & Max Price (indexed under the Currency & Valuation Engine Rule)	No	Shown with the list price; not a buyer filter
Reserve price (T17b)	Number (private)	Unit type → unit	₦170,000,000	None	No	Never shown to buyers or used in results, filters or sorting
Price negotiable (T17c)	Yes / No	Unit type → unit	Yes	Price Negotiable	Yes	Buyers can find sellers open to negotiation
Phase / block (T19); floor level (U5)	Text; number	Unit type; unit	Phase 2; 4	None	No	No Spec filter; shown on unit detail
Unit ID (U1)	Pattern / text	Unit	B-07	None; system reference supports Property Ref / ID Lookup	No	Internal identifier
Availability (U2)	Single-select	Unit	Available	Listing Availability	Yes	Sold units remain for Include Sold
Actual sale price (U2a)	Number (private)	Unit	₦190,000,000	None	No	Private transaction record for analytics, separate from list and reserve prices;

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Field (ID)	Onboarding question / control	Data level	Example values	Search / filter control	Filterable?	Why
						never shown to buyers
Occupancy status (U2b)	Single-select	Unit	Vacant possession	Occupancy Status	Yes	Separates vacant units from units sold with occupiers
Media sections (M7–M10)	Dedicated upload sections	Unit type → unit	Photos; Floor plans; 3D link	With Photos Only; Has Video Tour; Has Floor Plan; Has 3D / Virtual Tour	Yes	Section defines media type, so flags are reliable
Project media (M1–M6)	Dedicated upload sections	Project	Drone fly-through; aerial photographs	Has Drone Fly-Through (M2 only)	M2 only	Other project media has no Spec filter
Viewing (V1–V4)	Dates; Yes/No	Project	Open house 14-NOV-2026	Open House; Has Show Home; Private Showings; Has Video Tour — Live	Yes	Spec tour filters

How mixed projects appear in results

- **Match rule:** a project appears only when at least one of its units satisfies every active filter at the same time. A project with a ₦90M flat and a separate 4-bedroom house does not match “4 bedrooms under ₦100M”.
- **Project result card:** shows the project, the number of matching units (“12 of 140 units match”), and ranges computed from matching units only (price from–to, bedrooms, property types, earliest handover).
- **Inspecting matches:** “View matching units” expands a list grouped by unit type with counts, price range and availability; each row opens the unit detail page. An “Open project page” link keeps the search filters; the project page counts available units.
- **Sorting:** price sorts use the lowest matching unit price; Handover Date: Soonest uses the earliest matching handover.
- **Single match:** when only one unit matches, the card may link straight to that unit.
- **Reference lookup:** a unit reference code opens that unit within its project.

7. PROJECT DASHBOARD

After creation, the project dashboard is the home for the project. It shows progress, counts and search readiness, and states exactly what missing data does to publishing and to filter eligibility. The full dashboard, including team access, freshness, enquiries, negotiations, payment terms, sales and payments, escrow, reviews and performance, is set out in RQS-01 §18.

Dashboard section	What it shows	Status indicators	Actions
Header	Project name, location, Listed by, overall status	Draft; Partly published; Published; Unpublished	Publish ready units; Preview as buyer; Edit project
Progress	Steps 1–8 with completion	Complete; Needs attention; Not started	Resume next step
Search readiness	Per-field checklist of search-critical data	Blocks publishing; Limits filters; Complete	Jump to the field or the affected units
Unit types	One card per type: property type, quantity, price range, key facts	Complete; Incomplete; Has overrides	Edit; Duplicate; Add units; Delete (blocked if sold units)
Units	Counts: total, Available, Under Offer, Sold, Not released;	Ready; Blocked (reason); Published	Open grid; Bulk actions; Import

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Dashboard section	What it shows	Status indicators	Actions
	published vs unpublished		
Media & viewing	Filled and empty media sections; open-house dates	Missing photos; Missing floor plans	Upload to a section; Add dates
Verification	Listing and title verification progress	Not started; Submitted; Verified; Rejected	Upload documents; Resubmit

Missing data and its effect

Field	If missing	Effect shown to the developer
Property type (T4); State, LGA, Area (L1–L3); price or POA (T17/U3); build stage (D1); availability (U2)	Blocks publishing	“This unit cannot be published until …”
Milestone and handover (D2–D3) for Off-plan / Under construction units	Blocks publishing	Off-plan buyers rely on these filters and sorts
Bedrooms and full bathrooms for residential units (T6–T7)	Blocks publishing	Residential units without rooms would vanish from every Beds & Baths search
At least one photo (M7, or unit photos)	Publishes, but hidden by default	“Hidden from buyers while With Photos Only is on (the default)”
Floor area, service charge, furnishing, title documents, amenities, media flags	Publishes	“Won’t appear when buyers filter by …” listed per field

Next steps panel: after publishing, the dashboard suggests the highest-value missing items first — for example “Add floor plans to 3 unit types to appear under Has Floor Plan” — and reminds the developer to update availability as units sell. Every month the developer confirms the project is current, with a one-button “Nothing has changed” for the whole project, groups or single units; unconfirmed listings show an amber freshness label and are never unpublished for staleness.

8. EDGE CASES AND VALIDATION

Case	Handling
Mixed-use building (shops below, flats above)	Separate unit types in different categories (Commercial Buildings and Flats & Apartments); commercial units carry blank rooms and are never excluded by room filters unless a count is set. A mixed-use building may be listed as a project or not, and sold whole or as components, each with its own listing card
Whole building sold as one asset	Not a project: route to Add Property as a single Block of Flats listing. Within a project, warn if Block of Flats is chosen as a unit type. A developer may still create a project with one unit
Phased delivery	Unit types override build stage, milestone and handover (T18) and may carry a phase label (T19)
Identical units priced by floor or position	One unit type; unit price overrides (U3)
Some units POA	POA per unit; those units follow Include Unpriced Listings
Facility only in one block (e.g. a block pool)	Record at unit-type level (T16), not as an estate facility (S1)
Estate not in the gazetteer	Create-new request at L5; project can save as draft; publishing waits for gazetteer approval
Reducing a type’s quantity below its sold units; deleting a type with sold units	Blocked with an explanation
Price changes after publishing	Stored per unit with history, feeding Price Reduced Since Listing and Recently Reduced

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Case	Handling
Unit sold	Status Sold; stays indexed for Include Sold; excluded by default
Values in square feet, or in a currency other than NGN or USD, in an import	Rejected with a message; never silently converted
Wrong file type in a media section	Photos accept image formats only and Video walkthrough accepts video formats only; other sections accept all formats
Duplicate project or unit IDs	See 5.4
Large estate spanning several streets	One project pin (L7); unit positions are shown on the site plan (M11)

9. DECISIONS

Design decisions

- Adopt the unit-type-first hybrid, with each unit indexed as its own searchable record using effective values.
- Project matches a search only when one unit meets all active filters; cards show matching-unit counts and ranges.
- Use one field dictionary for onboarding, bulk grid, import template and filters, with Spec labels.
- Replace CITY with LGA, free-text AREA with a gazetteer select, and PROJECT TYPE “estate” with a development-structure question.
- Replace free-text AMENITIES and FEATURES with the 44-item catalogue split into estate facilities (S1) and unit features (T16).
- Replace EXPECTED COMPLETION DATE with month/year Projected handover plus Build stage and Construction milestone.
- Replace the single PROJECT MEDIA zone with dedicated, titled upload sections; Photos image formats only, Video walkthrough video formats only, others all formats.
- Keep Launch date, Developer name, Street address, Phase and Floor level out of the buyer filters.

Business and engineering decisions

Topic	Resolution
Result count semantics	The live count shows both, for example “18 projects · 240 units”.
Project-level sort values	Price sorts use the lowest matching unit price; Handover Date: Soonest uses the earliest matching handover.
Publishing requirements	The fields that block publishing, and those that only limit filters, are the lists in §7 “Missing data and its effect”.
Taxonomy ownership	REALTIQ maintains the 41 types, the gazetteer and the amenity catalogue in the Console. New areas and estates submitted by sellers join after a map-provider match or REALTIQ review (L3, L5).
Title document inheritance	Unit types can add documents (for example Deed of Sub-Lease) on top of the project’s root title.
Development-structure options	Estate / gated community; Apartment building; Mixed-use development; Commercial complex; Other (P4).
“Not released” status	An unpublished status, never shown to buyers.
Size thresholds	Set by the product developer.
Listed By source	From the developer account (P2).
Escrow	Escrow is optional and separate from Payment Type.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Topic	Resolution
Map pins	One project pin (L7). A unit's position is shown on the site plan (M11); no unit-level map pins.
Plot units	Entry, storage and filtering in square metres (m²) only; plots are not used as a unit.
Google imagery	Aerial photographs from Google Earth or Google Maps show their source and the attribution the provider requires; the seller confirms they may use them.

10. HOW WE WILL KNOW THE WORK IS COMPLETE

- Only developer accounts can open Create Project; P2 "Listed by" is set to Developer automatically and cannot be edited.
- All eight steps save as drafts automatically and can be resumed from the dashboard.
- Units generated from a unit type inherit its values; a unit-level override changes only that unit, and the effective value (unit → unit type → project) is what search uses.
- Location is chosen from the gazetteer (State → LGA → Area); an unlisted area is matched to the map provider or sent for review.
- Values in square feet are rejected; every area field accepts m² only.
- The reserve price is required and never shown to buyers or REALTIQ staff; the actual sale price is captured from the platform transaction and never shown to buyers.
- A unit missing any publishing blocker in Section 7 cannot be published; other gaps only limit the filters it appears in, and the dashboard says which.
- A project matches a search only when at least one unit meets every active filter; the result card shows matching-unit counts and ranges.
- The units grid and spreadsheet import write the same records as the forms; a bulk edit shows a result summary and can be undone in one step; an import of several hundred units runs in the background.
- Every option list uses the RQS-03 labels exactly.

PART 3 OF 8 · RQS-03

REALTIQ Property Search & Discovery Specification

How buyers find property on REALTIQ: location search, filters, sorting, map and media controls for Nigerian property sales.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

QUICK REFERENCE — HOW BUYERS SEARCH, FILTER AND SORT

Search runs server-side against the whole catalogue, and every active setting is in the URL. The platform lists property sales only — no land, rentals, leases or short lets.

Area	What the buyer gets	Section
Ways to search	Location typeahead (State → LGA → Area → Gated Estate, multi-token), listing reference lookup, full-text keywords (strict AND) and the map viewport with optional “Search as I move the map” (default Off)	1
Property types	41 types in four categories: Flats & Apartments (12), Houses (10), Commercial Buildings (18), Mixed Use (1). “Estate” is a development, not a type	2
Location and price	Location hierarchy, travel radius (15–60 min), min and max price with shorthand, 7 price chips, price reduced, price negotiable, service-charge cap, include unpriced (POA) listings	3.1
Payment	Payment Type (Outright, Instalment), instalment duration, initial deposit cap, Escrow Available	3.1
Currency	A header display switcher (₦ NGN, $ USD) with an automatic daily rate the buyer can override; queries always run in ₦	3.1, 6.5
Build stage and delivery	8 build stages (multi-select), “Ready to Move In” macro, handover milestone and handover window for off-plan stock	3.2
Rooms and size	Bedrooms (min, max, exact), full bathrooms, powder rooms (toilets), all en-suite; internal floor area, built-up area and plot size in m²; number of floors for terraced houses and townhouses	3.2
Condition and services	Furnishing, serviced, parking, access road, occupancy, architectural style	3.2
Amenities	44 amenities in four groups, strict AND; the top 8 shown first	3.2
Title and trust	Declared title documents, Platform-Verified Title Only, Platform-Verified Listing Only, Listed By, From Accounts I Follow	3.3
Recency, status and media	Added to site, listing availability (Available by default; include Under Offer or Sold), With Photos Only (default On), video, 3D tour, floor plan, drone, distress sale	3.3
Tours	Open House, Private Showings, Show Home, Live and Recorded video tours, 3D / virtual tours	5
Sorting	Recommended (default) plus 11 further sorts, including Highest Rated and Trust Tier	3.4
Layout	Desktop bar with 6 core controls; an 11-section “All filters” drawer; full mobile parity; active-filter chips	4
Behaviour	Live result count, zero-result diagnosis and fallback ladder, saved searches with Instant, Daily or Weekly alerts, P95 under 300 ms	4.4, 6

KEY DECISIONS AT A GLANCE

Topic	Decision	Section
Query model	Server-side querying of the whole catalogue; every active filter serialises into the URL.	4.4, 6.1
Logic	OR within one attribute; AND across attributes. Amenities and keywords use strict AND.	3
Taxonomy	41 types in four categories; “Estate” becomes a listing_kind flag (Single Property or Development) and a gazetteer tier.	2, 6.4
Currency	Display switcher only, NGN and USD; all indexing, sorting and range filters run in ₦. A USD list price may be payable in NGN at a rate both parties confirm.	3.1, 6.5
Build stage	One 8-stage list, multi-select, with a “Ready to Move In” macro.	3.2, 6.5

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Topic	Decision	Section
Measurements	Square metres only; square feet rejected; plots are not a unit.	6.5
Commercial rooms	Room filters never exclude commercial listings unless a count is set.	2.3, 6.5
Promotion	Featured is editorial placement with no ranking weight; Sponsored is a labelled paid boost. Neither bypasses buyer filters.	3.3, 6.4
Defaults	With Photos Only On; listing availability Available Only; Include Unpriced On; “Search as I move the map” Off.	3
Verification	Verified Title and Verified Listing filters are live at launch; verification is administrative validation, not a title warranty.	6.5
Sold listings	Searchable within results through “Include Sold”.	6.5
Distress sale	Searchable only with proof of a price at least 15% below valuation, after admin review.	6.5
Accessibility	WCAG 2.1 AA; touch targets of at least 44 px; contrast of at least 4.5:1 in light and dark themes.	4.4

1. PURPOSE AND WAYS TO SEARCH

This specification defines the search and filter architecture for REALTIQ. It replaces client-side filtering of loaded results (“Search loaded properties”) with a server-rendered, URL-addressable discovery engine queried against the whole catalogue. Every feature in this specification is a launch feature. The platform supports property sales only. Rental tenancies, short lets and standalone land sales are strictly excluded. Plot size is captured solely as a physical attribute of a listed property that sits on land or an integrated development scheme.

Primary Search Modalities (Ways Buyers Discover Stock)

Modality	Type / Placement	Functional Scope & Operational Mechanics
Location Autocomplete	Typeahead / Main Bar & Drawer	Hierarchical gazetteer auto-suggest (State → LGA → Area → Gated Estate). Supports multi-token tokenised entry (OR logic) with automated parent absorption and breadcrumb labels to disambiguate identical town / estate names across different states. One control and one shared state between bar popover and drawer.
Property Ref / ID Lookup	Exact Input / Drawer Header	Direct alphanumeric lookup for a listing reference code (e.g. RQ-10492, RQ-123456, PID). Submitting overrides and pauses all other active filters, location tokens and map bounds without clearing them, isolates the unique listing record and disables sort. An unknown reference shows “No listing with reference X”.
Full-Text Keyword Search	Text Index / Drawer Section	Case-insensitive scan of listing headlines and descriptions for specialised terms not held as structured attributes (e.g. “penthouse terrace”, “commercial kitchen”). Multiple terms execute with strict AND logic and combine with all other filters. Null bedroom / bathroom counts in commercial stock do not trigger residential exclusions.
Interactive Map Viewport	Bounding Box / Map Canvas	“Search as I move the map” dynamic viewport querying. Panning or zooming recalculates results to visible coordinate boundaries with a 400 ms debounce. Default: Off (§6.5); selecting a location token re-centres the map.
Browse by State / Region	Taxonomic Chips / Landing Grid	Pre-indexed directory landing links and quick-filter chips partitioned across Nigeria’s 36 states and the Federal Capital Territory (FCT Abuja), for buyers without a specific query. Sets the state parameter and seeds gazetteer context.
Social Feed (Explore & Following)	Feed / My Portal	Real-estate posts from sellers and third parties (RQS-01 §27.2): Explore recommends posts by area, property type and topic, and by related listings and liked posts and accounts (RQS-06 §17.7); Following shows posts from followed accounts. A post tagged to a listing, unit or project opens its page.
Saved Search	Signed-in / Bar & Drawer	A Registered (signed-in) buyer stores a filter set plus location tokens and map bounds, optionally with new- and reduced-listing alerts (§6.3).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Core Discovery Baseline & UI Hygiene: Desktop navigation exposes 6 primary bar controls (Location, Property Type, Price, Beds & Baths, All Filters with active badge count, Save Search CTA) backed by an 11-section drawer. Results update dynamically server-side against the whole catalogue with live count aggregation, dismissible active-filter chips, “Clear All” functionality and full URL-parameter persistence. Promotional badges (Sponsored and Featured) are excluded from user filters; Sponsored is governed by the ranking engine and Featured by editorial placement.

2. PROPERTY TYPE TAXONOMY

The taxonomy establishes a rigorous structural hierarchy to eliminate ambiguity between high-level categories and physical forms. Grouped multi-select controls apply OR logic within the taxonomy section; selecting a category header selects all child subcategories. Standalone land transactions and rental tenancies are excluded. The 41 types are detailed below.

2.1 Property Types (41 Types)

Parent Category	Subcategory Label	Architectural Context & Local Nigerian Definition
Flats & Apartments 12 Types	Flat / Standard Apartment	Self-contained multi-unit residential dwelling situated on a single floor.
	1-Bedroom Flat	Modern one-bedroom apartment with a separate living room, kitchen and bathroom.
	2-Bedroom Flat / Apartment	Standard two-bedroom multi-unit residential floor plan.
	3-Bedroom Flat / Apartment	Standard family-sized three-bedroom multi-unit layout.
	4-Bedroom+ Flat / Apartment	Large-capacity premium apartment with four or more bedrooms.
	Mini Flat (Room & Parlour)	One bedroom, one distinct sitting room (parlour), kitchen and bathroom.
	Self-Contain (Self-Contained)	Single room containing its own kitchenette, toilet and bathroom. Common regional inventory.
	Studio Apartment	Single open-plan living and sleeping space with integrated kitchenette.
	Penthouse	Premium top-floor apartment featuring an expansive private terrace and elevated views.
	Maisonette	Duplex apartment structured across two or more private interior levels with an internal staircase; also marketed as a Duplex Flat.
	Serviced Apartment	Whole unit sold as a managed serviced-residence product. Distinct from the “Serviced” condition filter (§3.2).
	Block of Flats	Entire multi-unit apartment structure sold as an undivided investment asset.
Houses 10 Types	Detached Duplex	Freestanding two-storey residential house on private compound grounds.
	Semi-Detached Duplex	Two-storey house sharing a single central party wall with one adjoining neighbour.
	Terraced House	Multi-storey houses of identical design sharing side walls in a row. Floor counts vary (e.g. two or three floors); see Number of Floors (§3.2).
	Detached Bungalow	Single-storey freestanding residential home situated on private grounds.
	Semi-Detached Bungalow	Single-storey home joined to one adjacent property via a shared party wall.
	Terraced Bungalow	Single-storey attached row home sharing side structural party walls.
	Townhouse	Multi-storey compact urban residence sited within a planned, managed estate, usually one of a group built to

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Parent Category	Subcategory Label	Architectural Context & Local Nigerian Definition
		one design; not a row terrace. Floor counts vary; see Number of Floors (§3.2).
	Mansion / Villa	Expansive high-end residence situated on extensive private grounds or acreage.
	Chalet	Chalet-style residence.
	Boys' Quarters (BQ)	Small auxiliary residential unit attached to the main building with its own dedicated entrance, or located at the back of a main compound. Distinct from the Boys' Quarters (BQ) amenity (§3.2).
Commercial Buildings 18 Types	Office Space	Dedicated corporate office suite, commercial floor plate or standalone tower.
	Co-Working Space	Shared enterprise office floor plate.
	Shop / Retail	Individual street-facing retail shop or enclosed commercial shopping stall.
	Shop in a Mall	Enclosed retail unit within a managed mall, distinct from street-facing Shop / Retail.
	Showroom	Glazed commercial display space for automotive, furniture or equipment retail.
	Plaza / Complex / Mall	Commercial shopping centre, integrated trade or office complex, or retail arcade.
	Restaurant / Café Space	Specialised food-service retail space.
	Warehouse	Large-scale industrial storage, fulfilment depot or logistics distribution shed.
	Cold Room / Logistics Hub	Refrigerated agro-storage or freight transit warehouse.
	Hotel / Guest House	Hospitality property, boutique lodge or licensed commercial hotel building.
	Filling Station	Petroleum retail station with fuel pumps, forecourt canopy and underground tanks, including associated retail lots.
	Petrol / Gas Plant / Tank Farm	Bulk LPG or fuel depot, distinct from Filling Station.
	Factory	Industrial production plant, manufacturing hall, assembly depot or processing mill.
	School	Institutional educational facility: crèche, nursery, primary, secondary or tertiary campus.
	Hospital / Clinic	Healthcare facility, medical clinic, surgical theatre or diagnostic laboratory.
	Event Centre	Purpose-built commercial event and function venue, banquet hall, conference pavilion or auditorium.
	Place of Worship	Specialised institutional facility for religious worship.
	Other Commercial	Catch-all for commercial structures not falling into the 17 defined categories.
Mixed Use 1 Type	Mixed-Use Building	Integrated structure combining commercial ground-floor retail / office with residential upper units. It can be listed whole (this type) or as components, each with its own listing card; it may or may not be a project.

2.2 Type Notes and Exclusions

- **Self-Contain ("Self-Contained"):** single-room dwelling with private bath and kitchenette, under Flats & Apartments.
- **Bedroom-count flats (1-, 2-, 3- and 4-Bedroom+):** market-standard flat labels, under Flats & Apartments.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- **Serviced Apartment (as a type):** a whole unit sold as a managed serviced-residence product; distinct from the “Serviced” condition filter.
- **Boys’ Quarters (BQ) (as a type):** an auxiliary residential unit sold on its own; distinct from the BQ amenity.
- **Terraced House and Townhouse:** separate types. Terraced House covers row houses of any floor count; Townhouse covers estate townhouses. Number of Floors applies to both.
- **Commercial types:** Shop in a Mall is distinct from street-facing Shop / Retail; Petrol / Gas Plant / Tank Farm is distinct from Filling Station; Restaurant / Café Space and Place of Worship are separate types.

Excluded asset classes: All standalone land asset classes are excluded from indexing: Residential, Commercial, Industrial and Agricultural Plots / Farm Land, Land Banking Parcels, and Joint-Venture (JV) Land. The portal lists developed property only. Plot size is exposed solely as a descriptive attribute of a listed property that sits on land or development site.

2.3 Structural Migration & Legacy Category Rules

Legacy Category	Target Architecture & Mapping	Migration Logic & System Constraints
“Estate” Value	Reclassify to listing_kind Flag (Single Property vs Development)	“Estate” is not a physical property type; it represents a development listed by a developer account, with one or more units. It is removed from the property-type enum and handled as a development container flag and via the geographic gazetteer.
Legacy Types: House, Apartment, Commercial, Villa, Penthouse	Direct Mapping to 41-Type Structural Enum	The current six values migrate into the 41-type enum via listing-management backfill. Listing agents must reclassify records to precise architectural subtypes (e.g. Detached Duplex vs Terraced House or Townhouse).
“Uncompleted Structure” (market term)	Map to Build Stage Lifecycle (§3.2)	Shell buildings sold mid-construction describe a lifecycle state, not a physical form. They are captured through the Build Stage values “Uncompleted building” and “Semi-finished” applied to the relevant property type, not as a separate property-type value.
Commercial Room Nullability	Decoupled Room Query Execution	Commercial types may carry null bedroom and bathroom counts. Bedroom, full-bathroom and powder-room (toilet) filters must not exclude commercial listings unless an explicit count is set.
Plot Size Dependency	Contextual UI Render Constraint	Plot size inputs render for all property types that sit on land; for flats the value is the shared site area.

Unified Control Synchronisation: The desktop search bar “Property Type” popover and the drawer “Property Type” section share an identical data model and state store. Changing a selection in either view synchronises both controls instantly.

3. COMPLETE FILTER INVENTORY

Filter controls map to standardised backend query payloads. Multi-select options within the same attribute domain execute with OR logic; cross-domain selections execute with strict AND constraints.

3.1 Geography, Boundaries & Financial Terms

Filter Label	Selectable Values / Range	Control Type	Dependencies, Mechanics & Operational Defaults
Location Hierarchy	State → LGA → Area → Gated Estate	Typeahead Multi-Select (OR)	Default: All Nigeria. Max 10 concurrent tokens. Selecting a parent node automatically absorbs its child tokens. Parent breadcrumbs disambiguate duplicate place names. Only levels with published data are offered. New areas can be submitted by sellers and join the Area list after a map-provider match or REALTIQ review. Shared between bar and drawer.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Filter Label	Selectable Values / Range	Control Type	Dependencies, Mechanics & Operational Defaults
Search as I Move the Map	Boolean Toggle (On / Off)	Binary Toggle Switch	Bounds listings to the visible map viewport as an additional AND constraint, with a 400 ms settle / debounce. Selecting a location token re-centres the map and pauses viewport querying. Default: Off.
Travel Radius / Commute	15, 30, 45, 60 min from a target pin	Single-Select Picker / Dropdown	Calls an external traffic-matrix / mapping API to bound results by commute duration from a work or school address.
Min & Max Price	Free numeric inputs (≥ 0). Accepts shorthand “25m”, “1.5b”, “500k”.	Dual Numeric Text Inputs	Values queried strictly in Naira (₦), thousands-separated; USD list prices are converted as set out under Listing Currency & Buyer-Visible Pricing. Validates Max ≥ Min; auto-swaps reversed values with an inline notice. Default: No Min / No Max.
Popular Price Ranges	Under ₦25M; ₦25–50M; ₦50–100M; ₦100–250M; ₦250–500M; ₦500M–1B; Over ₦1B	Quick-Select Preset Chips (7 Chips)	One-tap injection populating Min / Max inputs. Typing directly into Min / Max immediately deselects the active preset chip.
Price Reduced Since Listing	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Restricts results to listings where current_price < original_price. Requires persistent listing price history.
Price Negotiable	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Restricts results to listings whose seller has marked the list price as negotiable. Requires a new listing-form field.
Maximum Service Charge	Any; None; Up to ₦500k; Up to ₦1M; Up to ₦2.5M; Up to ₦5M / year	Single-Select Dropdown	Default: Any. Caps annual estate facility-management fees. “None” isolates zero-fee properties; listings without a stated value are excluded when a cap is set. Aligns with the Serviced Property filter.
Include Unpriced Listings	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: On. Governs display of “Price on Application” (POA) properties. When a price range is applied, POA listings surface only while toggled On.
Display Currency Switcher	₦ NGN; $ USD	Header Segmented Control	Display setting only (not a query filter). Buyers toggle displayed prices between NGN and USD. Conversion uses the Central Bank of Nigeria’s official daily rate (NFEM) from the current or previous day, without altering the query; buyers may manually enter their own FX rate for their displayed conversions. The current “Any Currency” filter is removed.
Payment Type	Outright Purchase; Instalment Plan	Multi-Select Chips (OR)	Default: Any. Mortgage Accepted is left out of search. Replaces the single “Instalment plan: Any / Has / No” control; “no instalment” is queried by selecting Outright only. Critical discovery driver for off-plan purchasers.
Instalment Duration	Any; 6+ months; 12+ months; 24+ months; 36+ months	Single-Select Dropdown	Dependent: visible and active only when “Instalment Plan” is selected. Evaluated as minimum financing tenor.
Initial Deposit Cap	Any; Up to 10%; Up to 20%; Up to 30%; Up to 50%	Single-Select Dropdown	Dependent: visible and active only when “Instalment Plan” is selected. Evaluated as maximum upfront down-payment percentage at contract signing.
Escrow Available	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Restricts results to listings, including developer projects, that offer REALTIQ escrow, in which the buyer’s funds are held by REALTIQ’s licensed payment partner until the transaction’s specified conditions are met. Requires a new listing-form field.

Currency & Valuation Engine Rule: All backend price indexing, sorting and range evaluations operate strictly in base currency (₦ NGN). Secondary currencies are a presentation-layer translation calculated automatically from the current or previous day’s mid-market exchange rate.

Listing Currency & Buyer-Visible Pricing: A listing’s price may be set in ₦ NGN or $ USD; the selected listing currency is captured at onboarding and shown with the list price. The seller may add an optional second list price in the other currency, shown as the seller’s stated price. For indexing, sorting and range evaluation, a USD list price is converted to ₦ using the automated current- or previous-day FX rate, under the Currency & Valuation Engine Rule above. Buyers see only the list price (and the optional second list price). The reserve price (required at onboarding, never above the list price) and the actual sale price (recorded when the property sells, for analytics) are separate

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

data points; neither is shown to buyers or used in search results, filters or sorting. The reserve price is private to the seller, is not viewed by REALTIQ staff and is used only in aggregated analytics; the actual sale price is captured automatically when a platform sale completes. Payment terms may state a USD list price payable in NGN at a rate both parties confirm in the platform before each payment; the USD figure is a listed price only and payment in USD is never required (RQS-06 §10.2; RQS-08 Section 7.3).

3.2 Lifecycle, Physical Specifications & Amenities

Habitational filters capture local architectural configurations, distinguishing dedicated powder rooms (toilets) from full bathrooms. Multi-select amenities apply strict AND logic: returned listings must possess every selected amenity.

Filter Label	Selectable Values / Range	Control Type	Dependencies, Mechanics & Operational Defaults
Build Stage Lifecycle	Off-plan; Under construction; Uncompleted building; Semi-finished (Advanced Shell / Lock-up); Newly built; Renovated; Previously owned; Old	Multi-Select Checkboxes (OR)	Default: Any. Unifies physical maturity into 8 lifecycle states, replacing the legacy dual controls (Completion Stage + Listing Type). Semi-finished: exterior fully sealed and secure (lock-up), first-fix plumbing and electrical conduits complete and internal surfaces plastered, with second-fix fixtures, cabinetry, internal doors and decorative finishes not yet installed; distinct from a raw carcass, which is open to the elements. Uncompleted building or Semi-finished listings that will not be completed before handover carry a “Sold as is” label; this is not a separate filter value. Multi-select (buyer filter).
Ready to Move In	Boolean Macro Chip	Preset Filter Macro	Instant macro: sets build_stage IN (Newly built, Renovated, Previously owned) in one tap; suppresses the handover pickers and the Handover Delivery Stage selector while active.
Handover Delivery Stage	Site Preparation & Substructure: Site Clearing & Excavation; Foundation Footing; DPC (German Floor) Carcass: Blockwork / Lintel Level; Decking; Roofing / Parapet Semi-Finished: Lock-up; First-Fix Infrastructure Finishing: POP Ceiling; Tiling & Floor Finishes; Second-Fix Installation; Screeding & Painting Commissioning, External Works & Handover: External Works & Services; Snagging & Inspection; Handover	Grouped Multi-Select Checkboxes (OR)	Default: Any. Dependent: renders only when “Off-plan” or “Under construction” is active; hidden and cleared otherwise. Identifies the construction milestone a development has reached across five standard Nigerian phases; selecting a phase header selects all of its milestones. These milestones commonly determine when off-plan instalments fall due (the DPC stage is almost always a major payment trigger). Milestone definitions are given below this table.
Handover Delivery Window	Handover From (Month / Year) and Handover By (Month / Year)	Dual Month / Year Pickers	Dependent: renders only when “Off-plan” or “Under construction” is active. Enforces By ≥ From ≥ current calendar month. Month granularity replaces the current day-level completion window.
Bedrooms Boundary	Min: Any, 1+, 2+, 3+, 4+, 5+, 6+ Optional Max: Any, 1, 2, 3, 4, 5, 6+	Segmented Min + Dropdown Max	Default: Any. Minimum sets the lower bound; optional Maximum bounds the upper room count. Enforces Max ≥ Min. Exposed on main bar and drawer.
Exact Bedrooms Match	Boolean Toggle (On / Off)	Binary Toggle Switch	Locks the selected Bedroom minimum into strict equality (e.g. exactly 4) and disables and clears Max. “6+” with Exact matches 6 or more. Inert when Minimum is “Any”.
Full Bathrooms	Any; 1; 2; 3; 4; 5+	Segmented Pill Selector	Default: Any. Evaluates full sanitary suites containing a bath or shower (toilet + bath / shower + basin) as a minimum threshold. Excludes standalone guest powder rooms. Exposed on the bar “Beds & Baths” popover and drawer.
Dedicated Powder Rooms (Toilets)	Any, 1+, 2+, 3+, 4+, 5+, 6+	Segmented Control	Default: Any. Critical Nigerian habitational distinction: captures guest toilets / WCs, usually sited close to the foyer or main living room; the main living lounge and the family lounge may each have their own. Toilets frequently exceed full bathrooms. Drawer only; kept off the bar popover.
All Rooms En-Suite	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Restricts results to properties in which every bedroom has its own en-suite bathroom.
Internal Floor Area	Min / Max numeric in square metres (sqm)	Dual Numeric Inputs	Default: No Min / No Max. Filters total usable internal living or commercial space. Validates Max ≥ Min. Values in square feet are rejected.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Filter Label	Selectable Values / Range	Control Type	Dependencies, Mechanics & Operational Defaults
Built-up Area (Footprint)	Min / Max numeric in square metres (sqm)	Dual Numeric Inputs	Default: No Min / No Max. The ground area the building sits on (its footprint); distinct from Internal Floor Area (total usable internal space) and Plot Size (the land on which the property sits). Validates Max ≥ Min. For attached units on a shared lot, the filter compares the unit's own footprint; listings also show the whole building's footprint and the unbuilt area (plot size minus footprint), which are not filters.
Plot Size of Property	Min / Max numeric (sqm)	Dual Numeric Inputs	Visible for all property types that sit on land; for flats the value is the shared site area. Stored and compared in sqm. Helper text: "The land the listed property sits on; the portal does not list land on its own."
Number of Floors (Terraces)	Any; 2 floors; 3 floors; 4+ floors	Segmented Control	Dependent: visible only when Terraced House or Townhouse is selected; hidden and cleared otherwise. Qualifies terraces, which in Nigeria are built with varying numbers of floors. Requires a new listing-form field.
Furnishing Status	Any; Furnished; Semi-Furnished; Unfurnished	Segmented Single-Select	Default: Any. Standard 3-tier Nigerian habitational furnishing specification.
Serviced Property	Any; Serviced; Not Serviced	Segmented Single-Select	Default: Any. Flags comprehensively managed estates providing centralised security, waste handling, common-area cleaning, power management and facility management with a service charge; aligns with the service-charge ceiling.
Dedicated Parking / Garage	Any, 1+, 2+, 3+, 4+, 6+ vehicles	Segmented Control	Filters private enclosed garages or designated paved compound parking bays. Held as a count filter outside the amenity catalogue; requires a new listing-form field.
Access Road Condition	Tarred; Untarred; Flood-prone; Sand-filled area	Multi-Select Chips (OR)	Default: Any. Describes the condition of the access road serving the property; complements the Paved / Interlocked Access Road and Flood-Free / Covered Drainage amenities. Requires a new listing-form field.
Occupancy Status	Any; Vacant possession; Sold with occupiers	Segmented Single-Select	Default: Any. Identifies whether a property is sold with vacant possession or with occupiers in place. Sold with occupiers means the property has present tenants whose lease or rent is still running; the new owner may keep them, or refund them and evict them. The listing remains a sale; rental tenancies are still not listed. Requires a new listing-form field. Declared on every listing.
Architectural Style	Fixed style list (Architectural Style List below); typed if not listed	Multi-Select Chips (OR)	Default: Any. Filters by the building's architectural style. Values come from one fixed list shared by listing forms and search. If the style is not on the list, the seller types it in; typed styles are shown on the listing but cannot be filtered reliably. Requires a new listing-form field.

Architectural Style List: Styles common in Nigeria — Contemporary (modern Nigerian duplex and apartment style); Classic / Neoclassical (columns, pediments and balustrades); Modern Minimalist; Mediterranean; Colonial (British colonial bungalow and GRA style); Afro-Brazilian (Lagos Island and Brazilian Quarter style); Tropical Modernist (1950s–1970s, with brise-soleil and deep overhangs); Sudano-Sahelian / Hausa (Kano, Zaria and northern earth or rendered façades); Yoruba Courtyard (traditional compound around a courtyard); Igbo Traditional; Benin (Edo) Traditional; Brutalist (exposed concrete, 1970s–1980s). Other international styles — Mid-Century Modern; Art Deco; Industrial / Loft; Scandinavian; Victorian; Georgian; Tudor; Spanish / Hacienda; Ranch; Postmodern; High-Tech / Glass Curtain-Wall (commercial). REALTIQ maintains the list in the Console and can add styles; a style that is not listed is typed in by the seller and shown on the listing, but is not filterable.

Handover Delivery Stage — Milestone Definitions: Site Preparation & Substructure covers site clearing and excavation (in swampy terrain such as Lekki or Ibeju-Lekki, mandatory soil testing and potential piling), foundation footing, and the Damp Proof Course (DPC, locally the "German Floor"), which provides a flat concrete slab over the foundation walls. Carcass is the raw structural skeleton: sandcrete blockwork to lintel level, decking of intermediate floors for multi-storey buildings, and roofing or parapet works. Semi-Finished (Advanced Shell / Lock-up) means the exterior is rendered and secured with windows and security doors, internal walls are plastered and first-fix plumbing and electrical conduits are embedded, with no sanitary wares, cabinetry or ceilings. Finishing is the second-fix fit-out: POP ceilings, tiling and floor finishes, internal

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

doors, switches, sanitary wares and kitchen cabinets, followed by screeding and painting. Commissioning, External Works & Handover covers interlocking paving, boundary walls and gates, borehole and water treatment plant, transformers and generators, the buyer's snagging inspection, and final handover of possession with key documents such as the Deed of Assignment or allocation papers.

Deep Features & Amenities Catalogue (44 Amenities — Strict AND Logic)

Space & Layout (12)	Power, Water & Sanitation (11)	Interior Fittings & Fixtures (7)	Estate Security, Leisure & Site (14)
Boys' Quarters (BQ)* Maid's Room Guest House / Chalet Study / Home Office Family Lounge Balcony / Terrace Rooftop Terrace Private Garden / Compound Home Cinema Private Gym Basement Attic	24-Hour Electricity* Solar / Inverter System* Backup / Standby Central Generator Dedicated Transformer Connected to Electricity Distribution Pre-Paid Meter Dedicated / Industrial Borehole* Central Water Treatment Plant Connected to Public / Municipal Water Septic Tank Municipal Sewage System	Fitted Kitchen* POP Decorative Ceiling Central Air Conditioning Water Heater Fitted Wardrobes Passenger Elevator / Lift Smart-Home Automation	Gated Access Estate* 24/7 Uniformed Security / Access Post CCTV Surveillance* Video Intercom Electric Fencing Swimming Pool* Fully Equipped Gym Estate Clubhouse Children's Play Area Sports Court / Tennis Waterfront / Ocean View Flood-Free / Covered Drainage Paved / Interlocked Access Road Shared / Estate Parking

***UX Progressive Disclosure Rule:** The top 8 priority features marked with an asterisk (*) are exposed by default in the drawer; a "Show More Amenities" toggle expands the remaining 36. The default set may be revised from usage analytics. Multi-selection applies strict AND logic.

Amenity Definitions: A Maid's Room is an internal room within the main building, flat or living area where a live-in nanny, butler or other domestic staff member lives. It differs from Boys' Quarters (BQ), which are usually externally attached to or separate from the main building or, if attached, have their own entrance and amenities such as a bathroom and, in some cases, a kitchen. Septic Tank and Municipal Sewage System identify the property's sewage-system type. 24-Hour Electricity denotes 24/7 guaranteed power. Private Gym is within the dwelling; Fully Equipped Gym is an estate leisure facility. Passenger Elevator / Lift is most relevant for multi-storey apartments and penthouses; Flood-Free / Covered Drainage addresses seasonal drainage topography. Security, power, water and leisure amenities are critical signals for gated communities, high-value private duplex compounds, townhouses and master-planned estates. Shared / Estate Parking is shared parking provided by the estate or building; each unit's own parking spaces are recorded with Dedicated Parking / Garage.

3.3 Title Conveyance, Trust Signals, Media & Ordering Engine

Promotional badges are decoupled from user filters: Sponsored promotion carries the ranking boost; Featured is editorial placement only.

Title Documents, Advertiser Provenance & Media Quality

Filter Label	Selectable Values / Range	Control Type	Dependencies, Mechanics & Operational Defaults
Declared Title Documents	C of O; Global C of O; Governor's Consent; Deed of Assignment; Deed of Sub-Lease; Letter of Allocation; Registered Survey; Excision; Gazette; Approved Building Plan; R of O	Multi-Select Chips (OR)	Default: Any. Matches listings declaring any of the 11 selected root documents. When active, listings with no stated title are excluded, with an inline count of hidden listings. Global C of O, Deed of Sub-Lease and Letter of Allocation are specialised estate and allocation documents for purchases from private developers or government layout schemes (defined below this table).
Platform-Verified Title Only	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Limits results to listings whose title claims have been independently checked by platform legal officers against official land-registry files, as distinct from what the seller declares. Wording must not imply a legal guarantee: the badge reads "Verified"; hover or tap shows a panel headed "Verified by REALTIQ" with what was checked and when; clicking opens the verification policy; confirm the document list and copy with counsel.
Platform-Verified Listing Only	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Restricts results to listings whose advertiser identity, authority to sell and on-site photographic evidence have been vetted by the portal. Distinct from Verified Title.
Listed By (Entity)	Real Estate Agent; Primary Developer; Direct	Multi-Select Chips (OR)	Default: Any. Isolates advertiser provenance. Developer selection surfaces direct off-plan

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Filter Label	Selectable Values / Range	Control Type	Dependencies, Mechanics & Operational Defaults
	Property Owner		inventory; owner listings require verified identity proof.
From Accounts I Follow	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Registered users only. Restricts results to listings from accounts the user follows (RQS-01 §27.2).
Added to Site (Recency)	Anytime; Last 24 Hours; Last 3 Days; Last 7 Days; Last 14 Days; Last 30 Days	Single-Select Dropdown	Default: Anytime. Evaluates the publishing timestamp (created_at, not the updated date) against current server time.
Listing Availability	Available Only; Include Under Offer; Include Sold	Single-Select Segmented	Default: Available Only. Hides inactive inventory by default; “Include Sold” operates cumulatively. Stale listings keep their availability and show a separate amber freshness label (“Needs confirmation” from about 60 days; from about 90 days a banner also shows checkout paused); they are never greyed out or removed for staleness.
With Photos Only	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: On. Hides image-free listings to maintain portal trust and visual hygiene. Rendered as an active removable chip above results so users can explicitly deselect it.
Has Video Tour	Boolean Toggle (On / Off); options Live, Recorded	Binary Toggle + Option Chips (OR)	Default: Off. Isolates listings featuring hosted video walkthrough footage, either Live (scheduled guided walkthrough) or Recorded. Virtual tour type; see Tour Types (§5).
Has 3D / Virtual Tour	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Isolates listings with interactive Matterport, Realsee or CloudPano 360-degree virtual spatial models. Virtual tour type; see Tour Types (§5).
Has Floor Plan	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Isolates listings with 2D / 3D floor plans displaying verified room dimensions in metres. See §5.
Has Drone Fly-Through	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Isolates listings with drone aerial fly-through footage, where data allows. See §5.
Distress Sale / Urgent	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Surfaces time-sensitive liquidations priced below appraised market value. Requires a clear definition, administrative appraisal verification and abuse monitoring (§6.5).
Featured and Sponsored	Not buyer filters	Editorial placement (Featured); ranking boost (Sponsored)	The buyer-facing “Featured / Not Featured” filter is removed. “Featured” is REALTIQ’s editorial selection with placement slots only (homepage, top of category pages, newsletter) and no ranking weight. Sponsored (paid) items are labelled in results, capped per page and never bypass filters; their boost is factor (5) of the Recommended sort.

Specialised Estate & Allocation Documents: A Global Certificate of Occupancy is a single C of O issued to a developer or community over a large tract of land; individual buyers within that estate hold a Deed of Sub-Lease or an allocation letter tied back to this master document. A Deed of Sub-Lease is used when an entity holding a master lease (such as an estate developer holding a large C of O) carves out and transfers a specific portion of that lease (e.g. an individual house plot or apartment) to a buyer. A Letter of Allocation is issued by a government authority or a private developer to confirm that a specific plot number within a designated estate layout has been formally assigned to a buyer.

3.4 Result Sorting & Ranking Engine

Sort Option	Algorithmic Ordering Mechanism & Business Logic
Recommended (Default)	Multi-factor relevance score blending five factors: (1) platform verification status, (2) media richness [Photos ≥ 5, Video, 3D Tour], (3) listing recency / freshness decay, where freshness also uses the seller’s last confirmation date, so stale listings drop, (4) profile completeness and (5) active Sponsored boost. Each factor’s weight is a Console setting (RQS-06 §19.1). Placeholder weights for build and testing: 20% each; REALTIQ sets the live weights in the Console. Changing a weight changes the order without a code change. Sponsored assets never bypass strict user filters.
Price: Low to High	Strict ascending numeric sort by current_price (₦). Unpriced (POA) listings placed at the end.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Sort Option	Algorithmic Ordering Mechanism & Business Logic
Price: High to Low	Strict descending numeric sort by current_price (₦). Unpriced (POA) listings placed at the end.
Newest / Most Recent	Descending sort by publishing timestamp (created_at). Freshly listed properties take precedence.
Handover Date: Soonest	Ascending sort by projected handover date (handover_epoch ASC). Orders off-plan and under-construction inventory by projected completion date; ready / existing stock is omitted.
Verified First	Boolean tiering: is_verified = true first, then sub-sorted by the Recommended relevance score.
Recently Reduced	Ordered by recency of price reduction (price_reduced_at DESC). Never-reduced listings placed last.
Price Reduced: Largest Drop	Ordered by absolute or percentage price drop (original_price − current_price). Isolates highest discount velocity.
Bedrooms: Most	Descending sort by nominal bedroom count. Commercial properties with null bedroom values placed at the end.
Floor Area: Largest	Descending sort by internal usable floor space (sqm). Null values sorted to the bottom.
Highest Rated	Descending by the average rating received by the seller or developer (RQS-06 §7.2 Ratings; §16.2 ratings component); an average exists only after at least two qualifying reviews (RQS-06 §16.4). Ties are broken by number of reviews, then by the Recommended sort. Listings whose seller or developer has no average are placed after rated ones, in Recommended order. Recommended weights are unchanged.
Trust Tier	Ordered by the seller's or developer's trust tier (RQS-06 §16.4): Platinum, Gold, Silver, Bronze, then New ("New to REALTIQ — building history", RQS-06 §16.3). Ties are broken by trust score (0–100), then by the Recommended sort. Accounts whose tier has been removed are placed last, in Recommended order. Recommended weights are unchanged.

Final Sort Set: Recommended (default), Newest / Most Recent, Price: Low to High, Price: High to Low, Handover Date: Soonest, Verified First, Recently Reduced, Price Reduced: Largest Drop, Bedrooms: Most and Floor Area: Largest are implemented. Highest Rated and Trust Tier are added sorts. See §6.5.

4. UI/UX ARCHITECTURE & CONTROL PLACEMENT

The interface balances frictionless top-level discovery with comprehensive secondary refinement through a coordinated two-tier layout: a persistent desktop navigation bar paired with an 11-section progressive drawer.

4.1 Search Bar (Desktop 6 Core Controls)

- **Location Typeahead:** Multi-token gazetteer with parent auto-absorption.
- **Property Type Popover:** Grouped 41-type selector sharing drawer state.
- **Price Range Popover:** Min / Max inputs + 7 popular price chips.
- **Beds & Baths Popover:** Segmented minimums (Bedrooms, Full Bathrooms) + Exact bedroom toggle (Dedicated Powder Rooms stay in the drawer).
- **All Filters Trigger:** Secondary button with dynamic active-count badge.
- **Save Search CTA:** Modal trigger to configure multi-channel alerts.

4.2 Mobile Experience (100% Feature Parity)

- **Sticky Compact Header:** Bar collapses to a Location pill plus a "Filters (n)" button.
- **Full-Screen Filter Drawer:** Edge-to-edge bottom sheet hosting the complete 11-section inventory, with a sticky header ("Filters", "Clear All", "Close"); collapsible sections summarise their current value; replaces awkward dropdown cascades.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- **Sticky Bottom Action Bar:** Anchors the live matched count and primary CTA (e.g. Show 42 Properties). Changes are staged locally and committed on this CTA.
- **Touch Targets:** ≥ 44 px throughout.

4.3 “All Filters” Drawer Architecture (11 Grouped Sections)

#	Drawer Section	Contained Controls & Interactive Behaviours
01	Property Type	Grouped multi-select across 4 categories (41 types). Section-level “Clear” resets type parameters to Any.
02	Price & Payment Terms	Min / Max inputs, 7 preset range chips, Price Reduced toggle, Unpriced toggle, Payment Type, Instalment Duration, Deposit Cap, Service Charge Ceiling, plus Price Negotiable and Escrow Available toggles.
03	Rooms & Sanitation	Bedrooms min / max with Exact match toggle, Full Bathrooms and Dedicated Powder Rooms (Toilets) segmented controls, and All Rooms En-Suite toggle.
04	Size & Plot Area	Internal floor area (sqm) min / max; Built-up Area (footprint, sqm) min / max; Plot size (sqm) min / max; Number of Floors, conditionally visible for Terraced House or Townhouse.
05	Build Stage & Delivery	Build Stage lifecycle checkboxes (8 states), “Ready to Move In” macro chip, Handover Delivery Stage milestone checkboxes and Handover delivery window dual month pickers.
06	Condition & Services	Furnishing status (Furnished, Semi, Unfurnished) and Serviced property status segmented controls, Dedicated Parking / Garage and Access Road Condition, plus Occupancy Status and Architectural Style.
07	Features & Amenities	44 amenities in 4 groups. Top 8 exposed by default; “Show More” reveals the remaining 36. Strict AND logic.
08	Title & Legal Documents	Declared Title Documents multi-select chips (11 root titles) and Platform-Verified Title Only toggle.
09	Trust & Verification	Platform-Verified Listing Only toggle (identity, authority to sell and on-site photos vetted).
10	Media Quality & Tours	With Photos Only toggle (default: On); virtual tours (Has Video Tour — Live / Recorded; Has 3D / Virtual Tour); Has Floor Plan and Has Drone Fly-Through toggles; physical tours (Open House, Has Show Home, Private Showings).
11	Provenance & Status	Listed By entity (Agent, Developer, Owner), Added to Site recency, Listing Availability, Distress Sale toggle, From Accounts I Follow toggle.

Active Filter Chips Bar	Media Standards & Listing Badging
Positioned directly below the primary search bar and above result cards. Renders an individual dismissible chip (“x”) for every non-default selection; removing a chip re-queries. Multi-select categories collapse to a group label when more than 3 sub-items are checked (e.g. “5 House Types”). A trailing “Clear All” appears when ≥ 1 filter is active and restores baseline defaults (Available Only, With Photos On, Include Unpriced On) rather than switching them off.	Listing cards render explicit badges: photo count (minimum 5 required for verified status, with shot types — completed properties: exterior, living area, kitchen, a bedroom or main room; off-plan: 3 renders plus 2 dated site photos; the number and shot types are settings REALTIQ can adjust), Video badge, 3D Virtual Tour badge (Matterport / 360 viewer) and Floor Plan badge. Verified listings carry a dedicated visual seal. Renders are labelled “Artist’s impression”. Cards also show the Listed By label (Developer, Agent or Owner) and, when a listing is stale, the amber freshness tag.

4.4 Search & Filter Interaction Rules

Interaction Domain	Runtime Rule, Behaviour & Edge-Case Protection
Location Typeahead	Suggestions fire after 2 characters with a 400 ms debounce, ranked by level (Estate, Area, LGA, State) and listing count. Each row shows its parent lineage (e.g. “Ikate · Lekki · Eti-Osa · Lagos”). Text matching nothing is not applied as a location and offers Keywords instead.
Reference Code Override	Submitting an exact listing ID bypasses all criteria, pauses active filters, tokens and map bounds (not clearing them), disables sort and returns the unique

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Interaction Domain	Runtime Rule, Behaviour & Edge-Case Protection
	record with a single chip stating the paused state. Clearing the reference chip restores the prior filter state without reload.
Range Validation & Shorthand	Price, floor area, built-up area, plot size and bedroom ranges parse shorthand (“25m” → ₦25,000,000; “1.5b” → ₦1,500,000,000; “500k” → ₦500,000) and enforce Max ≥ Min, swapping with an explanatory inline notice. Nothing applies while a field is invalid.
Exact Bedrooms Match	When active, the selected minimum becomes an exact requirement (beds = N) and the Max selector is disabled and cleared. “6+” with Exact matches 6 or more. Inert when Minimum is “Any”.
Dependent Cascade	Plan length and deposit render only when “Instalment” is active; the handover window and Handover Delivery Stage render only for Off-plan / Under construction; Number of Floors renders only for Terraced House or Townhouse. Deselecting a parent immediately clears and hides child values, which never contribute to active filter badges.
Zero-Result Diagnosis	On zero matches, the engine evaluates individual filter impact and suggests single-tap removals, naming the first that restores results (e.g. “Remove ‘Swimming Pool’ to see 34 homes”). It never blanks the page mid-query and displays a “Save Search & Alert Me” CTA to capture lead intent. See the fallback ladder in §6.2.
URL Serialisation	100% of active filter parameters serialise into the query string, enabling native sharing, browser back / forward traversal, crawler indexation of canonical landing pages and restoration of the last-used state on return.
Server-Side Querying	All filtering runs against the full catalogue server-side, not client-side filtering of a pre-loaded set. Shared links without parameters reproduce the same default set.

Accessibility & Standards: Full WCAG 2.1 AA compliance. Controls are keyboard-reachable in reading / DOM order, with focus trapping and restoration while the drawer is open; group checkboxes expose a mixed state; live result updates are announced via aria-live="polite" regions; colour is never the only indicator; touch targets ≥ 44 px; contrast ≥ 4.5:1 in both light and dark themes.

5. TOURS, PLANS, INSPECTIONS & TECHNICAL PROPERTY DATA

Feature Component	Functional Scope, Workflow & Behaviour
Video / Virtual Tour Filters	Primary drawer toggles isolating properties with rich digital media, split by virtual tour type into Has Video Tour (Live / Recorded) and Has 3D / Virtual Tour, alongside Has Floor Plan and Has Drone Fly-Through. See §3.3 and Tour Types below.
Open-House Inspections	Physical tour type: filter flag isolating properties hosting scheduled public walkthroughs, with a date / time badge rendered on cards, a scheduled open-house date on the listing and an “Open house this weekend” filter / label. See Tour Types below.
3D Matterport / VR Tour	Interactive web-embed modal (Matterport, Realsee or CloudPano) supporting dollhouse view, spatial room navigation and VR-headset rendering. Matterport, Realsee and CloudPano are supported (their SDKs or APIs are integrated). Capture is provided outside the platform (RQS-06 §1).
Listing-Detail Media Tabs	The media tab shows an icon row per media type present, with counts, jumping straight to each type: Photos; Renders; Video Tour (Recorded); Live Video Tour; 3D Tour / Dollhouse; Virtual Staging; Floor Plans; Site / Master Plan; Survey / TDP; Drone Fly-Through; Aerial / Satellite; Approach & Access Roads; Street View; Map; Construction Progress; CAD / BIM Files (RQS-06 §12.4).
Open-House / 3D-Tour Filters	“Must have open house”, “Must have 3D tour” and a showcase-media flag as filters.
Verified Floor Plans	“Must have Floor Plan” toggle and an interactive viewer displaying 2D / 3D layouts with verified room dimensions in metres.
Distinct Media Flags & Filters	Split the single video / tour toggle into filterable media types where data allows: Has Floor Plan; Has 3D / Virtual Tour; Has Drone Fly-Through; Has Video Tour (Live / Recorded). Implemented in §3.3.
Site Plans & Cadastral / Master Survey	For gated developments and high-end houses: estate master plan or site plan showing boundary coordinates, setbacks and estate master layout, public and viewable / downloadable; the registered survey is kept in the private vault and released to a buyer on request with the seller’s approval. Both uploads are optional.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Feature Component	Functional Scope, Workflow & Behaviour
Individual Property Survey / TDP	For individual properties (not estates or gated developments): the property's TDP, site plan or survey showing the beacons and property lines. The survey and TDP are kept in the private vault and released on request; a site plan may be public.
Drone Aerial Fly-Through	Media tab hosting 4K drone footage showing neighbourhood infrastructure, estate road access, drainage and surrounding developments.
Aerial Photography	High-resolution aerial photographs of the property from drone or satellite imagery.
Media Access Levels	3D / virtual tours and other media except photos, renders and recorded video tours may be Free or Paid, as set by REALTIQ, with the free-access models in RQS-06 §13.2. Photos, renders, recorded video tours and the master plan or site plan of a development are always Free.
Approach & Access-Road Media	Videos, photos and / or a 360° walkthrough of the approaches and access roads to the property, so buyers can assess the surrounding properties and area.
CAD / BIM / Technical Downloads	Gated download repository for commercial buyers and off-plan investors: structural drawings, architectural PDFs and BIM models (e.g. DWG / IFC / Revit). Gated behind developer upload. Available at project and unit level.
Renders	Artist's impressions of the property or development, labelled "Artist's impression" wherever shown. No filter.
Construction Progress Media	Dated photos or videos linked to a construction milestone, shown for properties being built. No filter.
Digital In-Person Inspection Engine	"Book Physical Inspection" modal on listing pages with a real-time calendar picker, time-slot reservation, agent assignment / notification and SMS / WhatsApp confirmation sent as one-way notifications from REALTIQ, with no contact details exchanged. Serves Private Showings (By Appointment Only).
Live Guided Video Tour	Booking option, open to every buyer type, for one-to-one scheduled live walkthroughs by any seller type (owner, agent or agency, developer) or an Inspection Partner, on Zoom integrated into REALTIQ, with real-time Q&A. Surfaces under Has Video Tour: Live. Booked on the platform; REALTIQ issues the meeting link, so no phone numbers are exchanged. Used until the platform can stream live video.

Tour Types (Virtual & Physical)

	Filter Label	Selectable Values / Range	Control Type	Dependencies, Mechanics & Defaults
Virtual	Has Video Tour	Boolean Toggle (On / Off); options Live, Recorded	Binary Toggle + Option Chips (OR)	Default: Off. Isolates properties featuring hosted video walkthrough footage. Options: Live and Recorded.
	Has 3D / Virtual Tour	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Filters for interactive Matterport, Realsee or CloudPano 360-degree virtual spatial models.
Physical	Open House	Boolean Toggle (On / Off); "Open house this weekend"	Binary Toggle + Quick-Select Chip	Default: Off. Allows any potential buyer to walk into a property at a specific, designated time without a prior appointment. Filter flag isolating properties hosting scheduled public walkthroughs, with a scheduled open-house date on the listing, a date / time badge rendered on cards and an "Open house this weekend" filter / label. Open House includes recurring weekly schedules; "Open house this weekend" includes them.
	Private Showings (By Appointment Only)	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Potential buyers must pre-book a specific date and time to view the property, rather than walking in. Bookings use the Digital In-Person Inspection Engine.
	Has Show Home	Boolean Toggle (On / Off)	Binary Toggle Switch	Default: Off. Isolates developer listings with a show home: a finished sample unit of a unit type that buyers can visit (RQS-06 §11.1).

Commercial & Development Ingestion: For commercial and mixed-use listings, the system enforces ingestion of architectural floor plans, approved building plans and parking-capacity data before granting "Verified Listing" status.

Dependency: these media and tour features depend on the capture fields in RQS-02 and RQS-04 and, for booking, on the agent-notification workflow.

6. TECHNICAL ARCHITECTURE, GOVERNANCE & DECISIONS

The discovery engine enforces URL addressability, deterministic query serialisation, aggressive caching and defensive fallback ladders to guarantee sub-300 ms response times.

6.1 Query Serialisation & SLAs

- **Clean URL Query Schema:** Fully serialised parameters (e.g. state=lagos&lga=etiosa&type=detached_duplex&min_price=100m&beds=4&toilets=4&title=c_of_o).
- **Browser History:** pushState on drawer apply; replaceState on viewport pan.
- **Performance Targets:** P95 response < 300 ms server-side; 400 ms debounce on viewport map and text inputs; Facet counts are cached.

6.2 Zero-Result Fallback Ladder

- **Level 1:** Suppress keyword search or exact bedroom match while preserving core attributes.
- **Level 2:** Broaden geographic bounds to the parent administrative entity (Estate → Area → LGA).
- **Level 3:** Expand the price window by ±20%. The UI clearly displays relaxed constraints.

6.3 Saved Search and Multi-Channel Alerts

Signed-in users can persist any active filter configuration — including location tokens and map bounds — into a Saved Search, with alerts for new and reduced listings. The alert engine schedules updates across three cadences: Instant (within 15 minutes of listing ingestion), Daily Digest or Weekly Summary. Notifications dispatch across channels: Email, SMS / WhatsApp Business API and mobile push. Alerts can include “Promoted match” items, labelled Sponsored, following the recipient’s notification settings. These are one-way notifications from REALTIQ.

6.4 Architecture Changes from the Current Build

- **Build Lifecycle Duplication:** Overlapping “Listing Type” (Ready / Off-Plan) and “Completion Stage” controls are unified into a single 8-stage enum (Off-plan through Old) with a “Ready to Move In” macro.
- **Category vs Type Contradiction:** The 41-type grouped taxonomy is adopted; “Estate” moves from the type selector to the geographic gazetteer and a listing_kind flag (Single Property / Development).
- **Currency Filtering vs Conversion:** Currency relocates to the site header as a pure display switcher; queries execute strictly in ₦ (NGN); the “Any Currency” filter is removed.
- **Featured Filter:** Removed from buyer-facing filters; Featured is editorial placement only, with no ranking weight; the paid boost in the Recommended sort is Sponsored.
- **“Search Loaded Properties” Limitation:** Client-side filtering is removed and replaced with server-side querying, Location autocomplete on the bar and Keywords in the drawer.

6.5 Decisions & Implementation Rules

Decision Item	Resolution
Display Currency Options	₦ NGN and $ USD, with an automated current- or previous-day FX rate that buyers may override for their own display. Queries remain in ₦.
“Search as I Move the Map” Default	Default: Off.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Decision Item	Resolution
Build Stage Select Mode	Multi-select.
Travel Radius Increments	15 / 30 / 45 / 60 min.
Sort Option Set	Implement Recommended, Newest, Price Low–High, Price High–Low, Verified First, Recently Reduced, Handover Date: Soonest, Bedrooms: Most, Floor Area: Largest and Price Reduced: Largest Drop. Highest Rated and Trust Tier are added (RQS-06 §16.4).
Plot Area Conversion / Units	Standardise all calculations in sqm (values in square feet are rejected); plots are not used as a unit for entry, display or filtering.
Maisonette Placement	Flats & Apartments.
Location Gazetteer Coverage	Limit suggestions to areas with ≥ 1 published listing; index new areas dynamically as listings onboard. Sellers can submit new areas; they join the Area list after a map-provider match or REALTIQ review.
“Estate” / Development Listings	Adopt the listing_kind flag (Single Property / Development).
Verification Processes at Launch	Deploy the toggles; verification is live at launch.
Verification Liability & Title Wording	State prominently that verification is administrative validation, not a statutory title warranty. The document list and non-guarantee copy are Console settings, confirmed by counsel before launch (RQS-08 Section 14).
Top-Eight Default Features	BQ, 24-Hour Electricity, Fitted Kitchen, Gated Estate, Solar / Inverter, Borehole, CCTV, Swimming Pool; may be revised from usage analytics.
Keywords Logic	Strict AND.
Sold Listings	Within results, via “Include Sold”.
Rooms on Commercial	They do not exclude commercial listings unless a value is set.
Distress Sale Validation	Require vendor proof of a price drop (≥ 15% below valuation) at listing intake before assigning the searchable tag.

Data Migration & Verification Governance: Existing 6-value schemas must be reclassified by listing agents into the 41-type hierarchy, extracting “Estate” into an independent listing_kind development container. Platform-verified titles require an operational workflow vetting root instruments against official land registries; the portal must prominently state that verification constitutes administrative validation and not a statutory title warranty.

7. HOW WE WILL KNOW THE WORK IS COMPLETE

- Every search runs server-side against the whole catalogue; reloading or sharing a URL restores exactly the same
- Within one attribute values combine with OR; across attributes with AND; amenities and keywords use strict AND.
- All 41 property types appear under their four categories; no land, plot, rental, lease or short-let option exists
- Price filters and sorts run in ₦ whatever display currency is selected; changing the display currency never changes
- Defaults apply on a fresh search: With Photos Only On, Available Only, Include Unpriced On, “Search as I move
- Room filters never exclude commercial listings unless a count is set.
- Sponsored listings are labelled and never appear outside the buyer’s filters; Featured has no effect on ranking.
- Zero-result searches show which filter removed the results and offer the fallback ladder.
- Saved searches send alerts at the chosen frequency (Instant, Daily or Weekly) through the channels the buyer
- P95 response time is under 300 ms; the interface meets WCAG 2.1 AA with touch targets of at least 44 px and contrast of at least 4.5:1 in both themes

PART 4 OF 8 · RQS-04

REALTIQ Property Listing Onboarding Specification

How owners, agents and developers list an individual property, with every field mapped to search and comparison.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

QUICK REFERENCE — THE ADD-LISTING FLOW, SECTION BY SECTION

Owners, agents and developers list an individual property through Add Property. A developer choosing “Development” is sent to Projects › Create Project (RQS-02). Every field below names the RQS-03 search filter, sort or rule it supports; option lists marked “Spec options” use the exact labels in RQS-03.

Section	What the seller provides	What it drives for buyers
A. Listing set-up	Listing kind (Single Property or Development), advertiser type, optional Seller’s Agent management, headline, description; a system reference code is issued	Listed By label and filter; keyword search; reference lookup
B. Location	Country (Nigeria), State → LGA → Area from the gazetteer, estate path or standard address path, map pin inside Nigeria	Location hierarchy and typeahead; map and commute search; address shown with the Verified badge once checked
C. Property type	Category and one of the 41 types; commercial details for commercial and mixed-use listings	Property Type filter; comparison rows
D. Price and payment	List price or POA, currency (NGN or USD) with optional second price, price history, payment types with escrow per payment type, service charge, private reserve price, price negotiable	Price filters and sorts; Payment Type; Escrow Available; service-charge cap; Price Negotiable
E. Build stage	Build stage, completion before handover, milestone, handover month, construction start, milestone targets	Build Stage; Ready to Move In; handover filters and sort
F. Rooms and sanitation	Bedrooms, full bathrooms, powder rooms, en-suite	Beds & Baths filters and sort
G. Size and structure	Internal floor area, built-up area, plot size in m²; number of floors for terraced houses and townhouses; unbuilt area calculated	Size filters; Floor Area sort
H. Condition and services	Furnishing, serviced, parking, access road, occupancy, architectural style	Condition and services filters
I. Amenities	44 catalogue amenities in four groups, plus a display-only “Other amenity” field	Amenities filter (strict AND)
J. Title and trust	Declared title documents and uploads to the private vault, listing verification, commercial verification pack, distress-sale proof	Declared Title Documents; verified filters; Distress Sale
K. Media, plans and tours	Dedicated upload sections per media type, plans and technical files, open house, private showings, live video	Media and tour filters; media tab; viewing panel
L. Status	Availability, actual sale price (captured automatically), publishing date, monthly confirmation	Listing Availability; recency; freshness

KEY DECISIONS AT A GLANCE

Topic	Decision	Section
One vocabulary	Every listing field maps to an RQS-03 filter, sort or rule and uses its exact option labels.	All
Developments	“Development” is offered to developer accounts only and redirects to Create Project (RQS-02).	A
Advertiser	Prefilled and locked from the account; drives the Listed By label. Listing needs the Verified access level.	A
Location	Gazetteer selects replace free text; unlisted areas and estates are matched to the map provider or reviewed. The full address is shown publicly.	B
No land	No land or plot option; shell buildings use a physical type plus a build stage.	C
Prices	NGN or USD with an optional second price; the reserve price is required and private; the actual sale price is captured from the platform transaction and private.	D, L

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Topic	Decision	Section
Payment and escrow	Escrow is chosen per payment type; the seller's terms include who pays the REALTIQ transaction fee (buyer, seller or split, default 50/50).	D
Measurements	Square metres only; square feet rejected, not converted.	G
Media	One titled upload section per media type; the section sets the media type. Photos, renders and recorded video tours are always Free.	K
Verification	Title documents go to the private vault; Verified badges appear only on facts REALTIQ has checked.	J
Freshness	Monthly "Nothing has changed" confirmation; an amber tag at about 60 days and checkout paused at about 90 days; listings stay visible.	L

A–B. LISTING SET-UP & LOCATION

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
A. Listing set-up › Listing kind	Is this a single property or a development (a project)?	Single-select. Spec options: Single Property; Development. Helper: a development is a project listed by a developer, with one or more units — such as an estate, apartment building, or a single home the developer has named as a project	Required. Single Property → continue in Add Property. Development → redirect to the project addition dashboard (Projects › Create Project) instead of this form. Development also governs Site Plans & Cadastral / Master Survey (K10). Development is offered to developer accounts only	listing_kind flag (Single Property vs Development); "Estate" / Development Listings
A. Listing set-up › Advertiser	Who is listing this property?	Single-select. Spec options: Real Estate Agent; Primary Developer; Direct Property Owner	Required. Direct Property Owner requires verified identity proof. Prefilled and locked when derived from the account. Drives the listing card label: Developer, Agent or Owner. The lister chooses the Listed By display: type only ("Listed by Developer") or type and name ("Listed by Developer · [name]"), with the Verified badge and trust tier; agent-managed listings can show "Listed by Owner · Managed by [agent]". Listing a property requires the Verified access level (minimum KYC)	Listed By (Entity)
A. Listing set-up › Agent management	Is this listing managed by a Seller's Agent?	Mandate with the agent; permissions granted per listing (RQS-06 §9.3)	Optional. One editor at a time: editing and boosting are done by one party only (RQS-06 §9.4)	Listed By display ("Managed by [agent]")
A. Listing set-up › Headline	Listing title	Free text	Required; maximum length set by REALTIQ in the Console	Full-Text Keyword Search (listing headlines)
A. Listing set-up › Description	Describe the property	Free text (multi-line)	Required	Full-Text Keyword Search (descriptions)
A. Listing set-up › Reference code	No seller question — system-issued reference (e.g. RQ-10492)	System-generated, read-only	Issued on submission; must be unique	Property Ref / ID Lookup
B. Location › 1 Country	Country	Fixed value: Nigeria.	Locked; not editable	Scope: Target Market Nigeria (context only)
B. Location › 2 State	State	Dependent single-select. Spec options: Nigeria's 36 states and the Federal Capital	Required. Parent of LGA	Location Hierarchy (State); Browse by State / Region

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
		Territory (FCT Abuja)		
B. Location › 3 LGA	Local Government Area (LGA)	Dependent single-select, filtered by State. Values from the search gazetteer (gazetteer maintained by REALTIQ)	Required; cleared when State changes	Location Hierarchy (LGA)
B. Location › 4 Area	Area / district	Dependent single-select, filtered by LGA. Gazetteer values; “area not listed” handling: the seller types the area; it is matched to the map provider or sent to REALTIQ review	Required; cleared when LGA changes. Replaces free-text “neighbourhood”	Location Hierarchy (Area)
B. Location › 5 Address type	Is the property inside an estate or gated community?	Single-select: Yes; No. the specification defines Gated Estate as an optional fourth tier	Required. No → standard path (B6–B8). Yes → estate path (B9–B12)	Location Hierarchy (Gated Estate tier)
B. Location › Standard path › 6 Street	Street name	Free text, with optional map-provider address suggestions.	Shown when B5 = No. Not a search filter; the full address is shown publicly, with the Verified badge once REALTIQ has checked it. Address verification through the address verification provider	None directly (address completeness)
B. Location › Standard path › 7 House number	House number	Free text (allows “12A”).	Shown when B5 = No. Shown publicly as part of the address	None directly
B. Location › Standard path › 8 Unit / flat number	Unit / flat number	Free text.	Shown when B5 = No and parent category is Flats & Apartments, Commercial Buildings or Mixed Use; optional	None directly
B. Location › Estate path › 9 Street	Street name (road the estate is on)	Free text, with optional map-provider address suggestions.	Shown when B5 = Yes	None directly
B. Location › Estate path › 10 Estate	Estate / gated community name	Dependent single-select, filtered by Area; gazetteer values. “Estate not listed” handling: the seller types the estate name; it is matched to the map provider or sent to REALTIQ review	Required when B5 = Yes; cleared when Area changes	Location Hierarchy (Gated Estate); Location Autocomplete (State → LGA → Area → Gated Estate)
B. Location › Estate path › 11 Street inside estate	Street name inside the estate	Free text.	Shown when B5 = Yes	None directly
B. Location › Estate path › 12 House / unit number	House / unit / apartment number	Free text.	Shown when B5 = Yes	None directly
B. Location › 13 Map position	Pin the property on the map (latitude and longitude)	Pin set from an address suggestion, by dropping a pin, or by typing latitude and longitude (decimal degrees)	Numeric only; latitude −90 to 90, longitude −180 to 180. Required; the pin must fall inside Nigeria	Search as I Move the Map; Interactive Map Viewport; Travel Radius / Commute

C. PROPERTY TYPE

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
C. Property type › 1 Parent category	What kind of property is this?	Single-select. Spec options: Flats & Apartments; Houses; Commercial Buildings; Mixed Use	Required. Parent of C2. No land option (standalone land is excluded)	41-type grouped taxonomy (Property Type filter);

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
				Deliberately Excluded Asset Classes
C. Property type › 2a Flats & Apartments (12)	Which type of flat or apartment?	Dependent single-select. Spec options: Flat / Standard Apartment; 1-Bedroom Flat; 2-Bedroom Flat / Apartment; 3-Bedroom Flat / Apartment; 4-Bedroom+ Flat / Apartment; Mini Flat (Room & Parlour); Self-Contain (Self-Contained); Studio Apartment; Penthouse; Maisonette; Serviced Apartment; Block of Flats. Unit floor level is not defined by the specification	Shown when C1 = Flats & Apartments; required. A bedroom-count type sets the matching Bedrooms value (F1)	41-type taxonomy — Flats & Apartments
C. Property type › 2b Houses (10)	Which type of house?	Dependent single-select. Spec options: Detached Duplex; Semi-Detached Duplex; Terraced House; Detached Bungalow; Semi-Detached Bungalow; Terraced Bungalow; Townhouse; Mansion / Villa; Chalet; Boys' Quarters (BQ)	Shown when C1 = Houses; required. Terraced House or Townhouse unlocks Number of floors (G4).	41-type taxonomy — Houses
C. Property type › 2c Commercial Buildings (18)	Which type of commercial building?	Dependent single-select. Spec options: Office Space; Co-Working Space; Shop / Retail; Shop in a Mall; Showroom; Plaza / Complex / Mall; Restaurant / Café Space; Warehouse; Cold Room / Logistics Hub; Hotel / Guest House; Filling Station; Petrol / Gas Plant / Tank Farm; Factory; School; Hospital / Clinic; Event Centre; Place of Worship; Other Commercial	Shown when C1 = Commercial Buildings; required. Room fields (F1–F4) may be left blank. Unlocks the commercial details (C3)	41-type taxonomy — Commercial Buildings; Commercial Room Nullability
C. Property type › 2d Mixed Use (1)	Which type of mixed-use property?	Dependent single-select. Spec option: Mixed-Use Building	Shown when C1 = Mixed Use; required. A mixed-use building can be listed whole (this type) or as separate listings for its components, each with its own listing card. Unlocks the commercial details (C3)	41-type taxonomy — Mixed Use
C. Property type › 3 Commercial details	Commercial details of the property	Permitted or intended use (single-select list); frontage (m); floors or units (whole number); loading or vehicle access (Yes / No and type); power capacity and backup; lifts (count); fit-out level: Shell & core; Partly fitted; Fully fitted	Shown when C1 = Commercial Buildings or Mixed Use; hidden for residential types	Comparison rows (RQS-05)
C. Property type › Shell buildings	No separate type — "Uncompleted Structure" is captured through Build stage (E1)	Not a type value	Sellers with a shell building choose the physical type here and Uncompleted building or Semi-finished in E1	"Uncompleted Structure" (market term) → Build Stage Lifecycle

D. PRICE & PAYMENT

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
D. Price › 1 List price	List price	Numeric, whole units of the currency chosen in D3, ≥ 0, thousands-separated	Required unless D2 is ticked	Min & Max Price; Popular Price Ranges; Price: Low to High / High to Low; Currency & Valuation Engine Rule

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
D. Price › 2 Price on Application	Price on Application (POA) — do not show a price	Checkbox	When ticked, D1 is disabled and cleared; either D1 or D2 is required	Include Unpriced Listings; POA placed at the end of price sorts
D. Price › 3 Currency	Which currency is the list price in?	Single-select: NGN; USD. Optional second list price in the other currency, shown as the seller's stated price	Required. Applies to the list price (D1), the reserve price (D7) and the actual sale price (L1 › Actual sale price). For search, a USD price is converted to ₦ using the automated current- or previous-day FX rate. Payment terms may state a USD list price payable in NGN at a rate both parties confirm in the platform before each payment (RQS-08 Section 7.3)	Min & Max Price; Currency & Valuation Engine Rule; Listing Currency & Buyer-Visible Pricing; Display Currency Switcher
D. Price › 4 Price history	No seller question — original price and reduction date kept when the price is edited	System-captured	Recorded on every price change after publication	Price Reduced Since Listing; Recently Reduced; Price Reduced: Largest Drop
D. Payment › 5 Payment type	Which payment options do you accept?	Multi-select checkboxes. Spec options: Outright Purchase; Instalment Plan; Mortgage Accepted (hidden until a Mortgage Partner is active)	At least one required. Escrow is chosen per payment type (D5 › Escrow). Terms per RQS-06 §10.2, including refund, cancellation, default and penalty terms and the REALTIQ transaction fee payer: buyer; seller; or split (default 50/50, changeable per transaction; RQS-08 Section 7)	Payment Type
D. Payment › 5 › Instalment duration	Longest instalment period you offer	Numeric, whole months, > 0. Filter thresholds in specification: 6+, 12+, 24+, 36+ months	Shown and required only when Instalment Plan is ticked; cleared when unticked	Instalment Duration
D. Payment › 5 › Initial deposit	Initial deposit required at contract signing	Numeric, % of price, 0–100. Filter thresholds in specification: up to 10%, 20%, 30%, 50%	Shown and required only when Instalment Plan is ticked	Initial Deposit Cap
D. Payment › 5 › Escrow	Do you offer REALTIQ escrow to buyers?	Single-select: Yes; No, chosen per payment type: on Outright, on Instalment, or both. Helper: the buyer's funds are held by REALTIQ's licensed payment partner until the transaction's specified conditions are met	Seller's option	Escrow Available
D. Price › 6 Service charge	Annual service charge	Numeric, ₦ per year, whole Naira, ≥ 0; plus a "No service charge" option. Filter bands in specification: None; up to ₦500k; ₦1M; ₦2.5M; ₦5M / year	Either an amount or "No service charge" should be given; blank is excluded when buyers set a cap	Maximum Service Charge
D. Price › 7 Reserve price	Reserve price — the lowest price you will accept	Numeric, whole units of the listing currency, ≥ 0	Required. Must not exceed the list price (D1); may equal it if the seller will not accept less, or be set lower if the seller is open to a lower price. Never shown to buyers; not used in search results, filters or sorting. Private to the seller: not viewed by REALTIQ staff; used only in aggregated analytics	None — private seller data (buyers see only the list price); Listing Currency & Buyer-Visible Pricing
D. Price › 8 Price negotiable	Is the list price negotiable?	Single-select: Yes; No	Required	Price Negotiable

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

E–G. BUILD STAGE, ROOMS & SIZE

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
E. Build stage › 1 Build stage	What stage is the property at?	Single-select (one current stage; the specification's multi-select applies to the buyer filter). Spec options: Off-plan; Under construction; Uncompleted building; Semi-finished (Advanced Shell / Lock-up); Newly built; Renovated; Previously owned; Old	Required; no pre-selected value. Replaces both legacy controls. Off-plan or Under construction unlocks E2 and E3; Uncompleted building or Semi-finished shows E1a	Build Stage Lifecycle; Ready to Move In (Newly built, Renovated, Previously owned)
E. Build stage › 1a Completion before handover	Will it be completed before handover?	Single-select: Yes; No	Shown when E1 = Uncompleted building or Semi-finished. Yes → E2 and E3 required. No → listed "Sold as is", with no handover date	Build Stage Lifecycle ("Sold as is" is a label, not a filter value)
E. Build stage › 1 › 2 Construction milestone	Which construction milestone has been reached?	Dependent grouped single-select (one current milestone). Spec options by phase: Site Preparation & Substructure: Site Clearing & Excavation; Foundation Footing; DPC (German Floor). Carcass: Blockwork / Lintel Level; Decking; Roofing / Parapet. Semi-Finished: Lock-up; First-Fix Infrastructure. Finishing: POP Ceiling; Tiling & Floor Finishes; Second-Fix Installation; Screeding & Painting. Commissioning, External Works & Handover: External Works & Services; Snagging & Inspection; Handover	Shown and required only when E1 = Off-plan or Under construction (or E1a = Yes); hidden and cleared otherwise	Handover Delivery Stage
E. Build stage › 1 › 3 Projected handover	When do you expect to hand over?	Month / year picker. One month; earlier dates are kept when revised	Shown and required only when E1 = Off-plan or Under construction (or E1a = Yes); not earlier than the current month	Handover Delivery Window; Handover Date: Soonest
E. Build stage › 4 Construction start	When did (or will) construction start?	Month / year, or "Not started"	Shown with E2. Planned duration is calculated from E4 and E3	Descriptive
E. Build stage › 5 Milestone targets	Target dates for upcoming milestones (optional)	Month / year per remaining milestone	Shown with E2; revised targets keep the original visible	Descriptive
F. Rooms & sanitation › 1 Bedrooms	Number of bedrooms	Numeric, whole number ≥ 0. Filter options in specification: 1+ to 6+ (min), 1 to 6+ (max)	Blank by default (no pre-fill). May be blank for Commercial Buildings types	Bedrooms Boundary; Exact Bedrooms Match; Bedrooms: Most; Commercial Room Nullability
F. Rooms & sanitation › 2 Full bathrooms	Full bathrooms (toilet, basin and a bath or shower)	Numeric, whole number ≥ 0. Filter options in specification: 1; 2; 3; 4; 5+	Blank by default. Excludes guest powder rooms. May be blank for Commercial Buildings	Full Bathrooms; Commercial Room Nullability
F. Rooms & sanitation › 3 Powder rooms	Dedicated powder rooms (guest toilets)	Numeric, whole number ≥ 0. Filter options in specification: 1+ to 6+	Blank by default. Helper: guest WCs near the foyer or lounge, with no bath or shower	Dedicated Powder Rooms (Toilets)
F. Rooms & sanitation › 4 En-suite	Does every bedroom have its own en-suite bathroom?	Single-select: Yes; No	Shown when F1 ≥ 1	All Rooms En-Suite
G. Size & structure › 1 Internal floor area	Internal floor area (m²) — total usable space across all floors	Numeric, square metres, > 0	Unit fixed to m². Required; values in square feet are rejected, not converted	Internal Floor Area; Floor Area: Largest
G. Size & structure › 2	Built-up area (m²) — the	Numeric, square metres, > 0	Must be labelled as footprint, distinct from G1	Building Area

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
Built-up area (footprint)	ground area the building sits on		and G3. For attached units on a shared lot (e.g. a townhouse block), also record the whole building's footprint; buyers see both	
G. Size & structure › 3 Plot size	Plot size (m²) — the land the listed property sits on	Numeric, square metres, > 0. Entry in m² only; plots are not used as a unit	Shown for all properties that sit on land; for flats labelled "Site area (shared)"	Plot Size of Property; Plot Size Dependency
G. Size & structure › 4 Number of floors	How many floors does the terrace have?	Numeric, whole number ≥ 1. Filter options in specification: 2 floors; 3 floors; 4+ floors	Shown and required only for Terraced House or Townhouse; hidden and cleared otherwise	Number of Floors (Terraces)
G. Size & structure › 5 Unbuilt area	Unbuilt area (m²) — yards, parking and garden	Calculated automatically: plot size minus built-up area (whole-building footprint on a shared lot)	Not entered by the seller	Descriptive

H–I. CONDITION, SERVICES & AMENITIES

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
H. Condition & services › 1 Furnishing	Is the property furnished?	Single-select. Spec options: Furnished; Semi-Furnished; Unfurnished	Required; "unknown" is excluded when buyers filter	Furnishing Status
H. Condition & services › 2 Serviced	Is this a serviced property (central security, waste handling, common-area cleaning and power management)?	Single-select. Spec options: Serviced; Not Serviced	Required	Serviced Property
H. Condition & services › 3 Parking	How many vehicles can park in a private garage or designated compound bay?	Numeric, whole vehicles ≥ 0. Filter options in specification: 1+; 2+; 3+; 4+; 6+ vehicles	Required. Whole numbers only	Dedicated Parking / Garage; Commercial & Development Ingestion (parking capacity)
H. Condition & services › 4 Access road	Condition of the access road (tick all that apply)	Multi-select. Spec options: Tarred; Untarred; Flood-prone; Sand-filled area	At least one	Access Road Condition
H. Condition & services › 5 Occupancy	Is the property sold with occupiers?	Single-select: Vacant possession; Sold with occupiers. Helper: Sold with occupiers means the property has present tenants whose lease or rent is still running; the new owner may keep them, or refund them and evict them.	Required. Declared on every listing; new builds default to Vacant possession	Occupancy Status
H. Condition & services › 6 Architectural style	What is the architectural style of the building?	Single-select from a fixed list; if the style is not listed, the seller types it in. Styles come from REALTIQ's fixed style list (Architectural Style List, RQS-03 §3.2)	Typed styles are shown on the listing but are not filterable	Architectural Style
I. Amenities › Space & Layout (12)	Tick every feature the property has	Multi-select checkboxes. Spec options: Boys' Quarters (BQ)*; Maid's Room; Guest House / Chalet; Study / Home Office; Family Lounge; Balcony / Terrace; Rooftop Terrace; Private Garden / Compound; Home Cinema; Private Gym; Basement; Attic	Exact labels only; an "Other amenity" text field is provided (I. Amenities › Other amenity). Helper: Maid's Room is internal; BQ has its own entrance or sits apart	Deep Features & Amenities Catalogue (strict AND)
I. Amenities › Power, Water & Sanitation (11)	Tick every feature the property has	Multi-select checkboxes. Spec options: 24-Hour Electricity*; Solar / Inverter System*; Backup / Standby Central Generator;	Exact labels only. "Power available" and "Water available" are replaced by these	Deep Features & Amenities Catalogue (strict AND)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
		Dedicated Transformer; Connected to Electricity Distribution; Pre-Paid Meter; Dedicated / Industrial Borehole*; Central Water Treatment Plant; Connected to Public / Municipal Water; Septic Tank; Municipal Sewage System	catalogue items	
I. Amenities › Interior Fittings & Fixtures (7)	Tick every feature the property has	Multi-select checkboxes. Spec options: Fitted Kitchen*; POP Decorative Ceiling; Central Air Conditioning; Water Heater; Fitted Wardrobes; Passenger Elevator / Lift; Smart-Home Automation	Exact labels only	Deep Features & Amenities Catalogue (strict AND)
I. Amenities › Estate Security, Leisure & Site (14)	Tick every feature the property has	Multi-select checkboxes. Spec options: Gated Access Estate*; 24/7 Uniformed Security / Access Post; CCTV Surveillance*; Video Intercom; Electric Fencing; Swimming Pool*; Fully Equipped Gym; Estate Clubhouse; Children's Play Area; Sports Court / Tennis; Waterfront / Ocean View; Flood-Free / Covered Drainage; Paved / Interlocked Access Road; Shared / Estate Parking	Exact labels only. Helper: Fully Equipped Gym is an estate facility; Private Gym is in the dwelling	Deep Features & Amenities Catalogue (strict AND)
I. Amenities › Other amenity	Any other amenity not in the catalogue	Free text	Typed amenities are displayed on the listing and are not search filters	None (display only)

* Top-eight priority amenities in the specification (shown first in the buyer drawer).

J–L. TITLE, TRUST, MEDIA, TOURS & STATUS

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
J. Title & trust › 1 Declared title	Which title documents does the property have?	Multi-select. Spec options: C of O; Global C of O; Governor's Consent; Deed of Assignment; Deed of Sub-Lease; Letter of Allocation; Registered Survey; Excision; Gazette; Approved Building Plan; R of O. Plus "No title document declared"	Declaration is searchable; files stay private. Each declared document is uploaded to the private vault (J2)	Declared Title Documents
J. Title & trust › 1a Title reference	Title reference details	Text fields: registration or certificate number; registry (state land registry or AGIS); survey plan number. Optional when no title is declared	Used for the property register (RQS-06 §8.4); private, never shown publicly	Property register; duplicate and resale checks
J. Title & trust › 1 › 2 Title uploads	Upload each declared document	File upload, one per document, tagged with a J1 value. PDF, JPEG, PNG or WebP, up to 50 MB	Private vault; never public media	Platform-Verified Title Only (workflow input)
J. Title & trust › 3 Listing verification	Proof of identity and authority to sell	File upload. Document types follow RQS-06 §3.2–3.3: identity, plus proof of authority to sell	Required before Verified Listing status; reviewed by the portal. Verified items carry the "Verified" badge; hover or tap shows what was checked and when; clicking opens the verification policy	Platform-Verified Listing Only
J. Title & trust › 4 Commercial ingestion	Commercial and mixed-use verification pack	Composite: floor plan (K5), Approved Building Plan (J1–J2), parking capacity (H3)	Required before Verified Listing when C1 = Commercial Buildings or Mixed Use	Commercial & Development Ingestion
J. Title & trust › 5	Mark as urgent / distress	Checkbox + required valuation upload showing price	Tag becomes searchable only after admin review	Distress Sale / Urgent; Distress

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
Distress sale	sale	≥ 15% below valuation		Sale Validation
K. Media › 0 Section layout	One dedicated, titled upload section per media type	Separate sections titled: Photos; Renders; Construction progress; Video walkthrough; Floor plans; 3D / virtual tour; Drone fly-through; Aerial photographs; Approach & access-road media. File formats: Photos — image formats only (JPEG, PNG and other photo formats); Video walkthrough — video formats only (MP4 and other video formats); all other upload sections — all file formats	Replaces the single shared “Media” zone on Add Property and the “PROJECT MEDIA” zone on Create Project. A file’s section determines its media type; no separate tagging. Each item carries an access level — Free, Paid, On request or Private (RQS-06 §13); photos, renders and recorded video tours are always Free	With Photos Only; Has Video Tour; Has 3D / Virtual Tour; Has Floor Plan; Has Drone Fly-Through; Aerial Photography; Approach & Access-Road Media; Media Standards & Listing Badging
K. Media › 1 Photos	Upload photos	Dedicated upload section titled “Photos”. Image formats only: JPEG, PNG and other photo formats; counter “n of 5”	Cover image order: the front of the building; then the next most suitable exterior; then the floor plan. Minimum 5 required for verified status, with shot types — completed properties: exterior, living area, kitchen, a bedroom or main room; off-plan: 3 renders plus 2 dated site photos; the number and shot types are settings REALTIQ can adjust; non-image files are rejected with an inline message	With Photos Only; Media Standards & Listing Badging (photo count); Recommended (media richness)
K. Media › 1a Renders	Upload renders (artist’s impressions)	Dedicated upload section titled “Renders”. Image formats only	Labelled “Artist’s impression” wherever shown	Media Standards & Listing Badging
K. Media › 1b Construction progress	Upload dated construction progress photos or video	Dedicated upload section titled “Construction progress”. All file formats; each item dated and linked to a milestone (E2)	Shown when E1 = Off-plan or Under construction (or E1a = Yes)	Descriptive
K. Media › 2 Recorded video	Upload a video walkthrough	Dedicated upload section titled “Video walkthrough”. Video formats only: MP4 and other video formats; non-video files are rejected with an inline message	—	Has Video Tour — Recorded
K. Media › 3 Live video	Do you offer live video tours to buyers?	Single-select: Yes; No	Yes links to the booking engine. Booked on the platform; the session runs on Zoom, integrated into REALTIQ, until the platform can stream; REALTIQ issues the meeting link so no phone numbers are exchanged. Run by any seller type — owner, agent or agency, developer (free at launch; charging built and switched off, RQS-08 08-PF-10) or by an Inspection Partner (fee paid by the buyer; REALTIQ share split automatically)	Has Video Tour — Live; Live Guided Video Tour
K. Media › 4 3D / virtual tour	3D / virtual tour link	Dedicated section titled “3D / virtual tour” with a URL field. Spec-named hosts: Matterport; Realsee; CloudPano	Must be a valid Matterport, Realsee or CloudPano link. Matterport, Realsee and CloudPano are supported (their SDKs or APIs are integrated). Capture is provided outside the platform	Has 3D / Virtual Tour; 3D Matterport / VR Tour
K. Media › 5 Floor plan	Upload floor plan(s) with room dimensions	Dedicated upload section titled “Floor plans”. All file formats accepted; room dimensions in metres	Required for Commercial & Development Ingestion (J4)	Has Floor Plan; Verified Floor Plans
K. Media › 6 Drone fly-through	Upload drone fly-through footage	Dedicated upload section titled “Drone fly-through”. All file formats accepted	—	Has Drone Fly-Through; Drone Aerial Fly-Through
K. Media › 7 Aerial	Upload aerial photographs	Dedicated upload section titled “Aerial photographs”.	—	Aerial Photography

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Category / hierarchy	Onboarding question or field	Input type, options, units, and subcategories	Conditional logic / validation	Specification item supported
photos	(drone, Google Earth, Google Maps or satellite imagery)	All file formats accepted. Sources: drone, Google Earth, Google Maps or satellite imagery		
K. Media › 8 Approach & access road	Upload photos, video or a 360° walkthrough of the approach and access roads	Dedicated upload section titled “Approach & access-road media”. All file formats accepted (photos, video or 360° walkthroughs)	—	Approach & Access-Road Media
K. Plans › 9 Property survey / TDP	Survey, TDP or site plan showing beacons and property lines	File upload, kept in the private vault and released to a buyer on request; a site plan may be public	Shown for Single Property listings (not estates or developments)	Individual Property Survey / TDP
K. Plans › 10 Master survey	Estate master plan or site plan; registered survey	File upload. Master plan or site plan: public, buyer-viewable / downloadable. Registered survey: private vault, released on request. Both optional	Shown for Development listings; optional for other listings	Site Plans & Cadastral / Master Survey
K. Plans › 11 Technical files	Upload structural or architectural drawings and BIM models	File upload. Spec-named formats: architectural PDFs; DWG; IFC; Revit	Developer upload; access level per RQS-06 §13	CAD / BIM / Technical Downloads
K. Tours › 12 Open house	Will you hold an open house? Add date(s) and times	Date + start time + end time; one or more entries; or a recurring weekly schedule (days and hours)	Date not in the past	Open House; Open-House Inspections (“Open house this weekend”)
K. Tours › 13 Private showings	Do you offer viewings by appointment only?	Single-select: Yes; No	Yes links to the Digital In-Person Inspection Engine	Private Showings (By Appointment Only); Digital In-Person Inspection Engine
L. Status › 1 Availability	Listing status	Single-select. Spec options: Available; Under Offer; Sold	Set after publication; new listings start as Available. Sold is set automatically when the transaction is complete (legal transfer done, escrow fully released, nothing outstanding). Seller-facing labels follow RQS-06 §5; public labels remain Available, Under Offer and Sold	Listing Availability
L. Status › 1 › Actual sale price	What price did the property actually sell for?	Numeric, whole units of the listing currency, ≥ 0	Captured automatically from the platform transaction, with the completion date; the seller confirms. Recorded separately from the list and reserve prices, for analytics; never shown to buyers	None — private transaction record; Listing Currency & Buyer-Visible Pricing
L. Status › 2 Publishing date	No seller question — publishing timestamp recorded on submission	System-captured	—	Added to Site (Recency); Newest / Most Recent
L. Status › 3 Monthly confirmation	Is everything still accurate?	Monthly reminder with a one-button “Nothing has changed” confirmation	After about 60 days without confirmation: amber “Needs confirmation” tag and lower search ranking. After about 90 days: amber banner “Details not confirmed since [date] — checkout paused until the seller confirms”; the listing stays visible	Recommended (freshness); Listing Availability

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

M. HOW WE WILL KNOW THE WORK IS COMPLETE

- Every field in Sections A–L saves to the listing record and feeds the RQS-03 filter, sort or rule named against it, using RQS-03's exact option labels.
- Advertiser type is prefilled and locked from the account; a developer choosing "Development" is sent to Create Project (RQS-02).
- There is no land or plot option; shell buildings are listed with a physical type and a build stage.
- Values in square feet are rejected; all areas are in m².
- The reserve price is required and private; the actual sale price is captured from the platform transaction and never shown to buyers.
- Escrow is chosen per payment type, and the payment terms show who pays the REALTIQ transaction fee before the listing is published.
- Each media upload section sets its media type; photos, renders and recorded video tours are always Free.
- Title documents go to the private vault; no Verified badge appears until REALTIQ has checked the fact it covers.
- The monthly confirmation, the 60-day "Needs confirmation" tag and the 90-day checkout pause work as in Section L, and the listing stays visible throughout.

PART 5 OF 8 · RQS-05

REALTIQ Property Comparison Specification

How buyers compare two to four properties side by side — price, size, condition and trust — and move straight to enquiring or booking a viewing.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

QUICK REFERENCE — COMPARE AT A GLANCE

Compare is a launch feature. Section 13 lists the changes it needs in the add-listing flow.

Area	What it does	Section
The set	One active set per user, 2 to 4 properties, one category (residential or commercial); nothing is added without the buyer confirming	2
Entry points	One “Add to compare” toggle on cards, map pin previews, detail pages and project unit cards; “Compare top matches” on search results; a persistent tray; a Compare page with its own URL; “Compare saved properties” on Favourites	3
Manual flow	Add, keep browsing, open at 2 or more, review, act (message, viewing, documents), back to results with the exact search restored	4
Criteria-based picks	Compare top matches by a chosen criterion with a preview; Compare with similar from one property; Compare with recent sales	5, 9
Comparison view	Properties as columns, attributes as rows in collapsible groups; differences only; pin a reference; objective markers only	6
Currency	Toggle between NGN and USD with a named daily rate; the buyer can set their own rate; the seller’s price stays the price of record	7
Duplicates	Listings of the same property are grouped under one property record; uncertain matches go to review	8
Sold comparables	Sold properties of the same category, type and area, with the last asking price; sign-in required for details	9
Status changes	Price changes, Under Offer, Sold (greyed), Needs confirmation (amber) and withdrawn listings are handled in place	10
Accounts and leads	Full access for guests on the device; sign-in to sync, share or set alerts; enquiries from every column; opt-in lead context; anonymised seller insights	11
Mobile	A two-column comparison view; light and dark themes	12

KEY DECISIONS AT A GLANCE

Topic	Decision	Section
Set size	Minimum 2 to open the view, maximum 4; a full set shows a replace prompt and never drops a property silently.	2
One category	A set is residential or commercial, never both; projects are not compared, their units are.	2, 3
No silent adds	Every automatic pick goes through a preview and the buyer confirms.	2, 5
One control	A single “Add to compare” toggle everywhere; no “compare mode” that turns cards into checkboxes.	3
Markers	Objective markers only (lowest price, lowest price per m², largest area); no “best choice” labels; sold properties excluded.	6
FX	The Central Bank of Nigeria’s official daily rate (NFEM), set in the Console and refreshed daily; sellers cannot change the rate buyers see.	7, 16
Sale prices	The actual sale price is never shown; sold comparables show the last asking price before sale.	9
Sign-in gate	Sold details need sign-in (Registered level); guests see a count.	9, 16
Similarity	±20% size and ±15% price by default; the buyer can adjust them.	5, 16
Occupancy	Every listing declares Vacant possession or Sold with occupiers; no occupier income is shown.	6, 16

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Topic	Decision	Section
Launch scope	Every Compare feature launches, including the top navigation tab. Compare with recent sales appears once an area has the minimum number of sold records set in the Console.	14

1. GOAL & SCOPE

What Compare needs to do for buyers.

- **Goal:** Let buyers put 2 to 4 properties side by side and quickly see price, price per SQM, location, size, condition and trade-offs, then move straight to enquiring or booking a viewing.
- **Positioning:** Compare is a buyer tool first. Anything that serves sellers (lead context, insights) is opt-in for the buyer (Section 11). Anonymised seller insights are the exception and ship at launch.
- **Out of Scope:** Land-only listings, rentals, leases, short lets, tenancy terms and rental income.

2. THE COMPARISON SET

How the set works. Every entry point feeds this one set.

- **One Set per User:** Each user has a single active comparison set. Manual adds and criteria-based picks both go into it; they are not separate features.
- **No Silent Adds:** The system never adds properties on its own. Every automatic pick goes through a preview step and the buyer confirms.
- **Single Category:** A set is either residential or commercial, never both. If a buyer adds a commercial property to a residential set, prompt: "Start a new commercial comparison" or "Replace current set". Keep the previous set for one-step undo.
- **Size:** Minimum 2 to open the comparison view, maximum 4. When full, show a replace prompt with the current thumbnails. Never drop the oldest silently.
- **Origin Label:** An automatically built set shows what created it (e.g. "Suggested by: lowest price per SQM"). Clear the label once the buyer edits the set by hand.

3. ENTRY POINTS

One job per surface, so there are no duplicate controls.

- **Listing Card, Map Pin Preview & Detail Page:** One "Add to compare" toggle. Same icon, label and state everywhere, kept in sync across search, map and the Compare page. Unit cards on project pages carry the same toggle. Projects themselves are not compared; any individual unit can be compared with any other unit.
- **Search Results Header:** "Compare top matches" (Section 5). This fills the set from the current results; it is not a second add button. Keep it visually below "Apply filters" and the result count.
- **Compare Tray:** Persistent across search, map, detail and saved pages. Thumbnails, count (e.g. "2 of 4"), Compare and Clear. Bottom bar on mobile, corner on desktop.
- **Compare Page:** Its own URL. Reached from the tray and, for signed-in users, the account menu. Include "Add properties" (back to the last search) and "Compare with similar", so the page is never a dead end.
- **Favourites:** Add "Compare saved properties" on the Favourites page. Keep Compare and Favourites as separate features.
- **Top Navigation Tab:** A “Compare” tab in the top navigation, showing the number of properties in the active set and opening the Compare page (or an empty state with a link to search when the set is empty). At launch.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- **Do Not Build:** A "compare mode" toggle in the filter bar that turns cards into checkboxes. It duplicates the card toggle.

4. MANUAL COMPARISON FLOW

Ships at launch.

- **Add:** Buyer taps "Add to compare" on a card, map pin preview or detail page. Toggle switches to "Added" and the tray appears.
- **Keep Browsing:** Buyer adds more from anywhere. Wrong category triggers the single-category prompt; a fifth property triggers the replace prompt.
- **Open:** Compare button in the tray, enabled at 2 or more. With 1 property, the tray offers "Add another" or "Compare with similar".
- **Review:** Side-by-side view (Section 6): remove, pin a reference, "Show differences only", open a listing.
- **Act:** Each column links to messaging, viewing booking and document requests.
- **Return:** "Back to results" restores the exact search: filters, sort, map position and scroll. The set persists.

5. CRITERIA-BASED SELECTION

The system proposes properties against a criterion; the buyer confirms.

- **Compare Top Matches (From Search)**
- **Trigger:** Buyer taps "Compare top matches" with filters applied.
- **Criterion:** Offer only criteria valid for the current results: lowest asking price; lowest price per SQM (only where area data is complete); largest floor area; most recently listed; most recently reduced.
- **Count:** Default 3, capped by the space left in the set.
- **Preview:** Show picks with checkboxes and context (e.g. "Top 3 of 148 matching your filters, by lowest price"). Buyer can untick or swap in the next match.
- **Confirm:** If the set already has properties, ask "Add to current comparison" or "Start a new comparison".
- **Then:** Same as manual flow from Review onwards.
- **Compare with Similar (From a Property):** From a detail page or a single-item tray. The anchor property goes in first, pinned as reference. Criteria: same type in the same area; similar size (±20% default, adjustable); similar asking price (±15% default, adjustable). Same category as the anchor, no duplicates of the anchor. Same preview and confirm steps.
- **Compare with Recent Sales:** Section 9.
- **Ranking Rules:** Break ties by most recently listed. Properties with no value for the criterion rank last with a label (e.g. "Area not provided"), never silently excluded. One listing per property (Section 8).

6. COMPARISON VIEW & ATTRIBUTES

Layout and what gets shown.

- **Layout:** Properties as columns, attributes as rows. Sticky column header: photo, asking price, area, status badge, remove (×). Collapsible row groups: Overview, Size & Space, Condition, Features, Listing Information.
    - **Controls:** "Show differences only", "Pin as reference" (moves to first column), drag to reorder on desktop, "Add property" placeholder column, undo on remove.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- **Markers:** Objective only: lowest asking price, lowest price per SQM, largest area. No "best choice" labels. Sold properties excluded from markers.
- **Empty Values:** Show "Not provided" and "Not applicable" differently. Only show a row if at least one property in the set has data for it.
- **Attribute Tiers:** Pull from the existing onboarding fields.
- **Core:** Asking price (with original currency); price per SQM (derived, only when area exists); location/area; property type; floor area (internal floor area; built-up area and unbuilt area where they exist); condition or completion stage; listing status; date listed and last price change; occupancy status.
- **Residential:** Bedrooms; bathrooms; parking; plot size for all properties on land (site area shared for flats); furnishing; service or estate charges; key amenities.
- **Commercial:** Permitted or intended use; floors or units; frontage; parking spaces; loading or vehicle access; power and backup; lifts; fit-out level; occupancy status. These come from the new commercial onboarding fields (Project onboarding T20–T26; Listing onboarding commercial fields).
- **Trust & Listing:** Trust badge and verification (the “Verified” badge shows what was checked and when on hover or tap, and links to the verification policy); listed by (developer, owner or agent); photos, video, 3D tour or floorplan available; title document status from the Document Vault.
- **Occupancy Status:** Every listing declares "Vacant possession" or "Sold with occupiers". Use it as a comparison row, a search filter and a selectable criterion. No tenancy terms or income.

7. MULTI-CURRENCY & FX

Sellers list in different currencies, so every price needs to be comparable.

- **Currency Toggle:** On search, detail and Compare pages. Converted prices always show the original too (e.g. "≈ $412,000 (listed at NGN 620,000,000)"). The conversion is the buyer’s own view; the seller’s list price stays the price of record.
- **Automatic Rate:** From the Central Bank of Nigeria’s official daily rate (NFEM), the source set in the Console, shown with date and time (e.g. "Rate as of 27-SEP-2026, 09:00 AM"). Price per SQM, rankings and markers run on converted values.
- **Buyer Override:** Buyer can set their own rate. Applies only to their view, marked "Your rate". Device storage for guests, account storage when signed in.
- **Seller Second Price:** Sellers price in their chosen currency and can add one stated price in another currency, shown as "Seller's stated price in USD", separate from REALTIQ’s conversion. Optional. The reserve price is required, private to the seller (not shown to buyers or viewed by REALTIQ staff) and used only in aggregated analytics; the actual sale price is captured on completion.
- **No Seller Rate Control:** Sellers must not be able to change the rate buyers see.
- **Sold Comparables:** Today's rate by default, with an option to view the rate at the time of sale.
- **Rate Unavailable:** Fall back to original prices, disable converted rankings and markers, and say why.

8. DUPLICATE PROPERTY DETECTION

Two listings of the same property must be recognised as one property.

- **Property Record:** Group listings of the same property under one property record at platform level, not just inside Compare. The property record is held in the property register (RQS-06 §8.4).
- **Matching:** Location (coordinates or normalised address), property type, and size within a small tolerance. Supporting signals: photo similarity, unit reference within a development, and the title hash where one exists.
- **Review Queue:** Send uncertain matches to manual review. No auto-merge on low confidence, since a false merge hides a genuine listing.
- **In Automatic Picks:** One listing per property: the verified or most complete one.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- **In Manual Sets:** Allow it, but flag "Same property, 2 listings" and show both asking prices.

9. SOLD COMPARABLES

Buyers compare what they want to buy with what similar properties sold for.

- **Compare with Recent Sales:** On the Compare page and detail page. Suggests sold properties of the same category, type and area. Buyer picks the window: 6 months, 1 year (default), 2 years or 3 years.
- **Display:** Separate labelled columns (e.g. "Sold, MAR-2026"), excluded from markers.
- **Price Label:** Sold comparables show "Last asking price before sale". The actual sale price is never shown to buyers.
- **Retention:** Sold listings must be kept, not deleted, on completion.
- **Sign-In Gate:** Sold details need sign-in (Registered level, RQS-06 §3.1); guests see a count (e.g. "5 similar properties sold in the last year").

10. LISTING STATUS CHANGES

A compared property stays in the set when its status changes.

- **Price Change:** "Reduced from X" or "Increased from X".
- **Under Offer:** Badge; still comparable.
- **Sold:** Greyed column, "Sold" badge, excluded from markers, "Find similar available" link.
- **Needs confirmation:** Amber freshness label when the seller has not confirmed the listing recently; separate from availability; still comparable. Grey stays reserved for Sold.
- **Withdrawn or Removed:** Placeholder with last known key details and one-tap remove.
- **Return Summary:** On return, a one-line summary of changes since the last visit (e.g. "1 property is now under offer; 1 was reduced").

11. ACCOUNTS, PERSISTENCE & LEADS

No sign-up is needed to browse or compare. Sign-in is asked for only where it gives the buyer something.

- **Guests:** Full Compare access. Set saved on the device. Guests keep the basic enquiry; other features follow the access levels — Guest, Registered and Verified (RQS-06 §3.1).
- **Sign-In Prompts:** On save across devices, share or set alert. Merge the device set into the account on sign-in; ask only if the merged set exceeds 4.
- **Signed-In:** Synced sets, alerts on price or status changes via Notifications, shareable links.
- **Enquiries:** Book a viewing and Message [seller type] on every column. Guests can enquire with name and phone or email, with a one-tap option to create an account from those details. REALTIQ keeps the guest's phone or email; the seller never sees it and replies on the platform.
- **Sellers & Agents:** Account and verification required, as now.
- **Lead Context:** Opt-in only, off by default: with consent, an enquiry from Compare tells the seller the buyer is comparing their listing with similar properties.
- **Seller Insights:** At launch. Anonymised comparison counts and price position, feeding Listing Analytics.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

12. MOBILE

Compare must work properly on a phone. The comparison view supports light and dark themes (RQS-01 §27.2).

13. CHANGES TO THE ADD-LISTING FLOW

Needed before launch. Compare depends on these.

- **Mandatory Structured Fields:** Property type, category, location with coordinates, floor area, condition or completion stage, asking price and currency. Structured and required, not free text.
- **Occupancy Declaration:** Required on every listing.
- **Area Unit:** Store in SQM. Values in other units are rejected, not converted.
- **Sale Price Capture:** When a sale completes on the platform, the agreed sale price and completion date are captured automatically and the seller confirms them.
- **Status History:** Store every price and status change with a timestamp.

14. LAUNCH SCOPE

Every item below ships at launch and depends on the add-listing changes in Section 13.

- "Add to compare" on cards, map pin previews and detail pages, with synced state.
- Tray, single-category sets, cap of 4 with replace prompt.
- Compare page with all attribute tiers; remove, undo, pin, "Show differences only".
- Compare top matches, with preview.
- Compare with similar.
- Currency toggle, automatic rate, buyer override.
- Duplicate grouping under property records.
- Occupancy status for all listings.
- Status change handling; guest device storage; "Back to results".
- Mobile two-column view.
- Account sync and merge; alerts on compared properties; shareable links.
- Seller insights (anonymised comparison counts and price position).
- Notes per property; export or print; compared properties shown together on the map.
- Tracking: adds, opens, removals, enquiries from Compare.
- Compare with recent sales: built for launch and shown in an area once it has the minimum number of sold records
- Top navigation tab (Section 3).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

15. EDGE CASES

Handle these explicitly.

- **Too Few Matches:** Show what was found, no padding (e.g. "Only 1 property matches your filters for this criterion"). Offer one relaxation, such as a wider price band or nearby areas.
- **Too Many Matches:** Rank, break ties by most recently listed, show scale (e.g. "Top 3 of 212") with a link to the full sorted results.
- **Incompatible Criteria:** Hide criteria that do not apply (e.g. bedrooms on commercial searches). Disable price per SQM, with a reason, when too many results lack area.
- **Results Change:** Automatic sets are a snapshot. If results change, show "Results have changed since these were suggested. Refresh suggestions?". Never touch manual additions.

16. DECISIONS

- **FX Rate Source:** A named source set by REALTIQ in the Console, refreshed daily (current- or previous-day rate, RQS-03 §3.1).
- **Sold Comparables Gate:** Sold details need sign-in (Registered level); guests see a count.
- **Occupied Commercial:** No income from occupiers is shown; lease details stay out of scope.
- **Similarity Tolerances:** ±20% size and ±15% price by default; the buyer can adjust them.

17. HOW WE WILL KNOW THE WORK IS COMPLETE

- A set holds 2 to 4 properties of one category; adding a fifth shows the replace prompt and never drops a property
- Nothing enters a set without the buyer confirming, including Compare top matches and Compare with similar.
- One “Add to compare” toggle works on cards, map previews, detail pages and project unit cards, and its state stays
- The Compare page has its own URL; “Back to results” restores the exact search.
- Only objective markers appear (lowest price, lowest price per m², largest area); sold properties are excluded from
- Prices convert at the named daily rate; a buyer’s own rate changes only their view; the seller’s price stays the price
- Listings of the same property appear once under one property record; uncertain matches go to review.
- Sold comparables need sign-in and show the last asking price, never the sale price; Compare with recent sales
- Status changes (price change, Under Offer, Sold, Needs confirmation, withdrawn) update in place.
- Guests can compare on their device; signing in syncs and merges their set.

PART 6 OF 8 · RQS-06

REALTIQ User Portals & Dashboards Specification

Every signed-in workspace — buyers, sellers, third parties and REALTIQ staff — and the shared rules for status labels, payments, viewings, the listing page, documents, finance, trust, promotion and ecosystem readiness.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

QUICK REFERENCE — PORTALS AND SHARED RULES

Area	What it covers	Section
Users and portals	Buyers use My Portal; owners the Seller Portal; agencies the Agency Portal; developers the Developer Portal; third parties the Partner Portal; staff the REALTIQ Console. One email holds several profiles with a profile switcher	2
Access and verification	Guest, Registered and Verified access levels; identity routes for Nigerian and international users; details by account type; payout and split set-up before a first listing or job	3
Shared conventions	Header, page rules, formats (DD-MMM-YYYY, 12-hour time, NGN and USD, UK English), plain wording, page states, accessibility, plan and billing	4
Status labels	Pre-publication statuses; 11 transaction stages with labels for each viewpoint; public stage counts on listing and project pages	5
My Portal	Needs your attention, purchases by stage, money summary; Discover, purchases, contact, viewings and inspections, documents, money, tools, account	6
Seller portals	Shared core for Seller, Agency and Developer Portals, plus agency and developer additions and their public pages	7
Listings	Location entry, prices and sale data, Listed By display, media from any provider, archive not delete	8
Agents	Buyer's and Seller's Agents in the Partner Portal; mandates, permissions per listing, one-editor and dual-agency rules	9
Payment terms	Outright, Instalment (Mortgage hidden); escrow as an optional layer; what the seller sets; what the buyer can do; money movement; instalment plan page	10
Viewings	Open House, Show Home, Private Showings, Live Guided Video Tour, Recorded Video, 3D Tour; seller calendar	11
Listing page	Action card, services card, main column order, media tab	12
Media and documents	Free, Paid, On request and Private access levels; free-access models; safeguards	13
Document manager	Platform-issued and between-party documents; REALTIQ mark and QR verification; REALTIQ fee invoices; document types	14
Finance	Money in and out, receivables, escrow funds, payouts, reconciliation, tax, controls and exports; advanced modules for developers and agencies	15
Trust	Verification versus trust score and tier; components by role; visibility; tiers and blacklist	16
Promotion	Sponsored and Featured; paid products; Promote page; packages and prepaid bidding; reporting; Explore ordering	17
Partner Portal	Shared workspace, public partner page, role variations, job matching, directory, partner payment terms	18
REALTIQ Console	Shared foundations, configuration, 14 departments, separation rules, small-team start	19
Notifications and legal explainer	Channels and categories per profile; plain-language legal terms	20, 21

KEY DECISIONS AT A GLANCE

Topic	Decision	Section
Scope	Sales of residential, commercial and mixed-use property only; no rentals, leases, short lets or land anywhere.	1
On-platform only	Communication and payments stay on REALTIQ; phone numbers and emails are never shown to another party.	1

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Topic	Decision	Section
Profiles	One email can hold one buyer profile, any number of seller-side profiles and partner profiles; each keeps its own records.	2.2
Plans and seats	Developer, Agency and Partner profiles can be required to hold a paid plan; listing is free for owners within a Console cap. Every account includes the holder's seat; each additional seat is paid.	2.2, 4.7
Status labels	Public labels are Available, Under Offer and Sold; Sold only when legal transfer is complete, escrow fully released and nothing is outstanding. Freshness is a separate label.	5
Public counts	Enquiries, viewings, negotiations, views and saves are shown on listing and project pages; never on profile pages; never with identities.	5.4
Escrow	An optional protection layer on Outright, Instalment or both; funds held in a Moniepoint segregated account; REALTIQ instructs releases.	10.1, 10.4
Payment routing	Property payments and the services basket go through Moniepoint with splits; Paystack only for plans, subscriptions, promotion and REALTIQ fee invoices. No stored balance except a single-campaign promotion budget.	10.4
REALTIQ transaction fee	One fee on every sale; standard rate without escrow, protected rate with escrow; default payer split 50/50.	10.2
Media access	Photos, renders, recorded video tours and a development's master plan or site plan are always Free; REALTIQ receives the whole fee for Paid items.	13
Documents	REALTIQ never issues documents in another party's name; every document carries the REALTIQ mark and verifies by QR code.	14.2
Trust	One Verified badge for checked facts; a separate trust tier; no negative labels; only platform-completed transactions count.	16
Promotion	Sponsored is labelled and never bypasses filters; Featured is editorial with no ranking weight; bidding needs a minimum quality score.	17
Partner payment terms	Partners choose from REALTIQ-approved, switchable payment-term types; REALTIQ's platform rate is included in the partner's price.	18.5
Console	Prepare-and-approve for sensitive actions; nobody approves their own work; reserve prices are never visible to staff.	19.3

1. PURPOSE AND SCOPE

This specification covers every signed-in workspace on REALTIQ and the shared rules they depend on: My Portal for buyers; the Seller, Agency and Developer Portals; the Partner Portal for third parties; and the REALTIQ Console for staff. It also sets the platform-wide rules for status labels, payment terms, viewings, the listing page, media and document access, the document manager, finance, trust, promotion and notifications. It also covers the platform's social features: public profiles, following, posts, the Explore and Following feeds, comments and likes, and account reporting.

- Product scope. Sales of residential, commercial and mixed-use properties only. No rentals, leases, short lets, land or empty plots anywhere in the portals, documents or wording. Social content is limited to property sales and related services; no rentals, leases, short lets, land or empty plots.
- Communication and payments. Everything stays on the platform. Phone numbers and email addresses are never shown to another party.
- Outside this specification. After-purchase services (a separate product) and the production of listing media (photography, drone, 3D capture), which is provided outside the platform. Fee amounts, prices and seat pricing are set by REALTIQ in the Console; how REALTIQ's fees are charged, collected, split, invoiced, refunded and taxed is specified in RQS-08 REALTIQ Revenue and Monetisation Specification.
- Public profile pages are specified in RQS-07 REALTIQ Public Profile Pages Specification. This document sets what each portal supplies to those pages (Sections 2.2, 7.3, 7.4, 18.1 and 18.4).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

2. USER CLASSES, ACCOUNT TYPES AND PORTALS

2.1 Classes and portals

Class	Account types	Portal
Buyers (first party)	Individual buyer (in Nigeria or abroad); corporate buyer; cooperative buyer	My Portal. The page heading shows the account name, for example “Okoro Holdings Portal”
Sellers (second party)	Individual owner	Seller Portal
	Agent, agency or broker	Agency Portal
	Developer (a registered company). Only developers create projects	Developer Portal
Third parties	Legal Partner; Engineering & Survey Partner; Inspection Partner (including proxy inspections and live guided video tours); Valuation Partner; Buyer’s Agent; Seller’s Agent. Mortgage Partner: data model and connections built, not active until a lender partner is live. Provider types sit inside these role labels and are shown as specialties beside the label: Inspection Partner — proxy visitor (non-technical), property inspector, snagging inspector, builder, termite and pest inspector; Engineering & Survey Partner — engineer (civil, structural or MEP specialty), geotechnical engineer, flood risk assessor, land surveyor, architect, town planner, quantity surveyor, materials testing laboratory; Legal Partner — lawyer or law firm, tax adviser; Valuation Partner — valuer.	Partner Portal, with the role label shown, for example “Partner Portal · Inspection Partner”
REALTIQ staff	Department roles (Section 19)	REALTIQ Console
Guests	Not signed in	No portal

2.2 One sign-in, several profiles

- One email address can hold several profiles: one buyer profile, any number of seller-side profiles (Seller, Agency, Developer), partner profiles, and company or cooperative profiles.
- A profile switcher in the header lists every profile with its verification status and unread count. Switching changes the whole workspace.
- Each profile keeps its own listings, enquiries, messages, documents, finance, team and notification settings.
- Personal identity checks are done once and reused across a person’s profiles. Company and cooperative checks are done per company profile.
- Changing a seller-side profile’s type (for example Seller to Developer) goes through REALTIQ review and fresh verification.
- Team seats with standard and custom roles are available in every portal and for corporate and cooperative buyers. The account holder’s own seat is included; every additional seat is paid, for every account type including corporate and cooperative buyers (Section 4.7).
- Account plans: REALTIQ can require a paid plan for Developer, Agency and Partner profiles and switch each fee on or off in the Console. Plans (placeholder names): Developer Essential, Developer Professional, Developer Enterprise; Agency Essential, Agency Professional; Partner Individual, Partner Firm. Advanced Finance modules (Section 15) are a paid add-on to any Developer or Agency plan. Billing follows Section 4.7.
- Listing a property is free; added features are paid. Active listings per owner profile are capped in the Console. At the cap, the owner cannot publish another listing until one is sold or withdrawn; they may ask for a Trust & Safety review or change to an Agency profile. Owner profiles are checked against title-holder details at verification; a profile that looks like an agent goes to Trust & Safety review (RQS-08 08-RV-07).

Public profile pages

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- Each seller-side and partner profile has a public profile page: listings, a grid of posts, follower and following counts, Verified badge and trust tier, with Follow and Report account actions. Owners choose whether their profile is public. One page per profile.
- Buyer profiles are private by default. A buyer can make their profile followable in Settings (default: not followable). Following is one-way and never shares contact details.
- Page order: header (name or company, logo or photo, role label, member since); Verified badge with the “Verified by REALTIQ” details panel (RQS-01 §20.1); trust tier (Section 16); the type-specific body (Sections 7.3, 7.4 and 18.1); posts grid with follower and following counts; reviews; actions.
- Actions are on-platform only: Message [role], Follow and Report account, plus the actions for the profile type.
- Self-declared content carries a grey “Provided by the [developer / seller / professional]” note. Empty sections are hidden. Wording follows RQS-01 §21.
- Private owner profiles: an owner who keeps the profile private appears to buyers only through the listing’s seller card: “Listed by Owner” (name optional), Verified badge, trust tier and “Usually replies within X hours” (Sections 8.3 and 12.1).

3. ACCOUNTS, ONBOARDING AND VERIFICATION

3.1 Access levels

Level	Who	Can do
Guest	Not signed in	Browse, search, compare on the device, view Free media, send a basic enquiry with name and phone or email (REALTIQ keeps the details; the seller never sees them), view public posts and profiles
Registered	Email and phone verified	Everything above, plus save properties and searches, alerts, synced compare sets, messages, book free viewings; follow accounts and projects; like, comment on, save and share posts; see the Following and Explore feeds; report accounts and content
Verified	Minimum KYC met	Full features: Paid media and documents, inspections, offers and negotiation, payments, instalments, escrow, hiring agents, listing property, providing third-party services; publish posts (seller-side and partner profiles only; buyers do not publish posts)

Minimum KYC is required for full features. Users who do not meet it keep Registered access only.

3.2 Identity requirements for every individual

Applies to individual buyers and owners, agents, directors, beneficial owners, authorised signatories and third-party professionals.

- Nigerian route: BVN; NIN (slip or card); one more government ID (international passport, driver’s licence or permanent voter’s card); proof of address.
- International route (foreign nationals and users without a NIN or BVN): passport; national ID from the country of residence; proof of overseas address. REALTIQ compliance maintains the accepted document list in the Console.

3.3 Details collected by account type

Account	Details
Individual buyer	Identity (3.2); phone and email verified; country of residence
Corporate buyer	Company name; CAC RC number; TIN; registered address; directors; beneficial owners (25% or more); authorised signatories (identity per 3.2); board resolution or letter of authority; SCUML certificate where applicable
Cooperative buyer	Cooperative name; registration number (State Ministry of Commerce / Cooperatives department); TIN; executive members; authorised signatories (identity per 3.2); resolution authorising the purchase; membership size (optional)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Account	Details
Individual owner	Identity (3.2); payout bank account; title declaration on each listing
Developer	CAC RC number; TIN; SCUML; state regulatory registration (for example LASRERA in Lagos); directors, beneficial owners and signatories (identity per 3.2); payout accounts; company profile
Agent, agency or broker	Individual: identity (3.2) and professional membership. Agency: CAC registration or business name number; TIN; SCUML; state regulatory registration; principal agent's identity
Third parties	Individual or company details as above; professional licences (NBA, COREN, SURCON, ESVARBON, ARCON for architects, CORBON for builders, TOPREC for town planners, QSRBN for quantity surveyors, CITN for tax advisers, laboratory accreditation where held as relevant); professional indemnity insurance; service areas by state. Proxy visitors hold no professional licence: identity (3.2), proof of address and REALTIQ proxy vetting, whose standard (for example background check, training and a test visit) is set by REALTIQ in the Console

3.4 Verification rules

- Every seller and partner sets up a name-matched payout account and its split-settlement set-up with the payments partner at onboarding, before publishing a first listing or accepting a first job. Payout accounts are confirmed by account-name match.
- Expiring documents (IDs, licences, insurance, registrations) are tracked with reminders before expiry. An expired item pauses only the features and services that depend on it; the rest of the profile keeps its access level. The affected services stay on the public page marked “Not bookable until renewed”.
- Suspended or blacklisted profiles cannot be hired or booked (Section 16.4).
- Changes to identity, company or payout details trigger re-verification.
- Verification status is shown in the profile switcher and on the Settings page.

4. SHARED DASHBOARD CONVENTIONS

4.1 Header

- Profile switcher; search scoped to the current profile; notification bell with count; basket (cart icon, for paid services); account menu with a theme switch: Light, Dark or Match device.
- The portal name and account name appear at the top of the navigation.

4.2 Pages

- Every page title matches its menu name. Each page shows its heading once.
- Every signed-in page, including the ROI Calculator and the trust pages, opens inside the dashboard shell with the navigation visible.
- Navigation is grouped by task (Sections 6, 7 and 18).

4.3 Formats

Item	Default
Date	DD-MMM-YYYY, for example 04-OCT-2026

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Item	Default
Time on screens	12-hour, for example 03:05 PM
Time in records and audit logs	12-hour with seconds, for example 03:05:15 PM
Currency	NGN (₦) and USD ($)
Spelling	UK English
Labels	Title Case, for example Listed, Under Offer

REALTIQ can change the date and time formats in the Console.

4.4 Wording

Screens use plain language. System terms never appear.

Not shown	Shown instead
“Based on the live property data returned by the API”	Nothing, or “Based on your properties”
“These fields come from the signed-in user object”	“Your account details”
“Manage favourites… from server-backed history”	“Your saved properties and searches”
“Receipts and allocation status for unified service-cart payments”	“Your orders and receipts”
Database IDs as titles (for example 6a87774b0fdaa024e181c26e)	Readable titles, for example “Virtual tour · 4 Bedroom, Ikeja GRA”
“Full technical proof for internal review”	“How this was verified”

4.5 Page states

State	Behaviour
Empty	Explains what will appear and offers the next step, for example “Save a search to get alerts”
Loading	Placeholder shapes per card; one slow card never blanks the page
Error	Shown on the affected card with a Retry action. A failed figure is never shown as ₦0
Verification pending	Banner explaining what is waiting and what the user can still do
Restricted	Clear reason and route forward: KYC needed; listing paused; escrow on hold; payment overdue; profile suspended

4.6 Accessibility, mobile and security

•WCAG 2.1 AA. Status is always shown in words as well as colour.

- Service levels: 99.5% monthly availability; at most 1 hour of data loss and full recovery within 4 hours after an incident; sized for 500 concurrent users at launch and able to scale tenfold.
- Supported devices: mobile first; Android 9 and later, iOS 15 and later, and the latest two versions of Chrome, Safari, Edge and Firefox.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- Light and dark themes on every page and portal; default Match device; the choice is saved per user. Text, buttons, the Verified badge, trust tier badges, status labels and freshness labels meet contrast of at least 4.5:1 in both themes (RQS-03 §4.4).
- Phone layouts use a bottom navigation bar of four or five groups, with “Needs attention” first.
- Two-step verification, active session list and sign-out of other devices.
- Step-up confirmation for accepting terms, paying, claiming or releasing escrow, issuing legal documents and changing payout details.

4.7 Plan and billing

Every paying profile has a “Plan and billing” page (Settings in every portal) showing: plan, entitlements and use (active projects or listings, units, included seats, promotion credits); seats, each with its cost and next charge; add-ons; next charge; payment method; invoices; credits.

- Plans bill monthly or annually. Upgrades apply at once with a prorated charge shown before confirmation; downgrades apply at the end of the period.
- Renewal is paid through Paystack by saved card, invoice paid by transfer or direct debit; each account chooses one.
- With the plan fee switched on for a profile type, that profile needs an active plan to publish new listings or projects or accept new jobs. An individual owner can always list free (within the owner listing cap, Section 2.2).
- A failed renewal starts a grace period (Console setting) with reminders. After it, the plan lapses into a restricted state: no new listings, projects, jobs or seats can be added. Live listings, enquiries in progress, Terms Agreed transactions, instalment plans, escrows and buyer access to items already paid for continue unchanged.
- Each additional seat is billed per period from the date it is added, prorated; removing a seat stops billing at the end of the period.
- Credits (for example founding-developer credits) appear as credit notes and reduce the next plan, seat, add-on or promotion invoice. Credits never reduce the REALTIQ transaction fee.
- REALTIQ Templates (Section 14.3) and Buyer Pass (Section 13.2) follow the same billing lifecycle, without the publishing gate.

5. TRANSACTION STAGES AND STATUS LABELS

Every listing (project, unit and individual property) shows one status label chosen by who is viewing it. There are four viewpoints: Public (anyone not involved), Buyer (that buyer’s own stage), Seller (the listing’s stage from the seller’s side) and Third party (their own job on that listing).

5.1 Before publication (seller and REALTIQ only)

Seller sees	Meaning
Draft	Not yet submitted
In Review	Submitted, awaiting REALTIQ approval
Changes Needed	Returned by REALTIQ with notes
Paused	Hidden by the seller for a while
Withdrawn	Taken off the market by the seller
Archived	Kept for records; cannot be relisted without editing

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

5.2 Transaction stages

Step	Public	Buyer	Seller	Third party (if engaged)	Moves on when
1. Discovering	Available	Available (or Saved)	Listed	Available	Seller publishes
2. Enquired	Available	Enquired	Enquiry	—	Buyer sends an enquiry
3. Viewing	Available	Viewing Booked → Viewed	Viewing Booked → Viewed	Scheduled (live tour provider)	Viewing booked or attended
4. Due diligence	Available	Checking	In Due Diligence	Requested → Accepted → In Progress → Reported	Document request, inspection or title search
5. Negotiating	Available	Negotiating	Negotiating	Negotiating (agents)	Offer or counter-offer
6. Terms locked	Available	Terms Agreed	Terms Agreed	Terms Agreed (agents, legal)	Both sides accept
7. Paying	Under Offer	Paying	Collecting	Verifying (escrow conditions)	First payment made
8. Paid	Under Offer	Paid	Fully Paid	—	Final payment received
9. Handover	Under Offer	Handed Over	Handed Over	Snagging (inspector, if engaged)	Handover certificate signed
10. Legal transfer	Under Offer	Transferring	Transferring	Transferring (legal)	Transfer documents completed
11. Complete	Sold	Owned	Sold	Completed	Legal transfer complete, escrow fully released, nothing outstanding on either side
Cancelled	Available again	Cancelled	Cancelled (listing returns to Listed)	Closed	Refund or retention under the agreed terms

5.3 Rules

- Steps 9 and 10 can happen in either order.
- Steps 2 to 5 (Enquired, Viewing, Due diligence, Negotiating) can be skipped: a buyer may accept the seller's terms directly. Step 6 (Terms locked) can never be skipped, and no payment is taken before it.
- A sale can be cancelled at any step before 11. From step 7 onwards, cancellation follows the refund, fault and fee rules in Section 10.2 and RQS-08 Section 7.2. After step 11 there is no cancellation, only a dispute.
- Several buyers on one listing: the seller’s listing label shows the most advanced stage with counts, for example “Negotiating · 3 enquiries · 1 viewing”. Opening the listing shows each buyer’s stage separately.
- Projects show a summary label, for example “Selling · 12 of 40 available”, then “Sold Out” when every unit is Sold. Each unit carries its own label.
- Freshness (“Last updated”, “Needs confirmation”) is a separate signal and never replaces the status label.

5.4 Public stage counts

The property page shows counts of interest beside the public status, for example “Available · 4 negotiating · 3 enquiries · 1 viewing since 04-OCT-2026”.

- Counted stages: Enquiries, Viewings and Negotiating. Views and saves are shown as well.
- Each buyer counts once per stage. The seller, the seller’s staff and agents, and REALTIQ staff are not counted.
- Counts run for the life of the listing and show the start date. Cancelled interest leaves the count.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- No identities are ever shown.
- Counts appear on listing and project pages only, never on profile pages.
- Projects show counts per unit and totals on the project page.
- Counts stop showing publicly when the listing is Sold or no longer for sale. They are kept as interest data by building type and area.

6. MY PORTAL (BUYERS)

6.1 Home

Module	Contents
Needs your attention	Only items the buyer must act on, each with a deadline and one action. Examples: “Instalment of ₦47,500,000 due 21-OCT-2026 — Pay now”; “Seller countered your offer — Review”; “Inspection report ready — Approve”; “Objection window for ‘Roofing complete’ closes in 2 days”. Items disappear when done
Purchases by stage	Each property being pursued with its stage bar: Enquired → Negotiating → Terms Agreed → Paying → Paid → Owned
Money summary	Total paid; held in escrow; outstanding; next amount due and date; penalties outstanding
New matches	New listings matching saved searches
Recent activity	Latest events across purchases, messages and services

6.2 Navigation and pages

Group	Page	Features
Home	Home	Section 6.1
Discover	Saved	Favourites; saved searches with alert settings (instant, daily, weekly; in-app, email, SMS/WhatsApp, mobile push); recently viewed; synced compare sets; “Compare saved properties”; saved posts
	Following	Posts, new listings and project updates from followed accounts and projects, newest first
	Explore	Recommended real-estate posts by area, property type and topic, shaped by related listings and liked posts and accounts, ordered as in Section 17.7
My purchases	My Purchases	Map and list; tabs All, Residential, Commercial, Mixed-use; stage per purchase (Section 5); title verification ladder; handover details and documents; link to paid market analytics for each property
	Offers & Negotiations	Offers per unit or bundle; tracked changes; counter-offers; locked terms sheets with version history
	Escrow	Escrow cards (active by default); condition progress; next action and deadline; verification room; objection window alerts
Contact	Enquiries	Enquiry history with type, stage and response status; New enquiry; link to the conversation
	Messages	Inbox and conversations, kept apart from escrow rooms and inspection threads
Viewings & inspections	Viewings	Bookings (Private Showings, Live Guided Video Tours, Show Homes by appointment); registered open houses; paid 3D / virtual tour access; visit history
	Proxy Inspections	Request; choose an inspector, automatic matching or REALTIQ assignment; schedule; agreed price; next action; report approval; reports filed in Documents

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Group	Page	Features
	My Agent	Hire a Buyer's Agent; appointment terms; negotiating authority; activity log; fees; end the appointment (Section 9)
Documents	Documents	Received; to sign; issued by me; requested (with status); receipts and statements; access granted; verification by QR code
Money	Finance	Section 15
	Services & Basket	Services catalogue and bundles; basket; checkout
Tools	ROI Scenarios	Saved scenarios; create; compare scenarios; ROI Calculator
	Market Analytics	Purchased reports; open the standalone market analytics tool

	Trust	Checklist, score, components, tier, appeal (Section 16)
	Notifications	Activity centre; delivery preferences (Section 20)
	Settings	Profile; KYC; currency preference; video autoplay (Always, Wi-Fi only or Never; default Wi-Fi only); security; outdated-listing reports made; team seats and roles (corporate and cooperative buyers); plan and billing (Section 4.7); profile visibility: followable or not followable (default: not followable); Following list with Unfollow; theme preference (Light, Dark, Match device)
	Help	Help Centre; support chat

7. SELLER, AGENCY AND DEVELOPER PORTALS

7.1 Home

Module	Contents
Needs attention	Examples: "3 enquiries unanswered"; "Buyer proposed 18 months on Unit B-07 — Respond"; "Monthly confirmation due — Nothing has changed"; "Escrow claim needs evidence"; "Payout account not set"; "Document request awaiting approval"
Listing health	Freshness, verification and quality per listing, with fixes
Money summary	Agreed sale value; received; held in escrow; released to you; paid out; outstanding; overdue (Section 15.2)
Recent activity	Latest events across listings, leads and payments

7.2 Shared core (all three seller portals)

Group	Page	Features
Listings	Listings	Map, grid and list; status filters; seller status labels (Section 5); freshness and verification columns; "Nothing has changed" confirmation per listing or in bulk; quality and search-readiness checklist; Sold count and share; Mark as Sold with actual sale price; archive (deletion blocked once a listing has transactions)
	Add Listing	Section 8; payment terms (Section 10); viewing options (Section 11); media and document access (Section 13)
Leads	Enquiries	Lead pipeline by stage; enquiries per listing; average reply time; link to conversation

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Group	Page	Features
	Messages	Inbox; contact details blocked
	Viewings	Calendar (Section 11.3)
Deals	Offers & Negotiations	Accept, reject or counter each term; lock terms; terms sheets
	Escrow	Escrow cards; next action and deadline; claim a condition with evidence; verification room
	My Agents	Find and hire a Seller's Agent; mandates; permissions per listing; activity log; fees; end or renew (Section 9)
Records	Documents	Issue, receive and request documents; vault; approve or decline document requests; view logs
	Verification & Trust	Three tabs: Account (KYC); Titles (registry, fingerprints, Declared → Submitted → Verified, Rejected, Revoked, "How this was verified"); Trust (score, components, tier, appeal)
Money	Finance	Section 15
Growth	Performance	Views, saves, enquiries, compare adds, price position, follower and post results; private
	Posts	Create, schedule, edit and delete posts (photos, carousels, short videos, walkthrough clips, progress updates, announcements, tips); tag a listing, unit or project; captions and hashtags; manage comments (delete or turn off); post results (reach, likes, comments, saves, shares, profile visits, follows); uploads are checked against the post media limits (RQS-01 §27.2); promote posts from the Promote page (Section 17)
	Followers	Follower count and list (names only, never contact details)
	Promote	Section 17
	Ratings	Ratings and reviews received; replies
Tools	ROI Calculator	In the dashboard shell
Account	Team	Seats; standard and custom roles; activity log
	Notifications	Section 20
	Settings	Profile; security; video autoplay; plan and billing (Section 4.7)

7.3 Agency Portal additions

- Clients: owners represented, with their listings and mandates.
- Mandates: authority to sell, mandate type and term per listing.
- Assignment: listings and enquiries assigned to staff; staff can be limited to their own leads.
- Staff performance: reply times, viewings and sales per staff member.
- Commission: per mandate and per staff member (Finance).
- Agency profile: public agency page: header with agency verification (Section 3.3); seller trust components including title quality, and reply time; own listings and listings managed under mandate ("Listed by Owner · Managed by [agent]", Section 8.3); team members by name and role only. Staff performance stays private.

7.4 Developer Portal additions

- Projects: project home with set-up progress, search readiness, unit counts by status, "Publish ready units" and "Preview as buyer".

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- Units: unit types; units grid with bulk edit of prices and availability; spreadsheet import.
- Branding & page content: project logo, cover image, descriptions, FAQs, facilities.
- Media & progress: dated construction progress per milestone; key dates; revised dates shown as revised.
- Posts and progress: posts can be linked to a construction milestone and appear in the project's progress updates. Project followers and developer followers both receive these posts (RQS-01 §27.2).
- Escrow milestone board: claim a shared milestone once for every linked buyer.
- Payment templates: default terms per project and unit type (Section 10).
- Reviews & Questions: reply to project reviews and answer public questions.
- Developer page: the public developer page shows, in order: header with company verification (Section 3.3) and states active; record on REALTIQ (completed transactions, reply time, title quality, handover record per Section 16.2); current projects linking to their project pages, with freshness labels (RQS-01 §19); completed projects with original and revised handover dates; "Units with verified title: x of y" across all projects (RQS-01 §20); developer reviews, separate from project reviews (RQS-01 §22); About the company, with memberships and partner firms as "Provided by the developer". Projects completed before joining REALTIQ are shown as "Provided by the developer" and are not counted in any figure or trust component.

8. LISTING MANAGEMENT RULES

8.1 Location

Field	Entry
State and LGA	Chosen from fixed lists
Area	Chosen from the list (filtered by LGA). If the area is not listed, the seller types it. A typed area is checked against the Mapbox location identifier: a match joins the area list; a non-match goes to the Listings Quality review queue in the Console
Street address	Typed. Address suggestions from Mapbox appear as the seller types; the seller can pick one or ignore it
Map pin and coordinates	Set by picking a suggested address, dropping a pin on the map, or typing latitude and longitude
Address verification	Automated through the address verification provider (for example QoreID), with manual review where needed

8.2 Price and sale data

- List price in NGN or USD, with an optional second list price in the other currency, and the "Price negotiable" answer (RQS-04 D8).
- Reserve price: required, never above the list price, private to the seller, not viewed by REALTIQ staff, used only in aggregated analytics.
- Actual sale price: captured from the platform transaction and confirmed by the seller; private. Buyers see the list price only.

8.3 Other listing rules

- Amenities: chosen from the amenities catalogue, plus an "Other amenity" text field. Typed amenities are displayed on the listing but are not search filters.
- Listed By display: the lister chooses type only ("Listed by Developer") or type and name ("Listed by Developer · [name]"). Both show the Verified badge and trust tier. Agent-managed listings can show "Listed by Owner · Managed by [agent]".

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- Listing media from any provider: sellers may use any media provider. All media must meet REALTIQ's media specifications (RQS-02 Step 7; RQS-04 K) and passes the same on-site checks before it counts towards Verified listing photos (RQS-01 §20, §21).
- Cover image: the front of the building first; then the next most suitable exterior image; then the floor plan.
- One editor at a time: editing and boosting are done by one party only (Section 9.4).
- Archive, not delete: listings with any transaction history are archived, never deleted, so records and payment histories stay complete.
- Deletion requests: when a user asks for their data to be deleted, REALTIQ deletes or anonymises personal data it no longer needs, keeps transaction, payment, escrow and tax records for the retention period set in the Console on counsel's advice, restricts access to what is kept, and tells the user what was kept and why.

8.4 Property register and duplicate detection

Every property on REALTIQ has one record in the property register, whoever lists it and however many times. The register answers three questions: is this property already listed, is it listed by more than one seller, and has it already been sold.

- **Identity of a property.** A property record is matched on its title reference (registration or certificate number and registry; survey plan number) where given (RQS-04 J1a), its Mapbox coordinates and normalised address, property type, and size within a small tolerance. Supporting signals: photo similarity (perceptual image hashes of listing photos), unit reference within a development, and the title document hash (RQS-01 §20).
- **At listing.** When a new listing matches an existing property record, the platform checks who is listing it. The same seller or a Seller's Agent under that seller's mandate is linked to the same record. A different seller is stopped from publishing and sent to Listings Quality review, with the match shown; the seller can prove authority to sell (RQS-04 J3) or withdraw.
- **Same property listed more than once.** Listings linked to one record are shown to buyers as one property (RQS-05 §8). Reused photos from another listing raise a review flag.
- **Already sold.** When a sale completes on REALTIQ, the property record keeps the sale date and the transfer status. A new listing of a property sold on REALTIQ is published only when the new seller's identity matches the buyer of record, or after Listings Quality has seen proof of transfer to the new seller. Two buyers paying for the same unit at the same time is prevented because only one buyer can hold Terms locked or a later stage on a unit (RQS-06 §5.2).
- **Same title document used twice.** A title document whose hash matches a document already verified on another property record is stopped and sent to Legal & Verification.
- **Limits.** The register sees only listings and sales on REALTIQ. Sales completed elsewhere are visible only through REALTIQ's title verification (RQS-08 §8); the register never claims a property is free of other sales.
- **Visibility.** Buyers see one property with its listings, and "Sold on REALTIQ on [date]" where that applies. Matching signals, title references and review outcomes are visible only to Listings Quality and Legal & Verification.

9. AGENTS AND MANDATES

9.1 Agent types (Partner Portal)

	Buyer's Agent	Seller's Agent
Public label	REALTIQ Verified Buyer's Agent	REALTIQ Verified Seller's Agent
Acts for	A buyer (individual, corporate or cooperative)	An owner or developer
Appointed by	The buyer, in-platform	The seller, in-platform
Appointment document	Buyer's Agent Appointment Letter	Seller's Agent Mandate

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

	Buyer's Agent	Seller's Agent
What they do	Shortlist properties; attend viewings for the buyer; coordinate due diligence; negotiate within the buyer's stated authority; guide the buyer to Owned	Manage the listing within the permissions granted: replies, viewings, documents, negotiation up to the owner's price floor
Final acceptance of terms	The paying party only (for companies and cooperatives, an authorised signatory)	The owner (the receiving party) only
Money	Payments always come from the buyer	Payouts always go to the owner's verified account
Fee	Fixed, hourly or percentage, paid through the platform; REALTIQ's uniform platform rate is included in the agreed fee and split automatically (RQS-08 08-PF-01, 08-PF-05)	As agreed in the mandate, with REALTIQ's platform rate included; split automatically from the sale proceeds
Sees amounts	Yes (negotiation is their job)	Yes, for the listings they manage; never payout details

Buyer's and Seller's Agents are representatives. The independent agents who verify escrow conditions (RQS-01 §17) are neutral and never see amounts.

9.2 Hiring a Seller's Agent

- The owner finds a verified Seller's Agent in the directory and sends a mandate request with the listing(s), mandate type, duration and fee.
- Mandate types: Sole (one agent only); Exclusive (one agent; the owner does not sell privately during the term); Open (several agents).
- The agent accepts in the Partner Portal and declares any conflict of interest.
- The mandate is issued through the document manager and appears in My Agents (seller) and Mandates & Clients (agent).

9.3 Permissions granted per listing

Permission	Notes
Edit listing details and media	Sole and Exclusive mandates only (Section 9.4); changes are logged
Boost and promote	Sole and Exclusive mandates only (Section 9.4)
Reply to enquiries and messages	Messages show "[Agent name], Seller's Agent for [owner]"
Manage viewings and open houses	
Share documents and approve document requests	Within the access levels the owner set
Negotiate	Propose and counter up to the owner's price floor; only the owner accepts final terms
Issue documents on the owner's behalf	For example viewing confirmations; legal agreements still need the owner's signature
View the listing's payment status	Amounts only; never payout details
Confirm freshness	"Nothing has changed" confirmations
Post about the listing	Publish posts tagged to the managed listing; the owner can remove them

9.4 Rules

- One editor: editing and boosting a listing are done by one party only. Under a Sole or Exclusive mandate, that is the owner or the appointed agent if the owner grants the permission. Under an Open mandate, only the owner edits or boosts; agents keep their other permissions.
- Owner's rights: a mandate never removes the owner's rights. Under any mandate type the owner can step in and

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- One listing, no copies: the listing stays the owner's. Under an Open mandate every agent works on the same listing.
- Changing or ending: the owner can change permissions or end the mandate at any time, subject to the notice and fee terms in the mandate. The activity log stays with the listing.
- Dual agency: an agent cannot act as Buyer's Agent and Seller's Agent in the same transaction without both parties' written consent, recorded as a dual-agency declaration in the document manager.
- Agencies in both roles: an agency can hold an Agency Portal profile (its own listings) and a Partner Portal profile (agent services) on one email, moving between them with the profile switcher.

10. PAYMENT TERMS

10.1 Payment types and escrow

- Payment types: Outright; Instalment; Mortgage. Mortgage has its data model, terms fields and lender connections built, and stays hidden until a Mortgage Partner is active.
- Escrow is an optional protection layer, not a payment type. The seller can apply escrow to Outright, to Instalment, or to both. Each payment type can also be offered without escrow.
- The seller sets the terms for each payment type offered on a listing (or, for developers, per project and unit type through payment templates).
- Trustee escrow: large transactions may use a bank or law-firm trustee escrow arrangement. It is disclosed in the escrow verification room and has no partner profile or directory entry.

10.2 What the seller sets

Area	Settings
Outright	Price; whether a reservation deposit is allowed and its amount; days allowed to pay the balance; which terms are negotiable
Instalment	Minimum deposit; longest period; allowed frequencies; schedule template, optionally linked to construction milestones; grace period; penalty rate and method; default threshold; default remedy; which terms are negotiable
Escrow	Which payment types it covers (Outright, Instalment or both); release conditions; independent agents required; objection window; timeframes
Currency	List price in NGN or USD. Terms may state "listed in USD, payable in NGN at the rate agreed on the day of payment": before each NGN payment one party proposes a rate and the other confirms it in the platform; the checkout is created only from a confirmed rate, which then cannot change. The Console FX source is shown for reference. Fees are calculated on the naira actually paid; receipts show the USD figure, agreed rate and NGN paid (RQS-08 Section 7.3)
REALTIQ transaction fee	Every sale pays one REALTIQ transaction fee: the standard rate without escrow and the protected rate on any part under escrow. Payer: buyer, seller or split; the default is split 50/50 and can be changed for each transaction. The fee is shown on the terms sheet before terms lock (RQS-08 Section 7)
Refund and cancellation	One of: full refund; refund less a stated percentage; seller's choice within a REALTIQ cap; a seller-defined refund schedule. REALTIQ's transaction fee is non-refundable once terms lock and the innocent party never bears it: the party at fault pays the whole fee and the innocent party is refunded in full; on mutual cancellation each pays its own share; on a no-fault reversal REALTIQ keeps a cost-recovery portion split equally, or waives it. No REALTIQ fee is charged on penalties or forfeited deposits (RQS-08 Section 7.2)
REALTIQ thresholds	Optional. REALTIQ can set maximum penalty rates, minimum grace periods and refund floors in the Console, and can switch them on or off. A seller can choose to list within them; such listings show a "REALTIQ Standard Terms" label

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

10.3 What the buyer can do

- After showing interest (an enquiry or offer), the buyer can accept the terms as offered, configure within the seller's bounds (for example 18 months where up to 24 is allowed) or request a variation . Variations become tracked negotiations (RQS-01 §12.3).
- Plans and checkouts are created only from accepted or locked terms. Multi-unit buying, allocation and per-unit receipts follow RQS-01 §12–13.
- Checkout amounts are fixed. Early settlement is requested from the seller.

10.4 Money movement

- Property payments (reservation deposits, outright payments and instalments) and the services basket are processed by Moniepoint (Monnify). Each party's share is split directly to its own verified account; REALTIQ-only basket items split 100% to REALTIQ's designated account. REALTIQ never receives buyer or seller money into its own account.
- Paystack is used only for account plans, seats, add-ons, subscriptions, promotion (packages and campaign budgets) and REALTIQ fee invoices. Paystack is never used for a payment that involves a split.
- A property checkout is never combined with the basket. The basket is paid as one Moniepoint payment; if it needs more receiving accounts than one split allows, checkout divides it into the fewest payments needed and shows them as one order.
- Escrowed funds are held in a Moniepoint segregated escrow account; a USD domiciliary account is available for USD payments. REALTIQ instructs each escrow release or reversal.
- REALTIQ's fees and partner fees are split automatically at the point of payment; under escrow, REALTIQ's fee leaves the escrow account only as a split at release.
- There is no stored balance on REALTIQ: no top-ups, wallets or refundable credit balances. The one exception is a prepaid promotion budget tied to a single campaign (Section 17.4). Every payment is allocated to a unit, escrow, instalment, invoice or service order. Refunds return to the original payment method or the payer's verified bank account.

10.5 Instalment plan page

Part	Contents
Summary	Property principal; principal paid; principal remaining; penalties outstanding; total outstanding; next due; grace period; default threshold; status
Schedule and milestones	Each instalment with seller-named milestone, due date, expected and paid amounts, penalties, status. Two labels kept distinct: payment triggers (when an instalment falls due, for example "due when roofing is complete") and escrow release conditions (when held money goes to the seller)
Payment history	Every payment with date, amount and receipt
Penalty history	Each penalty interval with rate, base amount, amount, paid and outstanding
Buyer actions	Pay now; Request a change; Request early settlement; Download schedule and statement
Seller actions	Send reminder; Waive or reduce a penalty (with reason); Respond to requests; Download statement
Cancellation outcome	For cancelled plans: amount refunded, amount retained under the terms, fees deducted, refund status and date
Audit	Every change to the plan, by whom and when

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

11. VIEWINGS

11.1 Viewing options

Option	Meaning	Booking	Listing shows
Open House	Walk in without an appointment at stated times. Either specific dates and times, or a recurring weekly schedule for properties open for viewing on set days and hours	None	“Open house · Sat 14-NOV-2026, 10:00 AM–2:00 PM” or “Open house · Mon–Sat, 9:00 AM–5:00 PM · No booking needed”
Show Home	Developers only. A finished sample unit of a unit type (furnished or unfurnished) that buyers can visit	Recurring hours or by appointment	“Show home for Type B · Open Mon–Sat, 10:00 AM–6:00 PM” with the note: “A sample of this unit type. Your unit’s finishes may differ; see your terms.”
Private Showings (By Appointment Only)	Pre-booked visit through the inspection booking engine	Slot from the seller’s availability	“Book a private showing”
Live Guided Video Tour	Live walkthrough by video, open to every buyer type (individual buyers in Nigeria or abroad, corporate and cooperative buyers), booked on the platform; runs on Zoom, integrated into REALTIQ, with a REALTIQ-issued link; WhatsApp Video is not used	Slot	“Book a live video tour”
Video Tour (Recorded)	Recorded walkthrough (media)	None	“Watch video tour”
3D / Virtual Tour	Interactive 3D tour and dollhouse (media)	None	“Take the 3D tour” (Free or Paid, Section 13)

11.2 Who runs live video tours

Any buyer can book a live video tour; it is not limited to buyers abroad. It can be offered by:

- Any seller type (owner, agent or agency, developer), free of charge at launch. The ability to charge for seller-run live video tours is built and switched off in the Console until REALTIQ runs live video on the platform; when switched on, the fee follows RQS-08 FP-11. Or an Inspection Partner, whose fee the buyer pays; REALTIQ’s platform rate is included in that fee and split automatically.

11.3 Seller viewing calendar

- One calendar per seller profile, filterable by listing, project, unit type and staff member.
- Availability is set once at profile level and overridden for a project, unit type or listing where it differs.
- Open houses and show homes belong to the listing or project they are for.
- Bookings can be assigned to a team member, accepted or rescheduled; confirmations go out as one-way notifications with no contact details exchanged.
- Buyers see only the slots for the listing they are viewing.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

11.4 Technology for live video, virtual and 3D tours

REALTIQ uses the products below for live video tours, 3D and virtual tours, dollhouse views and 3D views of a property's exterior. Build with these products; no further technology search is needed. Each sits behind an adapter (Section 23), so a provider can be changed by configuration rather than by rebuilding the feature.

Live video tours

Product	What it is	What it does	REALTIQ feature it serves
Zoom Meetings API (launch)	Zoom's API for creating and managing Zoom meetings	Creates a meeting when a live tour is booked and returns the join link that REALTIQ issues to both sides; no phone numbers or emails are exchanged	Live Guided Video Tour at launch, run by any seller type or an Inspection Partner
Zoom Video SDK (preferred for on-platform video)	Zoom's white-label video SDK, separate from the Zoom app	Video, audio, screen sharing, chat and recording inside REALTIQ's own pages and apps; no Zoom branding, account or download for buyers; copes well with weak mobile data	Live tours run inside REALTIQ, and paid seller-run live tours (RQS-08 FP-11), when REALTIQ switches on-platform live video on
Daily (Daily.co) (approved alternative)	WebRTC video API	A prebuilt, responsive call widget and React library that drop into the listing page with little code	As Zoom Video SDK
Agora (approved alternative)	Real-time video and audio SDK on a global low-latency network	Live video with the Agora Interactive Whiteboard and chat add-ons, so an agent can draw over the video or a tour to point out details	As Zoom Video SDK; annotated live tours
LiveKit (approved alternative)	Open-source WebRTC media server, self-hosted or on LiveKit Cloud	Full control over video routing, hosting location and cost at scale	As Zoom Video SDK

3D tours, virtual tours, dollhouse and exterior views

Product	What it is	What it does	REALTIQ feature it serves
Matterport Showcase and SDK (supported)	3D capture and hosting platform that produces a "digital twin" of a property	Embeddable walk-through, dollhouse view, floor plan and measurements. The SDK lets an agent guide the buyer's view during a live tour. The Pro3 camera captures exteriors in the same model	3D / Virtual Tour, "Take the 3D tour", the Has 3D / Virtual Tour filter, dollhouse view and 3D exterior view
Realsee (supported)	3D VR tour platform	Embeddable 3D tours with a dollhouse model, floor plans and VR-headset viewing; each tour is hosted on a credit basis	3D / Virtual Tour, "Take the 3D tour", dollhouse view
CloudPano (supported)	360° virtual tour software with an API	White-label 360° tours that can be created automatically through its API; built-in live video chat and an in-tour drawing tool; aerial 360° drone panoramas of the exterior and surroundings	3D / Virtual Tour links, exterior and aerial 360° views, guided tours inside a 360° tour

Considered and not used

- **Google Meet API and Embed SDK:** shows Google branding, often needs a Google sign-in and cannot carry REALTIQ's own controls.
- **WhatsApp Video:** exposes phone numbers (platform-wide rule 3).
- **Amazon IVS and ZEGOCLOUD:** built for one-to-many broadcasting; REALTIQ's live tours are small, two-way sessions.
- **VdoCipher, ZenStream and OBS Studio:** for broadcasting pre-produced streams; recorded video tours are uploaded as listing media instead.

Integration rules

- **Video adapter:** creates a session, issues a REALTIQ link or token per participant and ends the session; the provider is chosen in the Console. Links expire when the session ends.
- **Tour adapter:** checks a tour link against the allowed hosts (Matterport, Realsee, CloudPano; a Console setting), embeds it and fetches a thumbnail where the host offers one.
- **Loading:** an embedded tour loads only after the buyer taps "Take the 3D tour", so listing pages stay light on mobile data. Free or Paid access follows Section 13.
- **Capture:** scanning, 360° photography and drone flights happen outside REALTIQ; sellers add the finished tour link or media.

12. LISTING PAGE

12.1 Action card

Sticky on desktop. On phones, a bottom bar carries Book a viewing and Message [seller type].

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

1. Price (and optional second-currency price), public status label with stage counts (Section 5.4), “Last updated”, “Usually replies within X hours”.
2. Payment type chips from the seller’s terms: Outright · Instalment · Escrow-protected.
3. Buy this property: choose the payment type; see the seller’s terms; accept, configure within bounds or request a variation; then checkout.
4. Book a viewing: one panel showing only the viewing options this listing offers.
5. Message [seller type]: the label adapts — Message developer, Message agent or Message owner. Opens a structured enquiry (type: general, price and terms, documents, viewing, other) and its conversation. Guests also give name and phone or email; signed-in users do not.
6. Save · Add to compare · Share.

12.2 Services card

Below the action card: proxy inspection, title document view, market analytics for this property, valuation, legal review, hire a Buyer’s Agent, neighbourhood visit report (Inspection Partner), planning-approval check, cost and progress certification and materials testing (Engineering & Survey Partner), transfer cost estimate (Legal Partner) and other services. All go to the basket. Sponsored providers are labelled.

12.3 Main column order

1. Media tab (Section 12.4).
2. Title, badges (Verified, Sponsored, Featured, trust tier) and key facts in m².
3. Description.
4. Features and amenities.
5. Payment options and terms: read-only summary of the seller’s terms with an instalment calculator.
6. Viewing options.
7. Title and documents: verification ladder and Request documents.
8. Location.
9. Price history (one block).
10. Market analytics for this property (paid) and sold comparables.
11. Seller card: Listed By display, Verified badge, trust tier, reply time, Follow and Report account actions. No phone numbers or email addresses.
12. Similar and nearby properties, with distances.
13. Posts about this property: posts tagged to the listing.

12.4 Media tab

A main viewer with a row of small icons. Each icon appears only when the listing has that media, shows a count, and jumps straight to that media. A padlock marks On request items; ₦ marks Paid items. Every item shows its capture date and source (“Provided by the seller” or “Verified by REALTIQ”).

Icon	Shows	Details displayed
Photos	Real photographs, cover first	Room or area caption; date taken; “Verified on-site photo” where checked
Renders	Artist’s impressions	Always labelled “Artist’s impression”; unit type represented
Video Tour (Recorded)	Recorded walkthrough of the property or development	Duration; date recorded

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Icon	Shows	Details displayed
Live Video Tour	Opens the viewing panel to book	Available slots; price if paid
3D Tour / Dollhouse	Matterport, Realsee or CloudPano embed: room navigation, dollhouse, VR	Date captured; provider
Virtual Staging	Digitally furnished photos	Labelled “Virtually staged”
Floor Plans	2D / 3D plans per floor	Room names and dimensions in metres; total floor area in m²; “Verified floor plan” where checked
Site / Master Plan	Estate or building layout	Unit position highlighted; roads; facilities; boundaries; setbacks; north point; scale
Survey / TDP	Registered survey or title-deed plan	Survey number; surveyor; date; beacons
Drone Fly-Through	4K aerial video of the property and surroundings	Duration; date; coverage (roads, drainage, neighbouring developments)
Aerial / Satellite	High-resolution aerial photographs and satellite imagery	Date; source
Approach & Access Roads	Photos, video or 360° of routes to the property	Road condition; date captured
Street View	Street-level imagery	Provider; date
Map	Pin with satellite toggle, directions, nearby places, access-road condition	Distances to key places
Construction Progress	Dated photos and videos per milestone (off-plan and under construction only)	Milestone; date; link to the progress track
CAD / BIM Files	Structural and architectural drawings and BIM models	File list; format (DWG, IFC, Revit, PDF); version; date; size

12.5 Other listing page rules

- Views, saves and stage counts are shown publicly on the listing page (Section 5.4).
- Add to compare appears on the listing page, in sync with cards and the compare tray (RQS-05 §3).
- Phone numbers and email addresses never appear.
- Sponsored marks paid promotion; Featured marks REALTIQ’s own editorial selection (Section 17).

13. MEDIA AND DOCUMENT ACCESS

One access model applies to every media item and document.

Level	Who can see it	Used for
Free	Anyone	Always: photos, renders, recorded video tours, and the master plan or site plan of a development. Optional for every other item
Paid	Signed-in Verified users who pay	3D / virtual tour, dollhouse, drone, aerial, street view, approach roads, floor plans, CAD / BIM, documents marked viewable, live video tours run by Inspection Partners. Virtual staging can be Free at the seller’s choice
On request	Buyers the seller approves (a fee can also apply)	Registered survey or TDP; sensitive documents
Private	The seller and REALTIQ only	Vault documents

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

13.1 Who decides

- REALTIQ sets which items may be Paid, price ranges, and which free-access models are active. Each model can be switched on or off per listing or per user.
- The seller chooses each item's level within REALTIQ's settings.
- The buyer sees the padlock or ₦ symbol and the price before paying.
- Paid media and document fees are received wholly by REALTIQ.

13.2 Free-access models (switchable per listing or user)

- Seller-sponsored: the seller pays so every buyer views free; labelled "Tour sponsored by [seller]".
- Free preview: part of the item free (for example two rooms of a 3D tour); the rest paid.
- Buyer pass: a time-limited pass covering tours, document views and analytics.
- Free after a serious action: unlocked free once the buyer has enquired, paid a document fee or booked an inspection.
- Seller pays for capture: capture costs carried by the seller; buyers view free.

13.3 Safeguards for Paid and On request items

- View-only by default; downloads only where the seller allows.
- Watermarked with the viewer's name and the date.
- Every view logged (who, when, how long), visible to the seller and the Console for security and KYC audit.
- Verified level required; REALTIQ can require additional checks for high-value documents.
- Fees for third-party services are split automatically to the provider and REALTIQ.
- REALTIQ receives the whole fee for Paid media and documents; the fee covers document hashing, storage and access controls (RQS-08 08-PF-06).

14. DOCUMENT MANAGER

14.1 Scope

Scope	What it covers
Platform-issued	Generated by REALTIQ: payment confirmations for services REALTIQ sells, statements of platform activity, escrow release certificates, verification certificates, platform notices
Between parties	Issued by a buyer, seller or third party to another party in a transaction: offers, agreements, invoices, receipts, reports, certificates, letters
Stored uploads	The vault: title documents, survey plans, approvals
General letter	Issued to anyone on the platform, or downloaded as a PDF with a verification QR code for outside parties such as banks

14.2 Issuer identity and the REALTIQ mark

- REALTIQ never issues a receipt, invoice or agreement in a seller's or third party's name. The issuing party issues it from a template and it carries their name and branding.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- Every document issued through the platform carries the REALTIQ transaction mark, for example “Issued via REALTIQ · Ref RTQ-… · Verify by QR code”, as proof that the transaction took place on REALTIQ.

14.3 How documents are made and controlled

- Generated by the system (receipts, statements, schedules); drafted from a template with merge fields (parties, unit, price, dates), then edited; or uploaded .
- Lifecycle: Draft → Approval (team accounts) → Issued → Signed or Acknowledged → Archived. Issued documents cannot be edited; changes are made by amendment or variation.
- Register: reference number per issuer series (for example RTQ-INV-2026-000123); issuer; recipients; access list; view log.
- Verification: every issued document is fingerprinted through the title registry and carries a QR code that confirms it is genuine.
- Permissions: role-based. For example, only Owner or Finance roles issue invoices; only partners issue their reports.
- Privacy: independent escrow agents never receive documents showing amounts.
- E-signature in-platform. Templates mark instruments that also need wet-ink execution, witnessing, stamping or registration.
- REALTIQ fee invoices: REALTIQ invoices only its own fees, issuing a fee invoice and receipt per charge in its own series (for example RTQ-FEE-2026-000123) with the REALTIQ mark and QR verification. Each carries every field the Nigeria Tax Act 2025 s152 requires: supplier’s tax ID, name, address and registration number; sequential number; date; purchaser; gross amount; VAT and rate. The invoicing layer can send invoices to the Electronic Fiscal System once it is deployed (NTA s157). Partners and sellers who invoice add their own VAT on their own invoices; REALTIQ never invoices or reports VAT for another party’s supply.
- Templates: counsel-drafted and maintained, available through a paid subscription. A “Lawyer-checked” upgrade lets a Legal Partner review a filled template for a fixed fee. Sales only: no tenancy, lease or rental templates.

14.4 Document types

Group	Types
Enquiry and offer	Expression of interest / letter of intent; offer letter; counter-offer; acceptance of offer; terms sheet; reservation / holding agreement; withdrawal of offer; non-disclosure agreement
Agreements	Contract of sale; off-plan sale agreement; instalment payment agreement (with grace, penalty, default and refund terms); bulk / multi-unit agreement; escrow terms and conditions schedule; deed of variation; Seller’s Agent Mandate; Buyer’s Agent Appointment Letter; agency agreement; partner appointment letter; dual-agency declaration
Title and conveyancing	Deed of Assignment; Deed of Sub-Lease; Letter of Allocation; Governor’s Consent application pack; irrevocable power of attorney (where used); title search report; legal due diligence report; title document uploads; title verification certificate / registry extract; title revocation notice
Inspection and technical	Proxy inspection / condition report; snagging report; milestone verification report; structural / building survey; boundary survey report; valuation report; conflict-of-interest declaration
Developer and handover	Construction progress report; notice of revised handover date; completion notice; handover certificate; key handover acknowledgement; estate rules / deed of covenant; service charge notice; seller’s property information declaration; occupier disclosure (sold with occupiers)
Money	Invoice; receipt (per payment and per unit); statement of account; instalment schedule; payment reminder; penalty notice; default notice; early settlement quotation; escrow deposit confirmation; escrow release certificate; refund notice; credit note; payout advice; REALTIQ fee invoice; partner fee invoice; service order receipt; withholding tax certificate
Escrow and disputes	Milestone claim; request for further evidence; objection notice; dispute notice; dispute decision letter
Account and general	KYC approval or rejection notice; trust score appeal decision; verification certificate; team invitation; general letter; formal notice; viewing confirmation; document request approval or refusal

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

15. FINANCE

Finance is where every profile runs all of its money: every naira and dollar in or out is recorded, explained, reconciled and exportable. Small sellers see a simple view; Developer and Agency profiles can switch on advanced modules (marked Adv).

15.1 Modules

Module	What it does
Finance home	Position at a glance; alerts; period selector
Money in	Full history of every payment received: deposits, instalments, outright payments, penalties, service fees. By unit, buyer, project and payment type, with status, receipt and FX rate. Search, filters, export
Money out	Full history of payouts, refunds, platform and service fees, partner fees, commissions and seat charges, with status and supporting document
Receivables	Sales ledger per buyer and unit; instalment schedules; aged receivables (0–30, 31–60, 61–90, 90+ days); collections pipeline; reminder sequences; penalties; defaults
Escrow funds	Held by condition and unit; expected release dates; release history; escrow statement of money held but not yet released
Payouts & settlement	Verified payout accounts (several allowed, for example one per project) with account-name confirmation; change protection (re-verification and a payout hold after a change); payout schedule and advices; settlement reports
Reconciliation (Adv)	Match platform records to Moniepoint and Paystack settlements and bank statements; unmatched-item queue; period close and lock
Invoices, receipts, credit notes, statements	From the document manager; numbering series per entity; monthly and on-demand statements per unit, project or profile
Refunds & disputes	Requests, approvals, amounts and outcomes, linked to escrow decisions and refund terms
Cash-flow forecast (Adv)	Expected inflows from schedules and escrow releases, and planned costs, by month; scenarios for delays, defaults and slower sales
Sales reports (Adv)	Contracted sales; collections against target; unit sales register; price-list history; discounts; sales by staff member or channel; revenue-recognition schedules for the accountant
Budgets & targets (Adv)	Sales and collection targets per project or phase against actuals
Project costs & margin (Adv)	Section 15.4
Multi-entity (Adv)	One company per project if needed, with a consolidated view
Multi-currency	NGN with a USD view; FX rate stored with each payment; FX difference report for USD-priced listings
Commissions (Agency)	Commission per mandate and per staff member; commission statements
Tax	VAT on fees, calculated per supplier (REALTIQ, each partner, each seller) and shown as a separate line, never on a payment as a whole; fees are shown VAT-exclusive. Property prices, deposits, instalments and penalties under sale terms are VAT-exempt (NTA s185(1)(l)). Withholding tax deductions and certificates; stamp duty references; tax reports
Controls	Finance role seats; prepare-and-approve for refunds, waivers, payout-account changes and large payouts; approval limits; adjustments only with a reason; full audit trail
Exports & integrations	CSV, Excel and PDF; scheduled email reports; exports mapped to QuickBooks, Xero, Sage and Zoho Books through a chart-of-accounts mapping; API and webhooks for ERP systems (Adv)

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

15.2 Seller figures

Figure	Meaning
Agreed sale value	Total of locked terms
Received	Money buyers have paid, including into escrow
Held in escrow	Received but not yet released
Released to you	Escrow released to the seller
Paid out	Transferred to the seller's bank, after fees
Outstanding	Still owed under the terms
Overdue	Outstanding and past due plus grace
Refunded; Fees	Money returned; platform and service fees

Headline pair on the home page: Agreed sale value and Released to you.

REALTIQ's own fee accounting runs in Console Finance (Section 19.2): a monthly VAT report of REALTIQ's output VAT, input VAT and net payable, ready before the 21st of the following month (NTAA s22(1)); revenue recognised when each fee is earned — transaction fees at each payment or release, deferred verification fees at completion, plans and subscriptions over their period, promotion packages over their run, campaign budgets as spent, basket items at delivery or acceptance (RQS-08 08-RV-09).

15.3 Buyer and partner views

•Buyers: paid, owed and next due; schedules across all plans with "Pay all due"; escrow held; receipts and statements (useful for banks and embassies); orders and basket; refunds; early-settlement requests; penalties. Corporate and cooperative buyers get prepare-and-approve payments.

- Partners: earnings (pending, held, paid); invoices; withholding tax certificates; payouts.

15.4 Project costs and margin (Developer, optional)

Part	What it does
Cost ledger	Costs by category: land, approvals and permits, design and professional fees, construction (by package), infrastructure, marketing, finance costs, sales costs. Invoices and receipts attached from the document manager
Budget against actual	Budget per project, phase and category; variance alerts
Cost per unit	Shared costs allocated across unit types by floor area or count
Margin	Per unit, unit type, phase and project: sales value from platform transactions minus cost
Cash flow	Expected collections combined with planned spending
Imports	Spreadsheet import and accounting-software connections
REALTIQ use of data	Anonymised, aggregated cost benchmarks (for example cost per m² by area) for market intelligence, with the developer's consent in the terms of use

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

16. TRUST AND REPUTATION

16.1 Two kinds of signal

- Verification answers “has REALTIQ checked this fact?” (identity, listing, title). Shown with the single Verified badge (RQS-01 §20).
- Trust score and tier answer “how has this account behaved over time?”. Shown with a tier badge whose design is clearly different from the Verified badge.

16.2 Components

Who	Components
All accounts	Identity verification; completed transactions (only transactions completed on the platform count; self-reported off-platform sales are ignored); ratings; responsiveness; disputes
Sellers	Plus title quality
Inspection Partner	Plus report turnaround time; report acceptance rate
Legal Partner	Plus task turnaround time; client ratings
Engineering & Survey Partner	Plus verification turnaround time; report acceptance rate
Valuation Partner	Plus report turnaround time; client ratings
Buyer’s and Seller’s Agents	Plus deals completed; client ratings; average time to sale or purchase
Developers	Plus handover record, shown on the developer page as “Handed over by the original date: x of y” and “Handed over after a revised date: z”, calculated from the original and revised dates kept under Section 7.4. No other delivery score is shown

16.3 Visibility

Element	Sellers and third parties	Buyers
Score (0–100), tier and components with evidence counts	Public	Visible only to a seller or third party with a transaction relationship (enquiry, viewing, offer or job)
New accounts	“New to REALTIQ — building history” until the minimum evidence is reached (set in the Console). Profiles, directory cards and seller cards never show “0.0 / 5”, “0 reviews” or “0 completed jobs”; a ratings average appears only after two qualifying reviews (Section 16.4)	Same
Policy version and “How scores work”	Public	Public
Appeals	Private	Private
Public profiles and posts	Show the account’s Verified badge and trust tier	Buyer trust details as set out in this table, also on followable buyer profiles

16.4 Tiers and rules

- Tiers: New → Bronze → Silver → Gold → Platinum. No negative labels (for example “Low”) are ever displayed.
- The ratings component shows an average only after at least two qualifying reviews (RQS-01 §22).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- The effect of upheld disputes, and whether it decays over time, is set by REALTIQ in the Console and can be adjusted per case.
- Blacklist: REALTIQ can blacklist fraudulent actors across all their profiles. A tier can be removed. REALTIQ chooses whether the reason is shown publicly or kept private.
- Search: “Highest Rated” and “Trust Tier” are sort options. The Recommended sort weights are unchanged.
- Appeals are submitted from the Trust page with an appeal history; outcomes are issued as documents.

17. PROMOTION AND MARKETING

17.1 Sponsored and Featured

Label	Meaning	Effect
Sponsored	Paid promotion bought by a seller, agency, developer or third party	Sponsored boost in the Recommended sort (the existing paid-boost weighting) and paid placements. Never bypasses a buyer’s filters
Featured	REALTIQ’s own editorial selection, chosen by the REALTIQ team: new arrivals, seasonal selections, strategic promotions	Placement slots only (homepage, top of category pages, newsletter). No ranking weight. Never bypasses a buyer’s filters

An item can carry both labels.

17.2 Paid promotion products

For	Product	Where it appears
Sellers, agencies, developers	Listing boost	Higher in Recommended results, within the buyer’s filters
	Sponsored result slots	Top positions in matching search results
	Area or city spotlight	Homepage and area pages
	Project or developer showcase	Homepage carousel; project category pages
	Saved-search promotion	“Promoted match” in alerts to buyers whose saved searches match
	Similar-listing placement	“Similar properties · Sponsored” on other listing pages
	Open house and show home promotion	Sent to buyers who saved or follow that area
	Newsletter feature	REALTIQ’s buyer newsletter
Third parties	Promoted service provider	Top of the Services catalogue and the listing page Services card
	Directory spotlight	Top of the third-party directory by state and service
Sellers, agencies, developers and third parties	Promoted post	Explore and the Following feeds of matching buyers; always labelled Sponsored; capped per feed page; follows each recipient’s notification settings

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

17.3 Promote page (Seller, Agency, Developer and Partner Portals)

- Campaign manager: choose a product; target an audience (area, price band, buyer type, local or abroad, buyer's country); set budget and schedule; pause or stop at any time.
- Promoted post: in the Partner Portal, the campaign manager offers Promoted post alongside Promoted service provider and Directory spotlight.
- Results: impressions, clicks, saves, enquiries, viewings, cost per enquiry, and comparison with organic performance.
- Share kit: tracked share links; social media cards; printable brochure or flyer with QR code; WhatsApp sharing; website widget to embed REALTIQ listings on the seller's own site.
- Followers: buyers can follow any public account as well as projects and developers; followers receive the account's posts, new listings and updates on the platform only.
- Broadcasts to own leads: updates to buyers who enquired, on the platform only, respecting each buyer's notification settings.
- Offers: launch prices and time-limited discounts with an end date. Countdown timers and "only X left" messages are not used.
- Listing tips: suggestions that improve organic ranking, for example add a floor plan, add photos, confirm freshness.

17.4 Pricing and delivery

- Fixed packages (for example 7, 14 or 30 days) and bidding (pay per click or pay per enquiry) are both available. REALTIQ chooses which to offer per product and can run promotional prices and discounts.
- Fixed packages are paid in full upfront through Paystack; the campaign starts only after payment succeeds.
- Bidding campaigns are funded by a prepaid campaign budget paid upfront through Paystack. The budget belongs to one campaign: it cannot be transferred, withdrawn or spent on anything but that campaign's clicks or enquiries. Spend never exceeds the budget; the campaign pauses when the budget is used up and resumes when it is topped up. VAT is charged on the budget when it is paid.
- Each bidding product has a minimum bid set in the Console, and a click or enquiry is never charged more than the advertiser's bid in force at the time.
- Only listings meeting a minimum quality score set in the Console may bid. Bidding campaigns compete only for labelled Sponsored slots (for example the top of results), ranked by bid combined with listing quality, with weights set by REALTIQ. Fixed packages give the Sponsored boost within the Recommended order (RQS-03 §3.4). Neither ever shows a listing outside the buyer's filters.
- When a package is stopped or a campaign ends, the unused value (unused days pro rata, or unspent budget) is refunded to the original payment method or moved into the advertiser's next campaign, at the advertiser's choice. A moved amount becomes that campaign's budget at once; it never sits as an account balance.
- Promotions reach users in-app, by email and by mobile push, following each recipient's notification settings.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

17.5 Rules

- Paid placement is always labelled Sponsored and never bypasses a buyer’s filters.
- Only verified, fresh listings that meet the photo minimum can be promoted, whether directly or through a post tagged to them.
- A post can be promoted only if the account is verified and not suspended or blacklisted; the post is published, has passed moderation and has no open Trust & Safety case; and any listing, unit or project it tags is live and itself eligible for promotion.
- A post with no tag can be promoted if it relates to property sales or related services (RQS-01 §27.2). A third party’s untagged post must relate to a service listed on its partner page (Section 18.1).
- A third party can promote a post tagged to a listing only with the permission of the account entitled to boost that listing (Section 9.4).
- If a tagged listing becomes ineligible, Sold or removed, or the post is removed by moderation, the promotion pauses. Unused value is refunded or moved to the next campaign under RQS-08 08-PR-03.
- Blacklisted or suspended accounts cannot buy promotion.
- Sponsored slots are capped per page.
- Promotion, including a third party’s Promoted post, never affects automatic matching of third parties to jobs.
- Under an Open mandate only the owner can boost a listing (Section 9.4); agents cannot promote posts tagged to it.

17.6 Reporting

- Any signed-in user can report an account, listing, post, comment, review or message, choosing a reason: fraud or scam; fake or misleading listing; impersonation; harassment or abuse; asking to deal off the platform or sharing contact details; spam; other (with details).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- Each report opens a Trust & Safety case. The reporter is never shown to the reported account and can see the case status.
- Outcomes: no action, warning, content removal, suspension or blacklist (Section 16.4).

17.7 Explore ordering

- Explore orders posts by: relevance to the buyer (saved searches; followed accounts and projects; accounts whose posts the buyer has liked; and listings related to those the buyer has viewed, saved, or liked posts about — same area, property type, price band or project); recency; engagement (likes, saves, shares and comments); and post quality (from a verified account, tagged to a live listing, unit or project).
- Liking a post is an interest signal for its author and for any listing, unit or project it tags. Explore then shows more posts from that author and posts about related listings. Interest signals fade over time; REALTIQ sets the decay period in the Console (default: 90 days).
- Liking a post does not follow its author. The Following feed shows only followed accounts and projects (Section 6.2).
- Trust tier and paid promotion do not change the organic order, in line with the Recommended sort (Section 16.4). Featured posts appear in editorial slots and Promoted posts in labelled Sponsored slots, capped per feed page (Sections 17.1 and 17.2).
- Posts from suspended or blacklisted accounts and posts removed by moderation are excluded.
- The Following feed stays newest first (Section 6.2).
- REALTIQ sets the factor weights in the Console.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

18. PARTNER PORTAL

18.1 Shared workspace

Group	Page	Features
Home	Home	Needs attention: new job offers, visits due, reports due, client responses, payouts
Work	Jobs	Offers (accept or decline with conflict-of-interest declaration); accepted; in progress; completed
	Mandates & Clients	Agents: incoming mandate and appointment requests; listings managed or buyers represented; permissions granted; actions due
	Calendar	Site visits; live video tours; availability
	Messages	With clients and REALTIQ, following the verification room rules for escrow work
Records	Documents & Reports	Reports from role templates; signed on submission; issued with the REALTIQ mark
Money	Finance	Earnings (pending, held, paid); invoices; withholding tax certificates; payouts
Growth	Promote	Section 17
	Posts	As in Section 7.2. Partners post professional content (for example legal, survey, inspection or valuation explainers) and may tag a listing only with the seller’s permission; partners can promote posts (Sections 17.2 and 17.5)
	Followers	Follower count and list (names only, never contact details)
	Ratings & Trust	Ratings, trust components, appeals
Account	Profile & Credentials	Licences, insurance, service areas by state, rates, availability; expiry reminders; public partner page (below)
	Team	Seats and roles for firms
	Notifications, Settings	Section 20; security; video autoplay; plan and billing (Section 4.7)

Public partner page

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

The public partner page shows, in order:

1. Header with role label and service areas by state.
2. Independence line (a conflict-of-interest declaration is made on every job) and indemnity insurance where held.
3. Services, each with rate, turnaround and payment terms (Section 18.5).
4. How the work is delivered (role rules in Section 18.2).
5. An optional redacted sample report.
6. Availability with the next available date.
7. Credentials with issuing body and verification date.
8. Role trust components (Section 16.2).
9. About text marked “Provided by the professional”, with a word limit set in the Console, and specialties chosen from a fixed catalogue.

Guests can view the page (Section 3.1); hiring needs Verified access.

18.2 Role variations

Role label	Specific features
Inspection Partner	Services: proxy visit (non-technical), proxy inspection, live guided video tour (Section 11.2), condition report, snagging report, neighbourhood visit report, termite and pest inspection, handover attendance (non-technical) and builder’s condition assessment. A proxy visit or handover attendance is labelled “Observational visit, not a technical inspection” on the page, the request and the report. No page or directory text may state that live video is unavailable. Buyer checklist; live walkthrough link; photo and video evidence captured on site with automatic date, time and location stamps; condition and snagging report templates; payment terms per service as in Section 18.5
Legal Partner	Title searches; due diligence; agreement review (“Lawyer-checked”); conveyancing tasks; escrow conditions such as “Deed signed”; template drafting; NBA credentials; transfer cost estimate; tax advice on the transaction, given by a tax adviser with CITN membership (Section 3.3)
Engineering & Survey Partner	Milestone verification against escrow conditions; structural and survey reports; COREN or SURCON credentials; architect’s drawing review; planning- approval check; cost and progress certification; materials testing; geotechnical investigation; flood risk assessment. Engineers choose civil, structural or MEP specialties. A cost and progress certificate can serve as escrow milestone evidence only where both parties agree to that partner (RQS-01 §17.2; Section 18.3)
Valuation Partner	Valuation requests; valuation report template; access to comparables; ESVARBON credentials
Buyer’s Agent	Buyers represented; shortlists; viewings attended on the buyer’s behalf; negotiation within the stated authority; deal tracker
Seller’s Agent	Listings managed under mandate; permissions per listing; leads and viewings; negotiation up to the price floor; mandate terms and renewals
Mortgage Partner	Not active at launch; reserved

18.3 Job matching

- Three methods: the buyer chooses a provider; automatic matching (nearest available, verified, in the right service area); REALTIQ assigns.
- Independent agents for escrow conditions must be agreed by both buyer and seller before terms lock, whichever method proposed them.

18.4 Third-party directory

- Navigation label: “Find a verified professional”. The same label is used everywhere the directory is linked, including the public website navigation and the listing page Services card.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- Intro line: partners are independent third parties, not REALTIQ employees.
- Filters: search; state; city; service area; role; specialty; trust tier; minimum rating, with “Include New to REALTIQ” on by default; availability.
- Each card shows photo or logo, name, role label with Verified badge, trust tier or “New to REALTIQ”, specialty chips, service areas, availability and starting rate.
- Directory spotlight placements are labelled Sponsored (Section 17.2).
- Mortgage Partners are not listed until active.

18.5 Partner payment terms

- REALTIQ’s uniform platform rate applies to every partner service and is included in the partner’s listed price, never added on top: the buyer pays the listed price and REALTIQ’s share is deducted from it. The partner’s earnings view shows gross, platform rate and net. The Console can later set a different rate per role or service.
- The Console holds payment-term types: upfront; on completion or submission; on acceptance of the report (held); deposit plus balance. Each type can be switched on or off and limited per partner role and service. A type switched off disappears from partners’ settings and from new bookings.
- A partner chooses terms per service from the allowed types. The choice takes effect only after Third-Party Network approval; unapproved terms are never shown to buyers.
- The service’s payment terms appear on the public partner page beside rate and turnaround, and on the booking and basket screens, before the item enters the basket.
- The basket charges only the amount due now. Later amounts (for example a balance on report submission) are billed from the order or job page as a separate Moniepoint payment with the same split.
- Upfront and on-completion amounts settle to the partner at once. On-acceptance amounts are held in Moniepoint’s held structure until the buyer accepts the report or an acceptance window (Console setting) expires.
- A rejected report is reviewed by REALTIQ against its published report guidelines. REALTIQ decides whether the partner is paid, must redo the work, or the buyer is refunded. Partners must follow the guidelines.
- Partner terms include an obligation to refund a buyer for paid work not delivered. Unresolved refunds open a dispute that feeds the partner’s trust components (Section 16).
- Partners shown as “New to REALTIQ” may use only held or on-acceptance terms until they meet a track record set in the Console.
- Changes to a partner’s terms apply to new bookings only.
- Withholding tax is deducted from partner payouts where required, with certificates issued.

19. REALTIQ CONSOLE

The REALTIQ Console is the staff workspace. It covers buyers, sellers and third parties through the whole lifecycle: sign-up, verification, listing, discovery, enquiry, viewing, negotiation, payment, escrow, handover, legal transfer, review and records.

19.1 Shared foundations

Foundation	Description
Account record	One record per person or company showing every profile, KYC, trust, listings, transactions, payments, disputes, notes, cases and audit history
Case management	Every issue becomes a case with owner, department, priority, deadline timer and linked records; cases move between departments
Global search	Users, listings, projects, transactions, payments, documents and cases by ID, name, reference or fingerprint

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Foundation	Description
Queues	Deadline-sorted queues per department, with escalation to a senior officer when a deadline is missed
Approvals	Prepare-and-approve for sensitive actions, with thresholds set in Configuration
Audit log	Every staff action, permanent
View as (read-only)	See a user's screen for support; logged; cannot act as the user
Configuration	Dispute threshold; photo minimums; nudge ladder timings; payment thresholds and REALTIQ Standard Terms; trust policy versions, minimum evidence and dispute decay; free-access models; Paid item price ranges; promotion inventory and pricing; account plan fees on or off; FX source (default: Central Bank of Nigeria official daily rate, NFEM); ROI default assumptions; date and time formats; accepted KYC documents; Explore ordering weights; like-signal decay period (default: 90 days); post media limits (RQS-01 §27.2); proxy vetting standard; partner specialty catalogue; partner About word limit; fee schedule and versions, with the stream and payment route of each fee; plan catalogue and add-ons; owner listing cap; verification state bands and service fees; verification deferral period; platform rate; partner payment-term types; acceptance windows; minimum bids, quality threshold and ranking weights; Recommended sort factor weights (RQS-03 §3.4); waiver and refund thresholds; no-fault cost-recovery portion; internal hourly cost; promotional credits; plan grace period; REALTIQ's VAT status (not registered or registered at 7.5%)
Template library	Document templates with versions and issue permissions
Broadcasts	Platform notices and policy updates by role or segment
Reports	Department dashboards and an executive overview

19.2 Departments

Department	Purpose	Queues and tools	Sensitive actions
Executive / Super Admin	Oversight and final authority	Executive dashboard; staff and roles; configuration approval	Create staff accounts and roles; change policies; grant Super Admin (designated executives only)
Sales & Partnerships	Bring in and grow sellers, developers, agencies and large buyers	Prospect pipeline; account health; plans and seats; promotion sales; fee discounts and waivers within limits; onboarding help for large projects	Discounts within limits
Customer Support	First line for every user	Ticket inbox including support chat; View as; saved replies; help articles; routing to departments	Access resets with identity checks
Trust & Safety	Keep the marketplace safe	KYC review; fraud signals (duplicate listings, suspicious payments, contact-detail attempts, including in posts and comments); reports queue covering accounts, listings, posts, comments, reviews and messages (Section 17.6); trust appeals; blacklist	Content removal; Suspend, reinstate, blacklist (long bans by prepare-and-approve); trust corrections; public or private blacklist reasons
Legal & Verification	Titles, verification and legal decisions	Title queue (Declared → Submitted → Verified; Rejected; Revoked); registry and fingerprints; listing verification (authority to sell, approvals, photos); in-person title searches by state; verification orders priced by state band (Band 1 digitised registry, for example Lagos; Band 2 states where officers are based; Band 3 states needing travel), with pass-through costs and a service fee paid by the seller upfront or deferred to the sale; re-verification fee when the seller's own change triggers it; time and expenses logged on every case; template governance; law-firm panel; legal requests from authorities	Verify titles; revoke titles (two people); publish templates
Escrow Operations	Run every escrow fairly and on time	Claims by deadline; verification rooms; shared-milestone batch release with exceptions; objection windows; disputes; agent appointment and replacement	Approve release or reversal; two-person approval above threshold; separate from Finance payouts
Finance	Money correct, reconciled and	Payments monitor; Moniepoint and Paystack reconciliation; payout runs; refunds; failed	Payout runs and refunds by prepare-and-

Department	Purpose	Queues and tools	Sensitive actions
	reported	payments and chargebacks; fee revenue dashboard and fee lines; plan billing; VAT reports; revenue recognition; receivables for deferred fees and fees owed by defaulting sellers; partner payouts; per-unit ledger reconciliation; tax reports	approve; payout-account change reviews
Listings Quality	Accurate, fresh, compliant listings and projects	Listing review; new Area submissions; freshness nudge ladder; outdated- information reports; data fixes; project set-up support; moderation of reviews, Q&A, posts and comments (hold, approve or remove); sales- only content rule; posts tagged to listings must match the listing	Hide a listing pending fixes (staleness alone never unpublishes)
Third-Party Network	Recruit, vet and manage third parties	Applications; credential checks (NBA, COREN, SURCON, ESVARBON, ARCON, CORBON, TOPREC, QSRBN, CITN, laboratory accreditation); proxy vetting standard; specialty catalogue; About word limit; credential expiry; job assignment; performance; fee schedules; partner payment-term approvals; published report guidelines; rejected-report reviews	Approve, suspend or remove partners
Technical	Platform running and secure	System health; ecosystem connectors (Section 23); integrations (Moniepoint, Paystack, Mapbox, Zoom, Termii, Postmark, Firebase Cloud Messaging, CBN FX feed, address verification, SMS/WhatsApp, e-signature); incidents; feature switches; staff access; security alerts	Production changes; access grants
Data & Market Intelligence	Analytics products and data quality	Market analytics; ROI default assumptions; sold data; interest data from stage counts; heat-map layers; cost benchmarks	Publish assumption changes with effective dates
Marketing & Growth	Attract and retain users	Campaigns; newsletter; Featured selections, including Featured posts for Explore (editorial, no ranking weight); Sponsored inventory and approvals, including Promoted posts; broadcasts; SEO pages	No personal data beyond consented marketing lists
Compliance & Data Protection	Regulatory compliance	Anti-money-laundering monitoring and reports; data-protection register and requests (access, correction, deletion); policy versions; regulator correspondence	Report filing
Internal Audit	Independent checking	Read-only access to the audit log, approvals and reconciliations	None

19.3 Separation rules

- Nobody prepares and approves the same release, refund or payout.
- Nobody verifies their own submission or approves a payout to a bank account they changed.
- Title revocation always needs two people.
- Reserve prices are never visible to REALTIQ staff.

19.4 Starting with a small team

One Console with modules shown by role. One person can hold several roles (for example Finance and Escrow Operations, or Customer Support and Listings Quality). The separation rules apply even then. Super Admin is held by designated executives. As departments are staffed, roles are split without rebuilding.

20. NOTIFICATIONS

- Channels: in-app activity centre, email (Postmark), SMS and WhatsApp (Termii) and mobile push (Firebase Cloud Messaging).
- Categories follow the profile type, for example messages, enquiries, viewings, offers, payments, escrow, documents, saved searches, listing changes, jobs, mandates, promotions, posts and updates from followed accounts and projects, new followers, likes and comments on my posts, report outcomes.
- Each user chooses channels per category. Security, payment and legal notices are always delivered.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- Promotions follow the recipient’s settings.
- Each profile has its own settings; the profile switcher shows unread counts per profile.

21. LEGAL EXPLAINER

- Plain-language explanations of legal terms appear wherever they are used: for example C of O, Governor’s Consent, Deed of Assignment, Deed of Sub-Lease, escrow, objection window, default, forfeiture.
- Each transaction stage (Section 5) shows “What happens next” for the viewer’s role.
- A searchable glossary in the Help Centre.
- Explanations are maintained by REALTIQ Legal & Verification and reviewed by counsel.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

22. HOW WE WILL KNOW THE WORK IS COMPLETE

- Every portal uses the names, navigation and shell rules in Sections 2 and 4; no page leaves the shell; no system wording appears.
- One email can hold several profiles and switch between them; access levels gate features as in Section 3.1.
- Status labels and public stage counts follow Section 5 on projects, units and individual listings, for every viewpoint.
- Sellers set terms for Outright and Instalment, apply escrow to either or both, and set refund, default and penalty terms; buyers accept, configure or request variations; plans are never created from blank buyer forms.
- Viewing options, the seller calendar and the listing page panel match Section 11.
- The listing page has one action card, one services card and the column order in Section 12.3; the media tab icons jump to each media type.
- Every media item and document carries an access level; Paid and On request views are watermarked and logged.
- Documents issued by sellers and third parties carry their branding and the REALTIQ mark, and verify by QR code.
- Finance shows full money-in and money-out history and the seller figures in Section 15.2; reconciliation matches Moniepoint and Paystack settlements.
- Trust scores, tiers and visibility follow Section 16; no negative labels are displayed.
- Sponsored and Featured labels follow Section 17; promotion never bypasses filters; sellers, agencies, developers and third parties can buy Promoted posts, and only posts that meet Section 17.5 are promoted.
- Buyer's and Seller's Agents can be hired, granted permissions and removed as in Section 9; only the paying or receiving party accepts final terms.
- The Console separation rules in Section 19.3 are enforced by the system.
- Dates, times and currencies display in the formats in Section 4.3.
- Public profiles, posts, and the Explore and Following feeds work as in Sections 2.2, 6.2, 7.2 and 7.4; buyers are not followable unless they opt in; post uploads meet the post media limits (RQS-01 §27.2) and in-feed videos follow each user's autoplay setting.
- Posts and comments block contact details and are moderated; reports create Trust & Safety cases with the reporter hidden (Section 17.6).
- Light, Dark and Match device themes meet contrast of at least 4.5:1 on every page.
- Every public profile follows the page order in Section 2.2; developer, agency and partner pages show the content in Sections 7.4, 7.3 and 18.1.
- New profiles never show zero scores (Section 16.3); expired items show "Not bookable until renewed" (Section 3.4).
- Proxy visits carry the observational label (Section 18.2); the directory works as in Section 18.4.
- Explore follows the ordering in Section 17.7, with likes used as an interest signal; all listing media meets the media specifications, whoever captured it (Section 8.3).
- Plan and billing works as in Section 4.7; a lapsed plan never interrupts a transaction, escrow, instalment plan or paid access already in progress.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

- Property payments and the basket go through Moniepoint with splits; Paystack carries only plans, subscriptions, promotion and REALTIQ fee invoices; no stored balance exists other than single-campaign budgets (Section 10.4).
- Every sale shows the REALTIQ transaction fee and its payer on the terms sheet; fee refunds follow fault (Section 10.2).
- Partner payment terms, held amounts and rejected-report reviews work as in Section 18.5.
- No payout split can be created before payout set-up is complete (Section 3.4).
- A new listing that matches an existing property record from a different seller cannot publish until review; a property sold on REALTIQ cannot be relisted by anyone other than the buyer of record without proof of transfer (Section 8.4).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

23. ECOSYSTEM READINESS AND INTEGRATIONS

23.1 Purpose

REALTIQ must be able to connect with other applications in future, including other Savant applications and approved third-party providers, without changes to its core. No connected application is part of the launch scope. This section sets what REALTIQ provides at launch so that each future connection is added by registration and configuration, not by redevelopment. The data exchanged with any particular application is specified separately when that application is ready.

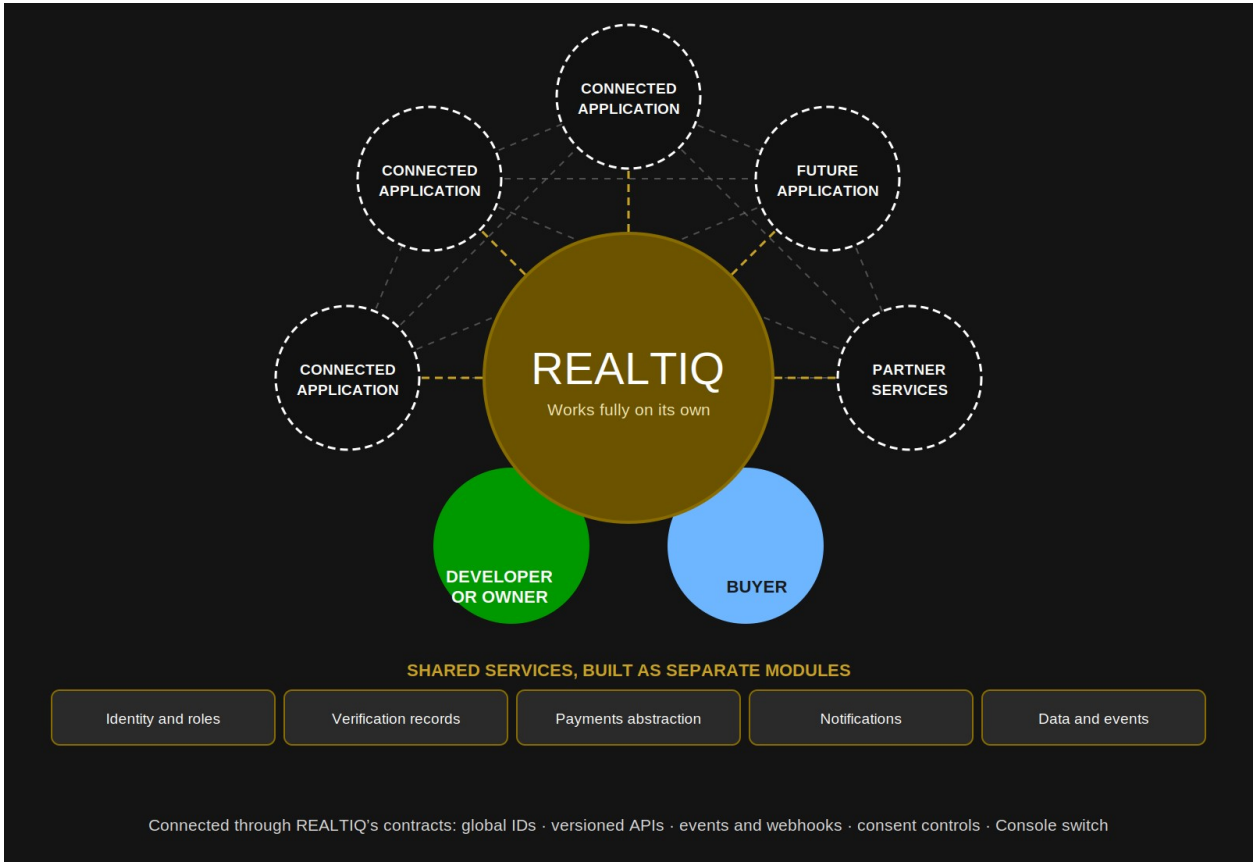

Figure 1. REALTIQ works fully on its own; future applications connect through REALTIQ's integration contracts and shared services.

23.2 Design principles

1. Integration-ready from day one. The identifiers, events, APIs and controls in this section are live at launch, even before anything connects. Nothing should have to be retrofitted.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

2. REALTIQ works on its own. Every REALTIQ feature works with no connected application. A connection adds to REALTIQ; it never becomes a dependency.

3. Shared services, separate modules. Identity, verification records, payments, notifications and data are built as separate modules with their own interfaces, so they can later serve other applications or move to a separate platform service without changing their contracts. They hold no feature-specific business rules.

4. One account, many roles. A single verified account can hold several roles, on REALTIQ and later in connected applications, without registering again.

5. REALTIQ owns the contracts. Connected applications build to REALTIQ's published contracts. REALTIQ does not change to suit each connection.

23.3 What REALTIQ provides at launch

Requirement	What REALTIQ provides
Global identifiers	A global participant ID for every account and a global property ID for every project, unit and listing. Both are independent of REALTIQ, permanent and never reused; REALTIQ's own listing references remain for display. A cross-reference table maps each ID to the matching record in any connected application.
Identity and roles	One account holds several roles and profiles (Section 2). REALTIQ's identity service supports OpenID Connect, so the same account can later sign in to connected applications. Identity details pass to an application only with the user's consent.
Verification records	Each verification result (identity, company, licence, title, rating, trust tier) is stored as a record with its source, issue date and expiry (Sections 3 and 16), so it can be reused later.
Payments	All money movement goes through the payments abstraction layer (RQS-08 §13). Escrow funds stay with REALTIQ's licensed payment partner (Section 10.1).
Notifications	Every notification goes through one notification service with channel adapters (in-app, email, SMS, WhatsApp, push), following each user's preferences (Section 20).
Events	REALTIQ publishes its own events through a transactional outbox from launch, even before anything subscribes: listing.created, listing.price_changed, listing.withdrawn, offer.accepted, transaction.completed, property.handover, project.created, unit.status_changed, milestone.verified and title.verified. Delivery is at least once; each event carries an idempotency key, the global property ID and the participant IDs involved.
Webhooks	Approved subscribers receive events by webhook. Each delivery is signed (HMAC-SHA256); failed deliveries retry with exponential backoff for 24 hours, then move to a dead-letter queue shown in the Console.
Partner APIs	Versioned REST APIs described in OpenAPI 3.1 for listings, property records, participant profiles and transaction status. JSON bodies; timestamps in UTC (ISO 8601); amounts in minor units with an ISO 4217 currency code; areas in m². New optional fields may be added within a version; removing or changing a field needs a new version, and the previous version stays supported for at least 12 months.
Service authentication	OAuth 2.0 client credentials per connected application, scoped to its contract, over mutual TLS. Credentials sit in the platform secret store and rotate at least every 90 days.
Consent and data sharing	Users approve, per connected application, what data is shared, in Settings › Connected applications, and can withdraw approval at any time. Every share is logged with time, application, purpose and consent version, in line with the Nigeria Data Protection Act 2023.
Deep links	Stable links open a REALTIQ listing, property record or transaction in context. REALTIQ's own sign-in and access checks apply on arrival.
Source labels	Every record and media item carries its source (REALTIQ or a named connected application) and the time it was received. Buyer-facing views label external content by source.
Sandbox	A sandbox environment where a connected application can be tested against REALTIQ's contracts before it is switched on.

23.4 Connected applications in the Console

1. The Technical department registers the application in the Console and issues client credentials scoped to its contract.
2. The application passes the contract tests in the sandbox.
3. One REALTIQ officer prepares the switch-on and a second officer approves it (Section 19.3).
4. The application's interface elements appear and data starts to flow. Switching it off hides them again and stops data flow; data already received keeps its source label.

At launch no application is connected.

23.5 Reserved extension points

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

These places in REALTIQ have a reserved, hidden area that a connected application can fill once it is switched on. Each area stays hidden, and takes no space, until then.

Place	Reserved for
Developer dashboard (RQS-01 §18)	A “Connected applications” area: linked applications, connection status and actions they provide
Project page	Additional construction progress items and media from a connected application, labelled by source
Listing page	Additional property information from a connected application, shown with the owner’s consent and labelled by source
My Portal › My Purchases	Services offered at handover, with the buyer’s consent
Settings (every portal)	Connected applications: approval per application and the sharing log
Console › Technical	Connectors: registration, credentials, on and off switch, health, event queues, dead letters and sharing log
Verification back office	External records shown to verification officers during checks

23.6 External providers

Category	In use at launch
Payments and escrow	Moniepoint for property payments and escrow; Paystack for plans, subscriptions, promotion and REALTIQ fee invoices
Identity and verification	BVN, NIN and address verification
Mapping	Mapbox
Communications	Termii (SMS), WhatsApp Business API, Postmark (email), Firebase Cloud Messaging (push)
Live video, virtual and 3D tours	Zoom; Matterport, Realsee and CloudPano (Section 11.4)
Other services	e-signature, CBN FX feed

Every external provider sits behind an adapter, so a provider can be swapped or added without changing product logic.

23.7 Rules that do not change

- **Minimum data:** each contract carries only the fields its purpose needs. Contact details are never passed between users through any connection.
- **Transactions stay whole:** communication, negotiation, payments and documents between a REALTIQ buyer and seller for a REALTIQ property stay on REALTIQ (platform-wide rule 2).
- **Sales only:** REALTIQ lists no land or empty plots (platform-wide rule 1), whatever a connected application provides.
- **Verification still applies:** evidence or records from a connected application go through REALTIQ’s normal verification and objection steps (RQS-01 §14); only REALTIQ can mark a REALTIQ item Verified.
- **Resilience:** if a connected application is unavailable, REALTIQ works normally; its reserved area shows “Not available right now”, and queued events are delivered when the connection returns.
- **Fees:** no fee applies to connections at launch; any future fee is added through the fee schedule.

23.8 How we will know the work is complete

- Every listing has a global property ID that is independent of REALTIQ, and every user has a global participant ID that can hold multiple roles.
- All payment operations go through the payments abstraction layer, and all notifications through the shared notification service.
- Every listed event is published from launch, and a sandbox test subscriber receives each one once per idempotency key.
- The partner APIs are documented in OpenAPI 3.1, versioned and secured with scoped client credentials over mutual TLS.
- A test application can be registered, switched on with prepare-and-approve and switched off in the Console with no code change; its reserved areas appear and disappear accordingly.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- No data about a person is shared without that person’s approval, and the sharing log records every share.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

PART 7 OF 8 · RQS-07

REALTIQ Public Profile Pages Specification

What buyers and other viewers see on the public pages of developers, agencies, owners and third-party partners — what each page contains, what it communicates and how it behaves.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

QUICK REFERENCE — PUBLIC PROFILE PAGES AT A GLANCE

Page	Who has one	What leads the page	Viewer's next step	Section
Shared core (every page)	Every public profile	Header; Verified badge with "Verified by REALTIQ" panel; trust tier; type-specific body; posts grid with follower and following counts; reviews; actions	Message [role], Follow, Report account	6.3
Developer page	Every Developer profile	Record on REALTIQ, current and completed projects, title record, developer reviews, About the company	Message, Follow, open a project	6.5
Agency page	Every Agency profile	Record on REALTIQ, own and managed listings, team by name and role	Message, Follow, open a listing	6.6
Owner page or seller card	Owners who choose a public page; otherwise the listing's seller card	Owner's listings, or "Listed by Owner", Verified badge, trust tier and reply time	Message owner	6.7
Partner page	Every Partner role (legal, engineering and survey, inspection, valuation, Buyer's and Seller's Agents)	Scope line, independence, services with rate, turnaround and payment terms, delivery, sample report, availability, credentials, trust components, About	Hire or request a service, Message	6.4
Directory	"Find a verified professional"	Filters, cards and Sponsored spotlight placements	Open a partner page	F40; RQS-06 §18.4

States (new, expired, unavailable, suspended, sponsored, empty) and disclosures apply on every page (Sections 6.10 and 6.11). Mortgage Partner pages are built but hidden until a lender is live.

1. PURPOSE AND SCOPE

1.1 Purpose

This document defines what a buyer or other viewer sees on another user's public page on REALTIQ: the page system, the content and order of each page type, what each page must and must not communicate, the actions available, page states and disclosures. User types follow RQS-06 §2. Every feature is a launch feature except mortgage: Mortgage Partner pages, mortgage products and the Mortgage payment type are built but hidden until a lender partner is live (RQS-06 §2.1, §10.1, §18.2).

1.2 Out of scope

- Land, plots, rentals, leases and short lets — the platform sells developed property only (RQS-03 §1, §2.2; RQS-06 §1; RQS-01 §21).
- After-purchase services — fit-out, interiors and similar belong to a separate product (RQS-06 §1).
- Production of listing media (photography, drone, 3D capture) — provided outside the platform; sellers may use any media provider (RQS-06 §1, §8.3).
- Buyer profiles — private by default; a buyer may opt in to being followable (RQS-06 §2.2).

2. KEY DECISIONS AT A GLANCE

Topic	Decision	Basis
Page system	One shared core on every public page, plus two families: seller pages (Developer, Agency, public owner) and partner	RQS-06 §2.2, §16

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Topic	Decision	Basis
	pages (all third-party roles).	
Who has a public page	Developer, Agency and each Partner role. Owners choose whether their page is public; a private owner appears through the seller card. Buyer profiles are private unless the buyer opts in to being followable, and never show trust details publicly.	RQS-06 §2.2, §16.3
Names on pages	RQS-06 role labels (for example “Inspection Partner”, “REALTIQ Verified Buyer’s Agent”). “Verified Property Agent” is not used; the directory is “Find a verified professional”.	RQS-06 §2.1, §9.1, §18.4
Trust signals	One Verified badge; a separate trust-tier badge; “New to REALTIQ — building history” for new accounts; a rating average only after two qualifying reviews.	RQS-01 §20.1, §22; RQS-06 §16
Contact	On-platform actions only; no phone numbers or email addresses on any page.	RQS-06 §1
Public counts	Profile pages show no view, save or stage counts; those appear on listing and project pages only.	RQS-06 §5.4
Live video tours	Launch scope, run by any seller type (owner, agent or agency, developer) or an Inspection Partner. No page or directory text may say live video is unavailable.	RQS-06 §11.1, §11.2, §18.2
Observational services	Proxy visits and handover attendance are Inspection Partner services labelled “Observational visit, not a technical inspection”.	RQS-06 §2.1, §3.3, §18.2
Partner payment terms	Each service shows its rate, turnaround and REALTIQ-approved payment terms; REALTIQ’s platform rate is included in the price.	RQS-06 §18.1, §18.5
Social layer	Every public page carries a posts grid, follower and following counts, Follow and Report account.	RQS-06 §2.2, §17.6
Listing media	Media from any provider counts towards Verified listing photos only after the same checks; no affiliation label is shown.	RQS-06 §8.3
Mortgage	Not at launch. No Mortgage Partner pages until a lender is live.	RQS-06 §2.1, §18.2
Added services	Added services and provider types sit under existing Partner role labels; no new user type is created.	RQS-06 §2.1, §18.2

3. FEATURE SUMMARY AND RQS MAPPING

Forty-two features are launch scope; one (mortgage) is not at launch. Every feature below is specified in the cited section.

#	Feature	Scope	RQS reference
F1	One Verified badge (tick-in-shield and the word “Verified”) with a “Verified by REALTIQ” panel stating what was checked and when	Launch	RQS-01 §20, §20.1; RQS-06 §16.1
F2	Trust score (0–100), tier and components with evidence counts; tier badge visibly different from Verified	Launch	RQS-06 §16.1–16.3
F3	“New to REALTIQ — building history” until minimum evidence; tiers New to Platinum; no negative labels	Launch	RQS-06 §16.3–16.4
F4	Ratings average shown only after two qualifying reviews	Launch	RQS-06 §16.4; RQS-01 §22
F5	Grey “Provided by the [developer / seller]” note on self-declared information	Launch	RQS-01 §20.1
F6	Wording rules: UK English, factual, m², empty sections hidden, “Not provided”, no urgency devices, no return projections. Profile pages show no view, save or stage counts (listing and project pages show them, RQS-06 §5.4)	Launch	RQS-01 §21; RQS-06 §5.4
F7	All contact on-platform; no phone numbers or emails shown	Launch	RQS-06 §1; RQS-01 §11

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

#	Feature	Scope	RQS reference
F8	Sponsored label on paid placement; directory spotlight; promotion never affects automatic job matching	Launch	RQS-06 §17.1, §17.2, §17.5
F9	One sign-in, several profiles; each profile has its own page and record	Launch	RQS-06 §2.2
F10	An expired licence, insurance or registration pauses only the services that depend on it; those services stay on the public page marked “Not bookable until renewed”; the rest of the profile keeps its access level	Launch	RQS-06 §3.4
F11	Blacklisting across all profiles; tier removable; reason public or private at REALTIQ’s choice	Launch	RQS-06 §16.4
F12	Public developer page with developer reviews, kept separate from project reviews	Launch	RQS-06 §7.4; RQS-01 §2.4, §22
F13	Developer verification: CAC RC number, TIN, SCUML, state regulatory registration, directors and beneficial owners	Launch	RQS-06 §3.3
F14	Developer’s projects, dated progress and key dates; revised dates shown as revised	Launch	RQS-06 §7.4; RQS-01 §10
F15	Title counts that name the verification, for example “Units with verified title: 46 of 60”; ladder Declared → Submitted → Verified	Launch	RQS-01 §20
F16	“Last updated” dates and the amber “Needs confirmation” freshness label	Launch	RQS-01 §19
F17	Follow a developer for progress, new units, price changes and open houses	Launch	RQS-06 §17.3
F18	“Message [seller type]” structured enquiry	Launch	RQS-06 §12.1; RQS-01 §11
F19	Public agency page and its verification (CAC or business name, TIN, SCUML, state registration, principal agent)	Launch	RQS-06 §7.3, §3.3
F20	“Listed by Owner · Managed by [agent]” on agent-managed listings	Launch	RQS-06 §8.3
F21	Owner seller card: “Listed by Owner” (name optional), Verified badge, trust tier, “Usually replies within X hours”	Launch	RQS-06 §8.3, §12.1, §2.2
F22	Partner role labels: Legal, Engineering & Survey, Inspection, Valuation, Buyer’s Agent, Seller’s Agent	Launch	RQS-06 §2.1, §9.1, §18.2
F23	Partner Profile & Credentials: licences, indemnity insurance, service areas by state, rates, payment terms, availability	Launch	RQS-06 §18.1, §18.5, §3.3
F24	Credential checks (NBA, COREN, SURCON, ESVARBON) by REALTIQ’s Third-Party Network	Launch	RQS-06 §19.2
F25	Role-specific trust components (turnaround, acceptance rate, client ratings, deals completed, time to sale or purchase)	Launch	RQS-06 §16.2
F26	Conflict-of-interest declaration when a partner accepts a job	Launch	RQS-06 §18.1; RQS-01 §17.2
F27	Inspection Partner: buyer checklist, evidence with automatic date, time and location stamps, condition and snagging templates; payment terms per service (upfront, on completion, on acceptance of the report or deposit plus balance, as approved by REALTIQ); rejected reports decided by REALTIQ against its published guidelines	Launch	RQS-06 §18.2, §18.5
F28	Proxy inspection request; provider chosen by the buyer, matched automatically or assigned by REALTIQ	Launch	RQS-06 §6.2, §18.3
F29	Live guided video tours run by any seller type (owner, agent or agency, developer) or an Inspection Partner, on Zoom integrated into REALTIQ; an Inspection Partner’s fee is paid by the buyer, with REALTIQ’s platform rate included in the partner’s price	Launch	RQS-06 §11.1, §11.2, §18.5; RQS-02 V3; RQS-04 K3
F30	Independent escrow agents: agreed by both parties, see only their conditions, never amounts	Launch	RQS-01 §14.2, §17.2; RQS-06 §18.3
F31	Buyer’s and Seller’s Agents: public labels, fee basis, authority, mandate types, dual-agency rule	Launch	RQS-06 §9.1–9.4
F32	Public profile page for every seller-side and partner profile, in one fixed order, with posts grid and follower and following counts	Launch	RQS-06 §2.2

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

#	Feature	Scope	RQS reference
F33	Follow and Report account on every public profile	Launch	RQS-06 §2.2, §17.6
F34	Guests can view public profiles and posts; hiring needs Verified access	Launch	RQS-06 §3.1
F35	Owner chooses whether the profile is public; otherwise seller card only	Launch	RQS-06 §2.2
F36	Developer page contents, including “Handed over by the original date: x of y”	Launch	RQS-06 §7.4, §16.2
F37	Agency page contents; team shown by name and role only	Launch	RQS-06 §7.3
F38	Public partner page: services with rate, turnaround and payment terms, availability, credentials, optional sample report, About marked “Provided by the professional”	Launch	RQS-06 §18.1, §18.5
F39	Proxy visits and handover attendance labelled “Observational visit, not a technical inspection”; added credential checks and proxy vetting	Launch	RQS-06 §3.3, §18.2, §19.2
F40	Third-party directory “Find a verified professional” with filters, cards and “Include New to REALTIQ”	Launch	RQS-06 §18.4
F41	Display rules: no zero scores for new profiles; expired items “Not bookable until renewed”; suspended profiles not bookable	Launch	RQS-06 §3.4, §16.3
F42	Listing media from any provider; it must meet REALTIQ’s media specifications and pass the same on-site checks before it counts towards Verified listing photos. No affiliation label is shown for any media provider	Launch	RQS-06 §8.3; RQS-01 §20, §21
F43	Mortgage Partner pages, mortgage products and Mortgage payment type	Not at launch	RQS-06 §2.1, §10.1, §18.2; RQS-02 S5; RQS-04 D5

4. ADDED SERVICES AND PROVIDER TYPES

These services and provider types sit under existing Partner role labels (RQS-06 §2.1, §18.2). No new user type is created.

4.1 Added services

Service	What it does for the buyer	Host role	Note
Neighbourhood visit report	Records access roads, flooding, traffic and nearby services at set times of day	Inspection Partner	Observational only
Handover attendance	Attends handover for the buyer: keys, meter readings and what was handed over	Inspection Partner	Observational only; not a snagging inspection
Termite and pest inspection	Checks the property for termite and pest damage	Inspection Partner	—
Planning-approval check	Confirms approved building plan, permitted use and setbacks against planning records	Engineering & Survey Partner	—
Cost and progress certification	Checks off-plan pricing against build cost; certifies progress for staged payments	Engineering & Survey Partner	Can serve as escrow milestone evidence where both parties agree to that partner (RQS-06 §18.2)
Materials testing	Tests concrete cores, reinforcement and blocks	Engineering & Survey Partner	—
Geotechnical investigation	Investigates soil and ground conditions	Engineering & Survey Partner	—
Flood risk assessment	Assesses the property’s flood risk	Engineering & Survey Partner	—

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

Service	What it does for the buyer	Host role	Note
Transfer cost estimate	Estimates stamp duty, consent fees and other transfer costs	Legal Partner	Amounts set outside REALTIQ
Bank or law-firm trustee escrow	Holds escrow funds with a neutral trustee for large transactions	None — infrastructure	Disclosed in the escrow room; no provider page (RQS-06 §10.1)

4.2 Added provider types

Provider type	Host role	Credential to verify
Architect	Engineering & Survey Partner	ARCON registration
Builder	Inspection Partner	CORBON registration
MEP engineer	Engineering & Survey Partner (specialty)	COREN registration
Geotechnical engineer	Engineering & Survey Partner	COREN registration
Flood risk assessor	Engineering & Survey Partner	Identity, professional qualification and indemnity insurance
Termite and pest inspector	Inspection Partner	Identity, professional qualification and indemnity insurance
Town planner	Engineering & Survey Partner	TOPREC registration
Quantity surveyor	Engineering & Survey Partner	QSRBN registration
Materials testing laboratory	Engineering & Survey Partner	Laboratory accreditation where held; lead engineer COREN
Tax adviser	Legal Partner	CITN membership

REALTIQ's Third-Party Network checks these credentials (RQS-06 §3.3, §19.2).

5. PROFILE CONTENT RULES

Rule	Reference
The developer "record on REALTIQ" shows completed transactions, reply time, title quality and the handover record ("Handed over by the original date: x of y"; "Handed over after a revised date: z"). No other delivery score is shown.	RQS-06 §7.4, §12.1, §16.2
The developer's title record across projects reads "Units with verified title: x of y".	RQS-01 §20; RQS-06 §16.2
Project cards on the developer page carry freshness labels.	RQS-01 §19
Projects completed before joining REALTIQ are shown as "Provided by the developer" and are not counted in any figure or trust component.	RQS-01 §20.1; RQS-06 §7.4
Resale units from a developer's past projects appear on their own listings ("This home is in [project name]"), not on the developer page.	RQS-01 §2.3
Memberships (for example REDAN) and linked architects or contractors are shown as "Provided by the developer".	RQS-06 §7.4
No negative labels such as missed handovers or disputes are shown. Upheld disputes feed the trust score; a blacklist reason is public or private at REALTIQ's choice.	RQS-06 §16.4; RQS-01 §22
Agency pages show no area-expertise figure and no authority-to-sell rate; mandates appear through managed listings.	RQS-06 §7.3, §9.2

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Rule	Reference
Agency teams are shown by name and role only; staff performance stays private.	RQS-06 §7.3
An agency markets a developer's project through a Seller's Agent mandate.	RQS-06 §9.1
Reviews follow RQS-01 §22; reviewers are not labelled "Verified buyer · [city]".	RQS-01 §22
A non-technical proxy visitor is an Inspection Partner with REALTIQ vetting and the observational label, and is never described as a professional.	RQS-06 §2.1, §3.3, §18.2
Off-plan site progress is checked by buyer-appointed escrow agents and milestone verification.	RQS-01 §14; RQS-06 §18.2
Snagging and handover inspection is an Inspection Partner service.	RQS-06 §5.2, §18.2
There is no land-visit proxy and no "Land Inspection" specialty.	RQS-03 §1, §2.2; RQS-06 §1
Insurers and after-purchase providers (fit-out, interiors) are not in the directory.	RQS-06 §1
Photographers, drone operators and 3D tour creators are not in the directory.	RQS-06 §1
Civil and structural engineers appear as "Engineer" with civil, structural or MEP specialties.	RQS-06 §18.2
The profession filter uses Buyer's Agent and Seller's Agent (not "Real estate agent") and Builder (not "Building professional"); there is no "Other".	RQS-06 §9.1, §18.4
New profiles show "New to REALTIQ — building history", never "0.0 / 5 (0)" or "0 completed jobs".	RQS-06 §16.3, §16.4
Guests can view prices and public profiles; hiring needs Verified access.	RQS-06 §3.1
Partner pages may carry an optional redacted sample report, an independence statement and indemnity cover.	RQS-06 §18.1, §3.3
Specialties are chips from a fixed catalogue; the About text has a word limit set in the Console.	RQS-06 §18.1, §19.2
The directory's minimum-rating filter keeps "Include New to REALTIQ" on by default.	RQS-06 §18.4
Posts, follower and following counts and Report account appear on every public page.	RQS-06 §2.2, §17.6

6. BUYER-FACING PROFILE PAGE SPECIFICATION

6.1 Purpose and audience

A public profile page lets a viewer judge, before acting, whether another party is checked, competent, available and right for the job. Audience: buyers in Nigeria and abroad (guests and signed-in), corporate and cooperative buyers, and sellers choosing a Seller's Agent. Each page belongs to one profile, never to a person's whole account (RQS-06 §2.2). Guests can view every public page (RQS-06 §3.1).

6.2 Page system

Layer	Seller pages: Developer, Agency	Partner pages: all third-party roles
Shared core	Header, Verified badge, trust tier, posts grid and follower counts, reviews rule, wording rules, on-platform actions (Message, Follow, Report account), Sponsored label	Same
Leads with	What is for sale and the record behind it	Services, credentials, coverage and availability
Viewer's next step	Message, Follow, open a project or listing	Hire or request a service, Message
Varies by type	Developer: projects and delivery. Agency: listings and mandates	Credential, services and trust components per role (RQS-06

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Layer	Seller pages: Developer, Agency	Partner pages: all third-party roles
		§16.2)

6.3 Shared core — order on every page (RQS-06 §2.2)

Order	Block	Content	What it tells the viewer	Ref.
1	Header	Name or company, logo or photo, role label, member since	Who this is and what role they play	RQS-06 §2.1, §9.1
2	Verified badge	Badge after the verified item; tap for “Verified by REALTIQ”: what was checked and the date	REALTIQ checked identity and registrations; not a guarantee	RQS-01 §20.1
3	Trust tier	Tier badge, score and components with evidence counts; “New to REALTIQ — building history” when new	How this account has behaved over time	RQS-06 §16.1–16.4
4	Type-specific body	See 6.4 to 6.7	Capability and fit	—
5	Posts and followers	Posts grid; follower and following counts	What they publish and who follows them	RQS-06 §2.2
6	Reviews	Reviews with replies; average after two qualifying reviews	What earlier clients or buyers experienced	RQS-06 §16.4; RQS-01 §22
7	Actions	Message [role], Follow, Report account and type actions (6.9)	What to do next	RQS-06 §1, §2.2

6.4 Partner page — hierarchy (RQS-06 §18.1)

Order	Block	Content	What it tells the viewer	Ref.
1	Header and scope line	Role label (for example “Inspection Partner”), firm, service areas by state. Proxy visits and handover attendance carry “Observational visit, not a technical inspection”	What kind of help this is, and its limits	RQS-06 §2.1, §18.1, §18.2
2	Independence	Conflict-of-interest declaration on every job; indemnity insurance where held	Works for the client, not the other side	RQS-06 §18.1, §3.3
3	Services and rates	Services from the role list, each with rate, turnaround and payment terms	What I get, what it costs, how fast	RQS-06 §18.1, §18.2, §18.5
4	How the work is delivered	Inspection: stamped evidence; payment terms as approved for each service. Escrow work: never sees amounts	The work is evidenced and the client stays in control	RQS-06 §18.2; RQS-01 §14.2
5	Sample report	An optional redacted example of the deliverable	The quality to expect	RQS-06 §18.1
6	Availability	Availability from the partner calendar; next available date	When they can do it	RQS-06 §18.1
7	Credentials	Each licence with issuing body and verification date; expired items flagged by REALTIQ	Qualified for regulated work	RQS-06 §3.3, §3.4, §19.2
8	Trust components	Role components, for example report turnaround and acceptance rate	Measured performance, not claims	RQS-06 §16.2
9	About	Provider’s own text with a grey “Provided by the professional” note; specialties from a fixed catalogue	Background, clearly self-declared	RQS-01 §20.1, §21; RQS-06 §18.1

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

6.5 Developer page — hierarchy (RQS-06 §7.4)

Order	Block	Content	What it tells the viewer	Ref.
1	Header	Logo, company name, Verified badge (company registrations and directors checked), states active, Follow	A checked, registered company	RQS-06 §3.3, §17.3
2	Record on REALTIQ	Completed transactions, reply time, title quality; “Handed over by the original date: x of y”	Delivers and answers buyers	RQS-06 §16.2, §12.1
3	Current projects	Project cards linking to each project page, with freshness labels	What can be bought now, and how current it is	RQS-01 §19; RQS-06 §7.4
4	Completed projects	Handover dates, original and revised; pre-REALTIQ projects as “Provided by the developer”	Track record, with revisions visible	RQS-06 §7.4; RQS-01 §20.1
5	Title record	“Units with verified title: x of y” across projects	How much of the title claim REALTIQ has checked	RQS-01 §20
6	Developer reviews	From buyers who bought or almost bought; developer replies; separate from project reviews	Buyer judgement of the company	RQS-01 §22
7	About the company	Factual description; memberships and partner firms as “Provided by the developer”	Context, clearly labelled	RQS-01 §20.1, §21; RQS-06 §7.4

6.6 Agency page — hierarchy (RQS-06 §7.3)

Order	Block	Content	What it tells the viewer	Ref.
1	Header	Agency name, Verified badge (registration, state regulatory registration, principal agent)	A registered agency	RQS-06 §3.3, §7.3
2	Record on REALTIQ	Seller trust components, including title quality; reply time	Reliable and responsive	RQS-06 §16.2, §12.1
3	Listings	Own listings and listings managed under mandate (“Listed by Owner · Managed by [agent]”)	What they sell and on whose authority	RQS-06 §8.3, §9.2
4	Team	Agent names and roles, no performance figures	Who will deal with me	RQS-06 §7.3

6.7 Individual owner

The owner chooses whether the profile is public (RQS-06 §2.2). A public owner page uses the shared core with the owner’s listings as its body. A private owner appears only through the listing’s seller card: “Listed by Owner” (name optional), Verified badge, trust tier and “Usually replies within X hours” (RQS-06 §2.2, §8.3, §12.1). Either way the buyer sees an identity-checked, responsive owner without personal details.

6.8 What every page must and must not communicate

- Must: what REALTIQ checked and when; what is self-declared; measured performance; the scope, limits and payment terms of each service; that all contact and payment stay on REALTIQ.
- Must not: imply a guarantee — verification is administrative validation, not a statutory title warranty (RQS-01 §20.1); present a proxy visit or handover attendance as a professional inspection (RQS-06 §18.2); show return projections, urgency devices, view, save or stage counts, or negative labels (RQS-01 §21; RQS-06 §16.4).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

6.9 Actions

Action	Shown on	Rule	Ref.
Hire or Request (service to basket, or proxy inspection request)	Partner pages	Needs Verified access; guests and Registered users see “Sign in to hire”	RQS-06 §3.1, §6.2, §12.2
Message [role]	All pages	Structured enquiry on-platform; label adapts to the role	RQS-06 §12.1; RQS-01 §11
Follow	All public pages	Followers receive the account’s posts, new listings and updates on the platform only	RQS-06 §17.3, §2.2
Report account	All public pages	Opens a Trust & Safety case; the reporter is never shown	RQS-06 §2.2, §17.6
View project or listing	Seller pages	Opens the project page or listing page	RQS-01 §23
Request mandate	Seller’s Agent pages (viewed by sellers)	Sends listing, mandate type, term and fee	RQS-06 §9.2

6.10 States

State	Display	Ref.
New account	“New to REALTIQ — building history”; no average rating; no zero scores	RQS-06 §16.3–16.4, §16.3
Fewer than two reviews	Reviews listed; average hidden	RQS-06 §16.4
Credential, licence or insurance expired	Affected services marked “Not bookable until renewed”	RQS-06 §3.4
Unavailable	Next available date from the calendar	RQS-06 §18.1
Suspended or blacklisted	Not bookable; tier removed; reason shown or kept private at REALTIQ’s choice	RQS-06 §16.4, §19.2, §3.4
Sponsored placement	“Sponsored” label wherever the profile is promoted	RQS-06 §17.5
Empty section	Hidden	RQS-01 §21

6.11 Disclosures

- Third-party partners are independent and not REALTIQ employees (RQS-06 §18.4).
- Each service’s payment terms — upfront, on completion, on acceptance of the report (held) or deposit plus balance — are shown before booking (RQS-06 §18.5).
- Independent escrow agents never see payment amounts or negotiations (RQS-01 §14.2).
- Every paid placement is labelled “Sponsored” and never bypasses a buyer’s filters (RQS-06 §17.5).
- Each Verified badge links to the verification policy (RQS-01 §20.1).

7. HOW WE WILL KNOW THE WORK IS COMPLETE

- No public page shows a phone number, email address or outside contact link.
- Profile pages show no view, save or stage counts.
- A new profile shows “New to REALTIQ — building history”, never “0.0 / 5” or “0 completed jobs”; a rating average appears only after two qualifying

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

- The Verified badge appears only on facts REALTIQ has checked, and opens the “Verified by REALTIQ” panel.
- A service that depends on an expired licence, insurance or registration shows “Not bookable until renewed” and cannot be booked.
- Every partner service shows its rate, turnaround and approved payment terms before booking.
- Mortgage Partner pages do not appear anywhere until the Mortgage switch is on.
- Each page state in Section 6.10 (new, expired, unavailable, suspended, sponsored, empty) renders as specified.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

PART 8 OF 8 · RQS-08

REALTIQ Revenue and Monetisation Specification

How REALTIQ earns: the fee products, who pays them, and how each payment is routed, split, invoiced, taxed and refunded.

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

QUICK REFERENCE — REVENUE AT A GLANCE

Fee amounts, rates and prices are never hard-coded: they are versioned Console values. Every fee product is live at launch and can be switched off or on.

Area	What it covers	Section
Payer roles	What each profile type pays for; billing per profile	3
Fee products	23 fee products (FP codes), each a fee schedule entry	4
Payment routing	Stream 1 basket and Stream 2 transaction fees through Moniepoint with splits; Stream 3 plans, subscriptions and promotion through Paystack	4.1
Pricing engine	Versioned schedule; flat, percentage, marginal bands, per unit, per seat, per period; minimum and cap; payer rule; VAT-exclusive display; waivers with approval	5
Plans and seats	Plan catalogue, entitlements, publishing gate, billing periods, renewal, grace, lapse, seats, credits, Advanced Finance add-on	6
Transaction fee	One fee on every sale; standard and protected rates; default 50/50 split; collection with and without escrow; reversal rules; USD-listed prices paid in NGN	7
Verification fees	Seller-paid; title verification by state band, upfront or deferred; estate root title; re-verification	8
Partner, agent and media fees	Uniform platform rate inside the partner’s price; Paid media wholly to REALTIQ; partner payment terms	9
Promotion and subscriptions	Packages paid upfront; bidding from a prepaid single-campaign budget; minimum bids and quality-weighted ranking	10
Invoices and refunds	Fee lines, REALTIQ fee invoices, refund rules, credit notes, chargebacks	11
Reporting and controls	Revenue dashboard, receivables, staff time, partner charges, contribution view, analytics events, Console settings	2, 12
Constraints	Custody of funds, security, privacy and VAT under the Nigeria Tax Act 2025	13
Revenue protection	Leakage, chargebacks, owner-versus-agent checks, payout set-up, revenue recognition	16

KEY DECISIONS AT A GLANCE

ID	Decision	Where
D-01	Plan names (placeholders): Developer Essential, Professional, Enterprise; Agency Essential, Professional; Partner Individual, Firm.	FP-01 to FP-03; 08-AP-01
D-02	Advanced Finance modules are a paid add-on.	FP-05; 08-AP-11
D-03	One REALTIQ transaction fee on every sale: standard rate without escrow, protected rate with escrow.	Section 7
D-04	Default payer split 50/50, changeable per transaction.	08-EF-02
D-05	Multi-unit fee bands apply to each unit separately.	08-EF-05
D-06	The fee is non-refundable; the party at fault pays it all; the innocent party is refunded in full.	Section 7.2
D-07	The seller pays for verification; fees are set per state band.	Section 8
D-08	Credits reduce plans, seats, add-ons and promotion only, never the transaction fee.	08-AP-10

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

ID	Decision	Where
D-09	Renewal by saved card, invoice or direct debit; each account chooses.	08-AP-05
D-10	No fixed verification expiry; re-verification on change.	08-VF-09
D-11	One uniform platform rate on partner services and agent fees, included in the listed price.	08-PF-01, 08-PF-02
D-12	Fees are shown VAT-exclusive.	08-TX-04
D-13	REALTIQ receives the whole fee for Paid media and documents.	08-PF-06
D-14	Bidding is funded by a prepaid single-campaign budget, the one exception to the no-stored-balance rule.	Section 10.1
D-15	Unused promotion value is refunded or moved to the next campaign, at the advertiser’s choice.	08-PR-03
D-16	REALTIQ decides the outcome of a rejected report against its published guidelines.	08-PF-04
D-17	The account holder’s seat is included; every additional seat is paid, buyers included.	FP-04; 08-AP-08
D-18	Paystack accepts USD and supports on-demand charging of saved cards and direct debit.	Section 14
D-19	Property checkouts are never combined with the basket.	08-RS-08
D-20	One basket, paid through Moniepoint with splits.	Section 4.1
D-21	USD is a listed price only; payment is in NGN at a rate both parties confirm.	Section 7.3
D-22	Bidding needs a minimum quality score; REALTIQ weights bid and quality.	08-PR-10

1. PURPOSE AND SCOPE

This specification sets how REALTIQ charges, collects, allocates, refunds and reports its own fees. It defines one fee schedule and pricing engine used by every REALTIQ fee, so that every paid feature in RQS-01 to RQS-07 is billed through one system. Fee amounts are Console values; amounts shown in acceptance criteria are test values only, never prices.

1.1 In scope

- One fee schedule and pricing engine used by every REALTIQ fee (Section 5).
- Account plans and seat billing: periods, renewals, failed payments, lapses (Section 6).
- The REALTIQ transaction fee on every property sale, with or without escrow (Section 7).
- Verification fees (Section 8).
- REALTIQ’s platform rate on partner and agent fees, Paid media and partner payment terms (Section 9).
- Billing for promotion, subscriptions and prepaid campaign budgets (Section 10).
- Fee invoices, receipts, refunds, credit notes and revenue allocation (Section 11).
- Revenue reporting, unit-economics data, analytics events and Console controls (Section 12); revenue metrics (Section 2).
- Custody, security, privacy and tax constraints (Section 13); revenue protection (Section 16).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

1.2 Out of scope

- Fee amounts and prices. They stay Console settings (RQS-06 §1, §19.1).
- How promotion products behave for users. RQS-06 §17 governs; RQS-08 adds billing only.
- The design of the market analytics tool (RQS-06 §19.2, Data & Market Intelligence).
- Mortgage Partner fees. Mortgage is built but hidden until a lender is live (RQS-06 §10.1, §18.2).
- Interest on held escrow balances; it is not REALTIQ revenue and is never recorded as a fee.
- Land, rentals, leases, short lets and after-purchase services, as in RQS-06 §1.
- Legal and tax opinions. Points in Section 13 are confirmed by counsel and a tax adviser before launch (Section 14).

1.3 Related sections in RQS-01 to RQS-07

Document	What RQS-08 relies on or extends
RQS-01 §12–§17	Checkout, payment allocation, per-unit receipts, escrow model and the REALTIQ transaction fee (§17.4)
RQS-01 §18.2, §20	Team access and standard job types; Verified badge rules, which fees must never change
RQS-02 S8; RQS-04 D5	Payment templates and the transaction fee payer captured at onboarding
RQS-06 §2.2	Paid plans for Developer, Agency and Partner profiles; seats; owner listing cap; plan and billing (§4.7)
RQS-06 §9	Agent fees, with REALTIQ's platform rate included and split automatically
RQS-06 §10	Payment types, escrow settings, transaction fee, USD-listed prices, money movement and routing, no stored balance
RQS-06 §13	Free, Paid, On request and Private access levels; free-access models; Buyer Pass
RQS-06 §14	Platform-issued documents, templates subscription, "Lawyer-checked" upgrade
RQS-06 §15	Finance modules, fees, VAT on fees, withholding tax, reconciliation
RQS-06 §16–§19	Trust, promotion products and billing, Partner Portal and partner payment terms (§18.5), Console configuration and departments
RQS-07 F8, F29	Sponsored labelling; live video tour fee paid by the buyer; partner payment terms on public pages

2. REVENUE METRICS

The revenue dashboard (08-RP-01) and contribution view (08-RP-06) report these metrics. Targets are Console values set by REALTIQ.

Measure	Definition
Paid plan conversion	Share of Developer, Agency and Partner profiles holding an active paid plan
Fee revenue by product	Net fee revenue per fee product, after refunds, waivers and credits, by month
Escrow uptake	Share of transactions reaching Terms Agreed with escrow applied
Platform take rate	Net REALTIQ fee revenue ÷ value of transactions completed on the platform
Contribution per transaction	Transaction fee − payment-partner charges − logged staff time × internal hourly cost

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Measure	Definition
Verification cost recovery	Verification fees ÷ (pass-through costs + logged staff time × internal hourly cost), by state band
Waiver and refund rate	Value of fees waived or refunded ÷ value charged, by product
Plan retention	Share of paid plans renewed at the end of each period

3. PAYER ROLES

Each profile pays for what it uses; a person with several profiles (RQS-06 §2.2) is billed per profile.

Payer	Pays for
Developer	Account plan; additional seats; Advanced Finance add-on; transaction fee share; promotion; REALTIQ Templates
Developer	Verification, including estate root title
Agency	Account plan; additional seats; Advanced Finance add-on; promotion; REALTIQ Templates
Individual owner	Transaction fee share; promotion; seller-sponsored media access; verification
Buyer (individual)	Paid media and documents; Buyer Pass; inspections and live video tours; Buyer's Agent fees; transaction fee share; market analytics
Corporate or cooperative buyer	As individual buyer, plus additional seats
Partner (all roles)	Account plan; additional seats for firms; promotion; REALTIQ's platform rate, included in their listed price

Seats (D-17): every account includes the account holder's own seat; every additional seat is paid, including for corporate and cooperative buyers. Roles follow RQS-01 §18.2: five standard job types (Owner/administrator, Sales agent, Project editor, Finance, Viewer) plus custom roles. The RQS documents set no number of free seats, so any further included seats are a plan entitlement (08-AP-01).

4. FEE PRODUCT CATALOGUE

REALTIQ has 23 fee products. Each is an entry in the fee schedule (Section 5), and its code is used throughout this document.

Code	Fee product	Payer	Mechanism
FP-01	Developer plans: Developer Essential, Developer Professional, Developer Enterprise	Developer	Subscription per period
FP-02	Agency plans: Agency Essential, Agency Professional	Agency	Subscription per period
FP-03	Partner plans: Partner Individual, Partner Firm	Partner	Subscription per period
FP-04	Additional team seats	Any company profile, including corporate and cooperative buyers	Per seat per period
FP-05	Advanced Finance modules	Developer, Agency	Paid add-on to any plan
FP-06	REALTIQ transaction fee, on every property sale	Buyer, seller or split; default split 50/50	Banded percentage, minimum and cap; standard rate without escrow, protected rate with escrow

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Code	Fee product	Payer	Mechanism
FP-09	Platform rate on partner services	Partner (included in the listed price)	One uniform percentage, configurable per service later
FP-10	Platform rate on agent fees	Agent (included in the agreed fee)	Same uniform platform rate
FP-11	Paid media and documents	Buyer	Price per item within REALTIQ ranges; REALTIQ receives the whole fee
FP-12	Buyer Pass	Buyer	Time-limited pass
FP-13	Seller-sponsored access	Seller	Flat per item or per listing
FP-14	Promotion products	Seller, agency, developer, partner	Fixed packages paid upfront; bidding funded by a prepaid campaign budget
FP-15	REALTIQ Templates subscription	Sellers, agencies, developers	Subscription
FP-16	“Lawyer-checked” upgrade	Template user	Fixed fee to a Legal Partner; platform rate via FP-09
FP-17	Market analytics reports	Buyer, investor	Per report or via Buyer Pass
FP-18	Verified seller (individual identity)	Individual owner	One-off
FP-19	Listing verification (authority to sell, photos, address)	Seller	Flat per listing
FP-20	Title verification	Seller	Pass-through costs plus service fee by state band; upfront or deferred
FP-21	Estate root-title verification	Developer	Per project, plus per-unit document check
FP-22	Re-verification	Seller	Per re-verification triggered by the seller’s own change
FP-23	Mortgage referral fee	Lender	Per completed referral; modelled in the fee schedule and switched off until a Mortgage Partner is active
FP-24	Aggregated data products	Institutions	Licence; modelled in the fee schedule and switched off; external licensing needs a separate decision and a data-protection review (RQS-06 §15.4)
FP-25	Remote purchase bundle	Buyer	Bundle price for inspection, certificate and escrow set-up

4.1 Revenue streams and payment routing

REALTIQ revenue falls into three streams. Everything bought through the basket, and every property payment, goes through Moniepoint (Monnify), with each party’s share split directly to its account; REALTIQ-only basket items split 100% to REALTIQ’s designated account. Paystack is used only for plans, subscriptions, promotion and REALTIQ fee invoices (D-19, D-20). The purchase price itself is never REALTIQ revenue.

Stream	Includes (fee codes)	Payment route	REALTIQ receives
1. Service Orders	Everything in the basket: Paid media and documents, Buyer Pass, market analytics, verification orders, seller-sponsored access, partner services, remote purchase bundle (FP-09, FP-11 to FP-13, FP-16 to FP- 22, FP-25)	One Moniepoint payment per basket checkout, with split settlement; held fees in Moniepoint’s held structure	The full price of REALTIQ-only items; its share of shared items
2. Transaction Fees	REALTIQ transaction fee, platform rate on agent fees, deferred verification fees (FP-06, FP-10, FP-20 deferred)	Moniepoint checkout from locked terms, separate from the basket	Its fee only, split from each payment
3. Subscriptions and Promotion	Plans, seats, Advanced Finance add-on, REALTIQ Templates, promotion products and campaign budgets (FP-01 to FP-05, FP-14, FP- 15)	Paystack, from Plan and billing and the Promote page	The full price

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

ID	Requirement	Acceptance criteria
08-RS-01	Every fee schedule entry carries a stream tag (1, 2 or 3) and a payment route (Paystack or Moniepoint).	Each entry in the Console shows its stream and route
08-RS-02	Paystack is used only for Stream 3 payments and for REALTIQ fee invoices under 08-RS-07. These settle to REALTIQ's designated bank account. Paystack is never used for a payment that involves a split.	No Paystack transaction carries a split or a third-party share
08-RS-03	A basket checkout is paid as one Moniepoint payment. Each line's amount due now settles by split to its receiving party: REALTIQ-only lines to REALTIQ, partner and seller shares to their verified payout accounts.	A basket with a document fee and an inspection shows REALTIQ's and the partner's amounts settled to each account directly
08-RS-04	A fee held before payout is held in Moniepoint's held structure, never in a Paystack balance or a REALTIQ account.	No held fee ever sits outside Moniepoint
08-RS-05	Stream 2 payments under escrow go into the Moniepoint segregated escrow account; REALTIQ's fee leaves only as a split at release (08-EF-03).	Escrow statements show fee splits only at release
08-RS-06	Stream 2 payments without escrow go through Monnify with split settlement: REALTIQ's fee to REALTIQ's account, the balance to the seller's verified payout account.	Each settlement shows gross, REALTIQ fee and seller net
08-RS-07	If a split cannot be applied to a Moniepoint payment, the full payment still settles to the receiving user through Moniepoint, and REALTIQ's fee is invoiced to the payer separately and paid by Paystack. The shared payment never passes through REALTIQ's account.	A failed split produces a REALTIQ fee invoice, not a REALTIQ receipt of the full amount
08-RS-08	Property checkouts (RQS-01 §13) are never combined with the basket.	No checkout contains both a property payment and a basket item
08-RS-09	If a basket needs more receiving accounts than one split allows, checkout divides it into the fewest payments needed and shows them as one order with each part listed.	A basket with six receiving parties is paid in two payments, both listed before payment

5. PRICING AND FEE CONFIGURATION ENGINE

One engine calculates every REALTIQ fee from a versioned fee schedule kept in the Console. No fee amount, rate or band is hard-coded.

ID	Requirement	Acceptance criteria
08-PE-01	Each fee product (Section 4) is a fee schedule entry with: code, name, stream, route, payer rule, basis (flat, percentage, marginal bands, per unit, per seat, per period), currency, minimum, maximum, VAT treatment, effective-from date and on/off switch.	A Console user with the right role can create, edit and switch off each field; no code change is needed to change a price
08-PE-02	Changing an entry creates a new version with an effective date. A transaction or order keeps the version in force when its terms locked or the order was placed.	Changing a rate after Terms Agreed leaves that transaction's fee unchanged; new transactions use the new version
08-PE-03	The engine supports marginal bands: each band's rate applies only to the part of the base inside that band.	With test bands 1.0% to ₦50m and 0.75% above, a ₦60m base returns ₦575,000; a ₦50m base returns ₦500,000
08-PE-04	Minimum and maximum are applied after the band calculation.	A base whose banded fee is below the minimum returns the minimum; above the cap returns the cap
08-PE-05	The payer rule is buyer, seller or split. The default is split 50/50; the payer option and ratio can be changed per transaction and are stored with it.	Each option produces the right amount per party; buyer share + seller share = total fee
08-PE-06	A fee is calculated and collected in the currency of the payment it relates to (NGN or USD), with the FX rate stored.	A USD payment produces a USD fee line with the FX rate recorded
08-PE-07	Fees are rounded to the whole naira or to the cent, half up, once per fee line.	Totals equal the sum of lines

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Requirement	Acceptance criteria
08-PE-08	The Console can waive or discount any fee for one account or one transaction, with a reason; above a threshold this needs prepare-and- approve.	Waivers above the threshold cannot be approved by the preparer; every waiver shows in reporting
08-PE-09	Promotional prices and credits (for example a founding-developer offer) are time-bound and apply automatically to eligible accounts. Credits apply to plans, seats, add-ons and promotion only (D-08).	A credit applies only within its dates and to eligible accounts and never reduces a transaction fee
08-PE-10	Before any commitment, the payer sees each fee, its payer and its basis. Locked terms and the terms sheet show the REALTIQ transaction fee.	Fees appear on the terms sheet, checkout and order summary; no fee is charged that was not shown
08-PE-11	VAT on fees is calculated from a configurable rate and shown as a separate line; fees are displayed VAT-exclusive.	Every fee quote and invoice shows net, VAT and gross
08-PE-12	Every schedule change, waiver and discount is written to the permanent audit log.	The log shows who, when, old value and new value

6. ACCOUNT PLANS, SEATS AND SUBSCRIPTIONS

Plans and seats are set out in RQS-06 §2.2 and §4.7; this section specifies their billing. A lapsed plan never interrupts a transaction already under way.

ID	Requirement	Acceptance criteria
08-AP-01	The Console holds a plan catalogue per profile type, with the approved placeholder names: Developer Essential, Developer Professional, Developer Enterprise; Agency Essential, Agency Professional; Partner Individual, Partner Firm. Each plan lists its entitlements: active projects or listings, units, included seats, promotion credits.	A new plan can be created, priced and given entitlements in the Console
08-AP-02	When the plan fee is switched on for a profile type, that profile needs an active plan to publish new listings or projects, or to accept new jobs.	With the fee on and no plan, publish and accept actions are blocked with a plan prompt; with the fee off they work
08-AP-03	An individual owner lists free, within the owner listing cap (08-RV-07). Changing a Seller profile to Developer goes through review (RQS-06 §2.2) and then the plan step.	An owner profile never meets a plan prompt to list
08-AP-04	Plans bill monthly or annually. Upgrades apply at once with a prorated charge; downgrades apply at the end of the period.	Proration is shown before confirmation and matches the invoice
08-AP-05	Renewal collects payment through Paystack. All three methods are offered (saved card, invoice paid by transfer, direct debit) and each account chooses one.	Each method renews a test plan; renewal never draws from a REALTIQ- held balance
08-AP-06	A failed renewal starts a grace period (Console setting) with reminders. After it, the plan lapses into a restricted state.	Reminders follow RQS-06 §20; lapse occurs only after grace
08-AP-07	In the restricted state, no new listings, projects, jobs or seats can be added. Live listings, enquiries in progress, Terms Agreed transactions, instalment plans, escrows and buyer access to items already paid for continue unchanged.	A test transaction in escrow completes normally while the seller's plan is lapsed
08-AP-08	The account holder's own seat is included. Each additional seat is billed per period from the date it is added, prorated; removing a seat stops billing at period end.	The Plan and billing page shows each seat, its cost and its next charge
08-AP-09	The "Plan and billing" page (RQS-06 §6.2, §7.2, §18.1) shows plan, entitlements and use, seats, add-ons, next charge, payment method, invoices and credits.	All listed items appear for every paying profile
08-AP-10	Credits (for example founding-developer credits) appear as credit notes and reduce the next plan, seat, add-on or promotion invoice. Credits never reduce the REALTIQ transaction fee; a deal-specific reduction uses a waiver (08-PE-08).	The credit note is issued and the invoice shows the deduction

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Requirement	Acceptance criteria
08-AP-11	Advanced Finance modules are sold as a paid add-on to any Developer or Agency plan, billed with the plan.	The add-on can be bought, renewed and cancelled independently of the plan tier

7. REALTIQ TRANSACTION FEE

Every property sale completed on REALTIQ pays one REALTIQ transaction fee, with or without escrow: a standard rate without escrow and a higher protected rate with escrow (D-03). It is taken as a split from each payment, so REALTIQ never receives buyer funds into its own account. Escrow is optional on Outright, Instalment or both; escrowed funds sit in a Moniepoint segregated account; REALTIQ instructs releases and reversals; the payer is buyer, seller or split (RQS-01 §17; RQS-06 §10).

7.1 Calculation and collection

ID	Requirement	Acceptance criteria
08-EF-01	The fee base is the agreed sale value under the locked terms. The protected rate table applies to the part under escrow and the standard rate table to the rest, using the fee schedule version in force at Terms Agreed.	A sale with escrow on Instalment only is charged the protected rate on the instalments and the standard rate on the outright part
08-EF-02	The payer is buyer, seller or split; the default is split 50/50, changeable per transaction.	A new transaction defaults to 50/50; each option produces the right amount per party
08-EF-03	Under escrow, the buyer's share is added pro rata to each payment into escrow and the seller's share is deducted pro rata from each release. REALTIQ's fee leaves the segregated escrow account only as a split to REALTIQ's operating account at a release instruction.	Escrow statements show held, released, fee and paid-out amounts separately
08-EF-04	Without escrow, each payment (reservation deposit, outright payment or instalment) carries its pro rata fee: the buyer's share is added to the payment and the seller's share is deducted from the amount settled to the seller, split at payment through Monnify.	Each receipt and settlement report shows gross, fee shares and seller net
08-EF-05	For multi-unit purchases, the fee is calculated and shown per unit on per-unit receipts; bands apply to each unit separately.	Per-unit fee lines sum to the transaction fee
08-EF-06	Where a trustee escrow is used (RQS-06 §10.1), the trustee's charges appear as a separate, itemised pass-through line.	The trustee line is shown before Terms Agreed
08-EF-07	Fees apply whatever the payment channel, including RTGS transfers above instant-transfer limits.	An RTGS deposit is allocated and fee- split like any other
08-EF-08	No REALTIQ fee is charged on penalties, forfeited deposits or amounts a seller retains on default or cancellation.	Penalty and forfeiture lines carry no fee

7.2 Cancellation, reversal and default (D-06)

The fee is non-refundable once terms lock, but the innocent party never bears it: the party at fault pays the whole fee, and REALTIQ's dispute decision decides fault (RQS-01 §17).

Situation	Innocent party	REALTIQ transaction fee
Buyer defaults	Seller pays nothing	Buyer pays the whole fee, deducted from the buyer's refund

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Situation	Innocent party	REALTIQ transaction fee
Seller defaults (for example the title fails or the seller cannot deliver)	Buyer is refunded everything paid, including their fee share	Seller pays the whole fee
Mutual cancellation	Neither	Each pays its own share
No-fault reversal (for example government acquisition, death, force majeure)	Both	REALTIQ keeps a cost-recovery portion split equally, or waives it; Console setting
Partly released sale	—	Fee shares taken on released milestones stay earned; the rule applies to the reversed part only

ID	Requirement	Acceptance criteria
08-EF-09	The fee rule in the table above appears in the terms of service and on the terms sheet before terms lock.	The terms sheet shows the rule
08-EF-10	A dispute decision records the party at fault; refunds and fee charges then follow the table automatically.	A seller-default test refunds the buyer in full and charges the seller the whole fee
08-EF-11	A fee owed by a defaulting seller is recovered in this order: deducted from the seller's next payouts on any listing; new listings and transactions blocked until paid; added to the next plan invoice for developers and agencies; recorded in dispute history and trust (RQS-06 §16); legal recovery under the terms.	The seller's Finance view shows the amount owed and each recovery step

7.3 USD-priced listings paid in naira

A seller may show a price in USD for reference and collect in naira at a rate agreed with the buyer on the day of payment (D-21). The USD figure is a listed price only; payment in USD is never required. Checkout amounts are fixed (RQS-06 §10.3), so the rate must be agreed before each checkout is created.

ID	Requirement	Acceptance criteria
08-FX-01	Payment terms can state "listed in USD, payable in NGN at the rate agreed on the day of payment".	The term appears in the terms sheet and is accepted or negotiated like any other
08-FX-02	Before each NGN payment on such terms, one party proposes a rate and the other confirms it in the platform; the checkout is created only from a confirmed rate, which then cannot change. The Console FX source (RQS-06 §19.1) is shown for reference.	No checkout exists without a confirmed rate; each instalment repeats the step
08-FX-03	Fees are calculated on the naira actually paid (08-PE-06). Receipts show the USD figure, agreed rate and NGN paid.	The FX difference report reconciles USD terms to NGN received

8. VERIFICATION FEES

Legal & Verification runs the title queue, listing verification and "in-person title searches by state" (RQS-06 §19.2), and the Verified badge only appears on facts REALTIQ has checked (RQS-01 §20). The seller pays for verification (D-07). Fees recover the cost of the work; payment never buys a result.

ID	Requirement	Acceptance criteria
08-VF-01	Verification is ordered as service orders through the basket (RQS-06 §4.1) for FP- 18 to FP-22.	Each order produces an order record, invoice and receipt

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Requirement	Acceptance criteria
08-VF-02	Identity and company checks for Developer and Agency profiles are included in their plan; individual owners pay FP-18 to show “Verified seller”.	An owner who does not pay can still list, without the Verified badge
08-VF-03	The Console keeps a state-to-band table for title verification: Band 1 digitised registry (for example Lagos); Band 2 states where officers are based; Band 3 states needing travel.	Each of the 36 states and the FCT maps to one band; the quote uses the property’s state
08-VF-04	A title verification quote has two parts: pass-through costs (registry and search fees at cost, travel at cost or a flat band amount) and a service fee by band.	The quote shows both parts before payment
08-VF-05	The seller pays pass-through costs upfront. The service fee is paid upfront, or deferred and collected from the sale at the price set for deferral.	A deferred fee appears as a seller-side deduction on the first release or settlement after completion
08-VF-06	A deferred service fee also falls due if the listing is withdrawn, or if no sale completes within a Console-set period. The rule is shown at order time.	Withdrawal triggers an invoice for the deferred fee; counsel to confirm the terms
08-VF-07	Fees are due whatever the outcome. A Rejected outcome is shown to the seller with reasons; the badge appears only on verified facts.	No code path grants a badge on payment alone
08-VF-08	An estate root title is verified once per project (FP-21). Units inherit the root result; each unit’s own documents (for example Letter of Allocation) are checked for a per-unit fee.	Units in a verified project show the root result without a new title search
08-VF-09	Verification has no fixed expiry, as in RQS-06: the badge shows the date checked (RQS-01 §20); titles can be Rejected or Revoked by two people (RQS-06 §19.2– §19.3); changes to identity, company or payout details trigger re-verification (RQS- 06 §3.4). The re-verification fee (FP-22) applies when the seller’s own change triggers it.	A change to the seller’s title or identity details opens a re-verification order with the fee; no badge expires on a timer
08-VF-10	Verification officers log time and expenses against each case.	Every closed case has logged hours and expenses
08-VF-11	The title verification certificate or registry extract (RQS-06 §14.4) can be offered to buyers as a Paid item (FP-11), with REALTIQ as the receiving party.	A buyer purchase unlocks the certificate and posts revenue to REALTIQ
08-VF-12	Optional seller rebate: buyer purchases under 08-VF-11 credit the seller’s verification fee back, up to the amount paid. Switchable in the Console.	Credits stop once the seller’s fee is fully rebated

Service fees per band and the deferral period are Console values.

9. PARTNER, AGENT AND PAID-MEDIA FEES

Partners set their own rates (RQS-06 §18.1) and fees are split automatically (RQS-06 §13.3). This section sets how REALTIQ’s share is calculated and how partners are paid (RQS-06 §18.5).

ID	Requirement	Acceptance criteria
08-PF-01	REALTIQ charges one uniform platform rate on every partner service and agent fee. The Console can set a different rate per role or service later.	Changing the rate changes new jobs only (08-PE-02)
08-PF-02	The platform rate is included in the partner’s listed price, never added on top: the buyer pays the listed price and REALTIQ’s share is deducted from it.	The job quote shows one price; the partner earnings view shows gross, platform rate and net
08-PF-03	Where a service uses on-acceptance terms (08-PT-01), its fee is held in Moniepoint’s held structure until the buyer accepts the report or an acceptance window expires; the window length is a Console setting.	With no buyer response, the fee releases when the window ends

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant’s written consent.

ID	Requirement	Acceptance criteria
08-PF-04	A rejected report is reviewed by REALTIQ against its published report guidelines; REALTIQ decides whether the partner is paid, must redo the work, or the buyer is refunded. Partners must follow the guidelines.	Each rejection opens a review case with one of the three outcomes recorded
08-PF-05	REALTIQ's platform rate on agent fees is split from sale proceeds or from the buyer's payment, as the mandate or appointment sets (RQS-06 §9.1).	Commission statements (RQS-06 §15.1) show REALTIQ's share per mandate
08-PF-06	REALTIQ receives the whole fee for Paid media and documents (FP-11), which covers document hashing, storage and access controls.	Each Paid unlock posts revenue to REALTIQ only
08-PF-07	The "Lawyer-checked" fixed fee (FP-16) is a Legal Partner job with REALTIQ's platform rate under 08-PF-01.	The upgrade creates a job and a receipt
08-PF-08	Withholding tax is deducted from partner payouts where required, with certificates issued.	Payout advices show WHT; certificates are issued
08-PF-09	A remote purchase bundle (FP-25) combines a condition report, the title certificate (08- VF-11) and escrow set-up at one price in the basket. Each part keeps its own receiving party and share.	The bundle splits to each receiving party exactly as the separate items would, less the bundle discount
08-PF-10	Seller-run live video tours are free at launch. The fee schedule holds a live video tour fee (FP-11 basis), switched off until REALTIQ runs live video on the platform; switching it on needs no code change.	With the fee switched off, booking a seller-run live tour charges nothing; switching it on in a test environment applies the fee to new bookings only

9.1 Partner payment terms

Partners may set their own payment terms from types REALTIQ allows and approves; each type can be switched on or off in the Console. A type switched off disappears from partners' settings.

ID	Requirement	Acceptance criteria
08-PT-01	The Console holds payment-term types: upfront; on completion or submission; on acceptance of the report (held); deposit plus balance. Each type is switchable on or off and limited per partner role and service.	A type switched off disappears from every partner's settings and from new bookings
08-PT-02	A partner chooses terms per service from the allowed types; the choice takes effect only after Third-Party Network approval (RQS-06 §19.2, fee schedules).	Unapproved terms are never shown to buyers
08-PT-03	The service's payment terms appear on the public partner page beside rate and turnaround (RQS-06 §18.1) and on the booking and basket screens.	Terms are visible before the item enters the basket
08-PT-04	The basket charges only the amount due now. Later amounts (for example a balance on report submission) are billed from the order or job page as a separate Moniepoint payment with the same split.	An order with a 50% deposit shows the balance due, payable from the order page
08-PT-05	Upfront and on-completion amounts settle to the partner at once; held amounts follow 08-RS-04 and 08-PF-03.	Settlement reports show the term type per payment
08-PT-06	Partner terms include an obligation to refund a buyer for paid work not delivered. Unresolved refunds open a dispute that feeds the partner's trust components (RQS-06 §16).	A non-delivery case records the refund owed and its outcome
08-PT-07	Partners shown as "New to REALTIQ" (RQS-06 §16.3) may use only held or on- acceptance terms until they meet a Console-set track record.	A new partner cannot select upfront terms until the threshold is met
08-PT-08	Changes to a partner's terms apply to new bookings only.	Existing orders keep the terms shown at booking

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

10. PROMOTION, SUBSCRIPTIONS AND OTHER PRODUCTS

These products are specified in RQS-06; this section sets how they are billed. Promotion offers fixed packages and bidding (RQS-06 §17.4). Bidding is funded from a prepaid campaign budget, the one exception to the no-stored-balance rule in RQS-06 §10.4 (D-14).

ID	Requirement	Acceptance criteria
08-PR-01	Fixed promotion packages (for example 7, 14 or 30 days) are paid in full at purchase through Paystack.	The campaign starts only after payment succeeds
08-PR-02	Bidding campaigns (pay per click or per enquiry) are funded by a prepaid campaign budget paid upfront through Paystack. The campaign pauses when the budget is used up and resumes when it is topped up.	Spend never exceeds the budget; the campaign pauses at zero
08-PR-03	When a package is stopped or a campaign ends, the unused value (unused days pro rata, or unspent budget) is either refunded to the original payment method or moved into the advertiser's next campaign, at the advertiser's choice. A moved amount becomes that new campaign's budget at once; it never sits as an account balance.	The choice is offered when the campaign ends; no account balance is created
08-PR-04	REALTIQ Templates (FP-15) and Buyer Pass (FP-12) use the plan billing lifecycle in Section 6, without the publishing gate.	A lapsed templates subscription blocks new drafts only; issued documents stay valid
08-PR-05	Market analytics reports (FP-17) are sold per report or included in a Buyer Pass; purchased reports stay available in My Portal.	A purchased report remains accessible after the pass expires
08-PR-06	Mortgage referral fees (FP-23) are modelled in the fee schedule but switched off.	The entry cannot be switched on while no Mortgage Partner is active

10.1 Prepaid campaign budgets and bidding

ID	Requirement	Acceptance criteria
08-PR-07	A prepaid budget belongs to one campaign, not to the account. It cannot be transferred, withdrawn or spent on anything but that campaign's clicks or enquiries. Any unused amount is refunded or moved to a new campaign under 08-PR-03.	No screen shows an account- level balance
08-PR-08	Where REALTIQ's VAT status is "registered", VAT is charged on the budget when it is paid (NTA s146); revenue is recognised only as the budget is spent (08-RV-09).	With VAT status "registered", the budget invoice shows VAT; with "not registered", it shows none; revenue reports show spent and unspent budget separately
08-PR-09	Each bidding product has a minimum bid set in the Console. A click or enquiry is never charged more than the advertiser's bid.	No charge exceeds the bid in force at the time of the click
08-PR-10	Only listings meeting a minimum quality score set in the Console may bid. Competing bids are ranked by bid combined with listing quality, with weights set by REALTIQ. Bidding campaigns compete only for labelled Sponsored slots; they never change the organic Recommended order and never show a listing outside the buyer's filters.	Ranking matches the Console setting

Aggregated data products (FP-24) are modelled in the fee schedule and switched off. RQS-06 §15.4 allows anonymised cost benchmarks only with developer consent; any external licensing needs a separate decision and a data-protection review.

11. INVOICES, RECEIPTS, REFUNDS AND REVENUE ALLOCATION

REALTIQ invoices only its own fees, as platform-issued documents; it never issues a receipt or invoice in a seller's or partner's name (RQS-06 §14.1–§14.2).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Requirement	Acceptance criteria
08-RA-01	Every fee charged creates a fee line with: fee code, schedule version, base, rate or band result, payer, currency, FX rate, VAT, amount and the linked transaction, unit or order.	Any fee line can be traced to its schedule version and source record
08-RA-02	REALTIQ issues a fee invoice and receipt per charge in its own series (for example RTQ-FEE-2026-000123), with the REALTIQ mark and QR verification.	Invoices verify by QR code and appear in the payer's Finance view
08-RA-03	Fee lines appear in the payer's Finance "Money out" and in the seller figures "Fees" (RQS-06 §15.1–§15.2).	Seller "Paid out" equals "Released to you" less fees
08-RA-04	Fee refunds follow the rule for each product in Section 11.1, shown before purchase. Refunds return to the original payment method or verified bank account (RQS-06 §10.4).	Each refund issues a credit note and a refund notice
08-RA-05	Refunds and credit notes above a Console threshold need prepare-and-approve.	The preparer cannot approve the same refund
08-RA-06	Chargebacks on fee payments enter the Finance queue and reverse the related entitlement only after the case closes.	An open chargeback does not cancel a live transaction

11.1 Fee refund rules

Fee	Rule
Plans, add-ons and subscriptions	No refund for the current period; cancellation stops renewal
Additional seats	Billing stops at period end
REALTIQ transaction fee	Non-refundable once terms lock; the party at fault pays the whole fee and the innocent party is refunded in full (Section 7.2)
Verification	Pass-through costs not refunded once incurred; service fee refunded in full if REALTIQ cannot complete the work
Partner services	Per the partner's approved payment terms (Section 9.1); rejected reports decided by REALTIQ (08-PF-04)
Promotion packages	Unused days refunded pro rata or moved to the next campaign, at the advertiser's choice (08-PR-03)
Prepaid campaign budgets	Unspent budget refunded or moved to the next campaign, at the advertiser's choice (08-PR-03)
Paid media and documents	Non-refundable once access is granted; never credited against the purchase price

12. REPORTING, AUDIT, ANALYTICS EVENTS AND CONSOLE CONTROLS

REALTIQ must be able to see, per fee product and per transaction, what it earned and what it cost to deliver. The Console Finance department and executive overview (RQS-06 §19.1–§19.2) carry the reporting below, including staff time, payment costs and fee events.

ID	Requirement	Acceptance criteria
08-RP-01	A revenue dashboard shows net fee revenue by fee product, stream, payer type, profile type, state and currency, by month, after refunds, waivers and credits.	Totals reconcile to fee lines and to payment-partner settlements
08-RP-02	Deferred verification fees and fees owed by defaulting sellers appear as receivables until collected or written off.	Aged receivables show these amounts by age band
08-RP-03	Plan metrics: active paid plans, new, renewed, lapsed and cancelled per period; additional seats billed; add-ons.	Counts match plan records

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Requirement	Acceptance criteria
08-RP-04	Escrow, verification and inspection cases record staff time by department and pass- through expenses.	No case can close without a time entry
08-RP-05	Payment-partner charges (transfer fees, stamp duty, levies) are captured per payment from reconciliation and linked to the transaction.	Each payment shows its partner charges
08-RP-06	A contribution view per transaction shows: fees earned − partner charges − pass- through costs − logged staff time × an internal hourly cost set in the Console.	Visible only to Executive and Finance roles
08-RP-07	Exports of fee lines and revenue reports in CSV and Excel, mapped to the chart of accounts.	Exported totals equal dashboard totals

12.1 Analytics events

Each event carries profile type, fee code, schedule version, amount, currency and a timestamp.

Event	Fires when
fee_quoted	A fee is shown to a payer before commitment
fee_charged	A fee line is created and collected
fee_waived / fee_discounted	A waiver, discount or credit is applied
fee_refunded	A fee refund or credit note is issued
plan_started / plan_renewed / plan_payment_failed / plan_lapsed / plan_cancelled	Plan lifecycle changes
seat_added / seat_removed	Seat count changes
plan_gate_shown	A user meets the plan prompt (08-AP-02)
verification_ordered / verification_completed	Order placed; case closed, with outcome, band and hours
transaction_fee_collected	A transaction fee split is paid at a payment or release
partner_job_paid	A partner fee and REALTIQ platform rate are settled
paid_item_unlocked	A Paid media item, document or report is purchased
promotion_purchased / campaign_budget_exhausted	A package or bidding campaign starts; a campaign budget runs out

12.2 Console controls

Add to Configuration (RQS-06 §19.1): fee schedule and versions; stream and route per fee; plan catalogue and add-ons; state bands; deferral period; platform rate; partner payment-term types; acceptance windows; minimum bids, quality threshold and ranking weights; waiver and refund thresholds; no-fault cost-recovery portion; internal hourly cost; promotional credits; REALTIQ's VAT status. Sales & Partnerships applies discounts within limits; Finance approves refunds; Executive approves fee schedule changes.

13. NON-FUNCTIONAL, SECURITY, PRIVACY AND REGULATORY CONSTRAINTS

REALTIQ holds no payment licence, so it must never hold customer money; the payments partner holds it and REALTIQ only instructs. Confirmed by a Nigerian fintech lawyer before launch (Section 14).

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

13.1 Money and custody

- No stored balance; every payment allocated; escrow in a Moniepoint segregated account; USD domiciliary account for USD payments (RQS-06 §10.4).
- Only deposit-taking institutions may hold customer funds. Paystack never holds funds for REALTIQ; held money sits only in Moniepoint structures.
- REALTIQ fees leave held funds only as a split to REALTIQ's operating account (08-EF-03). Buyer and seller money never passes through a REALTIQ-owned account.
- No feature may create stored value: no top-ups, refundable credit balances or wallets. The one approved exception is a prepaid campaign budget tied to a single campaign (08-PR-07).
- Standard Monnify reserved accounts are not legal escrow and carry a provider lien over reserve balances ; escrow funds sit only in the segregated escrow account under the escrow agreement (Section 14).
- Large transfers exceed instant-transfer limits and arrive by RTGS; allocation and reconciliation must handle single very large payments.
- The payments layer sits behind an internal interface so a second provider can be added.

13.2 Accuracy, security and privacy

- Fee calculations are deterministic and covered by automated tests for every basis, band, minimum, cap, payer split, currency and rounding case.
- Separation rules apply to fee waivers, refunds and schedule changes (RQS-06 §19.3).
- Payment card data is handled only by the payments partners; REALTIQ stores tokens, never card numbers.
- Data protection: NDPA/GAID duties, including a Data Protection Officer, apply. Revenue data is restricted to Executive and Finance roles.
- Aggregated data for any data product uses only consented, anonymised data (RQS-06 §15.4).

13.3 Tax

The property price carries no VAT; every fee REALTIQ or a partner charges does, at 7.5%, and each supplier accounts for VAT on its own share. Sources: Nigeria Tax Act 2025 (NTA) and Nigeria Tax Administration Act 2025 (NTAA). A tax adviser confirms REALTIQ's VAT status before launch (Section 14).

Point	What the Acts say	Effect on REALTIQ
Property sale	Land or building, including any interest in it, is exempt (NTA s185(1)(l))	No VAT on the purchase price, deposits or instalments
Rate	VAT is 7.5% on all taxable supplies (NTA s144, s147)	Applies to every REALTIQ fee and every partner fee
Place of supply	A service connected with immovable property in Nigeria, including agents, valuers, engineers and architects, is supplied in Nigeria (NTA s145(b)(ii))	Fees paid by buyers abroad, in USD, still carry Nigerian VAT; they are not zero-rated exported services
Mixed payments	Where one payment covers several supplies, each supply's value is the part properly attributable to it (NTA s148(2))	A basket payment is several supplies: REALTIQ's and each partner's, each with its own VAT
Price without VAT shown	Value is the amount which, with VAT added, equals the consideration (NTA s148(1)(a))	A fee shown with no separate VAT is treated as VAT-inclusive; REALTIQ would absorb the VAT
Time of supply	Earliest of invoice, payment due or payment received; instalments are successive supplies (NTA s146)	VAT on a fee arises when that fee falls due
VAT invoice	Supplier's tax ID, name, address, registration number, sequential number, date, purchaser, gross amount, VAT and rate (NTA s152)	REALTIQ's fee invoices need every field; partners issue their own (RQS-06 §14.2)
Small business	Turnover ₦100m or less and fixed assets ₦250m or less is exempt from VAT registration, charging and returns, and may opt in; a business providing professional services is never a small business (NTAA s22(4)–(5); definitions)	REALTIQ's VAT status is a Console setting (08-TX-03). Professional partners must charge VAT whatever their size

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Point	What the Acts say	Effect on REALTIQ
Returns	Monthly VAT returns by the 21st of the following month (NTAA s22(1))	Finance needs a monthly VAT report
E-invoicing	Taxable persons must use the Electronic Fiscal System once deployed (NTA s157; NTAA s23, s104)	The invoicing layer must be able to connect to the fiscal system

13.4 Tax requirements

ID	Requirement	Acceptance criteria
08-TX-01	Every payment line records its supplier: REALTIQ, a partner or a seller. VAT is calculated per supplier, never on the payment as a whole.	A basket with a REALTIQ item and an inspection shows two suppliers and two VAT amounts
08-TX-02	Property prices, deposits, instalments and penalties under sale terms are classed as exempt and never carry VAT.	No property checkout line shows VAT
08-TX-03	REALTIQ's VAT status is a Console setting: not registered (small business) or registered at 7.5%. When registered, VAT is added to every REALTIQ fee.	Switching status changes new fee lines only
08-TX-04	Fees are shown VAT-exclusive with VAT as a separate line.	Every quote, checkout and invoice shows net, VAT and gross
08-TX-05	Partners and sellers who issue invoices record their tax ID and VAT status at onboarding. Professional partners (legal, valuation, engineering, survey) are always VAT-charging.	A Legal Partner cannot be set to "not VAT-charging"
08-TX-06	Each partner's VAT is added to its own line and settles to the partner with its share; the partner's own invoice shows it. REALTIQ never invoices or reports VAT for a partner's supply.	The partner's invoice, not REALTIQ's, carries the partner's VAT
08-TX-07	REALTIQ's platform rate is deducted from the partner's price (D-11), so REALTIQ's VAT invoice for it is addressed to the partner.	The platform-rate invoice is addressed to the partner
08-TX-08	REALTIQ's VAT invoice is issued when its fee falls due: transaction fees at each payment or release, deferred verification fees at completion, plans at each period start, campaign budgets at payment.	VAT dates on invoices match the fee due dates
08-TX-09	REALTIQ invoices carry every NTA s152 field, and the invoicing layer can send them to the Electronic Fiscal System when it is deployed.	A test invoice contains all required fields
08-TX-10	Finance produces a monthly VAT report of REALTIQ's output VAT, input VAT and net payable.	The report covers each calendar month and is ready before the 21st

Withholding tax on partner payouts and stamp duty references follow RQS-06 §15.1; withholding rates are set in regulations not supplied. Payment-partner charges are captured per payment from settlement data (08-RP-05).

14. DEPENDENCIES

These items sit outside the build and must be in place before the features that depend on them go live.

Dependency	Needed for	Owner
Moniepoint escrow agreement: segregated account, lien waiver, USD domiciliary terms, RTGS acceptance into escrow	Sections 7 and 13	Product owner with counsel
Monnify split settlement	08-EF-03, 08-EF-04, 08-RS-03, 08-RS-09	Technical

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

Dependency	Needed for	Owner
Paystack merchant set-up	Section 6; 08-PR-01, 08-PR-02	Technical
Zenith Bank USD domiciliary account for REALTIQ	USD plan and promotion payments through Paystack	Finance
Counsel: fee terms, deferred verification fees, the fault rule and the prepaid-budget exception	08-VF-06, Section 7.2, 08-PR-07	Legal & Verification
Tax adviser: REALTIQ's VAT status and voluntary registration	08-TX-03	Finance
Published report guidelines for partners	08-PF-04	Third-Party Network
Basket and service orders	08-VF-01, 08-PF-09	RQS-06 §4.1
Finance modules, document manager, Console configuration	Sections 6, 11, 12	RQS-06 §14, §15, §19
Counsel: retention periods for deletion requests (RQS-06 §8.3) and disclosure of any affiliation between REALTIQ and a media provider (RQS-07 §2)	RQS-06 §8.3; RQS-07 F42	Legal & Verification

15. HOW WE WILL KNOW THE WORK IS COMPLETE

- Every fee in Section 4 that is switched on is calculated by the engine from a versioned Console schedule, with no hard-coded amount.
- Every fee is shown to its payer before commitment and appears on an invoice, a receipt and the payer's Finance view.
- Every payment follows its stream's route: Paystack for Stream 3 only; Moniepoint with splits for the basket and property payments.
- REALTIQ's fee leaves the segregated escrow account only as a split at release; no REALTIQ-owned account ever receives buyer or seller funds; no stored balance exists other than single-campaign budgets.
- A lapsed plan never interrupts a transaction, escrow, instalment plan or paid access already in progress.
- No verification badge can be granted by payment alone.
- Waivers, refunds and schedule changes follow prepare-and-approve and appear in the audit log.
- The revenue dashboard reconciles to fee lines and payment-partner settlements, and every escrow, verification and inspection case carries logged staff time.

16. REVENUE PROTECTION AND ACCOUNTING CONTROLS

Nine controls protect the fees above from leakage, chargebacks and misuse, and keep revenue reporting consistent with the bank.

ID	Requirement	Acceptance criteria
08-RV-01	The REALTIQ transaction fee supports a cap on high-value transactions (08-PE-04), and the cap is shown on the terms sheet.	The cap is applied and shown in the terms sheet
08-RV-02	The Verified title certificate, "Owned" and "Sold" status labels, the escrow release certificate and transaction reviews are issued only for transactions completed on the platform.	A listing marked sold outside the platform shows none of these
08-RV-03	Completed-transaction trust components (RQS-06 §16.2) count only platform- completed transactions.	Trust scores ignore self-reported off- platform sales
08-RV-04	Listing terms prohibit completing a sale introduced through REALTIQ off the platform; suspected cases open a Trust & Safety case (RQS-06 §17.6).	The rule appears in listing terms; cases can be opened from the Console
08-RV-05	Partner and seller terms include recovery of their share of any chargeback or refund on money already split	Recovery is recorded against the party's account and later payouts

Confidential · © 2026 Savant Limited. All rights reserved. Not to be copied or disclosed without Savant's written consent.

ID	Requirement	Acceptance criteria
	to them.	
08-RV-06	Card-funded basket payments to partners and sellers can settle after a short delay set in the Console.	Delay length is configurable, including zero
08-RV-07	Owner profiles are checked against title-holder details at verification; active listings per owner profile are capped in the Console; profiles that look like agents go to Trust & Safety review.	At the cap, publishing another listing is blocked until one is sold or withdrawn; the owner can request a review or change to Agency
08-RV-08	Every seller and partner sets up a name-matched payout account (RQS-06 §3.4) and its split-settlement set-up with the payments partner at onboarding, before their first listing or job.	Publishing or accepting a job is blocked until payout set-up is complete
08-RV-09	Revenue is recognised when each fee is earned: transaction fees at each payment or release, deferred verification fees at completion, plans and subscriptions over their period, promotion packages over their run, campaign budgets as spent, basket items at delivery or acceptance.	Revenue reports show earned, deferred and unearned amounts separately

OWNERSHIP, CONFIDENTIALITY AND INTELLECTUAL PROPERTY NOTICE

Ownership

This document and its contents are the property of Savant Limited, a company registered in Nigeria under RC 8730838 (“Savant”). REALTIQ, including its name, product concept, specifications, requirements, designs, workflows, business rules, fee and revenue models, data models, diagrams and all related documentation, is owned by Savant.

Confidentiality

This document is confidential. It is provided in confidence to the recipient solely for the purpose of designing, building, testing, deploying and maintaining REALTIQ for Savant (the “Permitted Purpose”). It must not be copied, reproduced, disclosed, distributed, published or used, in whole or in part, for any other purpose without Savant’s prior written consent.

Non-disclosure

The recipient must keep this document and all information in it secret; limit access to its own personnel who need it for the Permitted Purpose and who are bound by confidentiality obligations no less protective than these; take reasonable care to prevent unauthorised access; and notify Savant promptly of any actual or suspected unauthorised disclosure. These obligations apply in addition to, and continue after the end of, any agreement between the recipient and Savant.

Intellectual property

All intellectual property rights in this document and in REALTIQ belong to Savant. Receiving this document grants no licence or right of any kind, except a limited, revocable right to use it for the Permitted Purpose. Unless Savant agrees otherwise in writing, all work product, code, designs and materials created for REALTIQ from this document are subject to the terms of the recipient’s agreement with Savant. The recipient must not use this document or any information in it to create, assist or advise on any competing product or service.

Return or destruction

On Savant’s request, or when the Permitted Purpose ends, the recipient must return or securely destroy this document and all copies, notes and extracts, and confirm this in writing.

Enforcement

Unauthorised use, copying or disclosure may cause Savant serious harm and may result in legal action, including claims for injunctive relief and damages.
